A letter to our customers:

This year I am going to focus on what we are best at: new and exciting products, backup technical knowledge, great prices & service.

We have a fantastic line up of new products for this year so, without further ado, I will tell you about them.

Firstly, we have some great new 3D-printers, which include dual filament and three filament ones with colour mixing capability. We have expanded our "Maker Hub" range to include new Arduino® controller boards and shields, wearable electronics, some brand-new Raspberry Pi® products, Retro arcade consoles, and some great learn-to-solder kits that leave you with a wearable flashing badge.

On the Power front, we have a really exciting new range of power inverters (both modified and pure sine) at prices that will knock your socks off. Especially the pure sine wave, see p271.

We have expanded our range of safe, rechargeable Lithium batteries and have brought down prices on the larger ones. There are also new multi-stage battery chargers, solar charge controllers and a great new range of QI wireless chargers that double as alarm clocks, lamps – even a 12V car fridge with a QI charger in the lid!

We have new smart Wi-Fi products, including colour changing light bulbs, power boards, and energy meters, etc.

Talking about car fridges, we have had such an astonishing response to our "Brass Monkey" fridges, we have expanded our range tremendously. Our price and warranty on these products has created an unprecedented demand for these. If you are in the market for a 12V powered refrigerator you would be mad not to look at them starting at p362 of this catalogue.

We also have (would you believe) 2 mini oil heaters for camping but also for people who get cold legs and feet in overly air conditioned offices. Oil heaters are very safe and we think that they will be a hit with the office crowds.

We also have some fantastic new Bluetooth® products. We have a great new range of Bluetooth® speakers, earphones and headphones. The reception quality and reliability of Bluetooth® has improved enormously. We also have a fantastic Bluetooth® transmitter/receiver that has a reliable line-of-sight range of 50 metres, that's unheard of for Bluetooth®.

We also have Bluetooth® controlled party lights, a fog machine and even PA speakers.

Back to Wi-Fi. We have a fantastic new Wi-Fi video door phone, new (non Wi-Fi) IP cameras and wireless battery cameras, other CCTV products and a low cost 4k UHD CCTV. We have a new 4G vehicle tracker, and even faster networking components up to AC3000 (3000Mbps.)

You get all of this with legendary Jaycar technical knowledge from our famous Jaycar staff.

Have I forgotten anything? Yes! We have a fantastic new plastic glue (it's really a plastic welding kit). It works like the UV-cured epoxy that the dentist now uses to make a filling in your tooth. Very strong!

All of this would be of no consequence if we were over the top with our prices, which we are not. We constantly monitor the internet to see how we compare. Even without the extra freight costs from internet suppliers we are very, very competitive! And remember, you don't have to wait to get goods from us. You can walk in to a Jaycar store on, say a Sunday afternoon and walk out with the product. Many internet sites only order the goods when they get an order from you.

Click and Collect. Our click & collect service has grown enormously since last year. This way you can simply order goods via our website and collect them from any convenient Jaycar store.

Finally, we continue to expand the Jaycar store network opening new stores in Enoggera, Hervey Bay, Bundaberg, Tamworth and opening shortly in New Plymouth. Some of these new stores have come about through acquiring established Jaycar resellers who have decided to retire. In keeping with our desire to provide unbroken service to our resellers customers we have moved quickly to open these new sites. We hope to continue to provide the level of service that customers have enjoyed from our resellers but with the stock backup that only the Jaycar Group can provide.

Once again may I take this opportunity to thank each and every one of you for shopping with us. Retail is not getting any easier and more than ever we respect your patronage.

We look forward to being of further service to you in the coming year & beyond.

Gary Johnston.

Think. Workshops.

Ever thought about building an Arduino Project from scratch but don't know where to start? Want to learn the basics and build up your confidence to try out your new skills at home? Would you like to have some fun learning a new skill with other first timers? Come and have a go at one of our hands-on member workshops.

Over 1,700 members have already joined us to participate in a workshop experience. From building a retro snake game to a wall dodging robot, you'll find a calendar of workshops taking place each month across the country on our website.

Check the website regularly to find out about the next member workshop being held at your local Jaycar store. Join our member Club and reserve your spot by booking online or enquiring at your local store.

CREALITY 3D PRINTER CR-X DUAL FILAMENT

Featuring a new print head design that channels two filament feeds through a single nozzle, the CR-X is the first dual extruder 3D printer from Creality. Two spool holders mounted atop the CR-X feed into two extruders, which are situated on both ends of the X-axis rail. From here, the two filaments pass through PTFE tubes into a single Y-splitter feeding into the CR-X's hot end, before extrusion through a single 0.4mm nozzle.

- 4-inch colour LCD touchscreen
- Over-sized bed screws for leveling the print bed
- Carboloy silicon printing platform
- 0.4mm nozzle aperture
- Dual cooling fans
- SD memory card slot
- Heavy duty power 24VDC supply

3D Revolution:

3D printing really isn't brand new technology now. We've sold 3D printers for a number of years, after all. Perhaps the biggest thing that has changed however, is the quality, and reliability of their output.

Jaycar's range of 3D printers, scanner & pen represent fantastic value for money with amazing features and reliability. Now you can find a suitable printer that fits your own unique prototyping requirements, as well as your budget.

SNAPMAKER 3-IN-1 PRINTER WITH 3D PRINTER/LASER ETCHING/CNC CARVING INTERCHANGING MODULES

The Snapmaker 3-in-1 3D Printer isn't just limited to 3D printing. The extruder nozzle can be swapped out with the included laser engraver or the CNC carver. With its integrated modular design and connectors, you can transform this printer with ease as well as expand it with future upgrades. Print 3D models as precise as 50 microns in a 4.9 x 4.9 x 4.9" build area using 1.75mm ABS and PLA filaments. Print from the USB Type-A port using .obj and .stl file types. The 3.5" touchscreen gives you added control of your printer. The all-metal design of this printer is durable and provides a solid frame. 3D Printing This printer has a 4.9 x 4.9 x 4.9" build area and has a 50-300 micron layer resolution. It uses 1.75mm ABS and PLA filaments. The print bed is heated. The printer supports .obj and .stl file types. Laser Engraving With a 4.9 x 4.9" work area, the laser is 200 mW with a wavelength of 405 nm and is Safety Class 3B. It works on wood, bamboo, leather, plastic, fabric, paper, non-transparent acrylic, and more. Please note that the laser cannot engrave on metal, glass, and other reflective surfaces. Upload supported file types, such as SVG, JPEG, and PNG, to the Snapmaker. CNC Carving With a 3.175mm shank diameter running at up to 19,000 rpm, the CNC carving module has a 3.5 x 3.5 x 2.0" work area. It can work with wood, acrylic, PCB, carbon fiber sheets, jade, and more. Please note that metal, glass, and gem are not supported. SVG, STEP, IGES, IGS, DWG, DXF, and more are the supported file types. You may need to use a third-party application, like Autodesk Fusion 360.

Product Highlights:

- 3D Print | Laser Engraving | CNC Carving
- 3D Print Build Area: 4.9 x 4.9 x 4.9"
- 50-300 Micron Layer Resolution
- Uses 1.75mm PLA & ABS Filaments
- 3.5" Touchscreen
- Heated Build Plate
- Modular Design

"It is a very capable machine providing exceptional quality results and a simple user experience."

ENCLOSURE FOR SNAPMAKER 3-IN-1 3D PRINTER

The Snapmaker Enclosure V1.1 is designed to fit the Snapmaker 3-in-1 3D printer. With an aluminum frame, this enclosure features a thickened corner bracket and an automatic induction switch on the door. The enclosure features light filtering, which helps protect you from potential harmful laser injuries when laser engraving. For further protection, laser engraving stops automatically when the door is opened. After you close the door to the enclosure, the laser engraving will resume, thanks to the switch connected to the spare port on the controller.

Dimensions: 358 x 358 x 358mm.

Note: enclosure only.

DOBOT TRIPLE FILAMENT 3D PRINTER MOOZ-3Z

The newly introduced modular colour-mixing 3D printer MOOZ-3 features a delta structure and high printing efficiency. Equipped with a three-colour print head, you can easily create mixed colour printing artworks through the controller, by setting different feeding speed and printing time of the three differently-colored raw filaments. Two schemes of colour-mixing in CMY colour mode are at your will to 3D print the desirable colour patterns. Quick assembly, easy-to-use controller and app, rich printing colour pattern make MOOZ suitable for beginners, DIYers, educators and artists. It's time to say goodbye to monotonous single-colour printing and welcome more beautiful and colourful 3D printing models.

3-IN 1-OUT MIX COLOUR PRINT HEAD THAT PRINTS AT FAST SPEED AND HIGH EFFICIENCY

Born for colour-mixing 3D printing, MOOZ-3 shows super high efficiency and incredible fidelity. By using merely one 0.6mm nozzle, it provides you with very smooth and lifelike results. The 3-in 1-out mix colour print head not only gives a rich mixture of colour combination of the printing objects, but also brings forth high efficiency and ultra-fast printing speeds. Different colours will blend together perfectly so that you create multi-colour objects without encountering any trouble.

FLASHFORGE ADVENTURER 3 3D PRINTER WITH CLOUD PRINT MANAGEMENT

The Adventurer 3 3D Printer is the new generation desktop 3D printer from Flashforge. It features a removable print bed, cloud print, detachable nozzle, and built-in camera, which is perfect as a teaching tool and great for domestic or commercial use. Detachable nozzle: remove nozzle just in one clip; stainless steel tube material, fast heating up to 200°C in 50 seconds. 3D Cloud, an integral 3D printing resource platform - Get free storage(register online), backup and share files, interact with other users, automatically slice print files, free model database.

- Lightweight and compact design
- Auto filament feeding with an enclosed built-in filament cartridge
- Removable and flexible heated print bed
- 45dB, ultra-quiet during operation
- Built-in 2 mp HD camera for remote monitoring
- Full-colour touch-screen with simple UI interface design

FLASHFORGE GUIDER II EXTRA LARGE 3D PRINTER

Guider II is a professional FFF (Fused Filament Fabrication) 3D printer. With an all-metal frame design and body side panels made of high-strength ABS material, the Guider II not only has a stable print performance, but also lightweight and durable. Perfect for the architectural and construction sector, science research, manufacturing industries and education.

FlashPrint, the mainstream slicing software used by FlashForge, has gained outstanding reviews by the media and professionals. The software further offers an expert mode, which allows dozens of parameters to be set by the user, for greater printing flexibility. With the external/internal compensation feature the dimensional errors are reduced to 0.02mm.

- Innovative Extruder System – completely encased air supply system to elevate printing smoothness
- Heatable Build Plate – supports multiple mainstream filament types for diverse printing needs
- Touch Screen – Guider II is equipped with a 5-inch full colour touch screen and multilingual user interface.

3D Printing Pen

3D PRINTING PEN

Create amazing 3D artwork with this 3D printing pen. It is comfortable to hold, and easy to operate. You simply press the feed button with your thumb to start the filament flowing. It supports both 1.75mm ABS and PLA filament, and automatically recognises when you insert new filament. A USB lead and mains power adaptor are included for power, and the pen automatically turns off after 2 minutes of inactivity if you forget to turn it off. 3 stencils, a drawing pad, and 3 x 10m rolls of coloured PLA filament are supplied to get you started straight away. Recommended for ages 14+.

- Uses PLA filament
- 3 template stencils included
- Ergonomic shape for comfortable operation

Filament Guide

Over these pages you can see that Jaycar sells an extensive range of 3D printer filaments from standard PLA to exotic filaments, including conductive, flexible and glow-in-the-dark. If you're wondering which filament to purchase, looking to fine-tune your printer, or just curious to find out what options are available have a look at the table below. Our in-house boffins have tested our filaments under all sorts of conditions to work out exactly what the best settings are for printing. We've listed recommended bed and nozzle temperatures, and other suggestions to get the best out of your filament.

	Type:	Extruder Temp	Bed Temp	Notes:
 TL4110, TL4112, TL4114, TL4116, TL4118, TL4120, TL4122, TL4138, TL4060, TL4062	PLA	180-220	20-55	PLA (Polylactic Acid) is one of the two most commonly used 3D printing filaments (with the other being ABS filament). It is the "default" recommended material for many 3D printers with good reason - PLA is useful in a broad range of printing applications, has the virtue of being both odourless and low-warp, and does not require a heated bed. PLA filament is also one of the eco-friendlier 3D printer materials available; it is made from renewable resources E.g. corn-starch, sugar cane. PLA plastic is often used in food containers, such as candy wrappers, and biodegradable medical implants, such as sutures. PLA filament for 3D Printing is available in a wide range of colours in both 1.75mm and 3mm.
 TL4070, TL4072	ABS	220-235	80-110	ABS (Acrylonitrile Butadiene Styrene) is another commonly used 3D printer material. Best used for making durable parts that need to withstand higher temperatures. In comparison to PLA filament, ABS plastic is less "brittle" and more "ductile." It can also be post-processed with acetone to provide a glossy finish. When 3D printing with ABS filament, a heated printing surface is recommended, as ABS plastic will contract when cooled leading to warped parts. ABS filament is available in both 1.75mm and 3mm.
 TL4152, TL4154, TL4155, TL4156	PET	210-230	35-60	PET (Polyethylene Terephthalate) is a versatile and lightweight filament used in 3D printing. This material is predominately used to produce plastic bottles and other food packaging as it can be 100% recycled. It is stronger and more flexible than ABS and PLA filaments. This filament has a higher print success rate in comparison to PLA. It has a high level of optical transparency (90%) and resolution. PET is easy to handle and is ideal for anything functional that needs to be robust with a degree of flexibility.
 TL4134	Glow in the Dark	180-240	20-80	Glow-in-the-dark filament is a great product to decorate children's bedrooms, from glowing light switches to a starry sky on the ceiling. Your prints will shine brightest immediately after turning out the lights, but dim quickly to a soft glow in the night. Use your normal print settings for PLA, but add more perimeters to your prints. The more perimeters, the more glow. Glow-in-the-dark filament is available in PLA filament 1.75mm.
 TL4136	Flexible	210-225	20-55	TPE filament is a flexible 3D printing material that feels and acts much like flexible rubber. TPE filament can be used to make parts that can bend or must flex to fit their environment: stoppers, belts, springs, phone cases, and more. Due to its flexibility, much slower print speeds must be used to keep the filament from binding in the extruder- we print at 20% speed.
 TL4124	Wood	175-250	30-50	This is a wood-like 3D printer materials that give 3D printed objects the look and feel of fibreboard. They imbue parts with other wood-like attributes, such as the ability be cut, painted, and sanded. These filaments use PLA as their base, and mix other materials (usually in powder form) into them. The PLA gives the 3D printer compatibility and ease of use while the material contributes to the look, feel, and properties of the filament. With these organic fills, be cautious of too high of a temperature, as it will result in the wood burning which will give you a darker coloured print. It is important to remove the filament from the extruder fairly soon after finishing a print, as the filament will begin to burn in the nozzle and start to clog it.
 TL4142	Conductive	215-230	20-50	Conductive Filament is a modified PLA, designed for low voltage and low current circuitry. Conductive PLA filament is available in 1.75mm. Note: Due to the additive in this filament, it is very brittle and should be handled with care.
 TL4126, TL4128, TL4130, TL4132	Metallic	195-220	20-50	These metals infused PLA filaments are tougher to print than Standard PLA filament, but because of the metal blended with the plastic, prints are heavier and thus, feel more authentic. Finished 3D prints can be sanded and polished to create beautiful and unique pieces. Unpolished, the filament looks like cast metal fresh from a mould, with a dull, matte, gritty appearance. With just a little finishing and polishing, however, you can easily create any look like you desire. 3D Printing with these metals is perfect for printing jewellery, props, costumes, figurines, and robots. These filaments are great not only for hobbyists looking to make faux metal prints, but serious designers as well.

3D Printer Exotic Filament:

Our range of exotic filaments are sure to appeal to anyone interested in 3D printing. There's filament that makes your creation look like it's made from wood, glow-in-the-dark, flexible and colour changing filament when heat is applied, and more. Imagine the possibilities with the conductive filament! All of our exotic filaments are 1.75mm, supplied in 250g rolls, and are all suitable for our current and superseded 3D printers.

- 250g Roll

Note: Exotic filament not suitable for our 3D pen.

CONDUCTIVE 3D PRINTER FILAMENT

Bring your 3D printed projects to life with this electrically conductive PLA filament! Bulk resistivity is 0.6g.cm - note that this is not the same as "grams per centimetre", but refers to the resistance of a 1cm cube across opposite sides with full contact. The filament itself measures about 4k ohms per metre, so it is mostly suitable for signal level voltages, but it is conceivable that you could illuminate some LEDs for example. The conductive properties come from graphene embedded in PLA which is a biodegradable.

Note: Due to the additive in this filament it is very brittle and should be handled with care.

WOOD FINISH 3D PRINTER FILAMENT

Perfect for recreating antique furniture and recreating small wooden features. Prints with a smooth finish that is ideal for painting, or even finishing with a wood-burning tool. The colour also suits models of animals and natural creatures.

- Contains wood, so models smell like wood
- Can be printed at different temperatures to give different colours

COPPER FINISH 3D PRINTER FILAMENT - TL4126

Did you know that the Statue of Liberty is made of copper? Now you can recreate any similar structure (miniaturised version of course) with this filament. Combine with Brass Finish Filament (TL4130) for creating steampunk works, or brush with some green paint to give a classic corroded copper patina.

DIY 3D PRINTING BOOK

This book compiled on 3D printing with Autodesk 123D, Tinkercad, and MakerBot reveals how to turn your innovative ideas into physical products that you can use or sell! This book will guide you to how to operate powerful, free software from Autodesk and bring your creations to life with the MakerBot - a leading consumer printer - or an online service bureau. The included practical lessons take you through the Design, Catch, Meshmixer, Tinkercad, Make, and CNC Utility apps, and the MakerBot Desktop. Fun projects, easy-to-follow instructions, & clear screenshots progress from installing the software to printing the design. Videos & digital files accompany this hands-on guide.

- Make your own creations with Design and Tinkercad
- Download editable, premade content
- Generate construction documents with the Layout feature
- Create and edit a reality capture model with Catch
- Edit and mash up .stl files with Meshmixer
- Navigate the MakerBot Desktop
- Print the model on your own machine or with a service bureau

tech talk Filament Types

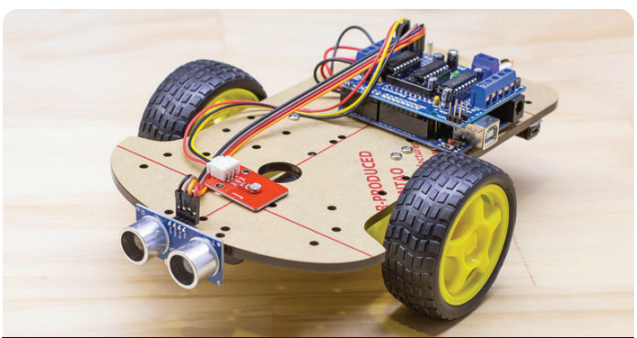

DESCRIPTION SUMMARY OF FILAMENT TYPES

PLA (Polylactic Acid)
Commonly used filament. Odourless, low warp. Does not need heated bed. Environmentally friendly. Made from corn starch.

ABS (Acrylonitrile Butadiene Styrene)
Very durable. Will withstand high temperatures. Needs heated bed. Can be finished (after printing) with Acetone to produce glossy finish.

PET (Polyethylene Terephthalate)
A plastic commonly used in plastic bottles. Stronger and more flexible than ABS. High degree of successful printing outcomes.

Other filament types
These are usually combinations of the base plastics above loaded with fillers to give the filament individual properties, e.g. "wood" appearance, metallic, etc.

10W SOLDERING STATION - 240VAC

Exceptionally delicate, temperature controlled soldering iron. With low pencil weight will help reduce fatigue on your hands when working for prolonged periods. Compact so you can almost keep it in your toolkit, and still have the precision you need on-site. The delicate pencil has enough power to work with fine components and circuits and good for very thin hookup style cable. Suitable for lead-based and lead-free solder thanks to the 100-450°C temperature range. Temperature is selected with the rotary dial, and the base unit includes an integrated stand.

300W HOT AIR REWORK STATION WITH LED DISPLAY - 240VAC *

SMD rework is a challenging task, but this rework station helps you get it done. With 300W of power and a selection of tip sizes, it allows you the precision and flexibility required to get it done. By using hot air rather than a soldering iron, you provide a more uniform heat transfer and can melt all solder pads at once, providing a method to remove the chip safely and effectively. You can then clean up the PCB, and use soldering paste (not included) to solder your new chip in place. Temperature selection is done via the digital display and push buttons, while air flow is controlled via the rotary dial. The base unit features an integrated dock for the blower to keep it from burning anything, which also puts it into automatic sleep mode. Lift the blower and it will quickly come back to temperature.

- Automatic sleep function
- LED display
- Variable air flow
- Suitable for SOIC, CHIP, QFP, PLCC, BGA & more

65W ESD SAFE ANTI-STATIC SOLDERING STATION WITH LED DISPLAY - 240VAC *

goot MADE IN 2 YEAR WARRANTY

Precision, Japanese manufactured instrument with excellent temperature stability and anti-static characteristics.

SOLDERING PENCIL: Lightweight pencil features a grounded tip, ceramic heater, integrated temperature sensor and very supple silicone rubber grip. The temperature sensor provides precise tip-temperature information to the heater controller, which maintains the selected heat setting with a high degree of accuracy. The tip fits snugly over the heater element providing fast heat transfer and tip temperature recovery during heavy soldering.

- 0.5mm tip supplied

CONTROL UNIT: Includes a digital temperature display unit, rotary temperature control, calibration control and display changeover switch to display either the desired or actual tip temperature. The darkened see-through cover prevents accidental temperature change but allows for easy access when required.

- Control dimensions, weight:

THERMALTRONICS CURIE HEAT TECHNOLOGY SOLDERING STATION - 240VAC. 55W RATED

It uses a proven technology, Curie point temp sensing with a new twist. The tip is heated by RF induction to bring the tip up to operating temp. The soldering iron tip is the heater. Older Curie point soldering irons like the famous Weller W-TCP used a separate Curie-switch, heater and tip. There are thermocouples, varistors or other temp sensors that only complicate things on inferior irons. The thermal inertia with the Thermaltronics product is far lower. The system consists of the base power unit which connects to mains 240V. The soldering pencil accepts a cartridge tip (which is also the heating element) and a burn-proof silicon rubber cord. The third element in the system is the pencil iron stand. This stand features a 'dry'-type tip cleaner which is made from machine curled brass and also a standard sulphide free tip sponge.

- Tips can be hot swapped
- Constant tip temperature
- Low power idle
- Under 10 second heat-up
- Rapid recovery from soldering load
- No overshoot
- No calibration needed
- ESD rated
- Can work leaded and unleaded solder

CONCLUSION

This is a very exciting development in soldering technology. We are sure that you will be delighted with this product.

Note: Not stocked at all stores but can be ordered.

† All tips are 350-398°C .

ESD SAFE SOLDER/DESOLDER REWORK STATION *

Complete solder/desolder station for professional and hobbyist use. Designed for soldering and desoldering all types of surface mounted IC, PCB, or components, and features an innovative heater and sensor that provides a quick heat-up and rapid temperature recovery. The unit will immediately enter into Working Mode when you pick up the handle, and return to Standby Mode when you put the handle back into the holder. The control unit has two LED displays with controls to the set temperature and the actual tip or nozzle temperature in Celsius and Fahrenheit. The temperature is easily adjusted in 1° increments with simple up/down buttons and the soldering/rework functions can be operated independently of each other. ESD safe. The heat gun can be calibrated from 3L/min to 24L/min and is supplied with 3 extra heat-gun attachments for different size components and jobs. Spare soldering iron tips are available separately.

15W GOOT SOLDERING PENCIL - 240V

This high quality soldering iron is made in Japan by Goot. This soldering iron offers exceptional heat recovery. The ceramic heater is automatically controlled by the heating load of the tip. With its high insulation and low current leakage, soldering of precision flat ICs and CMOS is safe. The heater on/off control uses a zero-volt switch circuit which reduces electrical noise.

- Tip temperature is set at 320°C
- The power lead is made from silicone rubber - very flexible
- The handle incorporates a ribbed rubber piece for extra grip
- Electricity Safety Approval Number SAITE20185

Rechargeable Soldering Iron

RECHARGEABLE LITHIUM-ION SOLDERING IRON SET WITH CASE

Everything you need to solder without the need for mains power or butane gas. Power is provided by an internal Li-ion battery for up to 50 minutes of soldering from a full charge. A quick 5 minute charge can provide 90 seconds of use if the battery isn't charged when you go to use it. An integrated LED provides light to what you are soldering, and safety features include overcharge, over discharge, and short circuit protection. The kit comes complete in a handy carry case with one 12W soldering tip (500°C), one 30W soldering tip (600°C), hot knife, sponge, and solder. To charge, simply plug it into an available USB power source. ESD safe.

5V USB Soldering Iron

USB POWERED 8W SOLDERING IRON

This handy little soldering iron will work anywhere you have USB power, which let's face it, is basically everywhere these days. Even if it's from a laptop or power bank, USB power is almost easier to come by than mains power when away from the home or office, or in the workshop or shed. Unlike a conventional mains iron which heats up persistently, this one has a touch-switch to activate, and it rapidly heats to 380-400°C in just 15 seconds, and you're ready to solder. The heating element is rated at 8W, so it's useful for fine electronics and small jobs not sinking a lot of heat (such as thick cables, better left for appropriate soldering irons). The heating element is integrated into the soldering tip, so heating and cooling is very rapid. Includes a long life tip, protective cap, and USB power cable.

Note - at 8W, your USB port will need to be rated with at least 2A, which most newer charging ports are equipped to supply. Older USB ports may struggle to power this device.

- Heats up in under 15 seconds
- Cools down in under 30 seconds
- Long-life tip with protective cap
- 2 in 1 heating element and soldering tip
- Automatic shutoff

Gas Soldering Irons CONTINUED

PORTASOL® TECHNIC GAS SOLDERING IRON

The Portasol® Technic combines compact power, and convenient reliability, making it one of the most versatile gas soldering irons available. It offers a run time of around 60 minutes, and tip temperature is adjustable up to 450°C . With equivalent electrical power of between 10 and 60 Watts, it is ready to tackle just about anything. The protective end cap features a built in flint type igniter, and if the gas is left on, it will turn it off when replaced. If a compact, versatile and reliable gas iron is what you're after, then the Portasol® Technic is for you.

PORTASOL® PRO PIEZO GAS SOLDERING IRON

The Portasol® Pro Piezo is a powerful gas soldering iron featuring an adjustable temperature control allowing soldering tip temperatures up to 580°C . With equivalent electrical power of between 15 and 75 Watts, there is little that's not possible with this beauty. It incorporates a viewing window at the end of the gas tank, to keep an eye on the fuel level. The fuel tank fills in around 20 seconds, and will provide approximately 45 minutes of run time. Ignition is via the built in Piezo crystal mechanism, and the end cap provides safety gas shut off when replaced. The Portasol® Pro Piezo is a dream to use, and will not let you down.

PORTASOL® SUPER PRO GAS SOLDERING IRON

The Portasol® Super Pro is the big brother of all irons in the range. It features adjustable tip temperature up to 580°C , with equivalent electrical power of between 25 and 125W! 125W may seem somewhat excessive to some. You don't need a V8 to drive around town, but it's nice to know that the power is there when it's needed isn't it? Ignition is achieved with the internal Piezo crystal mechanism, and run time is around 2 hours on a 30 second refill. The stainless steel finished gas tank features a viewing window to keep an eye on fuel level, & the protective end cap also acts as a safety cut off for the gas valve control when replaced. With the various tips available & huge power at hand, no job is a match for the Portasol® Super Pro.

portasol®

A leading brand recognized worldwide. Portasol® products are designed and manufactured in Ireland, to the highest quality standards. Since commencing operation in 1983, they have forged their way into the market with some of the most rugged & reliable gas powered soldering & heating tools in the world. They utilize catalytic combustion (flame tips excluded), which converts the gas flame into infrared radiation. It is a safe, flameless way of heating the tips evenly and continuously. They all use standard butane gas, and have a variety of tips available to support a wide range of applications.

Cheap & Nasty BUT EFFECTIVE FLUX

Before solder wire had a core of flux in it you had to use a paste, or a liquid flux. The liquid was Zinc Chloride. It was made by getting some hydrochloric Acid (Muriatic Acid) and dropping zinc into it. The most common source of zinc was bits of galvanised iron. When you dropped the zinc into the acid bubbles would come off. When the bubbles stopped, the zinc had replaced the Hydrogen in the acid. The Hydrochloric acid was then called "killed spirits." The killed spirits was a great flux to solder together, say, brass or copper – or even galvanised iron. Of course this was potentially dangerous but that was what you did in the good old days!
PS. don't forget to wear safety goggles if you attempt this.

Silver Solder

"SILVER" SOLDER

Far, far stronger than tin/lead solder. The product is basically pure tin with around 4% silver. It contains no lead or cadmium. It melts at 221°C so could be actually soldered with a very hot soldering iron but best results are with a butane type blowtorch. Includes an adequate amount of liquid flux which is basically zinc chloride, water, ammonia and other chlorides. The flux is an eye irritant so safety goggles should be worn.

PTFE DRY LUBRICANT SPRAY

MADE IN

This water displacing PTFE lubricant is formulated to provide a dry, lubricating film that is perfect for use with electronic & mechanical assemblies, chains & sprockets, rollers, runners, & power tools etc. It prevents rusting on ferrous metals and helps loosen stiff or sticking parts. The spray can be used in automotive, marine and household environments.

SPRAY-ON CONTACT ADHESIVE

MADE IN

This pressure-sensitive contact adhesive is in an aerosol can, and bonds to paper, fabric, leather, rubber, foam, vinyl, concrete, metal, in fact almost any surface! No more spills and dribbles from a tube, or sticky screwdrivers (and plastic applicators) from applying glue to a surface. Great for laying innerbond and speaker carpet in/on speaker cabinets etc.

	Cat.	Qty 1+	Qty 4+	Qty 10+
400g	NA1504	$21.90	$19.70	$17.30

ELECTRONIC CIRCUIT BOARD CLEANER

MADE IN

Non CFC ozone safe propellant. It may not be obvious, but many circuit problems occur when flux and other contaminents (even finger prints) remain on the PCB causing 'leakage' between tracks. If you work with RF, high impedance (i.e. FET Op-Amps etc), ioniser or other circuits, PCB cleanliness is a MUST. This is a spray that dissolves flux residues & grime leaving the track work and board absolutely clean. We then recommend that you 'tropicalise' the board with circuit board lacquer (NA1002).

NA1024

This product is similar to popular water displacement products EXCEPT that it does not contain silicone or kerosene based solvents etc. Indeed, it is so benign it can be used around food. It is also ideal for seized nuts or screws, freeing up hinges, door locks, as a cutting or tapping & other machining agent. As the product is nonconductive, it is ideal for removing moisture from car distributors, switches, potentiometers, solenoids etc. It does not dry or wash out in water. You will be delighted with this product. Two sizes are available:

tech talk God-Like Spray Can Behaviour

Many people will not go anywhere without a can of WD40. It is a great product and you will find it on this page. It is not the only God-in-a-can product that we stock, however. We also carry a similar product to WD40 called WD Lube (also on this page). (WD means water displacement). WD-40 is a light hydrocarbon oil with penetration properties useful for moving seized parts. It also works as a rust preventer by leaving a thin layer of oil on steel. WD-40 earned its reputation as a moisture displacer in the days when cars would not start due to condensation under the distributer cap. A further refinement is a product called INOX MX3. It does not contain petroleum or silicone based products and is indeed non-poisonous (the other products are not strictly poisonous, just obnoxious to taste) so much so that you can spray INOX near food. All God-in-a-can products have come a long way from their original automotive use. They have great anti-corrosion and lubrication properties, for example. They continue to find applications all over the place, but with modern ignition systems you can probably safely leave home without a can.

BONDIC LIQUID PLASTIC WELDING KIT WITH CASE AND UV-LED LIGHT FOR HARDENING

How many times has glue let us down? Fingers stuck together, broken toys that we just can't fix, having to throw out our stuff because gluing it only made it worse. Not to mention just when we need glue most we discover our 3-month-old bottle is as dry as the Sahara Desert on a hot day. Bondic® is the only product that works where glue fails. It's liquid plastic that only hardens when you need it to. YES it stays liquid and won't dry out like those crazy glues on the market today. Bondic® is a very simple 4-step process (clean, fill, cure and shape) to fix almost anything, saving countless precious items from ending up in the trash before their time. This incredible adhesive is a 100% water proof and heat resistant tool. A solvent free formula stays liquid until cured with the included UV LED Light. The Bondic® solution dries clear and creates a permanent bond. Bond, build, fix and fill virtually anything in seconds. Bondic® works on: plastic, wood, metal, PVC, steel, rubber, wiring, ceramic, figurines, vinyl, Kevlar, polypropylene, leather and so much more.

When Stainless Steel Is Not The Best!

We are big fans of stainless steel. We love it in tools, fasteners & many building products. It is not, however, always the best material. Top chefs will tell you, for example that the best knives are not stainless, they are made out of carbon steel.

Why? Carbon steel is far harder & tougher than stainless. The problem of course is that carbon steel will rust if not maintained. In our search for the best hand-tools we have decided to stock two very high quality Japanese-made products made out of carbon - steel. They are not cheap but they are for the professional user whose time is money. Like carbon steel knives, rust is not a problem if used constantly.

They will, however, pay you back every day because they will stand up to heavy wear & tear.

For those who have only occasional use for hand tools, we sincerely recommend stainless steel products.

To avoid confusion we have put a small logo "SS" nominating which tool is made out of stainless, and "CS" meaning carbon steel.

Pliers & Cutters

160MM (6") SIDE CUTTERS - INSULATED

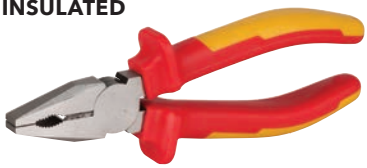

This drop forged alloy tool is made to the same standards as our TH1984 combination pliers. It is just as tough and will also cut piano wire up to 1.6mm. This is a quality tool and designed for dedicated wire cutting.
It has comfortable double inset handles.

- 160mm / 6" long

Cat.	Qty 1+	Qty 3+	Qty 6+
TH1985	$29.90	$26.90	$23.90

180MM (7") BULL NOSE PLIERS - INSULATED

Strong, Tough & Reliable. These high quality drop forged alloy steel pliers are a professional tool and manufactured to the rigid German DIN standards for electrical safety & mechanical strength. They are for serious tradesmen who need a quality tool. These pliers will cut hard (piano wire) wire up to 1.6mm & soft (annealed copper, aluminium silver etc,) up to 4.0mm. Non slip double inset handles are comfortable to hold.

Specialty Pliers

175MM - SCREW REMOVING PLIERS

This tool is basically designed to remove, by brute force, a hopelessly stripped out head of any type of small non-countersunk screw. The secret is an oval-shaped serrated hole in the end of the plier. You place the plier over the head of the screw, grip and rotate the plier. This system applies a lot more torque to the head of the screw than a drill bit ever could.
It's reminiscent of the plier that a dentist used to extract your tooth!! Its Japanese manufacturer has provided a beautifully made and finished product. Suitable for any screw in the range of 2.0 to 5.0mm or so, although it will work on larger screws to lesser effect

- 175mm long
- Soft grip handle

UNIVERSAL DRILL PRESS STAND

Convert your standard power drill or rotary tool into a drill press with this adjustable stand. Substantially cheaper than purchasing a full drill press, the stand still has all the necessary features expected in a full size press. It includes separate adjustments for limiting press depth and drill height so you can change drill position with minimal risk of over-drilling into the stand. The drill collar can be adjusted to suit a variety of tools. Heavy duty cast metal base and frame provides excellent stability.

- Allen key supplied for tightening drill collar
- Drilling depth: Up to 60mm
- Maximum collar diameter: 43mm

SHEET METAL BENDER - PAN BRAKE STYLE (VICE BREAK)

This unit sits in the jaws of your bench vice (100mm+ recommended). It retains itself in the vice with strong recessed magnets. One half consists of the familiar blade that bends the sheet metal. The other half in the 90 degree recess that the blade pushes into. By carefully positioning the sheet, you can perform a perfect 90 degree bend as good as a workshop! The blade is segmented, just like a workshop pan brake, so that you can make partial bends. With a little practice, you will be able to fabricate brackets, small boxes & other metal assemblies like a pro. Warning: This unit is not particularly cheap. It is, however, very well made. It is cast steel with tool steel pressing components. You need it to be sturdy, otherwise it would break or flex. It will, literally, last a lifetime. Will fold sheet up to 125 wide, however there are 3 x press segments 2 x 50mm, 1x25mm and these are independently removable by Allen head set screws. Depending on the width of the material you could easily bend steel strips up to 4mm thick and 25mm wide. Aluminium should not be a problem up to 4mm thick & 100mm wide, depending on your vice.

Fish Tape

WIRE DRAW FISH TAPE

A fish tape is a tool that's used to draw wire and cable through wall cavities or conduit. Instead of a clumsy method of using, say. a length of fencing wire and hours of frustration, this handy tool uses 15m of flat, rigid spring steel with a built-in cable eye on the end to making running cables easy. You can easily direct the rigid wire exactly where you need to, and when not in use the tape rolls back up into its own case for easy storage. No electrician, data cable, antenna, home theatre or security installer should be without one.

Electrical safety warning:
Conduits, wall, floor and roof cavities contain live electrical wiring. DO NOT use this device anywhere around live electrical wiring. Ensure all electrical power is turned off and disconnected from the mains before use.

- Made with Flexible High-Strength Steel in Durable Plastic
- Rust and Corrosion Resistant

tech talk Allen Keys for Cordless Drill Use

Allen keys are very common these days and small sets like the one above are really quite inexpensive. The boss here has a set where he has cut off the short return piece of the Allen key with an angle grinder. The Hex bit then fits conveniently into the chuck of the cordless drill. The low speed setting on a typical "cordless" is generally more than enough torque for most jobs. It's a great way to assemble flat-pack furniture & saves wear & tear on your fingers.

Watch Repair Tools:

Jaycar has been fiddling with micro tools for years now, from tiny jewellers screwdrivers to small spanner sets to tiny table mounted vices etc. We have discovered a source of reasonably priced watchmakers' tools (real; pull-watches-apart-tools.) Here they are, folks. We expect them to be popular; they are Jaycar kind of products.

2 PIECE WATCH CASE OPENER SET

This set consists of an adjustable opener that engages the little recesses on the back of a watch. You can adjust the removing lugs very accurately to get a tight fit - absolutely essential. The other half of the set looks like a small oyster shucking knife (Appropriate when you think about it!). It is just fine enough to get into that tiny groove that some of the older watch covers have.

- Can open cases 6 - 50mm diameter

12 DRAWER MODULAR STORAGE CABINET

Get your work area in order and looking amazing with this modular parts storage system. The cabinet measures 295 x 200 x 160 overall, and features twelve slide-out draws to keep your components organised. Add more cabinets on top or side-by-side by simply sliding them into the locking guides on the side or base.

PORTABLE STORAGE BOX WITH 3 DRAWERS

A fantastic way to store and carry your electronic components, parts, hardware, crafting accessories, etc. The durable case measures 400 x 290 x 200 overall, and features three generous sized slide out draws with removeable dividers. Thanks to a handy safety lock, your parts won't spill all over the floor if you accidentally knock the case over. Simply squeeze the handle to open. Two removeable bit cases on top of the case provides a convenient way to carry just the parts you need to do a job.

- Dimensions: 400(W) x 290(H) x 200(D)mm

4 TRAY TOOL/STORAGE CASE

On-site storage of parts, tools, fishing tackle or anything else you need to tote around. Each compartment has a 233 x 122 x 32mm 13 compartment storage box for small items with dividers that can be removed to accommodate larger things. All the hinges and catches are the durable pintle type, not a flimsy bit of folded plastic that will snap after a week. The top tray has a generous 265 x 160 x 65 space for ancillary items and it's finished in a tasteful shade of industrial yellow and black.

- Dimensions: 270(W) x 260(H) x 150(D)mm

Tool Cases & Boxes

FOAM INSERT ALUMINIUM ATTACHÉ CASES

Ideal for Camera, Video and Test Equipment, these cases feature removable 15mm square foam pieces so you can make a hole to the exact size of your valuable equipment. The lid also has a foam insert for complete protection. Cases are lockable and supplied with two keys. Great for wine and glasses also.

Digital Multimeters:

A multimeter digital or analogue, but mainly digital these days, is without a doubt your most trusted and widely used piece of test equipment. Indeed, it may only be your ONLY piece of test gear and certainly should be your first investment in test gear. I can still remember getting one for my 14th birthday. I treasured it and it taught me so much.

Most of our range of multimeters carry a LIFETIME GUARANTEE. Not even many of the ridiculously expensive Euro or US made products have a lifetime guarantee, so why pay 2-3 times as much for the similar-performing meter when you don't have to?
We sell more multimeters in Australia and New Zealand than anyone else. The reason for this, of course, is:

- We are trusted
- We stand by our products 7 days a week
- We deliver the best quality for the price
- We have a great range
- And we are going to reveal to you our BIG SECRET

What's the secret? It is this. We don't carry spare parts for our meters! Why?

They are so reliable, they hardly ever break. (We would have to eventually throw out the spare parts because they wouldn't be used!) If, in the unlikely event you had a faulty meter, we would simply give you a new one. (We hardly ever do that, because almost NO ONE comes back!)
If only selling cars was that simple!
Best wishes
Gary Johnston

Which One Is Right For Me?

Have a look at our quick selection guide below! We've colour graded for an easier product selection that fits your needs.
If you are a hobbyist and just starting out then look at any product labeled Green, these are budget friendly not overly complicated to use products, or someone who has used a multimeter before and is also looking for some high readings then the Blue mid range ones are for you. Do you use your multimeter every day for your job then the orange Professional colour range is for you, these meters have all the bells and whistles and the highest ratings out of any of the multimeters we carry.

IP67 TRUE RMS AUTORANGING CAT IV DMM

This is an excellent true RMS multimeter that features a large, easily read display and carries an IP67 environmental rating. This means the multimeter is waterproof and will not be damaged if accidentally dropped into water or left out in the rain. The meter has data hold and relative measurement capabilities and is housed in a robust, double moulded case. Includes leads, soft carry case and user manual. Double moulded case.

Analogue Multimeter

ANALOGUE MULTIMETER

Digital multimeters have almost completely taken over, but there are those who prefer to use the old analogue meter - it's perhaps still the best way to test a capacitor. This well-made meter has audible continuity and a transistor leakage test, in addition to the normal set of functions. Have a closer look at this meter. It's a beauty.

MULTIFUNCTION ENVIRONMENT METER WITH DMM

A multi-function environment meter that combines the functions of a sound level meter, light meter, humidity meter and temperature meter. Typical sound applications include checking acoustics of recording studios, auditoriums and professional hi-fi installations. The light and humidity meters are ideal for video photographers, greenhouse and hydroponic setups, etc. Others who should find this meter essential include interior designers, factory and office managers, record and archive keepers, schools, hospitals, laboratories and, of course, universities.

DMM WITH NETWORK CABLE TESTER

This innovative device is ideal for network installers or technicians & will allow the user to easily check cable integrity or measure AC & DC voltage, current, resistance, & continuity etc. without needing to carry two separate devices. The unit will check for cable continuity, opencircuits, short-circuits, & cross-connects etc. A remote terminator is included and enables the user to check network cables at a wall jack or patch panel. Supplied with loop back cable, LAN terminator & multimeter leads.

USB Oscilloscope

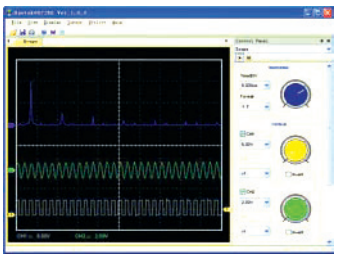

20MHZ USB OSCILLOSCOPE

This unit does away with more of the hardware and provides a highly accurate interface to allow software to provide the display. It still provides 20MHz bandwidth and high accuracy and physical probe couplings, but takes up a fraction of the bench-space. Use the included software to provide just about all standard oscilloscope functions, and even output waveforms to excel/word files. Convenient function in a small form factor, ideal for the traveling or compact workbench.

- USB interface plug & play
- Automatic setup
- Waveforms can be exported as Excel/Word files
- Spectrum analyser (FFT)
- Cursor measurements

PROBE K TYPE THERMOCOUPLE

This plug in thermocouple probe allows you to measure external temperature readings on DMMs. It will measure from below minus 50°C to above 250°C depending on the DMM it is used with. Suitable for gas and liquid, both with good accuracy of 0.75%.

Oscilloscopes Probes

OSCILLOSCOPE PROBE - 10 :1 / 1:1

Passive high impedance oscilloscope probe designed and calibrated for use with instruments having an input impedance of 1MΩ shunted by 20pF. It may be compensated for use with instruments having an input capacitance of 15 to 35pF. The probe incorporates a three-position slide switch in the head, which selects attenuation of x1, x10 or a ground reference position. This probe suits all of the oscilloscopes in our range. Supplied with sprung hook, channel identifier clip, ground lead, insulating tip, IC tip and adjusting tool.

Bench Voltmeter

ANALOGUE BENCH VOLTMETER 0-15V

A handy bench volt meter with analogue dial and banana plug connections. Reminiscent of the volt meters you might see in a school physics lab, this volt meter gives a quick and easy to read display of volts, and is ideal as a permanent fixture on a test bench, with a 15V maximum reading be suitable for automotive part testing.

- Choose either 3V and 15V scales via separate banana plugs
- 3V scale reads -1V to 3V
- 15V scale reads -5V to 15V
- Zero offset adjust
- Analogue movement

HOW TO TEST ALMOST EVERYTHING ELECTRONIC

Electronics is a unique science - everything that's going on has to be deduced from visible symptoms and effects with very little that is actually physically observable. The book covers everything from setting up a test and work area to using the most important types of test equipment - multimeters, oscilloscopes, signal generators, signal tracers, capacitance meters and frequency counters. It also covers testing and measurement methods, fault finding without circuit diagrams, component testing and some highly specialised measurement in applications such as audio and TV. A comprehensive volume that should be on every technical bookshelf.

Test & Jumper Leads

PARROT™ CLIP LEADS

The Parrot™ Clip is the only test probe that provides both clip-on hands free contact as with an EZ-hook and normal point contact like a test probe. These feature a sprung hook, which is soldered directly to the lead and housed inside a round metal tube. The grip is performed between the 2 metal parts, which can be used as pincers if required. Probes are supplied with 1m leads terminated to banana plugs and are fully insulated to 1000V.

PROFESSIONAL CAT IV MULTIMETER PROBES

Professional multimeter test probes have always been an expensive choice so what we've done is work closely with a manufacturer to get great quality probes at a genuinely affordable price! To start with, we've made them extra long; they're 1200mm long so you don't drag your meter across your workbench as you move around a circuit and makes them perfect for bench top meters. They're Cat IV rated for safety, feature finger guards and can handle 20A of current. The best part is the actual probes themselves. To start with, the probes are suitable for inserting into a standard 4mm banana socket using the same spring hold system. Also included are probe covers which not only stop the sharp points being dangerous, they allow only just the tip to be exposed for delicate work where you can be in danger of making a short between two connections which are close together.

- Extra long 1200mm
- 600V Cat IV rated
- 20A current rating

Non-Contact Thermometers

ECONOMY NON-CONTACT THERMOMETER

A safe way to measure temperatures in hard to reach places, and hot or hazardous areas. It is compact and easy to use - simply aim the built-in laser at the target area and read the temperature between -50°C to 500°C from the backlit LCD screen. Features include a 12:1 distance to spot ratio, rapid 500ms detection, max/min, data hold, and auto-power off functions.

- -50°C to 500°C
- Rapid detection function
- Built-in laser pointer
- 12:1 Distance to spot ratio
- Automatic data hold
- Max/min function

NON-CONTACT THERMOMETER WITH DUAL LASER TARGETING

Safely measure temperatures from -40°C up to 650°C in hard to reach places, and hot or hazardous areas. The circular laser targeting from the two built-in lasers and 16:1 distance to spot ratio provides more accurate and repeatable measurements. The rugged design with IP54 rating offers protection against dust and water. Features include min, max, average, difference temperature displays, data hold, and high and low alarms with backlight. It has a large white backlit LCD, a rapid response time of less than 150ms, and a digitally adjustable emissivity from 0.1 to 1.0, which helps improve accuracy depending on the materials you are measuring. Supplied in a carry case.

- -40 to 650°C
- Rapid detection function
- Built-in dual laser pointer
- 16:1 Distance to spot ratio
- Automatic data hold
- Max/min function
- Emissivity Digitally adjustable from 0.10 to 1.0
- MAX, MIN, AVG, DIF temperature displays
- High and Low alarms with red backlight
- Class 2 laser product

PRO HIGH TEMPERATURE NON-CONTACT THERMOMETER WITH K-TYPE PROBE SUPPORT AND USB

A professional non-contact thermometer with dual laser pointers to provide fast, easy and accurate readings of most surface temperatures between -50°C to 1650°C! The impressive 30:1 distance to spot ratio measures smaller surface areas at greater distances, with a 1% accuracy and a rapid 150ms sampling time. Features include automatic data hold & trigger lock, min, max, difference, average temperature displays, high/low alarms, and digitally adjustable emissivity (0.1 to 1.0) for more accurate readings of different materials. Provision for a K-Type thermocouple (supplied) enables you to take direct measurements up to 1370°C, and a USB port lets you transmit the data with a PC for further analysis. Supplied with a tripod, K-type probe, USB cable and carry case.

- Rapid detection function
- Built-in dual laser pointer
- 30:1 Distance to spot ratio
- Automatic Data Hold
- Emissivity Digitally adjustable from 0.10 to 1.0
- MAX, MIN, AVG, DIF temperature displays
- Backlight LCD display
- Trigger lock
- Set high and low alarm
- USB Interface

tech talk Distance To Spot Ratio Explained

Distance to spot ratio is the ratio of the distance of the Thermometer to the object being measured, and the diameter of the temperature measurement area. The larger the ratio number the better the resolution.

USB Temperature / Humidity Dataloggers

A must for anyone involved with food preparation, archiving or storage or applications where storage of environment information is important. These USB dataloggers log temperature and humidity readings and store them in internal memory for later download to a PC. The measurement interval is adjustable - you simply set up the recording parameters then download the data when you need it. The data is recorded at the prescribed intervals and will alert you if preset min/max levels are exceeded. Countless applications including greenhouses, museums, warehouses, container storage, photography, archives, food preparation etc.

PROFESSIONAL DIGITAL LIGHT METER

- Data Hold
- Relative Mode
- Auto Zeroing
- Long-Life Silicon Photo Diode Sensor
- Selectable Lux Or FC Scale
- Auto Power Off: 30 Minutes
- Max And Min Measurements

Light has an enormous impact on the atmosphere created in a room, office, foyer, retail shop, reception areas, or on film and photography. In some cases, a professionally lit servicescape may be the difference between business success and failure. Achieving the right amount of light is a fine art, and the help of a professional tool should be sought to ensure minimum lighting level standards are achieved. This professional light meter is brimming with features that should be part of every lighting technician's arsenal. It uses photopic spectral sensitivity which closely mimics the response of the human eye to changes in light. It is extremely accurate with a rapid response and can store min and max values for easy comparisons. Measurement can be switched between LUX and FC (foot candles) and a data hold function is included for pausing the reading. All this is output to an easy to read backlit LCD. A carry plastic case with handle is included for easy and safe transportation.

HAND HELD PH METER

A simple and accurate device for checking pH levels in water. The unit is equally valuable for keeping your fish tank at the proper pH level for optimum fish health or checking your swimming pool for the right balance. The meter is simple to use and the large liquid crystal display gives clear and precise readings that are much more accurate than messy chemicals. The unit has an extendable probe that can be adjusted to suit each application. The meter is supplied with a 9 volt battery, a bottle of pH 7.0 buffer solution and calibration tool.

Sound Level Meters

MICRO SOUND LEVEL METER

1 YEAR WARRANTY

- Very compact size
- Min / max hold
- Backlit

With a range of 40 - 130dB, this little meter is ideal for environmental, safety and sound system testing. It has a fast response time for transient measurements and is A-weighted for the frequency range of human hearing.

- Extremely small and price matches its size

DIGITAL FOR AN ANALOGUE PRICE!

SPECIFICATIONS	QM1591
Display	3 digit
Range	40 - 130 dB (±3.0dB)
Frequency Range	31.5Hz to 8kHz
Weighting	A weighted

PRO SOUND LEVEL METER WITH CALIBRATOR

NEW

This professional grade sound level meter is designed for all kinds of environmental sound measurement projects. It features a wide dynamic range from 30dB to 130dB, fast (125ms) or slow (1s) time weighting to get an ambient reading or a short noise. minimum, maximum and data hold values, and A & C weightings to get the right response for the human ear. Other features include backlit display with date and time, data logger function, analogue AC/DC outputs for connection to a frequency analyser, and a USB port to connect to your PC for further analysis. Includes an Alarm function which can be set to Over and Under thresholds. Great for car audio installers, clubs and PA. Tripod and mount included.

- MAX & MIN measurements
- Over & Under range display
- A & C Weighting
- FAST (125ms) & SLOW (1s) response
- Data logger
- IEC61672-1CLASS2 Standard
- 32700 Memories
- 1/2 inch electret condenser microphone
- Analogue Output
- USB Connectivity

Level Ranges:

- Low: 30dB~80dB
- Med: 50dB~100dB
- Hi: 80dB~130dB
- Auto: 30dB~130dB

Analogue Output:

- AC/DC outputs from earphone outlet (AC=1VRMS, DC=10mV/dB)

INCLUDES CALIBRATOR

IN-CAR BATTERY MONITOR AND TEMPERATURE DISPLAY

Absolute plug and play - simply plug it into an available cigarette lighter socket and you're good to go! Whenever power is applied, it will provide you with battery / system voltage, and current temperature.

- Dual function display
- No installation required
- Bright LED screen
- Temperature Meter: 10 - 80°C +/- 0.1C

SELF POWERED ROUND LED VOLTMETER 5-30VDC

Quite possibly the easiest way to monitor your battery voltage, or the voltage in any DC powered system. Simply wire up to a positive and negative DC power source of 5-30VDC, and the voltmeter tells you the voltage (taking power from the DC source to operate). Supplied with a panel mount and a surface mount "hood". Connection is via 6.3mm spade terminals.

- Voltmeter: 36(Dia) x 26(D)mm
- Panel mount: 60(W) x 42(H)mm
- Surface mount hood: 55(W) x 80(L) x 50(H) mm

12V CAR VOLTAGE, ALTERNATOR & TEMPERATURE DISPLAY

Plugs into the car's cigarette lighter socket to display the car's battery voltage and inside temperature. An audible and visual alarm can be set to trigger when the car's battery voltage dips too low, which could save you from breaking down in the middle of nowhere with a dead car battery. The display features a tricoloured LED to show the battery status and electrical system status at a glance. Stylish modern design allows for easy dash mounting. Celsius or Fahrenheit temperature display.

Automotive Test Equipment CONTINUED

SPECIALIST UNIVERSAL LCD BATTERY TESTER

Provides testing for most types of small rechargeable batteries, including a huge range of Lithium-based (LiFePo4, Li-Ion etc) batteries. You can test voltage, capacity, and internal resistance. Internal resistance is usually tied to the current charge level, however generally increases with a battery's age, it provides a good indication of battery health, most notably in Lithium-based rechargeable batteries. It also works with alkaline and various other non-rechargeable batteries.

- Tests over 11 types of batteries including cylindrical and button cells
- Test battery voltage, capacity (%), and internal resistance
- Weight: 161g (Includig Cables)
- Cable Length: 720mm
- Dimensions: 75(W) x 135(H) x 28(D) mm

AUTOMOTIVE MULTI-FUNCTION CIRCUIT TESTER WITH LCD

Designed to test the electrical system of an automotive vehicle running on 12V or 24V. One of the great features is being able to activate components with positive or negative without using a jumper wire. To top it all off the easy to read LCD is backlit so it's perfect for the dark crevices of an engine bay. All the features of a brand name unit at a fraction of the price. For full specifications see our website.

OBD2 ENGINE CODE READER

Modern car engines are controlled by computers which regulate engine performance. Sensors are connected to major components which constantly send data to the computer which then adjusts performance accordingly to ensure minimal emissions and optimal performance. Reading data from these computers helps mechanics pinpoint where problems may lie in car performance. You can also find out this information with this OBD2 engine code reader. It connects to your OBD2 port and will immediately intepret the information in the ECU (engine control unit). You can use this information to find faulty sensors which adversely affect performance, see if cylinders are misfiring, see how hot your engine coolant is, view engine RPMs and much more. Diagnosing and fixing certain problems yourself can save a lot of time and money. It's also fascinating to see how much engine information is readily available in modern cars. Viewable parameters*

TYRE PRESSURE GAUGE WITH DEFLATION MONITORING

Keeping your tyre pressure in check is important for maximising the life of your expensive tyres. But if you're travelling on sand or muddy terrain, or 4WDing in general, you often want to reduce pressure in the tyres to maximise your overall footprint and stability. Sure, you can grab a stick and manually deflate the tyres, but who wants to do that! Use this gauge and it will show current pressure while it deflates, so you can stop at any time! Also helps prevent over-deflation of tyres! Also features a bright LCD and LED torch to help you see what you're doing.

- Measurement Range: 5-100psi
- Units of Measurement: psi, bar, kPa

Circuit Tester

NON-CONTACT AC VOLTAGE PROXIMITY DETECTOR

About the size of a marking pen, this non-contact tester detects AC voltages from 200-1000V. Featuring red and green indicators, the unit will glow green when safe, and when voltage is detected it will flash red and beep at an increasing rate as you get closer to the voltage source. It can be used for detecting live mains in outlets, power boards or insulated wiring. It also has an LED torch and a handy pocket clip. A must for every toolbox

- Auto Power Off
- Flashlight function
- CAT III rated
- Green and Red LED indiciators

3-30VDC TESTER WITH VOLTAGE/POLARITY READOUT

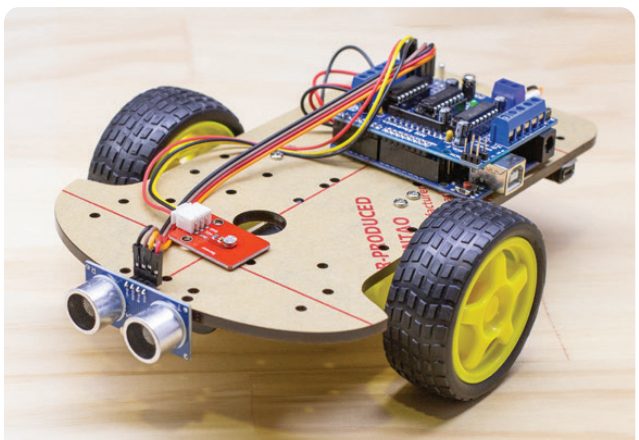

Provides useful debugging and testing in many systems, most notably vehicles, boats, motorbikes, and other 6-24V systems. It provides an accurate voltage readout as well as polarity check. It's a more advanced version of a test-lamp used for decades in the automotive industry. Self powered from the test circuit.

- Tests powered-on circuits
- Works on 6V, 12V, and 24V systems
- Stainless steel testing probe

Distance Meters

30M LASER DISTANCE METER WITH 5M TAPE MEASURE

NEW

Use this 2-in-1 laser measuring tape to measure rooms or areas up to 30m* using the laser or objects up to 5m using the retractable tape. The display can be set to show metres, inches or feet, with a laser accuracy down to just +/-3mm in ideal lighting conditions. The internal rechargeable battery can be charged from an available USB power source, and power save features extend the battery life.

**Up to 30 metres under good measuring conditions (good measuring surface, room temperature). Under bad measuring conditions (such as too strong ambient light, excessive or small measured coefficient of the measured point, excessive temperature difference, etc.) the deviation is ±0.25mm/m.*

Please use a reflector in cases of strong sunlight or poor reflection of the target

MINI LASER DISTANCE METER - 20M

A laser distance meter makes light work of taking area measurements. No longer do you have to get a second pair of hands on the other end of a tape measure, while you find some eye-protection for the inevitable recoil when you're done! Providing measurements up to 20m, with an accuracy of just 1.5mm - that's probably less than the flex in the end-hook of a tape measure anyway! Resolution down to 1mm, it also provides the last 20 measurements. Works in metric or imperial measurements, and can even help you with your area and volume calculations! The weatherproof case helps you work in just about all conditions too.

- Up to 20m range
- Metric and imperial
- Area volume calculations
- Weatherproof IP54 case

Stud Detector

3 IN 1 STUD DETECTOR WITH LASER LEVEL

A stud detector which just doesn't "beep" when you're over the stud, it shows the proximity when you are NEAR a stud via the large LCD and shows a target graphic when you're spot on. Also includes live wire (voltage) detection, you can be sure that nail you're about to hammer into the wall won't end up in your mains wiring. The best feature of all is the built in laser level. Rotating across 180° with stops on 45° and 90°, you can instantly and easily do layouts and basic tasks such as picture levelling in a snap. The inbuilt spirit level ensures you're at the right angle.

- Laser levelling, layout and stud locating on vertical and horizontal surfaces
- Wood, metal and live wire detection
- 180° pivoting laser plane with level and plumb vials
- 20ft laser line projections onto work surface with 90° squaring
- Two self contained half pins to mount unit to work surface
- LCD sensing and mode display with target graphics
- LED display with continuous live wire detection
- Thumb dial adjustable feet for levelling the laser
- Easy keypad operations and comfortable grip

3.5 DIGIT JUMBO LED PANEL METER

This is not just a digital display, but a fully functional high impedance digital panel meter that only requires power to operate. It will measure voltages from 200mV to 500VDC (jumper selectable) and has a maximum count of 1999. The module is suitable for a host of applications and can be used as a voltmeter or adapted for use as a current meter, thermometer etc.
The decimal point location can be selected with a jumper and the module uses an easy "plug-in" fixing method. The meter shares a common ground with the voltage being measured.

SELF-POWERED LED PANEL METERS 4.5-30VDC

Super simple to install, simply connect the power you want to monitor! Some panel meters require a power source in addition to a sensor wire to the source you want to monitor. These units connect straight up, with no fuss! Suitable for use between 4.5V and 30VDC, they're suitable for many DC applications including cars, boats, caravans, and other 12-24V sources. However their wide measurement range means they can be applied to many other applications too! Red coloured display. Panel mount with self-retaining spring clips.

- 4.5-30VDC input
- Simple two-wire installation

Heavy Duty Current Shunts

HEAVY DUTY CURRENT SHUNTS

Placed in series with a high power circuit, these shunt bars allow you to measure high current draw without needing a high current ammeter. Heavy duty brass construction and hand calibrated, they include large terminals for connection of the main circuit cables and smaller terminals for connection to a meter. Suitable for use with a standard multimeter or panel meter you simply measure the millivolts across the shunt to display the current draw of the circuit. Models are compatible with many readily available power meters such as our MS6172 Digital DC Power Meter.

NOTE: Care must be taken with digital panel meters and current shunts. Some meters allow their negative power input to be common with the measured supply. Others require completely isolated supplies. Check the datasheet carefully.

tech talk How To Install A Shunt

- Voltmeter is on millivolt scale
- Voltmeter connections to shunt are on each side of shunt
- If current is DC observe polarity. If AC amps connect either way
- Specs of shunt generally stamped on the shunt itself ie. 50mV/50A (volt drop across shunt) equates to 5, 10, 20A max current, etc. i.e. A 25mV reading on the millivolt meter would equate to 25A current on a 50mV/50A shunt. You can read the current straight off the millivolt scale on the meter.

LCD Modules

LCD PANEL 2 LINE 16 CHARACTER COMPACT WITH BACKLIGHT & SIL CONNECTIONS

This compact LCD module has 96 inbuilt ASCII characters as well as 92 special letters and 8 custom characters, which can be displayed on a 16 character by 2 line screen. It will hold the current input on the display using its own built in memory, making it easy to drive. Connections via single in line solder pads with an independent backlight.

The pretty young girl below is delighted with the Theatrical mask she has made from the Sparkle Stitch Kit. Not only is the mask great looking, she has learnt to incorporate colourful LEDs into the mask for spectacular lighting effects.

On the following pages, you will discover how to make hundreds of exciting projects based on the kits and materials shown.

You will discover the world of Arduino® and Raspberry Pi® computer boards that enable you to enhance your life.

These tiny but powerful computers are about the size of a playing card but can be easily attached to other devices so that you can make from say, an automatic cat feeder or a retro-style arcade game. Space Invaders or Street Fighter here we come!

The table on the left summarises what is in this section. Note that the Arduino and Raspberry Pi sections are together. This is because they are basically the same thing and they share a lot of connected accessories. They are a bit like Apple Computer and a P.C., or an iPhone and the Android phones. They both do the same thing but do it slightly differently. It may be wise to choose which one and stick to it (see strengths and weaknesses chart on p 88).

We also hae a very large range of dedicated electronics (not necessarily computer based projects) which start from the simple to complex. We also have Robot kits, Science lab kits, Mechanical kits, Motor & Servo kits, Microscopes, Clock Making Kits, and our highly regarded "Short Circuits" electronics learning system. All in the following pages!

Sparkle Stitch Kit

This kit includes all it takes for anyone (even boys) to make illuminated theatrical - type masks and clothing using ultra bright LED's and batteries.

INCLUDED IN THE KIT IS:

- Lots of coloured felt on which to base your creations
- A hot glue gun
- Conductive sewable thread
- Batteries, battery holders and LEDs
- A 62 page electronics guide with patterns for light up masks
- A multimeter
- Special sewing needles and other sewing accessories

Everything you need is in the kit except perhaps a good pair of scissors which your mum will undoubtedly have. So get started! this is your first step to becoming a famous theatrical designer! Oscars - here we come.

- Case dimensions: 330(L) x 220(D) x 120(H)mm

Wearable Technology Hardware

These products are designed to be sewn onto a costume or fabric based project to provide amazing lighting effects. Combine with other LED Raft Pads, Slide Switch Power Pads, and Battery Holder Power Pads, sold separately, to create a dazzling 'light show' on your e-clothing, cosplay outfit, mask, hat, hero cape, jacket, handbag and other theatrical designs. Sew them together using the Stainless Steel Conductive Thread.

LED RAFT PADS

The lightweight board measures approximately 13mm in length and has a surface-mount LED with resistor to limit the current. Two large sew tabs enable you to easily sew the raft pad onto the fabric using conductive thread (use WW4100, sold separately).

RGB LED RAFT PADS

The lightweight board has a surface-mount RGB LED with resistor to limit the current. The LED is addressable, which means they can be daisy-chained together and controlled individually from a microcontroller (eg. Arduino). Four sew tabs enable you to easily sew the raft pad onto the fabric using conductive thread (use WW4100, sold separately).

STAINLESS STEEL CONDUCTIVE THREAD 2M

A highly flexible thread made conductive by the inclusion of stainless steel strands. You can feel the extra weight that the stainless steel gives. The thread is a dark silvery grey, and is great for adding electrical elements to textiles such as fabric.

- Maximum current 500mA
- Tie onto modules and components to make a connection
- 2m length per pack

SILICON RUBBER HOOK UP WIRE FOR ELECTRONIC CLOTHING

This wire is superior to conductive thread for wiring clothing for LED lighting effects in clothing. it is insulated so wires can cross over each other without short circuits. it is extremely flexible and can be sewn (with a large needle) but it is better to hot melt glue the wires in places. it works well for large, complex clothing lighting projects where crossover wiring is very desirable.

Sewable / Wearable Arduino-Compatible Boards

DUINOTECH LILYPAD PLUS

An all-in-one Arduino-compatible board to add dazzling effects to your next project or costume. The round-shaped board features ten mini RGB LEDs, a motion sensor (accelerometer), temperature sensor (thermistor), light sensor (phototransistor), microphone, buzzer, left and right push-buttons, slide switch, and more to suit a wide variety of applications. The fourteen power and I/O pads around the edge of the board are alligator clip friendly for prototyping purposes, can be soldered, mounted with metal screws, or sewn into your costume using conductive thread (sold separately). The onboard ATmega32u4 8-bit AVR microcontroller runs your Arduino code, and the eight I/O connections include Serial TX, Serial RX, I2C (SCL & SDA) and four GPIO pins. Program and power the board from USB or 3.3VDC. A battery pack (6V max.) can also be connected to make your project completely portable. The USB port has HID support to act like a keyboard, mouse, joystick or MIDI, and the eight non-power related pads can be used as capacitive touch applications.

micro:bit

MICRO:BIT GO DEVELOPMENT BOARD BUNDLE

The micro:bit is an open source system originally designed by the BBC for use in computer education in the UK and is now available in Australia.

Described as being about half the size of a credit card, you can use the accelerometer to detect movement and tilting or the magnetic sensor to detect metal or create a compass. Uses for the 5 x 5 LED display are limited only by the imagination and 2 on-board input push buttons provide instant control.

Another 3 inputs are provided via the 5 ring connectors (the other 2 are for power and ground) which can be accessed via alligator clips or banana connectors. On top of this, the ring connectors form part of a larger 23 pin edge connector for more advanced projects. And if that isn't enough, USB and Bluetooth® connectivity allows interfacing with other peripherals!

Programming can be done via Microsoft MakeCode or MicroPython, both of which are available on the micro:bit foundation website. Power is via USB or the provided 2 x AAA battery holder (batteries included).

DUINOTECH BBC MICRO:BIT STARTER KIT

NEW

If you are just getting started into the world of electronics and coding or want that ideal gift for a young maker, this kit is the perfect choice. No soldering or prior programming knowledge is required. At the heart of the kit is the micro:bit board which is a powerful handheld, fully programmable, computer designed by the BBC. It has an accelerometer to detect movement and tilting, a magnetic sensor to detect metal or create a compass, and up to 23 inputs to connect to the physical world. The board also has a 5 x 5 LED display and two onboard input push buttons provide instant control. The kit includes common electronics components from resistors to a servo motor, and all the necessary prototyping accessories to get building. A 36-page beginner's guide is also included to get you started.

Raspberry Pi & Accessories:

Raspberry Pi is the cute name for a British developed range of small computer boards and peripheral hardware. Don't be fooled!

These little boards have very powerful computing power thanks to the latest microprocessor technology. They are light years ahead of the 8-bit hobby computers of the past. They are full 64-bit machines with similar processing power to office computers or your laptop.

The Raspberry Pi is, in fact, a learning system. It starts, of course, with a Starter Pack, to launch you into the world of computer HARDWARE. (You learn software along the way.)

Hopefully, your imagination will be hooked on the possibilities these little computers have in their relationship to the real world.

Oh, and be stimulated by the enthusiasts who have trodden this path already with their ingenious applications of computer technology.

The following pages describe all the hardware extension products for Raspberry Pi. Keep an eye on our website for great Raspberry Pi project inspiration, you can build yourself too.

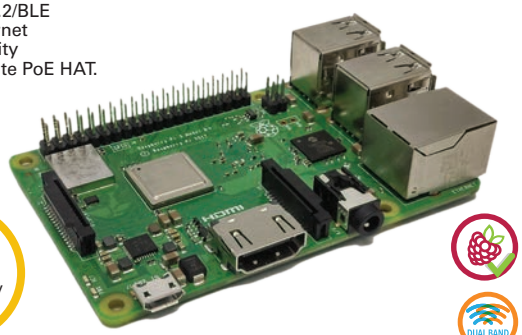

RASPBERRY PI 3B+ SINGLE BOARD COMPUTER

The latest product in the Raspberry Pi3 range.

Modular compliance certification allows the board to be designed into end products without the need for further wireless compliance testing.

- 64-Bit quad core processor running at 1.4GHz
- Dual band 2.4GHz / 5.0GHz wireless
- Bluetooth 4.2/BLE
- Faster Ethernet
- PoE capability via a separate PoE HAT.

RASPBERRY PI STARTER KIT

The Raspberry Pi has been designed as a computer that anyone can use. If you want to get started with a Raspberry Pi, but don't know where to start, then this kit has just about everything you need. Ideal for those starting out, or even as a basic educational computer for a student. You will also need a USB keyboard, mouse, HDMI monitor/TV and HDMI cable.

Includes:

- Raspberry Pi 3B
- Acrylic Case
- Power Supply and USB Cable
- Book (Programming the Raspberry Pi: Getting Started with Python)
- Micro SD Card loaded with NOOBS software
- Getting Started Guide

Raspberry Pi Starter Kit	XC9010	$169.00

16GB NOOBS SD CARD FOR RASPBERRY PI

A 16GB Micro SD card with fullsize SD card adapter preloaded with the NOOBS software, allowing easy install of the standard Raspbian operating system. Great option for beginners who aren't comfortable imaging their own cards. Also includes Librelec media player as an install option.

The following operating systems are also able to be downloaded and installed by NOOBS (internet connection needed):

- Raspbian Lite
- Lakka
- OSMC
- Screenly
- Windows 10 IOT Core

	Cat.	Qty 1+
16GB NOOBS SD Card for RPi	XC9030	$28.90

5MP CAMERA

This 5MP camera connects directly to the camera connector on the Raspberry Pi, saving precious USB ports. The camera is capable of up to 2592x1944 resolution. Video recording is supported for 1080p @ 30fps, 720p @ 60fps and 640x480p @ 60/90fps. Support for the camera is built into the latest version of Raspbian.

- Based on the 5MP Omnivision 5647 camera module
- Connects directly to Raspberry Pi/camera connector
- Up to 1080p video
- Up to 2592x1944 pixel images
- Fully compatible with both the Model A and Model B Raspberry Pi

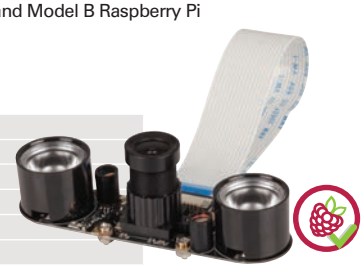

SPECIFICATIONS	XC9020
Still resolution	5 Megapixels - 2592 x 1944 Pixels
Video	Supports 1080p @ 30fps, 720p @ 60fps and 640x480p 60/90

5MP NIGHT VISION CAMERA

Similar to our XC9020 camera but features a camera lens with an adjustable focal length, and an onboard infrared LED to improve vision in dim lighting. Ideal for providing vision to your Rasberry Pi projects, including surveillance applications. The 5MP camera connects directly to the camera connector on the Raspberry Pi, saving precious USB ports, and is capable of up to 2592x1944 resolution. Video recording is supported up to 1080p @ 30fps, and the camera is built into the latest version of Raspbian.

- Video resolution up to 1080p @ 30fps; 720p @ 60fps
- Still resolution up to 5MP 2593 x 1944
- Compatible with both Model A and Model B Raspberry Pi

SPECIFICATIONS	XC9021

ENCLOSURE FOR RASPBERRY PI

If you're using your Raspberry Pi as a computer, you probably don't want all the pins and wires exposed to short out. This compact case is the perfect thing for protecting your Pi in fact it wouldn't even look out of place sitting next to your TV if you are using the Pi as a media computer. It has openings for the USB, HDMI, Ethernet, 3.5mm, MicroUSB and MicroSD card ports on the Pi, and includes four screws to secure the case closed. The removeable end panel features cooling holes, and overall, the case is only millimetres longer than the Pi itself. If you do want to tinker with your Pi, the top can be removed to allow access to the GPIOs and other headers. For easier access to the GPIO pins and other headers, see XC9004.

Includes:
Base, Lid, End Panel with vent holes & Fixing screws

Enclosure for Raspberry Pi	XC9002	$10.90	$9.90	$8.90

CLEAR ACRYLIC CASE FOR RASPBERRY PI WITH GPIO ACCESS

This simple snap-together enclosure is the perfect way to protect your Raspberry Pi, but still be able to easily access the GPIO pins and other headers. The crystal clear acrylic doesn't hide anything, and if you are going to be connecting and disconnecting things, then this enclosure will keep your Pi from shorting out, while still allowing access via the hinged lid. For semi-permanent setups, there are slots in the lid for the GPIOs, Camera header and Display header. Another hole directly above the processor provides ventilation and allows mounting a small cooling fan.

Includes:
- Six plates with cutouts for all Raspberry Pi connections
- Mounting nuts and bolts
- Insulating spacers

Clear Acrylic Enclosure for RPi3	XC9004	$10.90	$9.90	$8.90

VESA MOUNT CASE TO SUIT RASPBERRY PI

NEW

Mount your Raspberry Pi 3B+ securely to the back of your monitor or TV. The perspex case is compatible with 100 x 100mm VESA mounts, and fits a 30mm fan (YX2500 sold separately) if cooling is required. Mounting screws included.
- Perspex
- Includes mounting screws
- Fits a 30mm fan (YX2500)

SPECIFICATIONS	XC9003

OFFICIAL RASPBERRY PI 3B CASE RED AND WHITE

This is the official case for Raspberry Pi 3B designed by the Raspberry Pi Foundation. The snap-together case requires no tools and has numerous removable panels to allow access to GPIO pins and other internal connections such as the camera port. Deep slot for easy access to Micro SD card.
- Stylish red and white design
- Easy no-tools assembly
- Protect your Pi
- Light pipes for activity LEDs
- Four Rubber feet included

AUDIO DAC MODULE FOR RASPBERRY PI

This simple DAC can be used to create your own Raspberry Pi based music player or just improve the sound quality from your Raspberry Pi. Plugs directly onto your Pi & requires minimal setup using Volumio & RuneAudio. Compatible with any 38kHz IR remote control.

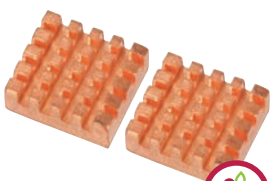

SPECIFICATIONS	XC9048
Sampling Frequency	384kHz
Resolution (Bits)	16-32
Digital Audio Interface	I2S
SNR	120dB
THD	-93dB

COPPER HEATSINK FOR RASPBERRY PI PK. 2

If you've got your Raspberry Pi doing some intensive work like running a media player or mining cryptocurrency, then heatsinks can help to dissipate some of that extraneous heat that is generated. Can even be used on motor driver ICs or other power ICs and regulators.
- Self-adhesive pads for peel and stick use
- PGA works well for all airflows including convection only

3.7V 3800MAH LITHIUM-ION BATTERY PACK

Make your Raspberry Pi project completely portable with this power expansion board with Li-ion battery pack. The expansion board is designed to attach directly below your Rasberry Pi and provide power from the 3800mAh Li-ion battery. Features two USB ports to power the RPi and another USB device, power switch, power and charging status LEDs, and an integrated charging module. Simply charge from an available USB port through the onboard micro USB socket. Mounting hardware included.

- Dual USB outputs
- High capacity 3.7V Li-Ion battery included
- Onboard charging circuit

SPECIFICATIONS	XC9060
Battery Capacity:	3800mAh
Max Discharge Current:	1.8A
No-Load Output Voltage:	5.1V

STACKABLE HEADER FOR RASPBERRY PI

One of the essentials for building your own custom hat for Raspberry Pi. Perfect fit for the 40 pin GPIO header. Can also be used to break out a DIL connection to a breadboard by bending the pins slightly.

- 2 x 20 stackable header
- Extended body for extra spacing

	Cat.	Qty 1+	Qty 4+	Qty 10+
	HM3228	$5.80	$5.20	$4.60

PROTOTYPING HAT FOR RASPBERRY PI

This prototyping hat for Raspberry Pi has a main area with gold plated holes that are spaced at the standard 2.54mm, making this ideal for use with DIP packaged ICs or sensors. Around the side of the board are 0.1" header strips and screw down terminals that tap into the GPIO, power and other interfaces for temporary (but robust) connection of components or wiring that can be easily removed. It also has a large prototyping area for PTH and SMD components.

- Screw Terminals
- Header connections
- Gold plated holes
- 2.54mm spacing of holes
- 26 pin GPIO
- SOIC Breakout
- Large prototyping area for PTH/ SMD components
- Dimensions: 85(W) x 56(L)mm

GPIO EXPANSION KIT

If you want to delve into the prototyping of hardware for the Raspberry Pi, then the GPIO expansion kit is a necessity. Using a colour coded rainbow ribbon cable, all 40 GPIO pins are broken out to a header which can be plugged straight into a breadboard. The header is clearly labelled with each pin name, making breadboarding of circuits super easy.

Touch Screens For
Raspberry Pi:

Touch screens are a great way to provide an intuitive user interface, and with the Raspberry Pi this is as easy as connecting any one of the touch screens from our range offering 2.8", 5" and 7" screens. The 2.8" and 5" Touch screens utilize Resistive Touch technology, with a pen option offering single touch operation. The 7" Touch screen utilizes advanced capacitive touch technology giving you the full multi-touch capabilities.

2.8 INCH TOUCHSCREEN FOR RASPBERRY PI

This compact 2.8 inch screen provides 320 x 240 resolution and includes resistive touch functionality. It creates a small but functional user interface capable of displaying and controlling a Raspbian desktop. Low power requirement, powered directly from the GPIO pins. Custom image/ kernel drivers required for operation.

- 2.8 inch
- 320x240 pixel
- Resistive touch
- Plugs straight into the top of Raspberry Pi

7 INCH TOUCHSCREEN WITH HDMI AND USB

This 7 inch LCD screen has a resolution of 1024x600. It can connect directly to a Raspberry Pi as well as to any other HDMI source that supports the native 1024 x 600 resolution, via the built-in HDMI port. It also includes a capacitive touch interface. This module is designed to connect directly to the top of a Raspberry Pi, with a small HDMI double plug that locks the two together, but it can be used as a standalone display powered via the micro USB socket on the device. A back-light with switch is included. Now you can add a compact second display to your HDMI device, or make your own portable display device. Turn the Pi plus monitor combination into your own portable computer, small enough to install in a car, or even a custom 3D printed case. Some display and driver configuration may be needed for operation. This display works with Microsoft Windows® versions up to Windows® 10, and supports 5 point touch input (with the exception of Windows® XP which has single point touch).

- 7 inch
- 1024x600 resolution
- Capacitive touch screen
- Switchable backlight
- HDMI input
- Powered via one of the 2 micro USB ports. The other ports is for touch support
- Mounting tabs in each corner

SPECIFICATIONS	XC9026
Screen	7", 1024x600 Pixels
Inputs	HDMI, USB Capactive Touch
Supports	Raspbian, Ubuntu, Kodi, Windows 10 IOT or XP (one touch point), Windows 7, Windows 8 and Windows 10 (5 Point Touch)

Arduino® vs Raspberry Pi®

If you're new to this technology, you might be a little confused around what the primary differences are, and how they're used.

While there are certainly many similarities on the surface, the reality is that these are more like "compatibilities", than fundamental similarities.

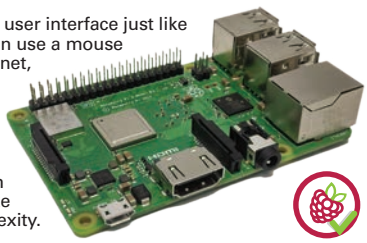

Raspberry Pi and Arduino both represent different corners of programming and computing. While there's certainly some crossover in what you can make with them, many projects will squarely suit one or the other. Just as a semi-trailer is better at hauling freight than taking kids to school, Raspbery Pi and Arduino Compatible hardware will suit certain projects over others too. Here's a little information to help you figure it out.

Raspberry Pi Overview

Raspberry Pi is a mini computer, essentially like a low-powered version of your computer at home. They often run a simplified version of Debian Linux called Raspbian, which makes it great for running multiple applications and has support for Full HD 1080p graphics, even 4K for the latest Raspberry Pi 4.

Raspbian provides you with a user interface just like a regular computer, so you can use a mouse and keyboard to surf the internet, work on spreadsheets, code websites, and so much more.

Overall this provides power and flexibility for your applications, however increases power consumption and can be less stable (just like your computer) due to complexity.

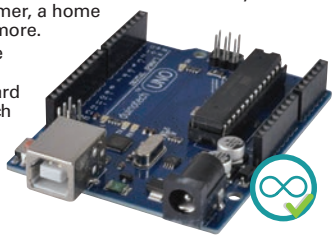

Arduino Overview

Arduino compatible hardware is essentially just a microcontroller.

Arduino-compatible hardware comes in all shapes and sizes, so it really needs to be considered as an approach to programmable hardware, than a specific capability or product.

Arduino is like a versatile version of embedded electronics that you'd find in your microwave, a digital timer, a home router, many kids toys, and much more.

Arduino boards essentially run one application at a time, which is programmed directly on to the board itself. This "single minded" approach means the software you develop can run reliably for very long periods and automatically starts going again if the board is power cycled too.

Differences, Strengths & Weaknesses

Raspberry Pi Hardware	Arduino Compatible Hardware
Very much like a full-size computer including operating system with multi-tasking and regular HDMI support for using a monitor.	Single application / single threaded programming approach. Great for simple, reliable hardware operation. Screen connection is possible with compatible hardware, however no rich graphics or video.
Edit and recompile code in-place, in a variety of languages. The most popular language for development on a Raspberry Pi is Python.	Requires a host computer (or capable hardware) to edit and recompile code. Primary language is C++ in the Arduino programming environment. It is possible to use other languages but less common.
A full size Raspberry Pi 4 requires a 15W power supply. That's quite a lot of power for battery-powered projects. Some smaller Raspberry Pi boards (such as Zero W) use less power, and can get down to around 0.5W by shutting off the display ports and such.	Generally quite low power consumption, with very simple options to reduce overall usage to mere micro-amps, in certain cases (mostly depending on attached hardware).
Onboard microSD provides an easy route to store data. If that's not enough you can attach an external USB hard drive (or multiples) for virtually unlimited direct-attached storage.	A storage shield is generally required in order to expand beyond the limited onboard memory for Arduino compatible hardware. If you're using a WiFi/Ethernet compatible board, pushing data to the cloud is generally easiler where possible.
Rich peripherals such as cameras and displays are fundamentally supported as well as network (WiFi or wired) on most models.	Some boards include onboard WiFi, with sheilds available to extend functionality if required.
Linux packages are often available for powerful functionality such as Machine Learning, web servers, network management, and so much more. Due to the popularity of Raspberry Pi, many common requirements have Raspbian-dedicated packages available.	There are many code libraries available in the Arduino community which expand functionality and simplify peripheral connection. However this does not extend to generalised computing as Arduino hardware is not really suitable for this purpose.
The GPIO (general purpose input output) interface provides great hardware attachment for inputs such as sensors and switches, as well as outputs such as LEDs and motors.	The GPIO (general purpose input output) varies based on the board you're using, however they're generally very powerful with more
Raspberry Pi uses open source software, but is not open hardware. While some imitators do exist, you'll more than likely be using official Raspberry Pi hardware. This has the benefits of compatability and reliability, but some in the community are frustrated with the lack of flexibility in what is a very "sharing" community.	Arduino is entirely open source and open hardware, so you may or may not be using official Arduino hardware. There are more Arduino-compatible third party boards around than genuine ones. However most people still use the official Arduino IDE to code their boards. Because they're open hardware, most board designs are virtually identical to official versions, with differences mostly cosmetic only.
Easy interface with virtually all communication protocols making peer to peer and API integration fairly simple. Support for SSL and other secure transmissions is generally no issue, however more complex functions may reach processor limitations.	Supports a good variety of external communications including for use with APIs and peer-to-peer systems. However some aspects such as supporting secure socket layers (SSL) can overload the microcontroller depending on the data and complexity / frequency.
Ideal applications: media centres, home automation projects, AI / Machine Learning education, cloud-controlled cameras, complex user-interface projects, and so much more.	Popular uses: environment sensors, retrofitted smart devices, lighting controllers, servo controllers, simple robots, simple user interface controls, intelligent control management projects, and so much more.

Arduino® Compatible Boards

DUINOTECH ATTINY85 MICRO USB DEVELOPMENT BOARD

NEW

This tiny development board features an ATtiny85 8-bit microcontroller that you can program using the Arduino IDE to make projects that don't need all the performance of larger development boards such as the Arduino Nano or Uno. It has an onboard micro USB socket for programming and power, and 6 x I/O connections. Power can also be provided directly via 5V, or by using the integrated 5V voltage regulator from a 7-35VDC supply (12V or less recommended).

- Integrated 5V Regulator
- Low power
- 8k Flash Memory (about 6k after bootloader)

DUINOTECH LEONARDO TINY ATMEGA32U4 DEVELOPMENT BOARD

NEW

This Arduino-compatible development board is a smaller version of the popular Leonardo. It measures just 23 x 20mm and is a great choice when you need a low-cost and compact Arduino project. The power and three of its analogue and digital pins go to large gold-plated tabs, making them suitable to connect alligator clips or for sewing onto clothing with conductive thread (sold separately). The board features a 32u4 ATMEL processor with a 16MHz clock, 10 x digital pins, 5 x analogue pins, 4 PWM pins, ICSP, I2C, and a serial port.

- 16MHz Clock Speed
- 32kB Flash Memory (4kB used by bootloader)
- 1kB EEPROM Memory

The ESP8266 based Wi-Fi Mini board packs an 80MHz microcontroller with Wi-Fi into a board not much bigger than a coin. With easy-to-add support for the Arduino® IDE, the Wi-Fi Mini is the perfect compact solution to your IoT sensor node problem. Includes 4MB of flash memory for your program and 11 digital IO pins and one analog input pin to interface to the world.

- 3.3V operating and IO voltage
- 5V-3.3 converter onboard for operation from USB

DUINOTECH NANO

This is the most breadboard friendly Arduino®-Compatible device you will find. Despite its small size, it packs virtually all the features of the full duinotech boards into a tiny DIP-style board that drops directly into your breadboard. It uses exactly the same ATMega328 chip as its larger cousins, so there is no need to change any of your coding. A Mini-B-USB port is easily accessible on top of the board for programming and serial communication. LEDs show power and serial status and a reset button is easily accessible. Its small DIP-style makes it easy to embed into Veroboard or custom PCBs for more advanced projects.

- Fully Arduino® and duinotech Compatible
- FT232RL USB-Serial Chipset
- USB cable included

DUINOTECH CLASSIC (UNO R3)

The flagship of our duinotech family, the duinotech Classic is a 100% Arduino®-Compatible development board. Its stackable design makes adding expansion shields a piece of cake. Powered from 7-12VDC or from your computer's USB port. In the past few years the Arduino® has taken the electronics world by storm. Everyone from hobbyists to professional engineers is making use of its limitless versatility. And it's not just for tech-heads; its easy to learn programming has made the Arduino® a hit with artists and educators as well.

- Fully Arduino® Uno Compatible
- ATMega16u2 USB-Serial Chipset

Arduino® Compatible Boards

DUINOTECH LITE (LEONARDO)

Most of the duinotech models use two chipsets, one for the main controller, one for USB communication. The duinotech Lite combines both these functions into a single IC. This opens the door for more advanced USB functions. Now you can have your duinotech Lite emulate a computer keyboard, mouse, joystick and many other types of input device. The duinotech Lite also boasts more analog inputs (12), and an extra PWM channel.

- Fully Arduino® Compatible
- Built in USB-Serial

ESP32 MAIN BOARD WITH WI-FI AND BLUETOOTH*

The ESP32 is a powerful dual core microcontroller featuring Wi-Fi and Bluetooth, and thanks to the efforts of the Arduino® community, is able to be programmed with the Arduino® IDE through the ESP32 addon. It has 512kB of RAM, 4MB of flash memory and heaps of IO pins with features like 12 bit ADC, 8 bit DAC, I2S, I2C, touch sensor and SPI. This is the next step up if a standard AVR based Arduino® isn't powerful enough to do what you need.

DUINOTECH MEGA

Boasting more IO pins, more memory, more PWM outputs, more Analog inputs and more Serial ports, the MEGA is definitely one the Leader's of the duinotech pack. When you have a project that just needs more inputs, outputs & memory than the duinotech Classic (Uno) can deliver, the MEGA has them in spades. And with 8x the program memory, you have the room to write much larger programs to take full advantage of the increased IO. Despite its elongated size, standard shields will still drop straight onto this board.

ARDUINO COMPATIBLE STARTER KIT

NEW

This kit includes all the essentials to get you started in the exciting world of Arduino. The kit includes the Arduino-compatible UNO board, which is one of the best boards to learn about first, along with a breadboard and plenty of prototyping accessories. Components include LEDs, resistors, switches, a potentiometer, a buzzer, a motor with fan, which can make any of the five projects described in the printed user manual, and for other projects you can find online. A generous amount of coloured jumper wires are also supplied. The kit makes the perfect gift for a young electronics enthusiast or maker in the making.

Box Contents:

- 1 x Duinotech UNO Arduino-Compatible Board
- 1 x USB Cable
- 1 x Breadboard
- 5 x 5mm Red LED
- 5 x 5mm Yellow LED
- 5 x 5mm Green LED
- 4 x Tactile Switches
- 1 x Buzzer Module

DUINOTECH LEARNING KIT - PERFECT FOR BEGINNERS

Looking to get into Arduino® but don't quite know where to start? We have specially selected the components in this kit to allow an easy entry into the world of Arduino® and to work with the examples included with the Arduino® IDE. There are many resources online to teach how the Arduino® software and hardware interact. This kit is also compatible with the full range of Duinotech shields and modules, which can be used to extend your Arduino® experience.

Includes:

- 1 x Uno Main Board with USB Cable
- 1 x Breadboard
- 1 x Jumper Wires
- 1 x Servo Motor
- 1 x LDR Light Sensor Module
- 1 x RGB LED Module
- 1 x Joystick Module

Audio & Sound:

People are accustomed to communicating with sound, and it makes sense for our Arduino® to do the same thing. From generating a warning simple tone or responding to a noise through to playing back a recorded message, there are a variety of Arduino® modules and shields for making and detecting sounds.

ACTIVE BUZZER MODULE

Use this module to generate sound from your Arduino®; libraries are available to produce different tones and frequencies.

Ultrasonic Theremin Project With Arduino®

This project is ideal for the musically inclined. Just like a traditional Etherwave-Theremin, this theramin plays back samples and modulates them depending on the distance of your hand to the sensor. This simple project doesn't need many parts to get its sound because it uses a few of the special hardware features of the ATMEGA 328p chip in the Uno to do most of the work. There is some soldering needed in this project.

OK, WHAT IS A SHIELD?

The Arduino® was originally designed by the Italians, and Italians being Italians have some weird names for things.

A word that you will hear a lot on these pages is SHIELD. For the purposes of Arduino, a shield is not a thing to protect you in a swordfight, it's a description for a device that will go with another Arduino® device. It could be a temperature sensor, a music generator, or even a Wi-Fi adaptor, etc. Sometimes the word "Module" is used as well. Both terms have an interchangeability about them.

Wi-Fi/Network/Computer:

You might think it's a bit of a stretch to put an Arduino® in the same category as a computer, but with the right modules and shields, you can almost be on the same level. With a Wi-Fi or Ethernet connection, your Arduino® can be serving up web pages or communicating over great distances. Add a USB host shield, and connect a keyboard or mouse, and you've got an easy to use interface for your next project.

LOW COST LONG RANGE DATA COMMUNICATIONS

LoRa™ is a powerful new technology enabling secure wireless data communications over long distances even several kilometres without the need of a mobile GSM network. LoRa™ can be used in many outdoor or indoor applications, such as building automation, weather monitoring, irrigation systems control, smart metering, smart cities, and much more. For more information about LoRa™ visit www.lora-alliance.org

LONG RANGE LORA SHIELD CAT. XC4392

The Arduino® Compatible Long Range LoRa™ shield turns your Arduino® into a LoRa™ node capable of transmitting and receiving data over long distances, even several kilometres, without the need of a GSM network. The perfect solution to your remote sensor and control projects. An external antenna is included.

- Compatible with 3.3V or 5V I/O Arduino® Board
- LoRa™ frequency Band: 915MHz
- Low power consumption
- Includes external Antenna (via I-Pex connector)

LONG RANGE LORA GATEWAY CAT. XC4394

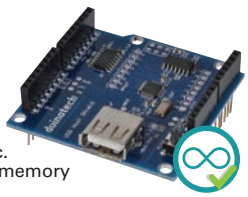

The Long Range LoRa™ Gateway allows you to connect several remote wireless LoRa™ devices, such as sensors, switch and control nodes to an IP network or the Internet, via Wi-Fi or Ethernet. A USB host port allows the gateway to be connected to a 3G/4G network using an external modem (not included).

- Internet connection via LAN, Wi-Fi
- USB host port (for 3G/4G modem connection)
- Built-in web server
- Managed by Web GUI, SSH via LAN or Wi-Fi
- Support Wi-Fi AP, Client or Ad-Hoc(Mesh) mode
- 9 x Digital, 7 x Analogue I/O, 2 x PWM, 1 x I2C
- Arduino® IDE compatible. Easy to program
- LoRa™ frequency band: 915 MHz

RTC Power Point Timer With Arduino®

Using Arduino® to control a 240V appliance but don't want to get zapped? Well then, here is your solution. Building on the simplicity of the Arduino® Clock, we've developed a project that interfaces to our MS6148 Remote Controlled Mains Outlet using a 433MHz transmitter and adding some extra code, gives you a mains timer with the following features:

- Switch on/off appliances with a minute of resolution
- Keeps time during power off
- Programme up to 99 timers
- Can be set for any or all days of the week, weekdays or weekends
- Can be set to turn single channel or all channels on or off
- Manual control of transmitter for setup and troubleshooting

And being Arduino®, there's nothing to stop you taking the code apart and adding your own features.

RF TRANSCEIVER MODULE

This module adds a versatile 433MHz radio to your duinotech project. Capable of transmitting and receiving over a wide frequency range, these modules allow two-way wireless communication between duinotechs. Controlled via SPI. Prewritten libraries available.

- Operating Voltage: 1.9-3.6VDC
- Frequency Range 433/898/915MHz
- Maximum Data Rate: 50kbps (with error correction)
- RF output power: 13dBm(20mW)
- Connection protocol: SPI
- Includes antenna
- Dimensions: 32(W) x 19(L) x 19(H)mm (Excluding antenna)

Power/Voltage Conversion:

Getting power to your Arduino® project is fairly important, and will probably need extra components if you want to take what you're building beyond the reach of the USB cable on your computer. From charging batteries to converting between systems running off different voltages or even getting power to your breadboard, you'll find something to help amongst the modules below.

LOGIC LEVEL CONVERTER MODULE

While most of the modules used in the Arduino® world are 5V logic, some are 3.3V. And unfortunately, connecting them directly often results in "letting out the smoke!" This little module is the answer. Provides two bi-directional channels to safely marry 3.3V with 5.0V. Drops straight into solder-less breadboard or can be soldered into your own PCBs.

- Two bi-directional channels
- 12-pin DIL package
- Dimensions: 35(W) x 31(D) x 21(H)mm

LITHIUM BATTERY CHARGE MODULE

This tiny module charges a single lithium cell from a 5V supply. Ideally paired with XC4512 DC-to-DC Converter Module to create a device that runs on a single lithium cell and recharges by USB. Output via solder tabs, Input is either via solder tabs or a mini-USB port.

- Input voltage 4.5V-5.5VDC
- Default charge rate: 1A
- Full charge voltage 4.2V
- Charge state LEDs
- Dimensions: 27(L) x 19(W) x 5(H)mm

Note: Batteries not included.

5VDC BOOST MODULE

This module is capable of providing a stable 5V, from a single Li-Po or two Alkaline cells. Input is via two solder pads, output is via a female USB socket.

- Input Voltage Range: 2.5-5VDC
- Output Voltage: 5VDC
- Dimensions: 34(L) x 16(W) x 8(H)mm

- Input voltage: 4.5 - 35VDC
- Output voltage: 4 - 34VDC adjustable
- Maximum output current: 2.5A

- Output from 5V-56V
- Input range 3.5V-35V
- Max 2A input current without heatsinking
- Solder terminals
- Cannot be used to reduce voltage

Motor/Power Control:

Practically all motors use more power than any of the pins on Arduino® Main Board can supply, so we need to use a Motor Control Shield or Module to interface. Most motors also operate off a voltage different to 5V, and many of these Shields and Modules will provide regulation of higher input voltages down to 5V for your Arduino® main board as well. Of course, these boards aren't limited to just driving motors, they are suitable for many power control applications.

L293D MOTOR CONTROL SHIELD

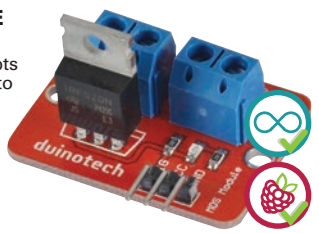

This versatile board has 2 x 5V servo ports connected to the Arduino® high-resolution dedicated timer to ensure jitter-free operation. It is also capable of driving up to 4 bi-directional DC motors with individual 8-bit speed selection, or up to 2 stepper motors with single/two/interleaved steppings.

- 5V to 16VDC
- 4 H-Bridges: per bridge provides 0.6A (1.2A peak current) with thermal protection
- 2 external terminal power interface

When connected to an Arduino®, this impressive MOS driver module accepts Pulse Width Modulated (PWM) input to drive 24VDC loads. Compatible with both Arduino® and pcDuino®, making it perfect for many projects such as lighting, DC motors, pumps and solenoid.

- 3.3V & 5V DC operation
- Output load voltage 0-24VDC
- Output current 5A

- Maximum output current: 4A
- Motor voltage: 3-30VDC
- Screw terminals for easy connections
- LEDs show power and output status
- Requires six digital pins
- 4 mounting holes

RELAY BOARDS

These handy relay modules provide the easiest way to use your duinotech to switch real world devices. Available in one, four and eight channel versions, these modules can switch up to 10A per channel. Includes back-EMF protection and LEDs so you can easily see the state of the outputs. The four and eight channel versions even have optical isolation to protect your duinotech. While the one channel version operates directly from 5V.

- Status LEDs show channel status
- Active High logic
- Screw terminals for easy connection to relay contact.
- SPDT Relays
- Current Ratings: 10A @ 250VAC, 10A @ 30VDC
- Four mounting holes on each module

USB INTERFACE FOR JOYSTICK AND BUTTONS

If you're building your own arcade game, whether it's with a PC or Raspberry Pi, you'll need a joystick. This interface board allows you to easily interface joysticks like our SM1052 and arcade pushbuttons like SP0662, SP0664, SP0665, SP0666 and SP0669 into any device that can connect to a USB joystick. It could be used for arcade games, flight simulators or anything that works with a USB joystick.

- Up/Down/Left/Right inputs
- 12 button inputs
- Detachable USB lead for fitting through small holes
- Includes 10 pluggable leads that connect directly to spade terminals on SM1052, SP0662, SP0664, SP0665, SP0666 and SP0669

HEARTBEAT SENSOR MODULE

NEW

An easy way to provide pulse rate measurements from a person's finger, earlobe or wrist to your electronics project. At the heart of the board is the MAX30102 IC, which is an integrated pulse oximeter and heart rate monitor sensor. Data from this sensor is communicated to your microcontroller using standard I2C communications. Other features include ambient light suppression and low-noise circuitry for optimum performance. The tiny board measures just 20 x 15mm, and runs from 1.8V to 5V (optional 1.8V or 3.3V IIC voltage switching onboard).

SPECIFICATIONS	XC3740
LED Peak Wavelength	660nm/880nm

LED Tester With Arduino®

Finished Project

A handy little tool that can help you out if you work with LEDs, especially if you are always trying to work out the right resistor to make them work. The idea has been inspired by Dave Cook's model at http://robotroom.com/LED-Tester-Pro-1.html. We have written the code from scratch to suit the parts we have available in the duinotech range.

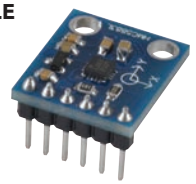

- Adjustable test current
- Displays LED Forward Operating voltage
- Calculates ideal resistor & gives Cat. number for a design voltage and current
- Only 3 discrete components to be soldered
- Detachable shields - pull it apart & use for other projects

See step-by-step instructions at: jaycar.co.nz/diy-arduino-led-tester

Compass/Orientation/GPS:

We pretty much take for granted many of the sensors that are on our phones these days- compass, GPS, accelerometer, but did you know that you can also add similar features to your Arduino® projects? You could use a compass sensor to help guide your robot or an accelerometer to keep your Arduino® controlled gimbal facing upright, or even provide a tilt-based user input device for next project.

3 AXIS DIGITAL COMPASS MODULE

This module allows you to take accurate compass bearings, no matter how it is orientated. Easily interfaced via I2C.

TRI-AXIS DIGITAL TILT SENSOR

NEW

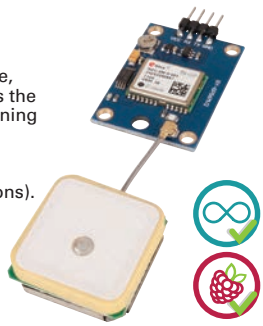

Use this high performance acceleration sensor in your project to detect direction (transverse/longitudinal), as well as free fall, pulse, and shake detection. The on-board MMA8452Q is a smart low-power, three-axis, capacitive micromachine acceleration sensor with 12-bit resolution. Users are able to set a range of ±2g, ±4g, or ±8g, which can output high-pass filtering data and non-filtered data in real-time. An embedded function can also be used to generate an inertial wake-up interrupt signal, which enables MMA8452Q to maintain a low-power mode in the static state while monitoring the event.

- 12 bit and 8 bit digital outputs
- I2C digital output interface (up to 2.25MHz with 4.7kΩ pull-up resistor)
- Two programmable interruption pins applied to six interruption sources
- Three motion detection embedded channels: free fall detection, pulse detection, shaking detection
- Direction (transverse/longitudinal) detection with setting lag compensation
- Automatic arousal and auto-dormant ODR can be automatically altered
- High-pass filtering data can be exported in real time
- Dimensions: 35(L) x 20(W) x 7(H) mm

DUINOTECH GPS RECEIVER MODULE WITH ON-BOARD ANTENNA

NEW

Add GPS positioning down to a 2.5m accuracy to your next project with this compact GPS module. Based on the NEO-7M that supports the NMEA standard protocol output, and features built-in flash to save settings after power-off, without an external EEPROM. An onboard ceramic antenna means you don't need an external one, however, an SMA connector is also attached if you wish to attach your own antenna to improve reception. The micro USB interface enables you to debug the GPS module via a data cable, and a reserved serial port interface for USB-to-serial port modules or external MCU enables you to easily receive the GPS data.

- On-board signal LED indicator
- 3.3V or 5V operation
- Onboard & external antenna options
- 9600 Baud Rate
- 1Hz Output Frequency
- Dimensions: 53(L) x 26(W) x 15(H)mm

Please note: When connecting an external antenna the C2 capacitor on the module needs to be removed. If the internal and external antennas are used together they will interfere with each other, affecting positioning.

NFC & RFID:

RFID technology is one of those things that is everywhere around us, including security systems, bank cards, public transport cards and even passports. Using a RFID module or shield you can read (and write to, depending on how secure they are) RFID cards and interact with NFC enabled items like mobile phones.

DATA LOGGING SHIELD

Extremely easy to set up. Use this datalogging shield to store your data to files on any FAT16 or FAT32 formatted SD card, or have it to be read by any plotting, spreadsheet or analysis program. All data stored is timestamped in real-time so you know precisely what happened when! Uses a 3.3V converter to avoid damaging your SD card. Includes a 3V button battery.

Clock & Timing:

If you have a project that needs to keep time, even when your Arduino® is powered down, then check out these modules and shields. Sporting a 'Real Time Clock', they have a small battery backed IC which keeps track of the seconds, minutes, hours, days and even years. Operation times of a year can be expected – even longer if the project has external power.

REAL TIME CLOCK (RTC) MODULE

This tiny little module will keep accurate time using the supplied CR2032 button battery. Great to use with all of your Arduino® projects that require the use of the date and time such as clocks, data-loggers and timers.

- Using a 24C32 32k EEPROM
- Supplied with a CR2032 battery
- Read and write functionality
- Usage time approx. 1 year fully charged
- Dimensions: 28(L) x 28(W) x 7(H)mm

Magnetic Hall Effect:

You'd be surprised at how useful a magnetic sensor can be, especially if you want to sense something without touching it. The duinotech range of magnetic sensors spans simple proximity sensors to detect the presence of a magnet to three dimensional compass sensors for detecting magnetic field directions and strength.

HALL EFFECT SENSOR MODULE

Sense magnetic presence, rotating wheels and magnets, door sensors and any other magnets near this device.

- Output turns on at 30Gauss(3mT) and off at 10Gauss(1mT)
- Operating Voltage: 4.5 - 28VDC
- Schmitt-Trigger output

Matrix Display & Control:

Matrix displays offer a cost effective way of creating large signage. The matrix display modules can be combined into multiple rows and columns to create a display as large as you need. Choose from the large range of monochrome or colour matrix display modules, microcontroller driven drivers, and any one of the Arduino® microcontroller boards and you can create an impressive scrolling text and image display board.

8 X 8 LED DOT MATRIX MODULE

A 64 x red LED matrix, this module is easily controlled with the LedControl library. Display your own custom characters, or use multiple modules together to make a scrolling display.

- Operating Voltage: 5VDC
- Protocol: SPI
- Chipset: MAX7219

RGB LED CIRCULAR BOARD

NEW

Add dazzling circular-shaped LED patterns to your next project or costume with this addressable RGB LED ring module. It measures 72mm in diameter and features 24 x RGB LEDs with 256 brightness levels. Runs from 5V, features reverse polarity protection, and has onboard WS2812 circuitry that allows you to control it with just one data input. A data output enables you to easily cascade multiple displays.

Specifications:

- Power: 5V
- Brightness Levels: 256
- Colours: 16,777,216

8 X 5 RGB LED SHIELD

NEW

Create dazzling LED displays with this RGB LED Matrix Shield that simply plugs directly onto your UNO compatible board. The built-in driver IC and 12V programmable constant current circuitry ensure each LED can reach full brightness and colour. The data transfer protocol uses single NZR communication mode. After the pixel power-on reset, the DI port receives data from controller. The first pixel collects initial 24-bit data then sends it to the internal data latch.

Can be driven in parallel or serial and takes less than 0.1s to light up all 8 rows/columns so a dynamic display can be achieved in either connection.

Includes:

- Chipset: MAX7219
- Electrolytic cpaacitor: 10uF/25V
- Resistor: 10K
- Capacitance: 0.1uF
- Headers and receptacles

This highly visible display module uses E-ink technology to display black, white, and red text and graphics on the 200 x 200 pixel screen. The screen uses very little power to refresh, and retains the last displayed content for a very long time when power is removed. The screen also reflects ambient light, which avoids the need for a backlight, and makes it easy to read under bright sunlight. It has a wide viewing angle over 170°, works from 3,3V, and communicates with your favourite microcontroller using its SPI interface.

- Black and White and Red Display

Displays:

One of the most useful things a device can do is communicate information to us- our smartphones wouldn't be much use without their screens! Your Arduino® is much the same, and most projects require some information to be communicated about the sensors they're reading, or how they're doing at the little task we've set them to. Here's a guide to the many different displays that make up the Arduino® range, and some tips on choosing the best one for your application. Whether it be reading out a single number or some brief words, or even a complex graphical display, there's one to suit your project.

3.5 INCH TOUCHSCREEN WITH ENCLOSURE & STYLUS

LED & Laser:

Sometimes when you need to provide output from a project, a full-on display is too much, or takes up too much space. The modules below are great if you want to your sketch to show what's going on with a simple 'GREEN IS OK' type of indication. If you want to shine some light and a basic LED is not enough, look at the higher powered XC4468 LED or XC4490 Laser modules.

RGB LED MODULE

Using a 5050 RGB LED, by adjusting a PWM signal on the three primary colours the user can gain the full colour spectrum. This tiny module can be interfaced with a variety of microcontrollers.

Obstacle Avoidance & Distance Detection:

What good is a robot if it can't gather information about its surroundings? This collection of modules is ideal to add to a robot or roving autonomous project. You could use an array of XC4442 Ultrasonic Sensor Modules to map out a robot's surroundings and have the Arduino® plan its next movement, or use the XC4611 Triple Reflectance Module to sense the surface underneath your robot, or even create a space age musical instrument like the Ultrasonic Theremin.

PIR MOTION DETECTOR MODULE

A pyroelectric infrared PIR motion sensor is a handy addition to any Arduino® project. Wide operating range and delay times changeable via two potentiometers giving this module versatility to the user, it is a must for any security application.

- Working voltage: 5-20VDC
- Quiescent current: 65uA

Data Storage:

An Arduino® has a fairly limited amount of storage (certainly compared to the terabytes of data that can be stored on some hard drives), so the shields and modules below can be used to provide an extra place to log data or store resources for your sketch. You might even use one of them to write to a removable card to make it easy to get data to and from a computer.

DATA LOGGING SHIELD

Extremely easy to set up. Use this datalogging shield to store your data to files on any FAT16 or FAT32 formatted SD card, or have it to be read by any plotting, spreadsheet or analysis program. All data stored is timestamped in real-time so you know precisely what happened when! Uses a 3.3V converter to avoid damaging your SD card. Includes a 3V button battery.

For Microcontrollers
Temperature/Environment:

There's no shortage of Arduino® weather station projects online, and with the duinotech range of sensor modules, you can create your own fully featured version. Alternatively, if you just want to check if the plants need watering or know if the sun is shining or how hot it is outside, we've got you covered with the range here.

PHOTOSENSITIVE LDR MODULE

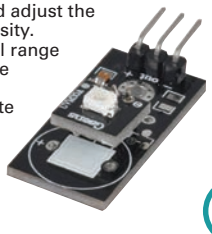

Measure light levels with this sensor module. This module uses a light dependant resistor to produce an output voltage that varies with light level. Connect it straight into your duinotech or other Arduino® compatible board to build a night/day sensor, a sun tracker or combine it with our laser module XC4490 to make a laser trip wire.

- Operating voltage: 3-5VDC
- Includes breakout cable
- Dimensions: 29(W) x 22(D) x 10(H)mm

	XC4446	$7.30	$6.50	$5.80

ULTRAVIOLET SENSOR MODULE

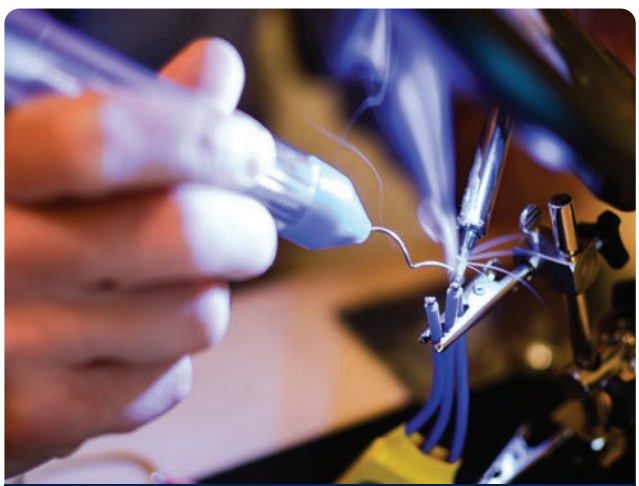

This module will measure the UV light and adjust the output voltage depending on the UV intensity. Capable of measuring over a wide spectral range of 200nm-370nm, this module is a valuable addition for weather station projects or in any place which require stable and accurate measurement of UV light.

- Working Voltage 3-5VDC
- Output voltage 0-1200mV
- Current 0.06-0.1mA
- Response wavelength 200-370nm
- Working temperature: -20 to 85˚C

COLOUR SENSOR MODULE

One of the Arduino® projects that everyone should try is the coloured lolly sorter, and you can't build one of these without a colour sensor. The Colour Sensor Module can give individual greyscale, red, green and blue colour levels with just three IO pins, and features bright white LEDs for even illumination.

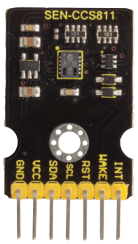

- Mounting holes for easy project building
- Can be set to read red, green, blue or greyscale levels
- Very fast response times with PWM output
- Optimal detection distance 1cm

DUINOTECH AIR QUALITY SENSOR WITH CO2+TEMPERATURE

NEW

This air quality sensor can detect a wide range of volatile organic compounds (TVOCs), including equivalent carbon dioxide (eCO2) and metal oxide (MOX) levels. It also features a 10K precision 1% NTC thermistor, which can be used to measure the specific temperature in the environment. Equivalent carbon dioxide (eCO2) is measured in the range of 400 to 8192ppm (parts per million), and various volatile organic compounds (TVOC) ranges from 0 to 1187ppb (parts per billion). Includes 3mm mounting holes for fixed applications.

- Measures eCO2 & MOX levels
- Ultra-low power consumption
- CCS811B chip
- Precision NTC thermistor
- 0-1187ppb TVOC Measurement Range
- 400-8192ppm eCO2 Measurement Range

DUINOTECH DUST SENSOR MODULE

NEW

Use this air quality sensor to detect the amount of dust in the air. The small board has a Sharp GP2Y1014AU optical sensor onboard that uses an infrared LED and photoelectric transistor to detect reflected light from dust in the air. Fine particles as small as 0.8µm in diameter can be detected, including smoke particles, such as cigarette smoke.

- Ultra-Low Power Consumption
- Analogue Voltage Output is Linear with Dust Density
- 0.5V/(0.1mg/m3) Sensitivity
- Detects Particles as Small as 0.8µm
- 0.9V Reference Voltage of Clean Air

RAIN SENSOR MODULE

Add another dimension to your Arduino® weather project. This compact module can be used to detect rain, and can be separated into a sensor and control board to keep the important bits dry.

- 5V supply needed.
- Adjustable sensitivity
- LED indicator
- TTL level output can drive 100mA, enough for a small relay or buzzer
- Sensor: 50 x 35 x 1mm

For Microcontrollers
Prototyping & Breakout:

The following parts are ideal for taking that design that you've squashed onto a breadboard, and making it into something more permanent. With prototyping space, you can solder individual components or even whole modules together to create a custom shield that is much more robust.

PROTOTYPING SHIELD FOR DUINOTECH - MEGA

This shield gives you plenty of room to prototype your latest MEGA project. The stackable shield provides access to all of the MEGAs pins and plenty of solder pads to prototype on. A small solderless breadboard is included for fast prototyping.

- Dimensions: 106(W) x 56(L) x 19(H)mm

BREADBOARD LAYOUT PROTOTYPING BOARDS

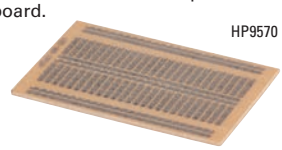

A prototyping board that lets you transfer your breadboard design without having to rework it. Includes five holes on each side per row and power rails running the length of the board.

Two sizes to choose from:

SMALL:

- 25 rows
- 400 holes
- Similar layout to PB8820 Breadboard
- 73mm x 47mm x 1.4mm

Uploading & Custom:

If you feel like there isn't quite an Arduino® main board or module that suits what you're trying to build, or your stack of shields is just too big, the parts below can help you make the next step towards custom building your own board. The various programmers will also allow you to explore the world beyond what the default Arduino® IDE and bootloaders offers. Did you know you can even use the XC4464 USB to Serial Adaptor to program the XC4614 Wi-Fi Shield as though it was a stand-alone Arduino® board?

AVR ISP 10 PIN TO 6 PIN ADAPTOR

Adaptor from 10pin ISP header to 6 pin ISP header as found on Arduino® boards.

- Use with an ISP programmer to update bootloaders or reflash bricked boards

Wheels & Chassis:

Making things that move is really exciting, but it can also be challenging to build. We make it easy by providing all the bits and bolts you need to make solid and rugged moving vehicles. Combined with other components, such as the Ultrasonic proximity sensor, motor driver and any one of the Arduino® range of boards, and your next weekend project could be an impressive intelligent buggy.

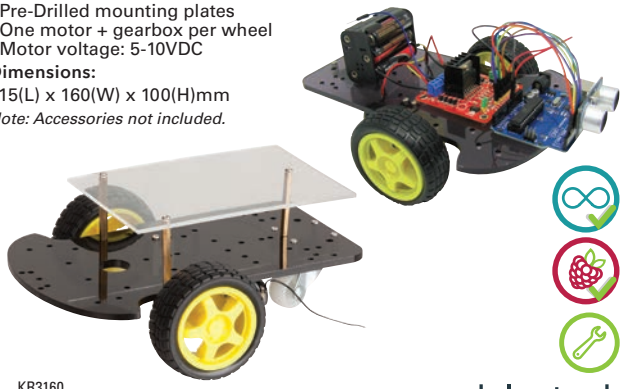

2 WHEEL DRIVE MOTOR CHASSIS ROBOTICS KIT

These two kits make creating your own robot easier than ever. The kit includes motors, wheels, tyres and two pre-drilled mounting plates. These kits are ideal for an Arduino® or pcDuino robotics project.

- Pre-Drilled mounting plates
- One motor + gearbox per wheel
- Motor voltage: 5-10VDC

Dimensions:

Motors & Gearboxes

LOW COST MOTOR / GEARBOX SET

This unit comes complete with a 3V 12,000 rpm motor*. It can be stepped down (with the consequent torque multiplication) up to six times as shown below. The motor is fitted with a 12 tooth pinion and the small gear cluster is 12 tooth. The large clusters are all 48 tooth. Not all gears need to be used. The intermediate output shafts are hardened steel, 3mm dia. Also supplied are press fit pulleys. The whole assembly snaps together. Hand tools are almost unnecessary.

**Motor can also be varied by changing input voltage but this lowers torque.*

- Motor cage - 40(H) x 25(W) x 28(D)mm
- Gearbox cluster - 40(W) x 25(D) x 30(H)mm
- Main & intermediate shafts - 63 x 3mm Dia. Supplied in kit form

Note: All DC motors and motor gearboxes can change speed to a considerable amount by changing voltage within specified limits. This reduces need for special gear ratios for your application.

HAND CRANK DYNAMO WITH GEARED MOTOR

Here's a great gadget that will allow you to add Green power to any of your projects. What we have here is a hand crank dynamo, pre-assembled but easily modified to be retro-fitted to existing equipment or added to new projects. Crank the handle and the specially designed gear set will operate the motor and produce a DC voltage which can be used for a variety of low current uses (charging batteries, lights etc.). Crank slowly and the voltage is low, crank harder and the voltage is higher. Made from plastic - easy to re-work to fit your projects.

Tamiya Power Transmission Components

SINGLE MOTOR 4 SPEED GEARBOX / AXLE ASSEMBLY

This brand-new Tamiya product features an all plastic moulded gearbox and motor casing. Included is a FA-30 type 3 volt electric motor, axle with 2 crank arm and tube of grease.

These gear ratios are user selectable:

WORM DRIVE SET

This set consists of a worm gear 24mm long x 12mm dia with an 8 turn worm screw. The worm has a 2.8mm axle hole which could probably be carefully drilled out to a larger diameter. The spur gear is 1/4" (6.35 wide) and 1 & 5/8" (41.2mm) diameter with a number of regular pitch-concentric 2.8mm holes across the face of the gear including one dead centre. It would be drilled out to accommodate a larger shaft. This gear has 40 teeth. Both are moulded in an engineering grade plastic.

UNIVERSAL AMPLIFIER MODULES

1 CHANNEL 3.5 WATT

Ideal as a bench-test amplifier for audio sources, or even as a mono headphone amplifier, this small audio amplifier can be operated from 4.5 V up to 12 VDC. Use two for stereo.

SPECIFICATIONS	AA0223 - 3.5 WATT
Output Power	3.5 W (max)
Operating Voltage	4.5 to 12 V
Speaker Impedance	4-16 ohms
Input Sensitivity	< 80mV
Frequency Response	40Hz-20kHz
Dimensions	30 x 25 x 15 mm

12 WATT

Small audio amplifier module is suitable for a number of purposes and has a range of suitable input voltages and load impedances.

SPECIFICATIONS	AA0225 - 12 WATT
Operating Voltage	6V - 16V, 800mA (max)
Output Power	12W (max) into 4-16 ohms
Frequency Range	40Hz-20kHz

UNIVERSAL PREAMPLIFIER MODULE - 1 CHANNEL

For microphones and diverse uses. This mini-module is simply connected between a power amplifier and a weak signal source (e.g. microphone).

SPECIFICATIONS	AA0220
Operating Voltage	9 to 24VDC
Frequency Response	20Hz to 20kHz
Input	2-50mV
Output	200mV - 5V

MULTI-VOLTAGE REGULATED ADAPTOR MODULE (STEPDOWN)

Ideal for when you need a reliable voltage source for a portable CD player or similar battery-powered device. Another use for this adaptor is for a peripheral computer power supply to power external Blu-Ray drive, powered speakers, modems, etc. Plug the input into your PC's internal power supply cable and get selectable regulated voltage out from 3 to 15VDC*. Output current capability is around 1.5 amps.

- Dimensions: 63(L) x 24(Dia.)mm

*Note: *Input voltage MUST be larger than the required output voltage.*

3 AMP 24V TO 12V REDUCER

Many trucks and boats use 24V systems. These converters will allow you to run a reasonably sized 12V car-stereo or other devices from a 24V supply. Heatsink (not included) should be used for superior performance.

SPECIFICATIONS	AA0266
Short-Circuit Protection	Thermal cutout
Input Voltage	24 to 26VDC
Output Voltage	12VDC
Maximum Load	3A
Dimensions	135(L) x 50(W) x 24(H)mm

DC TO DC CONVERTER MODULES

Converter modules that can step-up or step-down voltages so you can power your devices where a different power source is present. This could include powering 12VDC devices from a 6VDC motorbike battery or to run 12VDC devices from a 24VDC battery found in trucks. They feature protection against short-circuits, overload and over-heating.

BATTERY DISCHARGE PROTECTOR

Protects your car battery from total discharge by switching off appliances before the battery voltage drops to an unrecoverable level. When battery voltage is reestablished by recharging, it switches appliances on automatically. The interrupting voltage is adjustable from 10.4. to 13.3 VDC. Essential low-cost insurance if you have a dual battery setup in a boat, 4WD, RV or for an alternative energy system such as solar or wind power.

SPECIFICATIONS	AA0262

SPEEDO CORRECTOR MODULE FOR CARS

When you modify your gearbox, diff ratio or change to a large circumference tyre, it may result in an inaccurate speedometer. This module alters the speedometer signal up or down from 0% to 99% of the original signal. With this improved model, the input setup selection can be automatically selected and it also features an LED indicator to show when the input signal is being received.

FREQUENCY RELAY MODULE FOR CARS

It uses a standard tacho, road speed, or many other pulse outputs to switch a relay. The switch frequency can be set to trip when it is rising or falling, and it features adjustable hysteresis (the difference between trigger on/off frequency). You could configure it to trigger water spray cooling on deceleration, shift light activation, adjustable aerodynamics based on speed, intake manifold switching and much more.

12 VOLT TWILIGHT SWITCH

This handy module senses the ambient light level and will switch external devices on/off at night and in the morning. The unit operates from 12VDC and its changeover contacts are rated at 25VDC @ 3A. Power consumption is only 2mA so it is ideal for automotive or battery-driven applications. Use it for garden lighting or security applications etc.

12VDC 8A DIMMER/MOTOR SPEED CONTROLLER

DC speed controllers are ideal for slowing down pumps and motors or dimming lights, but some use resistance circuits or rheostats wich are very inefficient. The pulse width modulation (PWM) used in this controller allows you to vary the output from 0 to 100% while maintaining a very high efficiency. When used on motors this ensures full torque is available at very low speed and the motor won't shudder at start-up. Operates on any 12VDC system and capable of controlling devices rated at up to 8 amps.

- Internal circuitry is fully potted & the control potentiometer is splash proof making this suitable for marine environments and other harsh conditions

MAINS MOTOR & LAMP CONTROLLER

This module can be used for various mains rated applications including lamp dimming, soldering iron temperature adjustment and universal commutator motor speed control. Features a 600W continuous and 1200W peak loading capacity with adjustable potentiometer control. Please note: fluorescent, quartz and energy saving lamps, and motors with starting capacitors should not be used with this module.

- Knob included.

SPECIFICATIONS	AA0346
Continuous Power	600W
Maximum Power	1200W

PROGRAMMABLE INTERVAL 12V TIMER MODULE

An easily programmed low cost electronic timer. It operates from 12VDC, with low current drain: <50mA when relay is on, <5mA when relay is off. It is link programmed for either a single ON timing period, or continuous ON/OFF cycling and can be link programmed for any of 48 different time periods, separately for ON time and OFF time. Selectable periods are 1/2/3/4/5/6/7/8 /10/20/30/40/50/60/70/80 seconds, minutes and hours. It may be restarted at any time simply by pressing reset push button.

For Microcontrollers

Linker Modules & Accessories:

The Linker range is based around a series of Arduino® compatible modules, shields and cables that make prototyping easy - so easy that we'd recommend that even primary school children would be able to use them. With the Ardublocks Arduino® IDE add-on, even programming becomes as simple as drag and drop.

The Linker Base Shield attaches to the Uno, Mega or Leonardo boards, and allows any of the Linker modules to be plugged in. No need to worry about getting connections reversed and blowing up components - they can only be plugged in one way. There's over twenty different modules in the Linker range, and because the Linker Base Shield has standard Arduino® headers, you can even add any of our duinotech modules if you need to go beyond what Linker can offer.

LINKER LEDS FOR ARDUINO®

Linker LED Module is designed for beginners of Arduino® to monitor controls from digital ports. It can be mounted to your project easily and used as pilot lamp for power or signal. Its brightness can be adjusted by potentiometer.

DUINOTECH METRONOME

DUINOTECH METRONOME

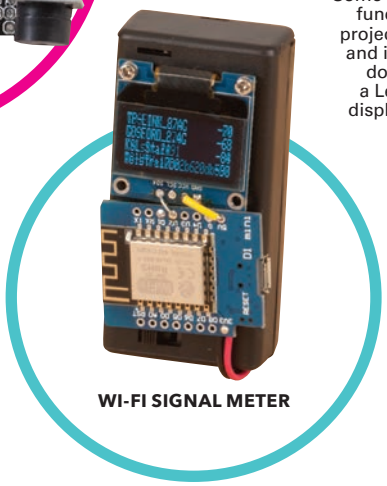

We usually think of soldering irons, pliers and oscilloscopes when we think of electronic tools, and while this project may not be useful to the electronics enthusiast, we think it's a good way of showing how Arduino® based tools can be useful in other fields- in this case for musicians. The Duinotech Metronome has adjustable tempo between 20 and 240bpm, and can be set to accent anywhere between every beat and every eighth beat. It also gives a display of the classical name for that tempo.

jaycar.co.nz/metronome

DUINOTECH FM RADIO

Some of the Arduino® compatible modules boast amazing functionality, such as the FM Radio Module used in this project. We've had the FM Radio Module for a while now, and it was only inevitable that someone would say 'Why don't you make an FM radio project?'. Here it is, using a Leonardo main board, one of our XC4629 colour LCD displays to show status information, and a pair of tactile switches for controls.

WI-FI SIGNAL METER

WI-FI SIGNAL METER

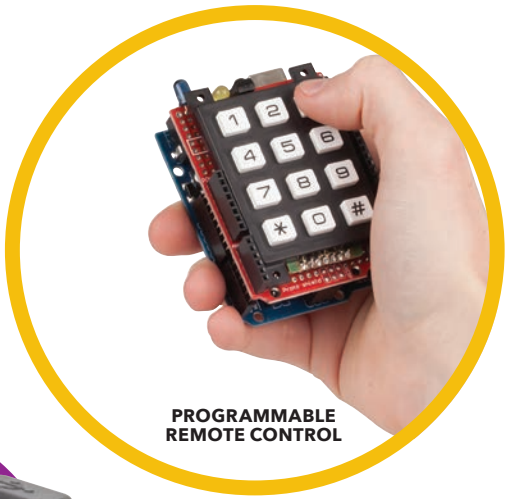

Check for any nearby Wi-Fi signals, see how well the connection in your workshop is going, or see if there's any free Wi-Fi hotspots when you're out and about. Uses the 8266 with a screen attached, and powered from just 2 x AA batteries.

PROGRAMMABLE REMOTE CONTROL

PROGRAMMABLE REMOTE CONTROL

One of the really great things about the Arduino® community is how many extra features they have added to the IDE. In this project, we'll be using a library which has been created by one of the members of the Arduino® community, and has been added to by other members. It's a Programmable Remote Control, which is perhaps similar to a 'Learning Remote Control', except that it can give a lot more information about the codes it is sending. Check out the library documentation for the protocols that are supported. Some soldering required!

You'll also need some offcuts of wire to build the project- we used some coloured ribbon cable offcuts to help identify which wire is which.

jaycar.co.nz/prog-remote-control

ANDROID PHONE NOTIFIER

ANDROID PHONE NOTIFIER

You might be surprised to find how easy it is to control an Android phone with an Arduino. We're using a Leonardo board to emulate a keyboard, and use this to send commands to the phone. In this project, we've hooked up an Ultrasonic Sensor Module as the trigger, and then commanding the phone to send a text message with the distance measured if something is detected too close, but like any Arduino® project, you can customize it as much as you like.

IOT WIRELESS LED SIGN

IOT WIRELESS LED SIGN

Decorate your shop window, bedroom door or loungeroom. Mount the dot matrix display somewhere in your house and connect to it through the same network. Using a custom HTTP server, you can access the sign through its network address and change it to display a clock, text, or anything else that you might want.

Programming, Wi-Fi, LoRa Projects:

GPS WORLD CLOCK

While most phones have the ability to display the local time throughout the world, you may not always have access to an internet connection. With our World Clock, all you need is a GPS signal.

jaycar.co.nz/gps-world-clock

DUINOTECH UNO PROGRAMMER

The idea of using an Uno to program an Uno sounds a bit meta, but with a USB Host Shield, we managed to program our Uno's. In fact, the programming only takes about three seconds per board, which is even faster than we could unpack them. Some soldering required.

jaycar.co.nz/uno-programmer

WI-FI EMAIL NOTIFIER

This project was inspired by one of my colleagues who wanted to be notified if his server room got too hot, but you could easily change the trigger to some other form of input, or even to simply report some data back to you at a regular rate.

The first thing you'll need to check is whether this project will work with your Wi-Fi network and email address. Most email servers are fussy about who they will accept email from, but if your email address is provided by your ISP, it will generally accept email from connections coming in through that ISP. For example, I have Virgin Mobile Broadband, and the virginbroadband.co.nz email server is happy to receive emails while I'm connected to Virgin Mobile Broadband. If you aren't sure, you can even check this with a computer before buying the components.

jaycar.co.nz/wifi-notifier

GPS SPEEDOMETER

Using our Arduino-compatible GPS module and TFT Screen, to display basic GPS information such as longitude, latitude, altitude, speed, and distance travelled from point A to B. Information are stored on an SD card which can be exported and viewed via Google Maps.

jaycar.co.nz/gps-speedometer

WI-FI WIRELESS POWER SWITCH

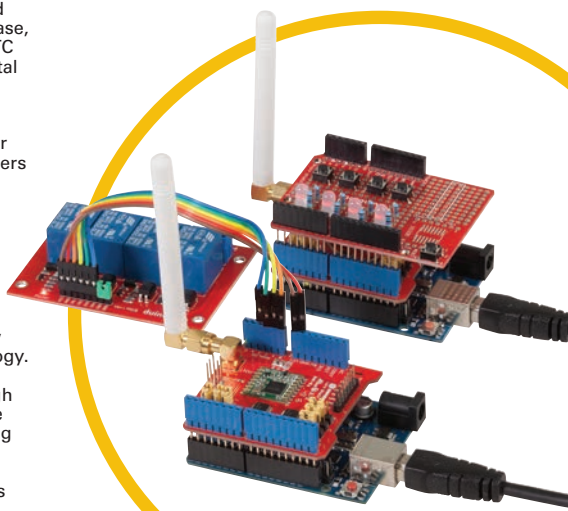

Like many of the projects that we put together, this one came about because someone asked 'can you make an Arduino® do this?' In this case, we had a request for a combination of the RTC Power Point Timer and the Wi-Fi Environmental Datalogger. We figured it sounds handy, and since everything is better with Wi-Fi, we got it working. The Arduino® serves up a basic webpage which can be viewed on a computer or phone, and clicking links on the page triggers the Arduino® to send a signal like the remote from the wireless remote.

jaycar.co.nz/wi-fi-power-switch

LORA REMOTE RELAY

We are very excited to get the chance to play with our new LoRa Shields, and test just how far we could get a signal using LoRa technology. With one of our tests, we were able to get a signal to travel about 200m, including through the corrugated iron of the warehouse and the concrete office building. We set about building a practical project that would make best use of the technology. The LoRa Remote Relay is basic- four buttons at one end and four relays at the other end. It also has LED's next to the buttons, so unlike other remote relay systems, there is feedback that the relays are operating as commanded.

Monitoring Projects

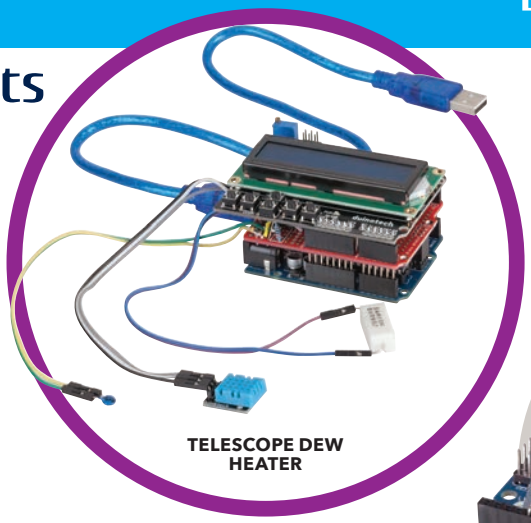

TELESCOPE DEW HEATER

This project brings together a few duinotech modules and some other parts to create a versatile tool. Inspired by the Dew Heaters used on telescopes, it senses ambient temperature and humidity to control a small heater. Not just for telescopes, but anything that needs to avoid condensation.

Features include:

- Programmable temperature setpoint
- Temperature target can be set above ambient or dewpoint
- Settings can be saved to EEPROM
- Adjustable failsafe heater output to use if sensors are faulty
- Comprehensive LCD info screen

TRAILER VOLTAGE MONITOR

One of the guys at the office here asked if I could build an Arduino® device for monitoring the voltage of the 12V battery in his trailer- as now required for registration of some trailers which have electric brakes. Here's what we built- and it's a bit cheaper than some of the offerings out there.

UV METER

This simple yet effective project will provide a way to the UV levels in your area, which is helpful to determine what level of sun protection is needed on a particular day. Readings can be displayed on the 7 segment display and are stored on the SD card for easy tracking.

jaycar.co.nz/arduino-uv-meter

DUINOTECH THERMOSTAT

Here's a project that will take you into the world beyond the basics of the duinotech Learning Kit. We're going to build a project that shows how we can use the Learning Kit with other modules, and also how to incorporate an external library to extend our programming possibilities. It's a thermostat, which is nothing more than a relay which responds to temperature. We've added some colour to it by connecting some LED's to give an indication of the current temperature.

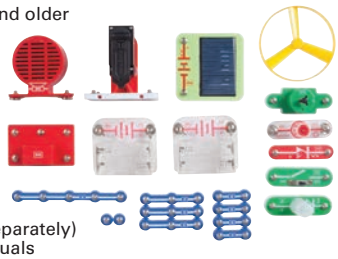

jaycar.co.nz/arduino-thermostat

WIRELESS GARDEN MONITOR

Here's a project that uses two Arduino® boards to communicate wirelessly- the first Arduino® reads a soil moisture sensor and a temperature and humidity sensor, and sends the data to a second Arduino® that displays the data in a graph and text. You can use it to monitor when your garden needs watering, or even as a basic weather station. Alternatively, you could use completely different sensors to create your own custom monitor.

Snap-On Projects & Kits:

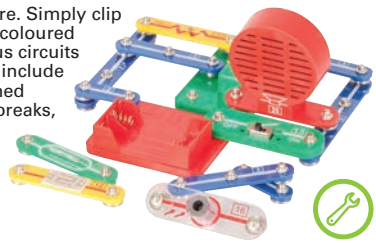

These kits allow children 6 years and older to learn about electronics whilst having fun. All of the brightly coloured parts simply snap together without any need for screws or soldering. The parts can be easily taken apart to be reused for other experiments over and over again.

- Suitable for ages 6+
- No tools or soldering required
- Powered by AA batteries (Sold separately)
- Include coloured instruction manuals

THIS BOOK ISN`T SAFE - COLIN FURZE

In the words of YouTuber and Author Colin Furze: In my 10 years making crazy inventions and madcap projects on the internet I've been inspiring people young and old to get into engineering and take up a more practical life. So with this in mind I've teamed up with Penguin to create a book for kids that will carry this inspiration and help them work up to being confident with tools and materials that is the foundation of what I do. There will be 10 projects that get progressively more challenging for you to create at home that are low cost and need only basic tools. As well as these DIY projects the book will cover some of my favourite inventions with pictures and cartoons so even those that don't like a lot of words (my younger self) can enjoy this to the max. 192 pages.

"T4" TRANSFORMING SOLAR POWERED ROBOT KIT

The basis of this kit is two moulded 'frames' of component parts reminiscent of a plastic model aeroplane kit - about 50 parts! It also has a small (40 x 25mm) solar panel, a tiny electric motor, gears, pinions, etc. It also includes decals. It can 'transform' between a T-Rex or Rhino beetle with moving legs and jaw, Robot with walking legs and moving wheels, and a futuristic miners drilling machine with moving drilling bit and wheels. You will probably need small diagonal pliers to cut out and de-flash all the plastic parts from the frame.

SOLAR POWERED 14-IN-1 ROBOT KIT

This kit has so many included parts we don't have the time to count them, certainly at least 100 or more. Notable are a solar panel, solar powered electric motor boat hull components, gears etc. This kit can be transformed into 14 different functional robots, some of which admittedly are whimsical, but the kit itself is a fantastic learning experience: Mechanical, educational, scientific & solar physics skills are exercised. Best of all the kit comes with an assembly manual that is LEGO® like in the clarity of description. The manual itself runs to over 80 pages. This kit represents sensational value and is perfect for bright kids 10+ years. (A side cutter is really required to clip all of the parts out of the moulding frames - try TH1897).

FRILLED LIZARD ROBOT KIT WITH IR SENSOR

A super smart frilled lizard with artificial intelligence. It has an infrared sensor that is programmed to 'escape' or 'follow-me'. Once the infrared sensor is activated in the 'escape' mode the robot will automatically act shocked by spreading its frill, dropping its jaw, illuminates its bicolour LED eyes and will scamper away from you until it reaches a safe place. If the infrared sensor is switched to the 'follow-me' mode using the 2 way function switch, then the robot will assess danger by bluffing the attacker (unfurling and shaking its frill). When the robot does not sense danger it will proceed to follow you like a pet lizard.

- Interactive artificial intelligence (AI)
- Two funway modes
- Infrared sensor
- LED illuminated eyes
- Requires 4 x AAA batteries
- Dimensions: 370mm long
- Suitable for ages 10+

Electronic & Electrical Projects for Kids

MINI ELECTRIC MOTOR EXPERIMENT

This simple motor model demonstrates the basics of how the magnets, armature and commutator work together in an electric motor to cause rotation. The banana plugs allow simple connection of a power source.

Removeable and reversible magnets to allow the effects of magnetic field to be seen

- Open structure to see all moving parts
- Magnetic poles marked on magnet
- Removeable armature

12-IN-1 ELECTRICAL EXPERIMENT KIT

12 different experiments to construct that demonstrate various electronic principles. Learn about static electricity, electric motors, resistors, diodes, lights, solar power and more. Kit included a manual with excellent information describing the theory and history associated with each experiment.

- Assembly time for each experiment: Approximately 10 mins
- Requires 2 x AA batteries
- Suitable for ages 8+
- Base dimensions: 120(L) x 99(W) x 23(H)mm

Activities:

- Static Electricity
- Conductors and insulators
- Make a fan
- Resistor
- Diode
- Make a light
- Make a Morse code machine
- Light control alarm
- Make a bell
- Make an electromagnet
- Make a motor

AIR POWER ENGINE CAR KIT

A green powered car! No batteries or motors required and it is not even subject to weather conditions like its solar powered counterparts. This futuristic car kit operates entirely using air, and it travels up to 80m on one single tank. This kit balances the fun and learning perfectly. A built-in hand pump with pressure meter is built in the car for easy operation and also as an indicator in measuring how volume of air is collected into the tank. Build this fun and educational kit and discover and learn about air pressure, pumps, valves, transfer of energy and green power, all that with the thrill of a speedy car!

This is a standard hour/minute/sweep second movement found in almost all electric clocks worldwide. Very reliable. Standard nut bushing mount. We have sold 10's of thousands of these and, as far as we can tell, not one has come back.

- Very compact 56 x 56 x 15mm
- Self starting one second stepping motor
- Uses 1 x AA battery that lasts 1 year
- ±15 second/month accuracy
- Supplied with three sets of hands
- Shaft length 19mm, dia. 7.5mm

SALT WATER FUEL CELL ENGINE CAR KIT

An entertaining educational kit demonstrating the concept of a salt powered automotive engine. It gives the next generation a look at alternative means of propelling cars of the future. It works with a combination of salt water and magnesium plates. When salt water is added it dissolves the magnesium to form hydrogen which is attracted to the cathode creating a flow of electrons. A detailed step by step assembly manual for connecting the myriad of components is included and the car engine can be configured as a V8 or flat engine. The cylinders also move up and down as the car moves forward. The finished vehicle is 4 wheel drive and the body will twist as it navigates its way over small pebbles and bumps. Watch a demonstration video on our website. You may require the use of a side cutter and flat/Phillips head screwdrivers.

- Assembly time: 3 hours
- Suitable for ages 8+
- Dimensions: 120(L) x 100(W) x 91(H)mm

SPACE RAIL CONSTRUCTION KIT - GLOW IN THE DARK

This is the big brother of the space rail kits, to make a HUGE 11m running track! The spiral "elevator" lifts the marbles up to the top of the rail, and gravity takes care of the rest. It's entertaining, and a great lesson in physics. If you don't get the angles of the track right, the marbles won't make the journey! Hours of entertainment, and virtually unlimited track possibilities! Once you get it right though, they'll keep going around and around until you stop them (usually to make changes to the track)!

Supplied with loads of pieces (488 in total) to make an 11m running track.

- Multi-fit baseboard
- Virtually unlimited design possibilities

Learn to Solder Kits

AMAZING WEARABLE BADGES & ELECTRIC DICE SOLDER TRAINING KITS

Now here's a great way to get started with soldering, learn a little about electronics, and end up with a really fun wearable badge or electronic LED dice at the end!

This range of projects are brand new and designed exclusively by Jaycar. Each project is powered by a small CR2032 Lithium coin battery, and the badges include a lapel pin so you can wear it too.

Each of the designs has a different look and feel, while the electronics involved is slightly different in each one, so you'll learn more about electronics and how it works even if you build them all!

KM1090

SKULL BADGE WITH ALTERNATING FLASHING LEDS

This decorative skull design uses a simple transistor circuit to make the LED eyes flash in an alternating pattern. You'll also learn to solder and have a great badge to show for it!

KM1090

OWL BADGE WITH TOUCH-SENSITIVE LED EYES

You'll have a hoot with this fun kit. It shows you how transistors can be used to have a light finger touch light up LEDs! It's also a great soldering training tool.

KM1092

ROCKET BADGE WITH FLASHING LEDS

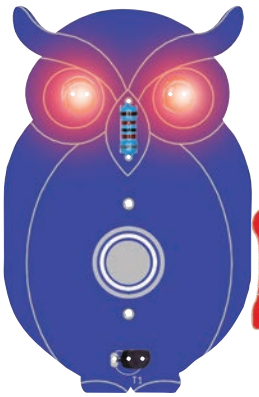

Blast off with this great project using the robust 7555 timer chip. You'll make the LEDs flash and have a blast soldering it together, while learning how timer chip can create alternating outputs.

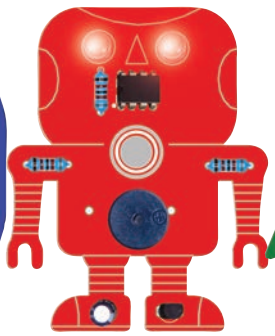

KM1094

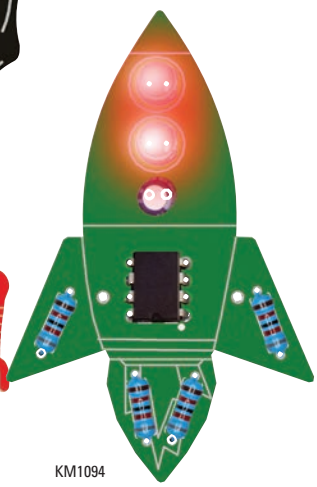

PIRATE BADGE WITH FLASHING EYES

Solder me hearties! Bring Captain Jaycar to life and learn how the 7555 timer chip can create alternate flashing LEDs! You'll learn to solder it all together too.

KM1094

ROBOT BADGE WITH TOUCH-SENSITIVE LEDS AND BUZZER

This great robot has a touch-sensitive pad which makes the buzzer and LEDs light up when you touch it. It'll demonstrate touch-pads and the powerful 7555 timer, as well as soldering techniques.

KM1098

ELECTRONIC DICE

Tap the module on the table to generate a random number between one a six, indicated by the LEDs on the top! It's great to build and highly functional.

CHRISTMAS TREE LEARN TO SOLDER KIT

A great way to get into the Christmas spirit and learn about electronics, soldering, and Arduino all at the same time. This kit includes a tree shaped circuit board, coloured LEDs, and electronic components to make the tree produce amazing lighting effects when combined with an Arduino UNO (sold separately). A soldering iron (eg. TS1465) and solder (eg. NS3013) are required as well, and a multimeter (QM1500) and third-hand PCB holder (TH1982) are also recommended to make construction easier.

Short Circuits Volume 1 – Second Edition:

With Short Circuits Volume 1, we give the option of buying the book on its own, or together with the accompanying kit that contains the components for each of the 20-odd projects described in the book. Some of the exciting projects include a Police Siren, Electronic Organ, Sound Effects Unit, Light Chaser and a Solar Powered Radio (an inexpensive solar panel is optional and available separately). Of course, many more projects are included! Remember, no prior knowledge of electronics is needed and the projects are totally safe. This volume will teach constructors everything they need to get started in electronics and is suitable for ages 8+. Kits contain small parts.

- Circuit diagrams included for each project
- Safe 6 volt system
- Techtalk discusses circuit operation and is written in a clear, easy to understand language
- Component layout on the special breadboard is clearly illustrated for each project
- Fun characters introduce each project, explaining the projects use

- Soft cover - 96 pages
- 205 x 275mm

PROJECT KIT

The complete kit of parts available separately. This includes plastic baseboard, spring connectors and all components needed to complete every project in the book. No instructions are supplied with this kit as they come in the book which is available separately.

BOOK & PROJECT KIT

Apart from the book, we supply the baseboard, plenty of spring terminals and ALL the components required to build every project in the book, INCLUDING the bonus projects!

- Additional hookup wire can be purchased (WH3025)
- Optional Solar Cell Power Supply for project #16 is extra Cat ZM9020 (batteries are also extra)
- 6VDC (4 X AA)

Some of the exciting projects that you can build from this book include:

- Short circuit tester
- Police siren
- Sound effects unit
- Solar powered radio
- Computer type circuits
- Magic Eye light alarm
- Electronic organ
- Light chaser
- 3 types of transistor amps
- And many many more

Short Circuits Volume 2:

Once constructors have mastered the art of assembling a circuit with springs they will want to tackle projects that are more complex. The benefit of spring termination falls away once they get into projects that have over, say, 20 parts. In addition to this, projects that work on radio frequency, or RF for short, don't like springs as they start to act like little antennae all over the place! So it's time to graduate to the heart of modern electronics - the printed circuit board. This simple device fulfils the function of mounting board & circuit wiring in one. The critical element of success in printed circuit board - or PCB for short - assembly is good soldering. Soldering is not for 8 year olds but its fine if they are older or are under adult supervision. In Short Circuits II we teach the reader how to solder. We teach you a lot more as well:

- How to use a Multimeter
- What tools will be needed.
- What sort of workspace is needed
- How the circuit works (Tech talk)
- What to do next
- Making the circuit work in the real world

p.328
9V battery to complete these projects. SB2423

SHORT CIRCUITS - VOLUME 2

Once constructors have the basic skills and knowledge either from a School Design and Technology course, or tackling Short Circuits Vol 1, you can now have some real fun! With this book (and associated project packs available separately - see following pages) they can make such things as a mini strobe light, police siren, mini organ, a couple of powerful radio transmitters, an FM radio - even a 'Knight Rider' scanner!!

All components are fully described and explained, along with tutorials on soldering iron and multimeter use.
All projects are safe and battery powered.

Short Circuits Volume 3 Second Edition:

Like our Volumes 1 & 2 book, Short Circuits Volume 3 is sold independently to each of the 30-odd projects. Some of the projects constructors will build include a Guitar Sustain Unit, a Universal Timer, Car Alarm, Two Lamp Flasher plus many more! There's even a project that demonstrates how constructors can use your computer to interface to the real world via a computer's parallel port. Building the projects described in Volume 3 will provide constructors with the confidence needed to tackle more complex projects, such as those described in the various electronics hobby magazines.

- Step by step instructions show you how to assemble each project
- Techtalk explains the operation of each circuit in detail, to help constructors gain a thorough knowledge of the "Building Blocks" used in circuit design
- "What To Do Next" shows constructors how to modify or further improve your project
- Basic circuit theory is provided to increase constructors level of understanding

SHORT CIRCUITS - VOLUME 3

SECOND EDITION

Each project contains a full technical description, with experimental changes to each circuit also explained. After constructors have built any or all of the described projects, there is no reason why they would not be able to successfully tackle any of the construction projects published in the electronics magazines. This book will end up giving them the knowledge and skill that will elevate them into a fully fledged constructor!

SC3 PROJECT - DING DONG DOOR BELL

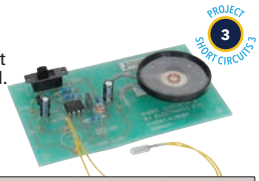

Another useful little kit that generates the sound of a classic Ding Dong door bell. Just the thing for your front door. Kit includes PCB, speaker and all components. 12VDC power required.

- Recommended Box - UB3 HB6013 $5.20

	Cat.	Qty 1+	
PCB: 105 x 60mm	KJ8052	$18.90	
Instructions	KJ8053	$3.50	

SC3 PROJECT - ELECTRONIC EYE

Install this kit to monitor traffic on a path or through a doorway. When a person of object breaks the beam the loudspeaker will sound.

- Kit includes PCV, LDR, speaker and all components
- 12VDC power required
- Recommended Box - UB3 HB6013 $5.20

	Cat.	Qty 1+	Qty 3+
PCB: 105 x 61mm	KJ8054	$17.90	$15.90

SC3 PROJECT - INFARED REMOTE LINK

This can be used as a remote on/off or momentary switch.

- Kit includes PCBs, 9V battery and all electronic components
- Receiver requires 12VDC power
- Recommended Box - UB3 HB6013 $5.20

	Cat.	Qty 1+
PCB: 105 x 60mm	KJ8058	$36.90
Instructions	KJ8059	$3.50

SC3 PROJECT - SIMPLE INTRUDER ALARM

This simple design features a normally open and normally closed input, 40 second siren duration and triggered LED indication.

- Kit includes PCB, buzzer and electronic components
- 12VDC power required
- Recommended Box - UB3 HB6013 $5.20

	Cat.	Qty 1+	Qty 3+
PCB: 105 x 60mm	KJ8060	$17.90	$15.90
Instructions	KJ8061	$3.50	

SC3 PROJECT - SCREAMER CAR ALARM

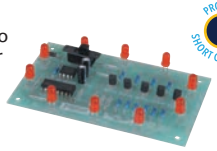

A more sophisticated alarm including entry/exit delay, flashing deterrent light, soft warning alarm and deafening internal siren. Thieves will make a hasty retreat!

- Kit includes PCB, siren and electronic components
- Recommended Box - UB2 HB6012 $8.90

	Cat.	Qty 1+	Qty 3+
PCB: 132 x 88mm	KJ8062	$39.90	$35.90

Meet Edison Robot Kit

A compact, sturdy robot that can be programmed in 3 different ways, making it suitable for all ages. Edison is your new robot buddy who will teach you about electronics, programing and robotics in a fun and engaging way. He's equipped with all the sensors, outputs and motors needed to introduce you to the amazing world of robotics. Once you've learned all about Edison's abilities, sensors and controls you can move on to programming him.

FOR BEGINNERS:

Edison has a barcode scanner to activate one of six inbuilt programs, including line following, clap controlled driving and obstacle avoidance.

FOR INTERMEDIATE:

EdBlocks is a drag-and-drop block based programming language and can run in a browser. EdWare is the next level up from EdBlocks, with the simplicity of drag-and-drop & more features.

FOR ADVANCED:

EdPy is the hardcore programming option for those who want to take their Edison to the limit. Requires 4xAAA batteries (not included).

EDCREATE - EDISON ROBOT CREATOR'S KIT

The EdCreate Edison robot creator's kit is a 5-in-1 expansion pack construction system. Designed to work with the Edison robot, EdCreate enriches students' STEM education experience through interactive engineering and programming projects.

The EdCreate system can be used with Edison robots to complete five EdBuild projects:

- EdTank
- EdDigger
- EdRoboClaw
- EdCrane
- EdPrinter

The EdBuild projects require progressive levels of coding capabilities, making them a perfect addition to the Edison programming and robotics curriculum.

MINI SMART CAR ROBOT KIT TO SUIT MICRO:BIT

NEW

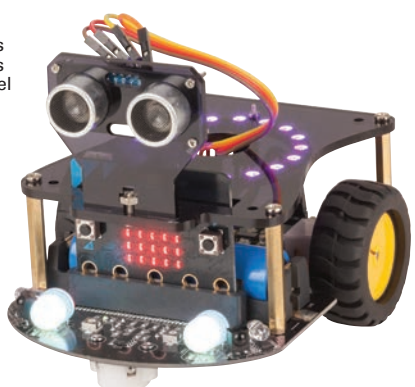

A fun to build robot that uses a micro:bit microcontroller board (sold separately) that kids can code or control using their Smartphone via Bluetooth. The kit is easy to assemble and no soldering is required. The included infrared and ultrasonic modules connect with the micro:bit, which enables the robot to follow a line, avoid or follow obstacles, and more. Other features include an onboard buzzer to produce sounds, an 18 RGB LED ring for amazing colour effects, and a photocell to detect light intensity. Two large RGB lights on the front are used to indicate the robot's direction as it travels. Once kids are competent using the micro:bit, they can create their own code to get the robot to use the micro:bit's accelerometer, compass, and 5x5 LED matrix. A 3.6V Li-ion rechargeable battery is required for power (sold separately)

Note: micro:bit not included (use XC4320). 3.6V Li-ion rechargeable battery also required (use SB2298)

Included:

- 1 x Smart Robot Shield Base
- 1 x Ultrasonic Sensor Module
- 1 x Round LED Module2 x Wheels
- 1 x Screwdriver
- 1 x USB Cable
- 3 x 100mm Jumper Wires
- 4 x 150mm Jumper Wires

CODEY ROCKY ROBOT KIT

This is a smart robot for beginners to learn coding and AI learning. Codey Rocky is an entry-level coding robot for STEAM (Science-Technology-Engineering-Arts-Mathematics) education. The combination of easy-to-use robotics hardware with visual programming software mBlock 5, gives all children the opportunity to take their first steps into the world of code and compose their first "Hello World!" statement at the same time as they explore their creativity. Codey Rocky is recommended for children 6 years and up. It's great family fun and can be used in schools by students and educators.

THE ROBOT COMES IN TWO PARTS:

- Codey is the detachable mainboard that holds all the magic. It includes more than 10 electronics modules that can be controlled via code
- Rocky is the car that lets you take Codey anywhere you want, so that your clever programs can be run everywhere

WHAT DO YOU LEARN?

- Beginning and advanced coding
- Logical thinking
- Creative expression
- AI and IoT principles

Check our website for a full outline of what you can do with the Codey Rocky Robot Kit.

mBot is an all-in-one solution to enjoy the hands-on experience of programming, electronics, and robotics. Working with mBlock inspired by Scratch 2.0, connecting with computers or smart devices via Bluetooth, this easy-to-assemble mBot provides infinite possibilities for you to learn STEM (Science, Technology, Engineering, Mathematics). Contains 38 assembly parts that can be assembled in 10 minutes and color-labeled RJ25 ports for convenient wiring, making sure more time can be spent on programming and creativity. mBot comes with a casing specially designed for protecting main control board. Installed with mini-programs to let you start learning straight away. Online manuals and courses are available to guide students and teachers. mBot can also be programmed with the Arduino® IDE - it uses the same chip as the Uno.

PUPPY GO AI SMART DOG

Meet your child's newest best friend named Puppy Go, who is eagerly awaiting to play, entertain, sing, teach, bark, wag its tail and show off its tricks. Puppy Go is over 300mm long, rechargeable and has many bionic parts for life-like actions. Control actions and behaviours by using voice commands, such as "Roll over" or "go to sleep", by touching parts of its body or by using an app on your Android or iOS Smartphone, A built-in speaker provides music and sound effects, and also doubles as a Bluetooth speaker to play your child's favourite music. You may even see Puppy Go dance to the music. Many stunts are pre-programmed in the app or your child can code their own - it may be their first ever program! Just like a real pet, Puppy Go can be adopted and raised from puppy to an adult dog by providing virtual feed every day, etc. A USB cable is supplied in order to feed Puppy Go some puppy power from an available USB port. Recommended for ages 8+.

ROBOT ARM KIT WITH CONTROLLER

STEM

This arm is a must for budding robot enthusiasts and operates just like the real thing. It is capable of 5 separate movements and can easily perform complex tasks. Individual control is available for opening and closing the illuminated gripper plus control of wrist, shoulder, elbow and base rotation. The arm is supplied as a kit of parts and makes an excellent project for anyone interested in robotic construction basic electrical connections.

- Suitable for ages 12+

SPECIFICATIONS	KJ8916
Max Lift Capacity	100g
Gripper Opening	43mm
Maximum Reach	320mm
Wrist Movement	120°
Elbow Movement	300°
Shoulder Movement	180°
Base Rotation	270°
Requires	4 x D cells
Base Dimensions	225(L) x 160(W) x 40(H)mm

USB INTERFACE KIT FOR KJ8916

Add computer control via USB to your Robotic Arm. The kit includes everything you need - interface cable, pre-built PCB, enclosure and software for controlling function. You can use a keyboard or mouse to have real-time control of the robotic arm, or you can program, edit and load individual functions and movements, just like a real industrial robot. The commands are saved just like a normal computer file to be loaded and used later.

3-IN-1 ALL TERRAIN TRACKED ROBOT

There are a lot of parts to assemble in this kit, including the hard-wire remote control. You do, however end up with a fantastic piece of robotic gear. It is primarily a terrestrial 6 track (i.e. 3 separate tractor-crawlers each side) unit. The crawlers can be reconfigured to operate as grippers, or even as a forklift type mechanism. You will need lots of time to put this thing together, but it will be a pleasure as the 50 page instruction manual is superb with dozens of good old-fashioned line drawings, which are still the best for clarity. There is very little electronics (indeed none really) but a tremendous amount of mechanical assembly. Electric motors are included.

This kit could form the basis of a sophisticated robotic platform with the addition of feedback systems, much of which is in the Jaycar catalogue.

- It would make a fabulous gift for a very bright 13+ year old
- Batteries AA x 4 are extra
- Carton dimensions 40(W) x 30(D) x 90(L)mm

R/C ROBOT CONSTRUCTION KIT

NEW

This impressive remote controlled robot construction kit is a thrill to build, and even more fun to control. It is supplied with 408 pieces, including two motors, LED lights, wireless receiver, and a battery box. A 40-page full colour manual is included to guide you step-by-step through the build, which takes about 1 to 2 hours to complete. A 2.4GHz full function remote control is supplied to control the direction from up to 10m away. Drive forward, backward, left, right or spin 360° on the spot, and at the touch of a button, you can also illuminate the LEDs in the eyes, lift the eyes up and down, turn the head, swing the arms, and rotate the hands. You are not limited to just the one robot design either. With a little imagination, you can also use the parts (and parts from other popular plastic block sets) to make your own custom robot. Batteries are not included. 3 x AAA are required for the remote, and 6 x AA for the robot, which provides up to an hour of continuous playtime. Recommended for ages 6+.

MAKEY MAKEY KIT

NEW

Getting kids hands-on with electronics and coding could not be easier with the Makey Makey Learning Kit. This clever system turns everyday conductive objects. such as bananas to aluminium foil and pencil drawings, into keys for your computer. The board simply plugs into an available USB port on your PC or Mac for power, and to send the signal that represents the keyboard or mouse key being triggered on the Makey Makey. Use it to control games, make a piano using bananas, and thousands of other fun projects. It is also compatible with Scratch to take your Scratch coding to the next level. Supplied with six coloured leads with alligator clips, a USB cable, and jumper wires to provide even more outputs.

Recommended for ages 8+.

Included:

- 1 x Makey Makey Board
- 7 x Alligator Clip Leads
- 6 x White Jumper Wires
- 1 x 1.5m USB Cable

SQUISHY CIRCUITS KITS

Squishy Circuits uses conductive and insulating play dough to teach the basics of electrical circuits, a perfect blend of play and learning! The play dough kits, projects, and recipes teach problem solving and engineering concepts and inspire creativity and independent thinking.

STANDARD KIT KJ9350**:**

Includes everything you need to get started with some more advanced Squishy Circuits projects that use LEDs, buzzers, and insulating dough!

Check our website for full list of contents.

DELUXE KIT KJ9352**:**

Our most complete Squishy Circuits kit. It comes with more items than the standard kit and comes with pre-made doughs so you can start circuit building right away! This kit also includes a deluxe battery holder which has a knob that allows your lights to blink and buzzers to beep at different speeds.

MAKEBLOCK NEURON INVENTOR KIT

Makeblock have assembled the essential package to get you started. The Neuron Inventors Kit contains 8 programmable electronic building blocks including power, sound, light and sensors. The building blocks are connected via snap magnetic Pogo Pins making them durable and effortless to use. Combine this with the intuitive graphical programming turn your ideas into real, working gadgets.

Make a new invention in just 5 minutes. The Inventors Kit includes 10+ invention ideas and online video guides. Follow, then lead with your own creative ideas. The invention ideas have case materials to help build out the invention, so the gadget is fun and looks great. Some of the invention ideas for you to build are below. Electronics Kits & Projects:

We are still making a surprising number of kits for printed magazine articles. This is especially so for past projects described in the venerable "Silicon Chip" magazine. You can identify these projects as the Silicon Chip logo will appear alongside the kit in question. Indeed, all kits shown have an icon revealing the original source magazine article, including recent kits from DIYODE magazine.

BACK CATALOGUE:

We have also continued to expand our back catalogue of kits that we still have stock of at the Head Office but do not carry in stores. If you are looking for a kit of an old project, check out our website at jaycar.co.nz/kitbackcatalogue for a full list of these great kits.

A Guide To Kit Icons:

SIMPLE
These kits are straightforward to assemble, generally built in one session and will require some basic electronics knowledge and soldering skills. Most are battery or AC adaptor powered. They may not have enclosures (i.e."boxes") or front panels.

DETAILED
Similar to the above but basically bigger. They are either "short forms" of larger projects or are fully operational projects with enclosures, front panels, etc. A greater knowledge of electronics is required to understand their operation and "troubleshoot" if necessary.

COMPLEX
All big projects which by their nature are complex, require several sittings to complete and may require some mechanical assembly. A good knowledge of electronics and manual dexterity is necessary to ensure success.

240V POWERED
All mains kits have this logo. We do this because we feel it is necessary that only experienced kit constructors should attempt mains powered projects. It is generally a good idea to have a competent colleague check your work before applying power.

BATTERY INCLUDED
Batteries are included with the kit.

AUTOMOTIVE KIT
Kit is specifically designed for automotive (which could mean motorcycle, caravan or boat as well).

BUILD TIME
We understand that your time is valuable. We have therefore decided to provide you with an estimated build time for all our kits. Each kit includes a stopwatch logo that indicates construction time. We know that you will find this useful.

KWIK KIT
A low cost fast assembly range of kits. Kwik kits are a fully imported range that can be assembled in just one sitting, sometimes only minutes! All printed circuit boards are screened with a component overlay. The instructions assume component knowledge & the ability to follow simple schematic diagrams

SMD COMPONENT
Kit involves soldering a SMD (Surface Mount Device). Suitable soldering iron for SMD soldering and proper handling techniques are required.

SMD COMPONENT PRE SOLDERED
Kit supplied with surface mount component already soldered onto the PCB

Guarantee on Kits

Most kits are successfully constructed with few problems. However, we recommend that if a kit builder does not have enough knowledge to diagnose faults, that the project should not be started unless assistance can be obtained. Unfortunately, one small faulty solder joint or wiring mistake can prevent a project from operating, which would take hours to locate and at normal service rates the service charge could well be more than the total cost of the kit. If you believe that you may have difficulty in building a kit (which is simply a complete set of separate parts made up to a list provided by the major electronics magazines) and you cannot get assistance from a friend, we suggest you return the kit to us in its original condition for a refund under our satisfaction guarantee. Unfortunately, kits cannot be replaced under our satisfaction guarantee once construction has been commenced. However, should you find any faulty parts (only), we will gladly replace them under warranty.

CLIFFORD THE CRICKET

Refer: Silicon Chip Magazine Dec 1994

Clifford hides in the dark and chirps annoyingly until a light is turned on - just like a real cricket. Clifford is created on a small PCB and has little LED insect eyes that flash as it sings. Just like a real cricket, it waits a few seconds after darkness until it begins chirping, and stops instantly when a light comes back on.

THEREMIN SYNTHESISER KIT MKIII

Refer: Silicon Chip Magazine Jan 2018

Originally invented in 1919 using valve technology, and as featured on the soundtrack for the 1951 film "The Day the Earth Stood Still", the all "new" completely transistorised Theremin will give you a truly retro sound.

This kit is easy to build with everything incorporated into one circuit board. Also, most components, the switch, the pot and the power socket are mounted on the circuit board to eliminate messy wiring; the use of on board voltage regulation to suit an AC power supply eliminates the noise that results from modern switch mode power supplies; and it can also be powered by an external 12 volt battery.

We'll be honest, it is tricky to play and generally suits someone experienced with string instruments like a violin (Leon Theremin himself was a cello player), but with a little practice you can play some basic tunes, or just use it to make eerie sci-fi sound effects.

Amplifier & Preamplifier Kits

"PRE-CHAMP" VERSATILE PREAMPLIFIER

Refer: Silicon Chip Magazine July 1994

This tiny preamp was specifically designed to be used with the 'Champ' amplifier KC5152. Unless you have a signal of sufficient amplitude the 'Champ' will not produce its maximum power output. The 'Pre-Champ' is the answer with a gain in excess of 40dB, which is more than enough for most applications. You can vary the gain by changing a resistor and there is even provision on the PCB for an electret microphone. Use AM4010.

'THE CHAMPION' AUDIO AMPLIFIER KIT WITH PRE-AMPLIFIER

Refer: Silicon Chip Magazine January 2013

An amplifier and pre-amplifier combination for all those general-purpose audio projects. It uses the AN7511 audio IC to deliver 2W music power into 8 ohms from a 9 to 12V supply. Features low distortion, two inputs (mixed 1:1), over-temperature protection (auto-limiting), mute and standby control. Pre-amplifier is also suitable for microphones and electric guitars, and can be separated from the amplifier for individual use. Kit supplied with silk-screened PCB, heatsink and PCB mount components.

Note: Optional 10k ohm potentiometer for external volume control use RP7610

THE 'FLEXITIMER'

Refer: Electronics Australia March 1991

Now in it's third revision by Jaycar, the Flexitimer uses a 555 timer coupled with a binary counter to create a simple and consistent timing circuit. In the original one-shot mode the timer will count up to the set point and switch the relay once. In the additional interval mode the timer will continue switching the relay at each recurrence of the set point. The circuit can be set at 11 time points with the minimum being 7 seconds and each step doubling the time to a maximum of 2 hours. Other times are possible by changing components C1, R1, and R2. Features of the third revision include a restarting the one-shot mode from an external switch or signal, a more energy efficient design, & space on the PCB for terminal blocks (not included).

This kit operates a relay when a preset temperature is exceeded and drops-out the relay when temperature drops. The relay included is capable of switching small currents only, so a larger relay or switching device should be employed if switching mains voltages or heavy currents. Ideal as a thermostat, ice alarm, hydroponics applications, etc. A small trimpot is used to adjust the cutout temperatures for the relay in the range of approx -30 to +150° C.

QUICKBRAKE BRAKE LIGHT WARNING KIT

Refer: Silicon Chip Magazine January 2016

Over one quarter of vehicle accidents in the Sydney area are of the rear-end variety. The Quickbrake reduces this risk by detecting when your foot quickly lifts off the accelerator pedal and activating your brake lights before your foot has even touched the brake pedal. This can increase apparent reaction time by up to 1 second, and at 100kph this equates to about 14 metres between you and the other car!

Automotive/Marine Kits

ULTRASONIC ANTIFOULING KIT FOR BOATS

Refer: Silicon Chip Magazine May/June 2017

This is an improved design from our popular kit (KC5498) from 2010 that helps reduce marine growth on the boat hull up to 8m. This new design has a second channel option (KC5536) for larger boats up to 14m, soft-start feature, low current drain during shut-down and LED & Neon operation indicators.

- Suitable for boats up to 14m (up to 8m with one transducer).
- Ideal for boats with single-skin glass-reinforced plastic (GRP) or fibreglass, steel, aluminium or concrete hulls
- Powered by the boat's 12V battery
- Adjustable low-battery shut-down
- Very low current drain during shut-down
- Soft-start feature reduces surge current.
- LED indicators for power, low battery or fault
- Neon indicators for ultrasonic drive operation

Kit includes all specified parts to make a single channel version for boats up to 8m, including one transducer. SECOND CHANNEL: To make it into a Dual Channel purchase add-on Kit KC5536 (Add-on Second Channel with Transducer)

SECOND CHANNEL ADD-ON PACK FOR ULTRASONIC ANTIFOULING KIT FOR BOATS

Refer: Silicon Chip Magazine May/June 2017

This is the add-on kit to make the KC5535 Ultrasonic Anti-Fouling Kit For Boats into a dual channel, so it can work on boats up to 14m. For more details see KC5535. Kit includes all specified parts to make the second channel, including one transducer.

SPECIFICATIONS	BOTH
Operating Supply Voltage	11-16V DC
Average Current Drain	Typically 320mA for one transducer, 640mA for two transducers
Peak Current:	2A
Output Frequency Range	19.08kHz to 41.66kHz in 14 bands
Frequency Steps	12 steps in each band; 80Hz steps at 20kHz increasing to 344Hz steps at 40kHz
Signal Burst Period	1000 cycle bursts ~600ms at 20kHz and ~300ms at 40kHz
Burst Interval Period	Between 300ms and 600ms
Dual Transducer Drive	Alternate
Transducer Drive Voltage	250VAC (about 700V peak-to-peak)
Low-Battery Cut-Out Threshold	Adjustable from 0-15V
Low-Battery Cut-In Threshold	0-2.5V above cut-out threshold

UNIVERSAL +/- 15VDC 1A POWER SUPPLY REGULATOR

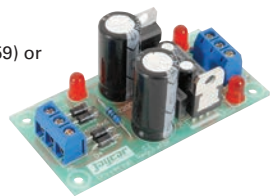

SILICON CHIP · 30 MINS · SIMPLE

Refer: Silicon Chip Magazine March 2011

This is an upgraded version of the original universal power supply kit published in August 1988. One small board and a handful of parts will allow you to create either a regulated ±15V rail or +15VDC single voltage from a single winding or centre tap transformer (not included). Substitute different regulators to these supplied and you can alter the output voltage to your requirements. Upgrades in this design include improved parts layout and terminal blocks for inputs and outputs. Kit includes PCB and all components for 15 volt versions, transformer sold separately.
PCB: 72 x 30mm

Power Supply Options:

- ±15V rails from 15V AC plug pack (MP3059) or transformer (MM2002)
- ±15V rails from 30V AC centre tapped transformer (MM2007)
- +15VDC from a single or centre tap transformer

Having completed this fun and playful course, you will be able to program any microcontroller, tackling and mastering I/O, memory, interrupts, communication (serial, I²C, SPI, 1-wire, SMBus), A/D converter, and more. All programs presented can be downloaded for free from www.elektor.com/mastering-microcontrollers.
For this second edition, the author has designed a versatile printed circuit board that can be stacked on an Arduino® board. The assembly can be used not only to try out many of the projects presented in this book but also allows for new exercises that in turn provide the opportunity to discover new techniques.

This book is for you if you are:

- A microcontroller novice
- An Arduino® user (enthusiast, artist, etc.) wishing to deepen your knowledge
- An electronics graduate or undergraduate student
- A teacher looking for inspiration
- Soft cover, 380 pages. 209(L) x 139(W)mm

ELEKTOR PYTHON 3 PROGRAMMING AND GUIS 2ND EDITION

This is the second edition of a book aimed at engineers, scientists and hobbyists who want to interface PCs with hardware projects using graphical user interfaces. Desktop and web based applications are covered. The programming language used is Python 3 which is one of the most popular languages around: speed of programming being a key feature. The book has been revised and updated with emphasis on getting the user to produce practical designs with ease - a text editor is all that is required to produce Python programs. Hardware interfacing is achieved using an Arduino® Uno as a remote slave. A full description and source code of the communication interface is given in the book. The slave provides digital and analogue input and outputs. Multiple Unos can be included in one project with all control code written in Python and running on a PCOne project involves a PIC microcontroller with code provided that can be loaded into the PIC using the Uno. The web applications and server are all implemented in Python allowing you to access your electronic hardware over the Internet. The Raspberry Pi computer can be used as your web server. An introductory chapter is provided to get you started with using Linux. The book is written for use with Debian or variations including Mint or Ubuntu. All of the programs in the book are freely available, ready to use and experiment with by way of a download from Elektor.

Books CONTINUED

PROGRAMMING ARDUINO®: GETTING STARTED WITH SKETCHES

This entry level book explains what an Arduino® microcontroller actually is (i.e. a very small stand alone computer), introduces you to the Arduino® programming language (called, "C") and then describes the basic configurations of Arduino® modules. It then goes into the detail of getting Arduino®'s to deal with the real world, finishing with a discussion on C++ and more sophisticated applications.

- Soft cover, 162 pages, 138 x 215mm

ARDUINO® WORKSHOP BOOK - 65 PROJECTS

In Arduino® Workshop you will learn to make projects that add-on to your Arduino® microcontroller platform. The book is very hands-on, describing 65 projects you can make. Lavishly illustrated with very clear text and lots of professional tips for the novice constructor.

Projects include:

- A digital thermometer
- A GPS logger
- A handy voltage tester
- A keypad combination lock
- A binary quiz game and much, much more
- Soft cover, 370 pages, 180 x 235

BM7137	$54.90

PROGRAMMING ANDROID APPS

The book explains the operation of the Android® OS in a clear step-by-step method. The book offers a wide range of applications based on hands-on examples, covering everything from simple math programs, reading sensors and GPS data, right up to programming for advanced Internet applications. Besides writing applications in the Java programming language, this book also explains how apps can be programmed using Javascript and PHP.

ARDUINO® + ANDROID PROJECTS FOR THE EVIL GENIUS

Not particularly evil, but another project oriented book written around Android-type mobile phones and the Arduino® microcontroller. You can, for example turn your Android phone into a Geiger counter, a TV remote controller, etc. Many projects use both the Arduino® and the Android culminating in the creation of a home Automation system.

ARDUINO® CIRCUIT & PROJECTS GUIDE

From basic to more elaborate projects are covered, so that even students and teachers with some pre-existing technical knowledge will encounter new challenges. The skill and experience level required for these projects ranges from absolute beginner, to hobbyist-expert. Beginners will benefit from progressing through the book as they build their skills, while experienced readers will find it a useful handbook.

- Programming essentials
- Simple entry level projects
- Interface and hardware extensions
- Complex applications for advanced users

30 ARDUINO® PROJECT FOR THE EVIL GENIUS

This is a practical project oriented book describing lots of projects based around the Arduino® microcontroller. Be warned, there is nothing intrinsically evil about this book. The title is a catchy marketing department trick. It does have, however, 30 practical projects which specify components which are mostly available from Jaycar. Hours & hours of evil fun.

- Soft cover, 191 pages.

Prototyping Breadboards & Jumper Leads

MINI BREADBOARD WITH 170 TIE POINTS

With self-adhesive tape on the back, it is ideal for DIY projects including Arduino®. It has 17 holes x 10. Total 170 holes. It can also be permanently mounted with screws (not included).

- Nubbins and slots on the sides to connect multiple breadboards together
- Dimensions: 46(L) x 35(W) x 9(H)mm
- Weight: 14g

	PB8820	$9.50	$8.55	$7.60

BREADBOARD WITH 830 TIE POINTS

With labelled rows and columns and adhesive back for mounting, it is ideal for electronic prototyping and Arduino® projects.

- Tie points: 830
- Distribution holes: 200
- Terminal holes: 630
- Nubbins and slots on the sides to connect multiple breadboards together
- Dimensions: 165(L) x 54(W) x 9(H)mm, 74g

SOLDERLESS BREADBOARD WITH POWER SUPPLY & JUMPER LEAD KIT

This kit comprises of a solderless breadboard with 830 connection tie-points, a power supply module and 64 pieces of mixed jumper leads. Ideal for circuit board prototyping and Arduino® projects. The power module can be plugged into the power rails and can be powered from either a 12V plug pack or from 5V using the USB socket, and has a switchable output between 3V and 5VDC.

- 1 x Solderless Breadboard with 830 Points
- 1 x Power Supply Module
- 64 mixed jumper wires of different lengths and colours

UNIVERSAL PRE-PUNCHED EXPERIMENTER'S BOARDS

The low cost way to build prototype or one-off projects. We now stock 3 sizes of phenolic board that has a matrix of punched holes on 0.1" (2.5mm) pitch with 'donut' of tin plated copper around each hole. Finally the non-solder side of the board has an alphanumeric grid printed on it to assist in the component identification board layout.

PRESSBOARD INSULATION MATERIAL

Similar to Presspahn Elephantide®, this product is a heavily pressed craft-type board which is used as an insulator in mains products. It can be scored, folded and formed into many shapes, particularly into boxes or partitions to isolate mains circuits from fingers. It has good abrasion resistance and is often used in areas where chafing from vibration can occur.

- Thermal Rating: 150°C

ETCH RESISTANT & WATERPROOF PEN

The ink from the pen is etch-resistant so you have a quick and simple way of making a PCB! Being waterproof it is also great for labeling things on or about the boat, caravan or motor home. The ink will wash off afterwards with metho, turps, etc.

- Excellent smudge-proof and waterproof qualities
- Dries in seconds
- Low-odour ink
- Xylene and toluene-free ink

Prototyping Accessories

POLYMORPH PELLETS

Polymorph will change the way you make parts. It's a commercial grade thermoplastic that softens enough to be formed into any shape at around 62 - 65° C. You simply heat the pellets in hot water. It hardens at room temperature to form a tough plastic material similar in consistency and colour to nylon. It can be drilled, sanded, ground, machined, painted or heated and reformed again and again. Endless uses in model making, craft, single part manufacture, prototyping, engineering, science, lab and more.

- Supplied in a 100g bag of 3mm pellets.

PRESS 'N' PEEL FILM

This is by far the easiest way to make Printed Circuit Boards from CAD software or magazine PCB layout artwork. You simply make the PCB image by putting a Press 'n' Peel sheet of transfer film in the paper tray of a photocopier or laser printer (The sheet size is almost the same as the A4 paper tray). You then print or copy the PCB track image onto the film. Using a domestic clothes iron you press the image onto a precleaned piece of copper clad PCB. The image transfers to the copper and the image will not etch away. Ammonium persulphate or ferric chloride are both OK. You get 5 sheets of 215 x 280mm transfer film in each pack. Full instructions are supplied.

4 Easy Steps:

1. Print or Copy
2. Iron on
3. Peel off
4. Etch

CONDUCTIVE CARBON GREASE

Lubricates and improves electrical and thermal connections between sliding surfaces, while providing protection from moisture & corrosion. Excellent for use on switches and EMI shielding applications. Industrial, trade and hobby use. 50 gram tube.

- Prevents normally closed switches from corroding in place
- Reduces make-break arcing and pitting of switch contact surfaces
- Improves the connection between irregular or pitted contact surfaces
- Reduces EMI noise by maintaining a continuous path between conductive surface
- Thermally stable up to 200°C
- Density: 2.7 g/ml
- Electrical resistivity: 117 ohms/cm

PRECISION CONDUCTIVE INK

This is a highly conductive polymer for use in a variety of applications and is an indispensable tool for fixing damaged circuit board tracks. Apply instant traces on most surfaces (epoxy, glass, plastic, metal). Draw traces on circuit boards, repair defective traces, make jumpers and shield electronics, design prototype circuits and repair rear-window heater traces.

- 1mm track trace width
- 0.02 Ohm per mm resistivity

After heat curing only. Use low temperature soldering (less than 180˚C/350˚F) for not more than 5 seconds. Use low temperature soldering iron.

DEOXIT PROGOLD CONTACT CLEANER & REJUVENATOR

Simple cleaners wash away dirt, grime, and dust from your expensive equipment but are often ineffective at cleaning tough oxidation and metal sulphide contamination. This product will not only clean, but it will help restore your equipment to its original condition, improving its performance.

Kit contains:

- DeoxIT power booster 7.4ml
- DeoxIT ProGold conditioning treatment 7.4ml
- 2 x brush applicators
- 4 x swabs
- Lint free cloth

Anti-Corrosion

TEF-GEL ANTI-CORROSION, ANTI-SIEZING, ANTI-GALLING SYRINGE

This product is far superior to a similar product we sold last year. Its main use is to prevent dissimilar metals when fastened together from corroding due to galvanic action. For example, you fasten down a stainless steel sail track slide to the metal deck of a yacht; you use this product to prevent dissimilar metal electrolytic corrosion. That's all the other product was good for. This product also stops rotating objects from seizing and prevents galling in stainless steel screw fasteners. It also protects electrical terminals/connectors.

- Will not cold flow or dry out
- Is resistant to salt water and detergents
- Has an indefinite shelf life
- Contains PTFE (Teflon®) and NO (0%) volatile solvents, no silicone, or petroleum solvents. Nothing to evaporate
- It is dielectric (Non-electrical conducting)
- No known hazardous ingredients
- High flashpoint
- Non toxic

CORROSION BUSTER PEN

This pen-type product enables you to remove rust, spot corrosion and clean burnt contacts etc, without abrasion utilising the 20,000 tiny glass fibres at the tip of the pen. It has an amply sized body with finger indent to provide a comfortable & secure grip while the adjustable length allows for more aggressive cleaning when required.

Remote Control Relays

MULTI CHANNEL REMOTE CONTROL RELAY BOARDS

Add remote control functions to a new project or existing installation with these handy remote control relay boards. Available with 2 or 4 channels, each output relay is controlled by a separate button on the key fob controller. Each channel can be set to momentary or latching mode allowing you to customise the setup to suit your application. Operating on the robust 433MHz band the key fob remotes work over distances up to 40m and feature rolling code transmitting for added security.

- Selectable momentary or latching mode for each channel
- Transmission frequency: 433MHz
- Transmission range: 40m max
- Operating Voltage: 12VDC
- Relay contact rating: 28VDC 10A max / 250VAC 5A max

WIRELESS 4 CH RELAY RECEIVER (12V NOMINAL OPERATION)

This unit, which can be operated with the 2 x remotes (supplied), will control up to 4 x relays in Normally Closed or Normally Open configuration as either Momentary or Latched operation (the relays are built-in to the receiver). The relay contacts are rated at 5A at 14VDC. If higher voltage or higher power (or both) switching is needed, simply get these relays to operate a higher power relay. Strictly speaking for simple control applications, the LR8824 is all you need.

SPECIFICATIONS	LR8824
Power Input	10 - 15VDC
Current Draw	350mA max
Standby Current	<10mA
Transmission Distance	30m typical (300m+ max line of sight)
Transmission Frequency	433.92MHz
Transmitter Features	SAW locked, rolling-code, water-resistant.
Learning Capacity	250 remotes per module.
Outputs	4 x NO/NC contacts individually selectable as momentary or latched
Relay Contacts	5A max at 14VDC
Receiver Dimensions	68(H) x 60(W) x 25(D)mm, Antenna 1 50mm long when deployed

ADDITIONAL WIRELESS RELAY TRANSMITTER UNIT

Capable of controlling the LR8824 with up to 4 control voltage inputs. You could, for example, have an input on channel 1, which would be from say a micro-switch connected to a window or a gate in a shed or barn. The LR- 8819 will transmit a signal (100m minimum, up to 400m line-of-sight) to the LR8824 to raise an alarm. It will also accept USB type voltage signals etc. It will accept positive or negative voltage commands (it will operate without the remote controls). Essential for fixed system monitoring.

- Unit measures 68(H) x 60(W) x 25(D)mm
- Antenna is 150mm long when deployed

Solid State Relays:

Solid state relays are particularly useful when only low switching currents are available, such as those presented by CMOS or TTL circuits. Optically isolated for optimum safety, these relays use solid state components rather than mechanical switches. AC types offer safe and easy switching of 230V mains.

CHASSIS MOUNT SOLID STATE RELAYS, HIGH CURRENT

SY4084 40A, 240VAC TRIAC TYPE

This unit has a dielectrically isolated D.C. control input that controls a 40amp TRIAC. This means that you can control AC mains up to 40A RMS. It also means that it will not control D.C. For that you need the SY4086 below.

Specifications for SY4084

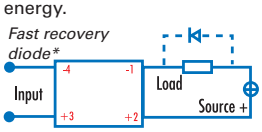

- Dielectric isolation rating 4000VAC
- Opto isolated control, 4V min, 32V max (D.C.)
- TRIAC controlled AC out. 48-280VAC
- Built-in snubber
- RoHS compliant

SY4086 100A, 0-30VDC MOSFET TYPE

This unit has a dielectrically isolated D.C. control input to switch a MOSFET which can control loads of up to 100A @ 30VDC. It will not switch AC. To switch AC use the SY4084. NB: Mechanical details same for both units. Advantages of SY4086. Switching high current D.C. was previously accomplished by high current contactors. Contactors quickly wear out plagued by arcing of the actual contacts. There is no arcing with MOSFETS and their very low ON-resistance (in this case 3.5 milli Ω) ensures little wasted energy.

UNIVERSAL LED FLASHER RELAYS

Specifically designed to work with replacement low current LED indicator lights which may "hyper flash" when used with your cars standard flasher relay. This high frequency flashing will burn out the globe quicker. The minimum load is negligible (0.02A). Some cars will even display a burnt out bulb indicator even though it's working fine, this unit will remedy that issue.

tech talk Converting To A Latching Relay

HOW TO TURN AN ORDINARY RELAY INTO LATCHING TYPE!

Sometimes you want to energise a relay to stay "on" instead of only momentarily staying on. For example you may want to make an electric motor, or a solenoid to stay on for some time.

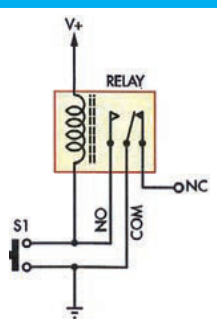

You can do this with the circuit shown.

The key to this is a momentary push button switch (there are many in this catalogue.)

Pressing the push button switch (S1) activates the relay and closes the N O (Normally Open) and COM (Common) contacts. These contacts form a parallel connection across S1. Even if S1 is now opened, the relay will stay ON, or "latched."

To turn the relay off, you must interrupt power to the coil, in other words, switch V+ off, even momentarily. Even if you switch V+ on again, the relay will remain off, until you push S1 again.

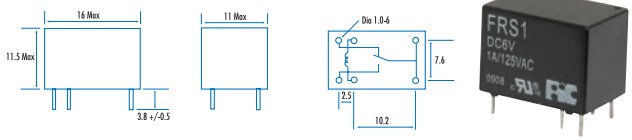

Note: While the relay is energized, it will continue to draw coil current. True mechanical latching relays do not do this.

Blade Fuse Holders

30A IN-LINE BLADE FUSE HOLDER

Accepts standard car type blade fuses. Supplied with heavy duty cable in a loop. Simply cut and join to existing cable.
- Low volt DC only

Type	Cat.	Qty 1+	Qty 10+	Qty 25+
Standard	SZ2040	$4.50	$3.60	$2.90

30A PANEL MOUNT BLADE FUSE HOLDER

Panel mount for auto or marine applications. Takes standard blade fuses, rated for 12VDC 30A max.
- Cover included

Type	Cat.	Qty 1+	Qty 10+	Qty 25+
Standard	SZ2046	$6.90	$5.50	$4.45

30A IN-LINE BLADE FUSE HOLDER WITH FAILURE LAMP - WATER RESISTANT

These accept ordinary blade fuses and have an integrated lamp that will light up when the fuse blows, making it easy to find the offending fuse. This is especially useful if the fuse is in a difficult or crowded location. They are supplied with 110mm leads and available to suit standard blade and mini-blade fuses.
- 30A max rating
- Ideal for circuits up to 32VDC

20A SELF CRIMPING BLADE FUSE HOLDER PACK

These are very simple blade fuse holders to install. The self crimping feature is easy to use and saves on installation time. No wire stripping or twisting required. No special tool required; just push in the wire and squeeze.
- Dimensions: 35(L) x 35(W)mm while open
- Voltage Rating 32VDC
- Current rating 20A

Type			Cat.	Qty 1+	Qty 10+	Qty 25+
Standard	20A	Pack of 5	SZ2049	$5.30	$4.75	$4.20

30A WATERPROOF BLADE FUSE HOLDER WITH LONG TRANSPARENT COVER

Quality transparent waterproof blade fuse holder. They are long enough to accept the circuit breaker blade fuse replacement models. The transparent cover allows you to inspect if a manual c/b has tripped, or able to see if an LED fuse has illuminated. This fuse holder provides extra protection against water and dust, ideal for marine applications.
- Dimensions: 65(L) x 25(W) x 15(D)mm

Type			Cat.	Qty 1+	Qty 10+	Qty 25+
Standard	30A	Waterproof	SZ2047	$8.90	$7.10	$5.75

30A STACKABLE BLADE FUSE HOLDER (IN-LINE STYLE)

These fuseholders accept standard blade fuses. They slide together if more than one is required, so you could have a bank of these mounted in your car. They have a cap over the front which makes them look very neat and tidy.
- Handle 30 amps.
- Supplied with a wire loop - can be cut to suit
- Low volt DC only

Standard	6 Way	SZ2002	$16.90	$14.90	$13.90

6 & 10 WAY BLADE FUSE BLOCKS

Convenient fuse blocks with integrated "fuse blown" indicator LEDs. The clear plastic cover allows you to quickly fault-find without disturbing your wiring. Includes quality bolt-down output connections for eye-terminals connection. Suitable for use in 12-24V systems, 30A max per fuse channel. Input cable up to 4-gauge. Uses standard automotive blade fuses, and includes a handy sheet of common labels, to make identification of connections even easier.
- Red LED "blown fuse" indicators
- Heavy duty bolt or convenient spade terminals
- Clear fuse cover

Blade Fuses With Failure Lamp

Not your ordinary blade fuse, these have an integrated lamp which illuminates the moment the fuse blows. This makes finding that blown fuse a cinch, especially when the fuse is in a hard to get location, like under the car dashboard. They don't cost much either, so they are a very worthwhile investment.

Wire Tapped Blade Fuses

DOUBLE BLADE FUSE SOCKET WIRE TAP

If you've ever wanted to install 12VDC devices near or around your dash but have been put off by the need to manually install new wiring and run it into your engine bay this is a great solution. Simply plug the fuse into a socket in your fusebox and you'll have an instant 12VDC power source. A great way to power headrest monitors, extra internal car lighting, gauges, and more. Outputs to a female bullet crimp connector. Comes in standard and mini blade fuse models.

Circuit Breakers - Blade Fuse Size

A blade fuse that doesn't need replacing! This range of mini and standard size Blade circuit breakers are designed to directly replace standard or mini blade fuses. No need to fumble around in the dark looking for the blown fuse or to dig around in the toolbox for a suitable replacement. Choose between manual or automatic reset types. The manual type suit 12V-24V systems and trip once the current is exceeded, and allow you to fault find the circuit before resetting. The auto reset type suits 12V systems and will re-establish power to the circuit once the current returns to normal levels. Available in Mini or Standard size, and come in similar colour coding to standard blade fuses.

HEAVY DUTY PANEL MOUNT CIRCUIT BREAKERS

A range of heavy duty and high quality panel mount circuit breakers. The reset switch on these units are high grade and will not fail in short period unlike other units in the market. It has a protective plastic cover to prevent accidental shortage. Incorporates multi-wire gauge inputs and outputs, they are perfect for high end car audio installations, automotive wiring or solar installations. Terminals are platinum plated.

HIGH CURRENT DC CIRCUIT BREAKERS

Moulded in black electrical grade bakelite, these rugged and reliable devices allow you to simply reset rather than find another expensive fuse. They can be used as an occasional circuit isolation switch. Two popular current ratings. Both units have the same physical dimensions. Ideal for car sound installations. Operating voltage is 12 to 14VDC. Each device will trip within a few milliseconds under short circuit conditions and feature protective rubber caps, test button and gold plated 5mm dia. terminals.

70A 12-14VDC

Will trip within 1 minute at 90A load. Will trip within a few milliseconds under short circuit conditions. Supplied with 5mm dia gold plated terminals with captive shakeproof washer and provision for up to 1/4" mounting bolts. Protective rubber caps for terminals. Test button on top of unit enables circuit breaker to be used as switch circuit restored with simple lever action.

MARINE GRADE ILLUMINATED SWITCH PANELS WITH CIRCUIT BREAKERS

An economical solution to controlling multiple DC circuits on your boat, or any other application where you want to switch multiple DC circuits. Each switch panel is an attractive moulded ABS plate, with high quality 10A rated illuminated rocker switches and re-settable circuit breakers on each circuit. Power is supplied on a common rail to keep wiring neater, and wiring connections are made with standard spade terminals.

IP66 MARINE SWITCH PANELS WITH CIRCUIT BREAKERS

These units feature the attractive tactile rocker switches that are common on luxury Australian and foreign made motor cruisers. The panels have Butyl rubber gaskets and IP66 water resistant rated switches and circuit breakers, making these switch panels suitable for an exposed environment. They are pre-wired as much as possible, with wiring connections made via standard spade terminals for ease. Both require about 80mm of space behind the mounting bulkhead. The 4 way has 6,10,15 & 20A rated circuit breakers and the 6 way has 6,6,10,10,15 & 20A breakers, and the switches feature LED illumination to let you know which circuit is active.

ANTI-TAMPER 4-GANG SWITCH BANK/CIRCUIT BREAKER

This switch bank consists of a gang of 4 x 16A/12VDC circuit breaker rocker switches pre-wired with protective translucent panels to discourage naughty fingers tampering with them. The rockers act like switches but will behave like a circuit breaker if any circuit pulls more than 16A. They would typically be used to power all sorts of things while under way which should not be turned off.
Each translucent panel has a recess to accept a permanent sticker annunciating the function of the switch. A sheet of decal annunciators is supplied with 45 (yes 45) labels. These range from "Bilge Pump" to "Deck Wash", to "Fridge", "Macerator Pump", "Radar", "VHF", etc. Front dimensions of the panel are 130(W) x 50(H)mm. Approx. 40mm is needed behind the panel for wiring access. 2 x No. 8 countersunk screws are supplied.

Polyswitches

PTC FUSES - CIRCUIT PROTECTION

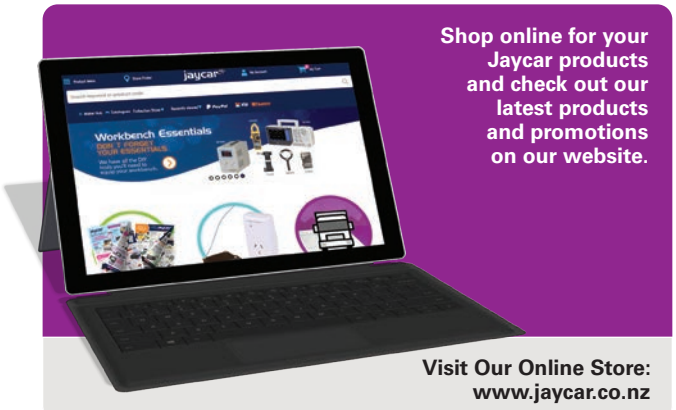

Polyswitch protectors are based on conductive polymers and act like resettable solid state circuit breakers. When the operating current of the protector is exceeded the interior of the device partially melts, which increases the volume increasing the resistance drastically. This in turn reduces the current. The device stays in this state while the current is maintained because its temperature is elevated. Once the current is removed, the device re-establishes itself almost immediately, so that the low resistance value is restored.

NORMALLY CLOSED

When the surface meets or exceeds a certain temperature the SPST bi-metallic element goes open circuit.

- The unit resets automatically when temperature falls below a specified limit
- Ideal for any electrical item that needs thermal protection

NORMALLY OPEN

These thermostat switches have normally open contacts. They operate once the temperature reaches a specified limit and automatically reset to their original normally open state once the temperate drops below its rated temperature. These are suitable for power amplifier applications and other temperature sensitive devices where a cooling fan needs to be integrated to cool the device down. Mounting holes are provided, ideal for attachment to a heatsink or any metallic surface.

Individual "Contura" Style DC Rocker Switches

These are the superb looking rocker switches that you have seen in the cockpits of the 70-100ft luxury motor cruisers recently. They would look great in your 4WD, RV, Caravan or any other application as well. The base switch supplied (rated at 12V 20A, 24V 10A) comes with a double-LED illumination (low in OFF, high in the ON position), a standard rocker cover and a standard range of decals to customise the switch to your application. Typical decals are symbols for: windscreen wipers, horn, heater, etc; there are dozens of these decals included. Also available are a set of special laser-etched covers with the following graphic symbols to really create a professional finish. You need to buy the basic switch (in blue, white or red illumination) and then the custom cover (if required).

MODULAR ROCKER SWITCH BRACKETS

Compatible with our Contura style switches, these brackets use a clever modular design allows you to "stack" multiple rocker switches together into a single cutout. The end-cap piece works for either end, and you can put as many centre pieces in as you like. Also available in a single-switch mount. 100% interchangeable with the round-hole variant of these brackets - PS2806/PS2808 (See page 335).

ILLUMINATED BLUE ROCKER SWITCH PANELS

Straight forward installation and wiring, with just four connections - everything else is pre-wired! Then all you need to do is connect your various peripheral devices. Switches are rated at 20A for a 12V system (10A for 24V) up to a maximum 45A per panel. The LED illumination is powered separately, so you can run it through a switch or dimmer too.

- Easy installation
- High quality switches
- Blue LED illumination

Float Switches

FLOAT SWITCH

VERTICAL OR HORIZONTAL MOUNT NO or NC. Ideal for use in conjunction with solenoid valves, water pumps, etc., this float switch can be made NO or NC (Normally Open or Normally Closed) by the orientation of the float. Horizontally mounted so the float falls, when the fluid level rises it will switch ON at maximum float height. Mounting the switch so the float rises upwards when the fluid level rises above switch height it will switch OFF. Vertical mounting, with the float down, will switch OFF at a high fluid level. Widely used in marine, automobile, industrial, agricultural fluid level sensing applications.

- 560mm wire leads
- 92.5(L)x 18(D)mm x M16
- Float Rise height: 40mm from centreline

TOP MOUNTING FLOAT SWITCH (LEVEL DETECTOR)

1 YEAR WARRANTY

Ideal to control tank filling systems this vertical movement float switch fits quickly to the lid or top cover of a tank or other container. A mere 20mm travel distance for the float will trigger the switch ensuring you leave an air gap and don't overfill the vessel. Contacts are closed when the float is out of liquid and open when the float is elevated.

tech talk Dual Switching

This circuit enables you to turn a load on or off (typically lighting) from either switch which may be a long way apart. The switches must be single pole, double throw types, minimum (SPDT).

Note! Only a qualified electrician can perform this wiring for 240V. You can do it yourself for low AC or DC voltage wiring.

ROTARY ENCODER WITH PUSHBUTTON

Quadrature encoded rotary encoder with pushbutton can be used to provide an intuitive interface to your next project. Similar to the interface found on many 3D Printers. PCB mount with five terminals. Thirty detents/ fifteen pulses per revolution. Encoder has two SPST contacts sharing a common, pushbutton switch is SPST/NO.

- Shaft with flat for grub screw
- Three terminals for rotary encoder
- Two independent terminals for pushbutton
- Two large mechanical lugs for PCB mounting

SEALED PCB ROTARY SWITCHES

These switches have a removable ring with tab which can be inserted into the switch several ways to your particular requirements. For example, if you purchased a 1 pole x 12 way (max) switch you could convert it to, say, 1 pole 7 way between stops. They have a standard 1/4," shaft. Panel hole 10mm.

4kHz AUDIO TRANSDUCER

This electro-acoustic transducer contains no electronics making it a versatile component for electronics projects. Apply an AC voltage input to the wires and it will generate sound pressure waves based on the frequency. Connect the wires to a ciruit input and it will generate an AC voltage when stimulated with a sound pressure wave making an efficient knock or vibration sensor.

Supplied in a black plastic casing for easy mounting it can also be deconstructed to suit alternate applications. Without a doubt this is one of our most popular components for a multitude of electronics projects.

FAN ASSISTED-TYPE HEATSINK

This heatsink is designed to mate with itself to form a tunnel. The heatsink extrusion has a screw flute centre to enable 4 x No.6 self-tapping screws to fasten an 80mm standard type fan on one (or both) end/s to drive air through the heatsink assembly. It is ideal for high power amplifiers and power supplies. The entire assembly, including fan/s can still fit inside a 2 x Rackunit (88mm) enclosure. The heatsink also features ribbed fins for extra surface area, a 4mm thick base to enable thread tapping and small vee grooves on 5mm centres to facilitate mounting hole location. The centre groove, for example, is directly below the middle fin.

- Two standard lengths are available, black anodised

LIFETIME GUARANTEE

Suitable fans are YX2512 (12VDC) or YX2510 (240VAC). *Note: Two heatsinks pictured.*

HEATSINK PIN GRID ARRAY WITH ADHESIVE THERMAL TRANSFER TAPE

This heatsink makes a perfect partner to Star LED modules. It doesn't get quicker or easier than this! Just peel the backing from the pre-mounted thermal transfer tape, press the Star LED (or whatever device) to the heatsink and SHAZAM!! It's ready to go! Don't be fooled by the compact size. The "pin grid array" design provides excellent low thermal resistance and heat dissipation. Sold individually.

THERMAL TRANSFER TAPE 100 X 100 X 0.5MM - PKT 2

When it comes to attaching devices like star LED modules to heatsinks, it's often not easy because they don't have screw 'eyes' like a TO220 transistor package. Using this thermal transfer tape, it's a breeze. The material is self adhesive and provides good thermal conductivity making it easy for chipsets, LED modules, memory modules etc. 2pcs of 100mm x 100mm sheets supplied. Just cut to size. 0.5mm thickness.

12VDC Hydrodynamic Fans

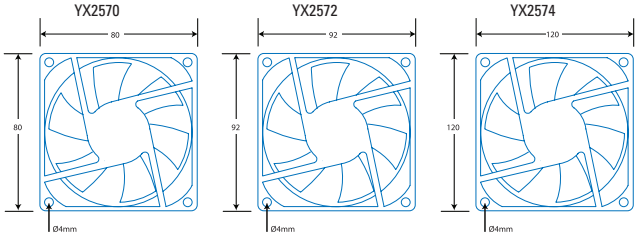

SILENT HYDRODYNAMIC BEARING CASE FANS

1 YEAR WARRANTY

Designed to provide additional airflow without increasing noise levels these fans have precisely balanced blades and long-life hydro-dynamic bearing. Ultra-low noise making these fans perfect for a home theatre PC, or ventilating the amplifier wedged into your entertainment unit. To further improve silence, rubber fan mounts are included to eliminate fan motor vibrations inducing vibration noise.

- Voltage: 12VDC
- Rated to last for 50,000 hours at 40°C (more at 25°C)
- Bearings: Ball (hydrodynamic)
- Housing / Impellers: Polycarbonate
- Connections: Flylead - 3 pin molex

12VDC Maglev Fans

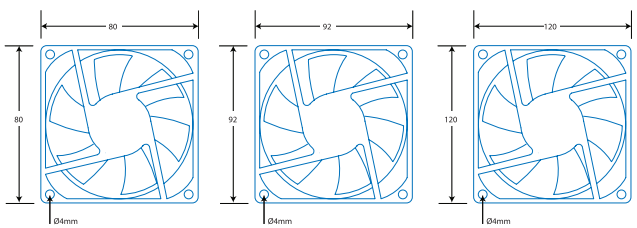

SUPER LONG-LIFE LOW-NOISE MAGLEV BEARING CASE FANS

5 YEAR WARRANTY

Featuring a patented Nanoflux bearing that incorporates magnetic levitation (maglev) technology and precise manufacturing, these premium quality fans ensure an extremely long operational life of 100,000hrs at 40°C (even longer at 25°C). Not only does the unique self-lubricating maglev bearing design offer extremely long life, but also extremely low noise levels compared to traditional fans ball bearings, and also offers the ability for the fan impeller to be removed for cleaning. The fan impeller itself has a winglet tip design and is UV reactive. Rubber fan mounts are also included to eliminate fan motor vibrations entering the case, further reducing noise levels. Dust/waterproof to IP54, these fans are sure to last even in harsh conditions.

- Voltage: 12VDC (5VDC Starting Voltage)
- Black: Earth, Red: 12V+, Yellow: Tacho output (1 pulse/rev)
- Bearings: Nanoflux magnetic levitation
- Housing: Polycarbonate
- Implellers: UV reactive polycarbonate

JIFFY BOXES

Manufactured from ABS plastic, these jiffy boxes not only look great, they have been designed to incorporate everything our customers wanted in a constructor's box. Sizes are compliant with industry standards externally and PCB fitting internally.

- Impervious, dimple-free finish provides good adhesion for screen printing
- Lids feature a 5mm grid of 'centre punch' type points on the underside for quick & accurate drilling
- Lids also feature a 10mm grid of scribed lines providing an easy and precise guide for cutting or filing cut-outs
- PCB guides in the sides of the box have snap-in locators. Eliminates the need for stand-off hardware when mounting boards horizontally
- Box also has a grid of 'centre punch' type points on the base of the inside
- Supplied with lid fixing screws

DIN RAIL ENCLOSURE 6U WITH CLEAR LID

This enclosure is made of light-grey ABS and has a clip to attach it to a standard DIN rail. We've found it's the perfect size for an Arduino Uno or even a Raspberry Pi, and will make a perfect way to protect and mount projects based around Arduino and Raspberry Pi. Includes a clear lid for a diagnostic display or even some indicator LEDs.

- 6U DIN rail mounting
- Measures 95mm x 106mm x 58mm including clip
- Side knockouts for terminal connections

IP54 HIGH QUALITY POLYSTYRENE ENCLOSURES

This range includes a small flat case that is ideal for remote control transmitters, up to a case that is ideal for bench test equipment, and the best thing is that they are not expensive.

All are supplied with removeable front and rear panels which are light grey in colour, with the rest of the case dark grey. They are moulded in ABS, conform to IP54 and IEC529 and NEMA4 with respect to moisture and dust proof sealing and flame retardant to UL94-VO. Guide slots are provided for vertical mounting of PCBs, and spacers are moulded in for horizontal mounting.

All but the smallest two have M3 screws and brass inserts to hold top and bottom together.

GREY VENTED ABS ENCLOSURES

NEW

A range of vented ABS enclosures to protect your project from unwanted fingers or objects making contact with your electronics, but still allowing for airflow (or moisture for environment sensor applications). The enclosures are moulded from grey ABS plastic and have a satin textured finish. Four moulded standoffs hold your circuit board in place (screws not included - use #2 x 3/16" or similar), and slots in the base makes it easy to wall-mount the enclosure. Wiring can be easily passed through by knocking out a small round section in its base with a screwdriver. The snap-fit assembly makes it easy to close or open the enclosure without the need for tools.

- ABS plastic with UL94-HB rating
- Satin texture finish
- Designed to meet IP30

BLUE ALUMINIUM ENCLOSURE WITH CLEAR ENDS

This great looking enclosure is sturdy and sleek. The extruded aluminium construction is ideal for both strength and heat-sinking if necessary. Provided with clear end caps to allow hole-less mounting of displays and diagnostic LEDs.

- Measures 177mm x 61mm x 89mm
- Slots for easy PCB mounting
- Clear end caps
- Sealing gaskets

Quick Reference Transformer Selection

Magnetic core technology for mains transformers has been stable for many years. This is not to say that manufacturing technology has not improved. Our range of transformers may be stable, but that does not mean that our products don't change. We are constantly refining these transformers. We have two major categories Power EI Core and Power Toroidals. This table gives an overview with key technical specifications for easy reference and selection.

- Primary Voltage (V): 240VAC
- Primary internal thermal fuse protection
- Conforms to AS/NZ 61558.2.6

Toroidals:

SOANAR

WHY A TOROID?

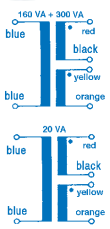

- Smaller size and weight to meet modern 'slimline' requirements
- Low electrically induced noise demanded by compact equipment
- High efficiency enabling conservative rating whilst maintaining size advantages
- Simple, quick, single bolt mounting

The Toroidal transformer is now accepted as the standard in the industry, quality made to ISO 9000 overtaking the obsolete laminated type. Industry has been quick to recognise the advantage toroidals offer in size, weight and lower radiated field. Current ratings on toroidal transformers. Can be used in 2 ways:

A) Both secondary windings in series - double the volts
B) Both secondary windings in parallel - double the amps.

Note: If connected in parallel, the windings must be connected in phase.

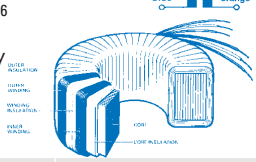

20VA LOW PROFILE: MT2082 / MT2084 / MT2086

- Dimensions: 75(O/D) x 27(I/D) x 32(H)mm

The height is only 32mm, which means they will fit into a 44mm rack case.

160VA TOROIDS: MT2112

- Dimensions: 110(O/D) x 34(I/D) x 44(H)mm

Speaker Transformer

5W LINE SPEAKER TRANSFORMER

Designed to tap 100V (or 70V 1/2 power) public address amplifier lines to use an 8Ω speaker. Made with grain oriented steel for good frequency response. Good dynamic range. Primary taps enable you to select power level for 8Ω speaker. Connect primary to C (100V) and tap for whatever sound level is required from 0.5-5WRMS. Supplied with terminal block mounted on top of transformer. Mounting hole centres 53mm.

BUILD YOUR OWN COILS AND TRANSFORMERS BOOK

This book is a wealth of information, ideal for hobbyist or anybody interested in winding their own transformers. After the introduction the book covers attributes of coils/transformers, mutual inductance, reactance, resonance, impedance, coil selectivity. It then goes on to the design aspects - discussing coils in tuning circuits, types of formers and cores, types of winding, self capacity, equations, coil design, design of IF transformers then output and power transformers. 55 pages 137 x 212mm.

LIGHT EMITTING DIODES

- Luminous intensity (IV) does not represent total light output from an LED. Both the luminous intensity & the spatial radiation pattern (viewing angle) must be taken into account
- If two LEDs have the same luminous intensity value, the lamp with the larger viewing angle will have the higher total light output
- Maximum luminous intensity can be achieved by operating the LED in pulsed mode, or maximum continuous forward current

Viewing Angle	Is the complete angle where the luminous intensity is half the on-axis intensity.
Wavelength	Dominant Wavelength of the light emitted in nm (nanometers). This determines the colour of the LED.
IF Typical	Continuous forward current in mA to obtain typical optical characteristics.
VF Typical	Continuous forward voltage in Volts to obtain typical optical characteristics.
IF Max	Maximum continuous forward current in mA at 25°C.
VDD Typical	Operating voltage to obtain typical optical characteristics.
VDD Max	Absolute maximum supply voltage at 25°C.
IV Typical	Light emitted from the LED is quantified by a single point, ie the on-axis luminous intensity value in mcd (millicandela) at IF Typical.

Free Boxes!

MOVING HOUSE? NEED SOMETHING FOR STORAGE?

In the course of running our business, we go through thousands of stout cardboard boxes that become surplus to our needs. If you need a box - even several - just ask and we will probably have half a dozen or so that could be suitable for you. They are FREE and you are doing yourself and us a favour by recycling them.

Pkt 5	HP1110	$5.80	$5.20	$4.05

100MM LIGHT TRANSPORTERS - PACK OF 3

These fibre optic light transporters are simply clipped over the LED and mounted to the panel. With high light conductivity the intensity will not diminish. Much easier to install than LED clips!

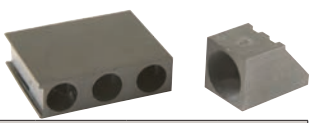

- Hole cut-out size: 3.5mm

LED Matrix Displays

8X8 LED MATRIX

A 8x8 LED matrix module for simple graphical output display. Ideal for display of symbols, basic data, or graphics. 16 pin connection with 8 anode pins for column and 8 cathode pins for rows. Available in red or green.

SPECIFICATIONS	
Peak Wavelength	568nm
Luminous Intensity	15mcd
Forward Voltage(Vf)	2.2V
Forward Current (If)	40mA
Dimensions	32(H) x 32(W) x 8(D)mm

	Cat.	Qty 1+	Qty 4+	Qty 10+
Green	ZD1800	$7.90	$7.10	$5.50
Red	ZD1802	$7.90	$7.10	$5.50

8X8 RGB LED MATRIX

A full 8x8 LED Matrix Display with a matte black background measuring 60mm x 60mm. Designed to mount directly on the XC4498 RGB LED Driver module. These modules can be stacked for extended displays.

- Full 8x8 Matrix controlled through 32 pins (8 + 8 x 3)
- Flush edges for creating extended displays
- 192 LEDs in 64 pixels

	Cat.	Qty 1+	Qty 4+	Qty 25+
RGB	ZD1810	$22.90	$20.90	$15.90

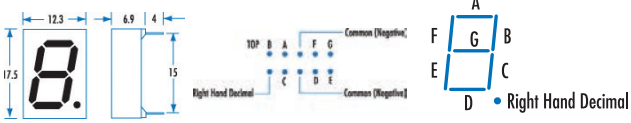

7 Segment LED Displays

SMALL DISPLAYS

Standard 7 segment LED module for numerical output display. Designed to be fitted in close format to allow display of larger numbers.

Proximity Sensor

IR ADJUSTABLE PROXIMITY SENSOR

An easy to use IR proximity sensor in adjustable threaded package for straightforward mounting.

- 5V supply for compatibility with logic level applications
- Use with Arduino® by setting sensor pin to INPUT_PULLUP mode
- 3-80cm detect range (adjustable via trimpot)
- Modulated IR to avoid interference from ambient light
- Output can sink up to 100mA for driving relays directly

LED Tester

LED TESTER

With this basic but essential tool it is possible to check the function, brightness, colour and polarity of most kinds of light emitting diodes (LED). The LED to be tested plugs into the front panel, at the current you wish to test it with. Two 10mA positions have been included on this multi-LED tester so that comparisons between two LEDs can be made simultaneously.

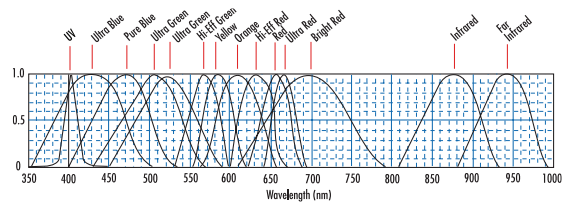

- Operating voltage: 9V (battery required)
- Test currents: 1mA, 2.5mA, 5mA, 10mA, 20mA,50mA
- Dimensions: 58 x 44 x 25mm

PHOTO INTERRUPTER

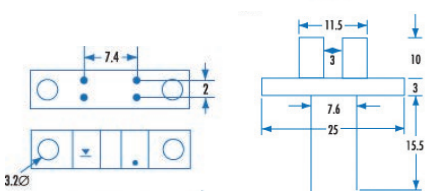

This device enables you to turn a circuit on and off optically. It consists of a moulded plastic housing with an IR LED facing a phototransistor across a gap. Any object in the gap will interrupt the IR beam and consequently switch the phototransistor on and off. The device is very fast and ideal for counting, timing or sensing. Full specs supplied with each unit.

- PCB or chassis mounting
- Low cost
- Rugged one piece construction
- Very fast

Hall Effect Devices

HALL EFFECT SENSOR

UGN3503U HALL EFFECT SENSOR IC

A miniature sensor to accurately track extremely small changes in magnetic flux density - changes generally too small to operate Hall effect switches. Applications include notch sensor, current monitor, gear tooth sensor, etc.

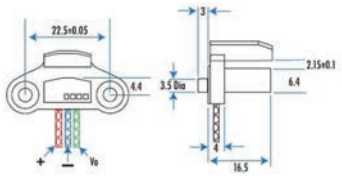

SPECIFICATIONS	ZD1902
Operating Voltage	4.5 - 6VDC
Supply Current	Typ. 9mA

HKZ-101 HALL EFFECT SWITCH

A rugged Hall effect switch designed for automotive ignition applications. This device consists of a Hall effect semiconductor sensor separated across a small gap by a magnet. In its normal state the Hall sensor (with inbuilt output transistor) is conducting. It will sink up to 40mA between the impressive temperature range of -40 to +150°C. When an iron vane is introduced into the gap between the Hall element and the magnet, the output transistor switches off. The sensor is hermetically sealed, resistant to petroleum products and incorporates metal bushed mounting holes to facilitate fitting to a carrier plate, bracket etc. Lead connections: Red V+, Black earth, Green signal (on/off).

Pressure Sensor

PRESSURE DIFFERENTIAL SENSOR

The ZD1904 piezo resistive pressure sensor provides a very accurate and linear voltage output directly proportional to the applied pressure. The sensor housed a single monolithic silicon die with a strain gauge and thin film resistor network on each chip.

- 0°C to 85°C temperature compensation
- 0 to 10kPa (0 to 1.45 psi)

Special Function ICs

SMD 7 DARLINGTON ARRAY

High voltage, high current Darlington arrays each contain seven open collector Darlington pairs with common emitters. Each channel rated at 500mA and can withstand peak currents of 600mA. Suppression diodes are included for inductive load driving and the inputs are pinned opposite the outputs to simplify board layout.

ISD1820 RECORD AND PLAYBACK IC (DIP 14)

This is the same IC as the XC4605 Record and Playback module. Simple digital control of recording and playback of audio samples, including the ability to drive an 8Ω speaker directly.

• Compact 14 pin DIP package
• Drive 8Ω speaker directly
• Loop select option
• Sample rate adjustable

74LVC245 DIP 8 CHANNEL BUS TRANSCEIVER DIP 20

Although the full name of the ZK8884 is a 74LVC245 Octal Bus Transceiver, it also makes a great eight channel 3.3V-5V level converter. The inputs are 5V tolerant and the outputs are all 3.3V compatible.

• Eight Channels
• Direction control pin
• Output enable pin
• 20 pin DIP package suits breadboarding

L293D QUAD HALF BRIDGE MOTOR DRIVER IC

The L293D quad half H-bridge motor driver is capable of providing four high power outputs, ideal for driving a stepper motor, or two DC motors. Suitable for 3.3V or 5V logic.

• 16pin DIP IC
• 600mA current drive per channel
• 36V maximum supply voltage
• 5kHz maximum PWM frequency

L293D	ZK8880	$5.60	$5.00	$3.90

L9110 BRIDGE DRIVER IC DIP 8

A compact 8 pin DIP package which can control a small motor from a microcontroller.

• Handles up to 2.5V- 12V, 800mA continuous
• Interface to TTL level inputs down to 2.7V
• Suitable for reversible control on one DC motor
• Easy for prototyping on breadboards

Specialty ICs

MCP3008 8 CHANNEL 10 BIT ADC DIP 16

The MCP3008 is an 8 channel 10 bit ADC (analog-to-digital converter) suitable for use with a microcontroller or single board computer. Great for adding analog inputs to chips that lack it.

• SPI interface
• Up to 200 ksps at 5V supply
• Suits Raspberry Pi

TDA1905 5W AMPLIFIER IC WITH MUTE

Monolithic integrated circuit in POWERDIP package, intended for use as low frequency power amplifier in a wide range of applications in radio and TV sets:

• Muting facility
• High supply voltage rejection
• Voltage range 4V to 30V
• Protection against chip over temperature
• Power dissipation of up to 6W and a thermal resistance of 15°C/W (junction to pins)
• Very low noise
• Low switch-on noise
• Full data on website

MAX7219 LED MATRIX DRIVER IC

The MAX7219 is an all-in-one LED Matrix driver suitable for controlling an 8x8 LED Matrix or even eight 7 segment displays (BCD decoding can be done on the chip too). This is the same IC that is on XC4499 and XC3714.

• SPI interface (3 IO pins)
• Can be daisy chained for larger displays
• Adjustable brightness
• 24 Pin DIP package

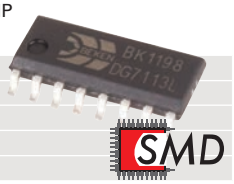

Requires only one external component (resistor for LED current setting)

SMD IC BK1198 RADIO RECEIVER

We've come a long way from cat's whiskers and triode valves to digital tuning. The ZK8829 is a digital radio IC that can pick up AM, FM and shortwave, and can be controlled by a potentiometer or resistor string. It's the same IC as in our Cardboard Radio Kit. Comes in 16 pin SOIC package, PI6530 SMD-DIP adapter is recommended for prototyping.

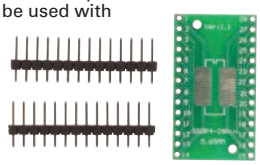

SPECIFICATIONS	ZK8829

28 PIN SOIC/SOP TO DIP BREADBOARD ADAPTOR

More and more IC's are now only available as surface mount variants, making prototyping harder. The SMD breadboard adaptor allows SMD IC's and other smaller pitch components to be used with standard 0.1" prototyping equipment such as breadboard and protoboards.

• Suits 4-28 pin SOP/SOIC IC's (SOIC on one side, SOP on the other)
• 1.27mm pitch and 0.65mm pitch
• Header strip included

END OF AN ERA

It has been a long time since surface mount components arrived on the scene. Up until recently, this has not been an issue, but we are now seeing some troubling developments.

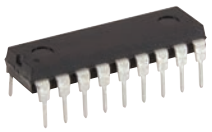

Many I.C.'s are now becoming not available in wire lead configurations and only come in surface mount.

We will continue to try to get wire parts while they are available.

PROGRAMMING & CUSTOMISING THE PIC MICROCONTROLLER BOOK

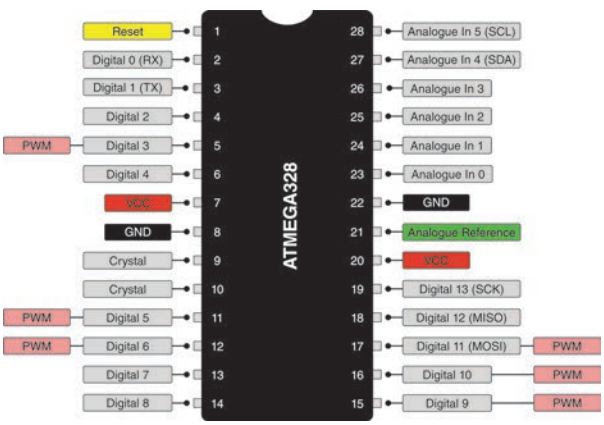

Tap into the latest advances in PIC technology with the fully revamped third edition of this brilliant book. More than 600 illustrations and comprehensive, easy-to-understand coverage of the PIC microcontroller's hardware and software schemes. With 100 experiments, projects and libraries, you get a firm grasp of PICs, how they work and the ins-and-outs of their most dynamic applications. Covers Assembly, BASIC, and C programming languages. It also covers the latest program development tools and includes a refresher in electronics and programming as well as reference material.

ELECTRONICS DEMYSTIFIED

Part of the popular Demystified series, this book teaches you electronics theory, it does not include projects. It avoids heavy mathematical formulae, but, be warned there are equations in this book. They are not seriously hard though! The book starts at simple DC circuits, goes through AC circuits, impedance, reactance, power supply concepts, semiconductor basics, amplifiers, oscillators, RF, telecommunications and finishes on antennas. At the end of each chapter is a straightforward quiz (multiple choice) to make sure you are on top of concepts. This is the best-written technical book on novice to moderately advanced electronics we have seen. Read this book and understand it - you are a serious techo.

GLOSSARY OF TERMS

Duty cycle	Duty cycle is commonly expressed as a percentage or a ratio, and indicates the amount of time over a certain period that a component is turned on. And a period is the time it takes for a signal to complete an on-and-off cycle. For example, when using a PWM value of 127 (out of a total of 256), you have a 50% duty cycle.
Firmware	Similar to software, however it is stored on non volatile memory and can be executed in place - without being copied in RAM - by a microcontroller. It is used in embedded systems and it is made of machine code instructions. Firmware is usually updateable.
Ground	The point of a circuit where there is 0 potential electrical energy. Without a ground, electricity will not have a place to flow in a circuit.
I2C	I2C - Inter Integrated Circuit - is two wires serial synchronous bus that provides communication between two Integrated Circuits. The I2C can run at different speeds: 100kbps, 400kbps and 3.4 Mbps. It's used to connect also different boards with the simplicity of wiring only two cables, called SDA (Data line), SCL (Clock line). Can support up to 1008 slave devices.
ICSP	In-Circuit Serial Programming is the ability of a microcontroller to be programmed directly on the board on which it is mounted. It is also a set of signals and pins used for the programming.
IDE	Integrated Development Environment. The Arduino® IDE for example, is where users write code to upload to an Arduino® board.
EEPROM	Electrically Erasable Programmable Read-Only Memory and is user-modifiable read-only memory (ROM) that can be erased and reprogrammed (written to) repeatedly
Digital IO	Digital Input and Output - refers to binary data flowing into and out of a circuit; the signal is either high(1) or low(0).
Analogue IO	Analog Input and Output - these signals are variable, and have multiple states. Analog input signals can represent - temperature or level or rate of flow.
GPIO	Stands for "General Purpose Input/Output." GPIO is a type of pin found on an integrated circuit that does not have a specific function. While most pins have a dedicated purpose, such as sending a signal to a certain component, the function of a GPIO pin is customizable and can be controlled by software.
RS232	RS-232 is a standard communication protocol for linking computer and its peripheral devices to allow serial data exchange.
RAM	Random Access Memory. It is a fast memory that offers both read and write capabilities. RAM is a volatile memory and requires power to keep the data accessible. If the computer is turned off, all data contained in RAM is lost.
ROM	Read Only Memory. Data that normally can only be read, not written to. ROM contains the programming that allows your computer to be "booted up" or regenerated each time you turn it on. Unlike a computer's random access memory (RAM), the data in ROM is not lost when the computer power is turned off.

Flash Memory Chip

SST 49LF020 LPC FLASH MEMORY

The SST 49LF020 flash memory device is designed to interface with the LPC bus for PC, game console and Internet Appliance applications. It provides protection for the storage and update of code and data in addition to adding system design flexibility through five General Purpose Inputs (GPI). The SST 49LF020 is in compliance with the Intel Low Pin Count (LPC) Interface Specification 1.0. Two interface modes are supported: LPC Mode for In-System programming and Parallel Programming (PP) Mode for fast factory programming.

41 PROJECTS USING 741 IC

By M C Sharma. The 741 OP amp IC is very inexpensive yet is comparable to the best in respect of versatility and performance. We can't list every one of the 41 kits but here are a few examples: inverting and non-inverting AC and DC amps, crystal, magnetic, guitar, telephone and mic preamps, 3W and 12W amps, intercom, AC and DC motor control, schmitt trigger, square wave generator, flasher, timer light op relay, DC voltmeter, AC millivoltmeter, RPM counter, A to D converter, etc.

Some parts are getting scarce

Many of the parts on these pages were created in the mid 60's to 70's. Whilst some are so popular, they will continue to be made for some time yet. The reality, however, is that industrial demand for many of these parts is falling off. This has not been helped by a manufacturers preference for surface mount types.

Sources for these parts is getting exotic. For example some of the types are only available from places like Russia.

Jaycar will try its hardest to keep our supply of these parts secure, but perhaps you should consider hoarding some linears that you have an ongoing need for.

Special Function ICs

8BIT 257 STEP DIGITAL POT - MCP4151-103E/P

8Bit (257 step) digital pots are useful in application that require precision control. They can be used for example in the feedback network of an op amp to provide precise variable gain control, or filters to allow accurate adjustment of the filter properties.

SMD 555 TIMER ICS

- Timing from microseconds through hours
- Operates in both astable and monostable modes
- Adjustable duty cycle
- Output can source or sink 200mA
- Output and supply TTL compatible
- Normally on and normally off output
- Sold as a pack of 10

Applications:

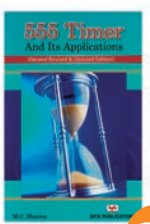

- Timing
- Pulse generation
- Time delay generation
- Pulse width modulation
- Pulse position modulation
- Linear ramp generator

555 timer & its applications

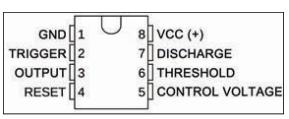

The 555 Timer IC is probably the most used IC in the world. It gives accurate timing range of micro seconds to hours. This book describes the functions and operation of the 555, then explains 21 projects to build using the IC. Some of these include photo timer, touch plate controller, car wiper control, car lights turn off, flashers, generators, delays auto power on and off, Ni-Cd charger, frequency divider, light operated relay, etc. An ideal book for the electronic hobbyist and experimenter.

tech talk The 555 Timer

It would be a mean-spirited person who did not concede that the 555 Timer IC was - and still is - the most popular chip ever made. Invented in 1971 by a U.S. company called Signetics it has a number of really useful features. Firstly it's a timer. It's a pulse generator and finally an oscillator, all in an 8 pin package. The original version was fabricated with bipolar transistors, and although still popular a CMOS version is now dominant. The bipolar version, like 74 series TTL drew a lot of current and also created an annoying amount of switching noise on power supply rails. Such is the popularity of this circuit, it is available in standard bipolar, CMOS in single, double and quad timer packages. Jaycar still carry the product in original form, (555) dual 556, CMOS 7555 and in a single surface mount version! It was said that the name 555 came from the fact that the circuit contained 3 x 5k resistors used within. The inventor of the original device, Hans Camenzind disputes this, saying that the number of the part was arbitrary. Whatever, the fact is that around a billion of them are made every year in one form or another.

Transistors Multi-Replacement

MULTI-REPLACEMENT COMMON TRANSISTORS

Two transistors which will replace a multitude of common hard to get devices. Both are TO-92 package.

PN100

NPN general purpose medium power amp and switch with continuous collector current up to 500mA. PN100 replaces PN2221, PN2222, PN2222A, PN3565, PN3568, PN3569, PN3643, PN5133, 2N2219A, 2N2222A, 2N3414, 2N3415, 2N3416, 2N3417, 2N3700, 2N3704, 2N3904, 2N4123, 2N4124, 2N4401, 2N5088 and 2N5210.

FULL TO-3 INSULATING CAP

Ideal for insulating 'live' transistors or for simply keeping prying fingers away from potentially dangerous transistor cases.

- Fastens to the transistor
- Has a single ventilation hole to decrease chance of overheating.

Insulation Kits

SILICONE RUBBER TRANSISTOR INSULATORS

Silicone impregnated rubber washers. Stop using messy silicone grease. These washers are made from silicone rubber and are as effective as mica and grease.

tech talk What Is A Zener Diode And How Does It Work?

A Zener diode works like a normal diode in the FORWARD direction, but when voltage is applied in the REVERSE direction it does something really useful. At a specified reverse voltage it starts to conduct. In other words, if you apply, say 12V (for a 12V Zener) across the diode it will start to conduct current. See diagram: When the Zener starts to draw current, this has the effect of regulating the positive (+) voltage. Note: As the Zener draws current, this will turn into heat. The Zener therefore has a wattage rating (as well as its Zener voltage rating) this may not be exceeded. Jaycar carries a range of Zener diodes from 3.3V to 75V.

Fig 1. As positive (+) voltage climbs up to 12 volts the 12V Zener starts to conduct, drawing current

Thermistors

NEGATIVE TEMPERATURE COEFFICIENT THERMISTORS

These devices are made of a special ceramic material which changes resistance value rapidly with temperature increase. They are commonly used to check thermal runaway in bipolar transistor amplifiers etc., but really have dozens of other uses. They are rugged and very reliable.

- Resistance at 25°C ±10%
- Dissipation (MAX) 500mW
- Temperature Range -20°C ~ +125°
- Case 5mm diameter
- Thermal dissipation constant: 6mW/°C
- Radial type, dipped epoxy
- Type-NTC Ceramic material with tinned copper lead

HIGH TEMPERATURE GLASS THERMISTOR 100K

This high temperature NTC thermistor is suitable for operation up to 250 degrees, and is compatible with the hot-end thermistors used in many 3D printers (including TL4100 and TL4076).

- Sealed glass body with small bead for fast response
- 30mm leads

SILICON CONTROLLED RECTIFIERS - Reverse blocking thyristors glassivated PNPN devices designed for high volume consumer applications such as temperature, light and speed control, process and remote control and warning systems where reliabilty of operation is important.

- Glassivated surface for reliabilty and uniformity
- Power rated at economical prices
- Sensitive gate triggering
- Practical level triggering and holding characteristics
- Flat, rugged, thermopad construction for low thermal resistance, high heat dissipation and durabilty

tech talk "Embedded System" Meaning?

An embedded system is a dedicated circuit, generally centred around a microprocessor (or microcontroller) which has a software program stored in dedicated on-board memory or in the memory of the microprocessor itself that has a SPECIFIC computational purpose. A calculator, is, for example an embedded system. It is specifically made to perform a particular task. A mobile phone is another example of an embedded system. A controller for a washing machine or a microwave oven is an example of an embedded system also. In other words, the application is specifically embedded in the system architecture. Typically a personal computer has a "general purpose" application. Both personal computers and embedded systems are programmed by high level languages, but nowadays the programming language in a PC is less obvious as the PC generally powers up to an application's menu automatically. The embedded system, on the other hand requires you to program the device directly through a programming language like 'C' etc. Interestingly, Smartphone which can still be regarded as an embedded system are looking more and more like PCs every day. Maybe the definitions will need to be redefined in future.

DUAL N-CHANNEL 30V MOSFET - SI4944DY

This handy dual N-channel MOSFET can be used in many projects such as DC-DC conversion and switching circuits. They have extremely low on-resistance (rDS(on) 0.016Ω VGS = 4.5V) and fast switching/low capacitance. They are very useful as analog switches as well as the traditional uses for MOSFETs eg, relay driving, LED driving, etc.

ULTRASONIC TRANSDUCER

- Compact and lightweight
- High sound pressure level
- Low power consumption
- High sensitivity, reliabilty & stability
- Transmitter & receiver in one unit

Application:
- Parking sensors
- Proximity sensor
- Motion detector
- Automatic doors
- Intruder alarm
- Water level meter

Peltier Modules

THERMOELECTRIC (PELTIER) MODULES

These are a solid-state devices which operate as a heat pump to transfer heat utilising the Peltier effect. Suitable for cooling or heating applications up to 100°C.

- Measures: 40 x 40 mm with lead wires
- Temperature differential (DT) (Th=27°C): >=68°C
- Optimum input voltage (Vmax) (Th=27°C): 15V

Valve Sockets

VALVE SOCKETS

9 PIN:

This unit is moulded from high grade thermosetting resin. The pins are adequately plated and have deep solder terminals, sufficient for several hard wiring points per pin. Sturdy flange mount is meant for fitting above the chassis.

8 PIN:

Made from similar materials to above, but with moulded key. Can be mounted above or below the chassis.

tech talk Capacitor Types

Ceramic:
These offer low cost and high capacitance in a small physical size. Normally there are two types, the 'High Stability Temperature Compensating' type and the 'Bypass and Coupling' type. The former for use in resonant circuit and filter applications, with a value largely independent of voltage and frequency. The latter is for use in less critical applications, as they are less stable and have non-linear temperature characteristics and are somewhat voltage dependent.

Polyester:
These type offer good stability, a large range of values at low cost, and are the most widely used capacitor for general purpose.

Polycarbonate:
These have a low temperature coefficient, low dielectric loss at high frequency and excellent temperature stability characteristics.

Polystyrene:
These offer tight tolerance and are highly stable; making them suitable for very stable tuned circuits and oscillators.

Polypropylene:
This type has a very low dielectric loss and are particularly suitable in audio circuits and sample-and-hold circuits.

Mylar:
This is the Du Pont tradename for polyester. They usually have an aluminium film deposit on the dielectric and are called "metallised polyester".

250VDC METALLISED POLYPROPYLENE

• Ideal for speaker crossovers
• Axial

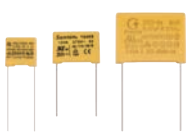

HIGH QUALITY

Metallised polypropylene dielectric offers stable capacitance over a wide temperature range. This, and the relatively high capacitance for size makes them ideal for high quality loudspeaker crossover networks. Naturally, they are also suitable for other applications where a stable, non polarised capacitive component is required.

2.5V SUPER CAPACITORS - 22 & 55 FARAD

These specially engineered capacitors are actually a high-tech energy storage device - not the standard capacitors which they look identical to. Using a new combination manufacturing process where nano surface structured carbon is combined with organic electrolytes, this technique enables these capacitors to store 1,000 times the energy of a standard electrolytic capacitor. The main applications are energy storage at a circuit board level replacing the bulkier secondary batteries which are currently used. Essentially anywhere high energy storage is needed.

- 7.5mm lead spacing
- High density of energy
- Long lifetime (10 years)
- High cycle life (over 500,000 cycles)

5.5V SUPER CAPACITOR - 0.047 FARAD & 1 FARAD

Super capacitors are a standby power source capable of providing up to 30 days back-up voltage & current to CMOS RAMs during power failures. Never needs replacing or maintenance

- Can be soldered onto PCBs
- Can be charged at high & low current rates i.e. microamps to amps
- 5mm lead spacing

MOTOR RUN CAPACITORS, SINGLE PHASE, ASYNCHRONOUS

These capacitors are designed to replace the original capacitor that has failed. You must replace the part as the motor may simply not work, draw excessive current or have poor torque. These are suitable for motors operating at up to 400VAC and common values are offered here. Please note it is important to choose the correct value for the motor otherwise the starting torque of the motor will change. Two different packages are provided. For the higher valued capacitors it's necessary to use the different case style which provides the important AMP250A terminals and an inbuilt safety device.

tech talk Low ESR Capacitors

ESR stands for Equivalent Series Resistance. Capacitors, like all electronic components, are never just pure capacitance; there are always inherent series resistances due to connecting leads and internal structures. Taken all together, these resistances are represented as a single ESR. Electrolytic capacitors can have a significant ESR. Typically, an electrolytic capacitor is used as energy stored to 'hold up' a voltage rail between pulses of current from a rectifier. each current pulse charging the capacitor causes power losses in the series resistance, both heating up the capacitor and increasing the ripple voltage. Further losses occur when the capacitor discharges into load. For mains frequency power supplies this may not be such a problem. However, for switching power supplies that run at 10 s of kilohertz, a Low ESR capacitor reduces heating losses and provides the best filtering.

RP ELECTROLYTIC

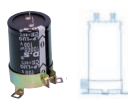

This style of capacitor is distinguished because, whilst bulky, does not need a chassis clamp. Fixing is by the stout lead wires. While soldered retention is generally adequate. For applications where vibration is an issue a dab of silicone under the component is recommended. 85°C rated

Ferrites CONTINUED

Ferrite is a ceramic material with Iron Oxide - up to 50% - then with oxides of manganese and zinc or nickel. The ceramic material is mixed with these substances, pressed or extruded into useful shapes and finally fired in a furnace to their final hard, brittle state. From this there are two forms: Manganese - Zinc (Mn-Zn) ferrites which are the most common and are used for lower frequency work. They have higher permeability than the higher frequency type which have Nickel and Zinc Oxide components. The products shown in this catalogue are Mn-Zn types. For more information check our website.

FLAT CABLE SUPPRESSION SLEEVES

These devices are designed to suppress high frequency (fast rise time) interference (radiation) to and from PC boards, printers, disk drives etc. The ferrite makes the cable behave like a high impedance choke at high frequencies.

Round Cable Suppression Sleeves

Basically a split high permeability ferrite core with a plastic case, these devices are ideal where parasitic voltage spikes or RF breakthrough are a problem or potential problem. The cores come in a hinged plastic case, simply snap on to the computer or data cable. Three versions are offered which cover most computer leads etc. For extra security, lock assembly together with a cable tie.

MODEL U25:

This offers impedance (peak approx 300Ω at 2-300MHz)with negligible impedance below 1MHz. Plastic casemeasures 32L x 30mm square. It will take a lead up to 12mm (1/2") diameter but preferably 10mm.

MODEL U16:

A compact attenuator that will pass a cable up to 8mm dia (most monitor cables etc). Typical impedance at 25MHz 300Ω approx, 590Ω at 100MHz dropping off after that.

- Case measures 25.9(L) x21.5(Dia)mm

MODEL U15:

This model is for 7mm dia cable or smaller.

- Offers good protection up to 500MHz

EMI Filters

IEC EMI POWER LINE FILTER - 6 AMP

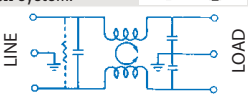

These Industry standard design RF/EMI filters are designed to reduce line - to - ground (common mode) interference. They accept a standard IEC power line connector and are panel mounted. They meet (or exceed) international standard leakage requirements and are rated for mains voltages of 115 to 250V, 50, 60Hz.

- Safety & construction are in compliance with UL, CSA, VDE

240V AC EMI FILTER

Designed for mounting inside a chassis, these industry standard RF/EMI filters are predesigned to reduce line-to-ground (common mode) interference. Rated for mains voltages of 125 or 240VAC 50 or 60Hz, they are very useful when mains cords are fixed to the outside chassis and an IEC320 inlet is not suitable.

Surge Arrestors

GAS DISCHARGE TYPE SURGE ARRESTERS

Gas discharge arresters are ideal for quenching high voltage, fast rise-time interference transients. They are very high impedance (virtually open circuit) in the normal state with a typical capacitance of 1pF between electrodes. When a voltage spike appears, they arc over and present a relatively low impedance in this condition effectively quenching the spike. They are suitable for protection of telecom lines and antenna circuits. They are not recommended to be fitted across mains circuits as the low source impedance of the mains could destroy these devices after the fault spike oh no! has cleared.

Component Lead Forming Tool

COMPONENT LEAD FORMING TOOL

Get the hole spacing for your resistors and diodes perfect every time. This handy forming tool provides uniform hole spacing from 10 to 38mm. Suitable for production assembly, education and training. The tool is double sided with one side for use with DO47 outline diodes (e.g. 1N914) and 1W Zener diodes; the other side being suitable for 1/4W resistors, DO41 outline diodes (e.g. 1N4004).

- Made in USA from engineering plastic
- Dimensions: 138(L)mm

Prototype Resistor Packs

0.25 WATT CARBON FILM RESISTORS

300 PIECES

This pack includes five of virtually each value from 1 Ω to 10 Meg. Sixty different values. All resistors are bandoleered for easy sorting.

Values supplied are:

1Ω, 1.5, 2.2, 3.3, 4.7, 5.6, 10, 12, 15, 22, 27, 33, 39, 47, 56, 68, 82, 100, 120, 180, 220, 270, 330, 470, 560, 680, 820, 1k, 1k2, 1k5, 1k8, 2k2, 3k3, 3k9, 4k7, 5k6, 8k2, 10k, 12k, 15k, 18k, 22k, 27k, 33k, 39k, 47k, 56k, 68k, 82k, 100k, 120k, 150k, 220k, 270k, 330k, 470k, 1M, 2M7, 4M7 & 10M.

ULTIMATE RESISTOR PACK

Top quality, guaranteed 1/4 watt 5% miniature sized carbon film. In fact, they look like 1/8W, they are so small. This pack gives you almost every resistor in the E24 range (eg. 1.8K, 2.0K, 2.2K). You get 10 of every value, a total of 170 values, 1700 resistors in all and they are bandoleered for easy sorting. Buy this pack and you should NEVER be short of any resistor again. Massive savings over normal costs.

0.25 WATT CARBON FILM RESISTORS

This pack includes 10 of every value of 1/4W 5% carbon film resistors from 1Ω to 10MΩ. This is the E12 range, which goes like this - 10, 12, 15, 18, 22, 27, 33, 39, 47, 56, 68, 82, 100. Total values supplied is 85, giving a total of 850 resistors. Resistors are bandoleered for easy sorting. A great way to never be out of that odd resistor & save a packet at the same time.

Potentiometers

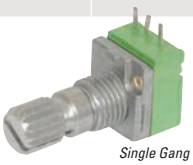

9MM SQUARE PCB MOUNTING

These pots are rapidly becoming the industry standard for miniaturised audio, digital and telecommunications equipment. This series features good solder bath immersion resistance, 300° rotation and standard 18 tooth metric pre-cut actuator shafts. Two popular metric knobs are now carried, however metric knobs are now commonly available. Both single and dual gang types are stocked in log and linear resistance tapers.

24MM PCB MOUNTING

With imperial standard shaft & bushings made to our rigid engineering specifications. The potentiometers are full size - 24mm diameter types. They have genuine 6.35mm (1/4") shafts with a flat machined 25% of the diameter for grubscrews or interference fit knob mounting. The shaft is a generous 38mm long. The bush is a 3/8" 32T.H.D. type which we believe is necessary for good fixing to a panel. Another important feature of the pots is their PCB mount capability. The pins are rigidly mounted on phenolic with the centre pin offset from the two outer terminals. When soldered into a PCB, the pot is quite rigidly held on its own. Double gang pots are held in 6 places and require no extra mechanical mounting assistance. The pins are large enough to terminate screened cable, etc., if the job requires hard wiring.

- We have stocked this product for over 10 years now and have no intention of changing it. You can therefore confidently design around this product
- Supplied with nut and washer
- Power rating Log 0.25W and Linear 0.5W

CAUTION WHEN ORDERING!
When ordering knobs (from any supplier) double check that the knob you are getting will fit the shaft of the component you are using it with. For example a knob with a 6mm shaft hole will not accept a 1/4" shaft. As you are probably aware 1/4" equals 6.35mm.

That 0.35mm is enough to render the knob unusable. So called "metric" knobs often have an 18 spline interference fit hole suitable only for push-on type aluminium shafts. Note: Apart from metric, all knobs shown on this page fix to 0.25"/6.35mm shafts (with flat) unless otherwise stated.

QUALITY MATTERS

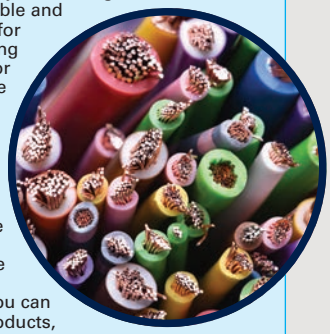

We often overlook the hardware that connects our appliances, our speakers, or feed our movie streaming from the router to the TV.

Often considered unsightly, with much effort to conceal them, there's much more than meets the eye to the humble length of cable.

Especially in today's electrically noisy environments, quality makes a difference. That's why you'll find such a huge range of cable, and associated connectors.

There are budget options for those less-sensitive projects, through to the most premium cable and connectors for the discerning audiophile or performance critical application.

We've been selling quality hardware in this space for over 30-years. We know what works, so you can trust our products, unreservedly.

Speaker Cable – By The Metre Or Roll:

Everyone, at some stage of their life, needs to run a length of wiring to set up a speaker or two. Yes, you may be able to cobble some mains fig.8 flex to do the job - but really, let's get serious. The Jaycar range of speaker cable goes from quite modest to gi-normous! At the modest prices shown below, why not just use the right stuff - with polarisation to boot - to get that job done, neatly & efficiently. Oh, and if you find yourself doing speaker wiring jobs a fair bit, you may be better off buying a spool. It's always there when you need it.

tech talk — Why Our Wire Is Tinned

We now supply all multi-strand power cable with the copper conductors tinned. When you put a coating of pure tin over the copper, you prevent the copper from oxidising. This oxidising can prevent you from achieving a good, tinned solder connection to the wire. This is particularly important in marine and car installations. We have not increased our price to you for this step up in quality.

Banana Plugs

Banana plugs & sockets originally started life on test equipment. Their versatility quickly saw them as output connectors for power supplies. When they were integrated with binding posts they quickly saw use as speaker connectors. Now they are everywhere.

BANANA PLUGS

PLUGS - PIGGY BACK

With this quality piggy back style, another banana plug can be inserted into the back of the plug.

XLR - Amphenol Plugs & Sockets

Typically used for balanced connections such as professional microphones; these connectors are 3 pin & lock on to the socket. The confusion over whether pin 2 or 3 is hot has only relatively recently been resolved. The Standard has been defined by the Audio Engineering Society which we have outlined on the bottom of the this page. Amphenol® have taken over the genuine Cannon brand.

tech talk XLR Wiring

The Standard is defined by the Audio Engineering Society in AES14-1992(r1998)

Pin 1: Shield/Ground
Pin 2: Hot/in Phase / +
Pin 3: Cold / Out of Phase / -

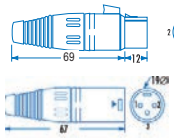

AS SEEN FROM THE FRONT OF CONNECTORS

To create an unbalanced connection, pin 1 & pin 3 are connected to ground & pin 2 carries the signal. Note that there is a lot of equipment (particularly in the US) that has pin 2 & pin 3 designations reversed (i.e. 3 hot, 2 cold).

Manufacturers are adopting the Standard on all new equipment.

DIN Plugs & Sockets

DIN PLUGS & SOCKETS

Originally a German standard, these connectors are available in versions from 2 to 13 pins. Once widely used, these are now seen less on AV equipment. The 2 pin version is used for some loudspeakers and 5 pin version is still used for connecting MIDI electronic musical instruments & older PC keyboards.

Free Boxes!

MOVING HOUSE? NEED SOMETHING FOR STORAGE?

In the course of running our business, we go through thousands of stout cardboard boxes that become surplus to our needs. If you need a box - even several - just ask and we will probably have half a dozen or so that could be suitable for you. They are FREE and you are doing yourself and us a favour by recycling them.

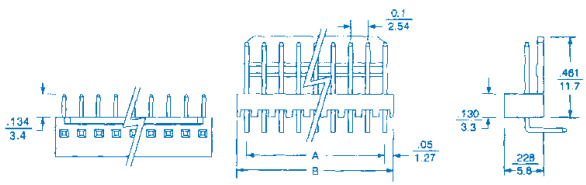

Header Connectors

0.1" (2.54MM) LOCKING & POLARISING HEADER CONNECTORS

A range of connectors for mating cables to PCBs. The connectors are polarised and locking for accurate and secure connections from 2 way to 10 way. The male PCB headers are available in both right angle and vertical orientations. Socket contacts are formed from tin plated brass that can be soldered or crimped.

- 2.54mm pin spacing
- 0.9mm PCB drill hole

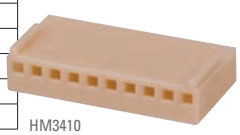

Suitable crimping tool for 0.1" header sockets is our Cat. TH1834.

WAGO PUSH WIRE CONNECTORS

WAGO 273 Series PUSH WIRE® connector for use in junction boxes suitable for solid conductors. This reliable connector with PUSH WIRE® technology has proven itself as an immediate solution for use with cross-sections up to 4mm2. The transparent housing enables the installer to see at a glance whether all the conductors have been fully inserted & properly connected.

"JOW" CABLE CLAMP CONNECTORS

Simply insert your wire into the clamp opening and snap it shut using your hands or small pliers depending on wire gauge to make the connection. The precision-sharpened connector blades borrows the IDC configuration that cut through the wires create a connection. Available in two shapes - "I" type and "T" type. "I" type are used for end to end connections whereas the "T" type for parallel connections. Ideal for applications such as: low voltage LEDs, residential, automotive, communication and broadcasting.

- Avoid stripping, twisting or crimping cables together eliminates need to tape cables
- Creates an IP33 connection
- Electrically Safety approved
- Handles up to 600VAC
- RoHS compliant

PCB SPRING TERMINAL BLOCKS

These PCB terminal blocks retain the wire securely by a spring type clamp. The wire is held very securely but can be quickly released by depressing a release lever. The wire can be inserted/released indefinitely with virtually no deterioration of the contact/spring assembly. Both 2 & 3 poles are available and the housing of each is dove tailed to stack together and make any number of poles.

- Pitch: 5.0mm
- Housing material: PA66
- Contact/spring assembly: Stainless Steel
- Will accept wires from 22-14AWG

NYLON INJECTION MOULDING

Unlike the majority of quick crimp connectors available on the market, our range of standard quick connectors are made with a nylon injection moulded insulation as opposed to the heat shrunk vinyl insulation most others feature. The injection-moulded nylon insulation is temperature rated to 105°C, and features a moulded funnel taper in the insulation for easy cable entry.

Self Sealing Quick Connectors

The unique heat sensitive sealing gel in these quick connectors will automatically flood the crimp joint with sealant as the heat-shrink sleeve is heated. The resulting crimp connection is water and corrosion resistant and has good strain relief properties. 11 styles to choose from.

Bus Bars

8 WAY 100A MACHINED BRASS BUS BAR

These are usually used to give an electrically common point for earth wiring but are also useful for low voltage tie points, especially on boats or RV's, Caravans etc., 6 holes accept up to a 4.5mm wire bundle and the outer 2 a 6.0 bundle. The Bus bar has insulated standoffs at each end which can be removed so that the assembly can be screwed directly to a chassis. The standoffs have a conservative insulation rating of 1000V.

Do not use either SZ2003 or SZ2012 for 240V

- All screws M4.0 Brass bar 9.0 x 6.0
- Length overall including standoffs: 100mm, without standoffs: 65mm

10 WAY 150A INSULATED BUS BAR

This quality bus bar features a raised insulating base that isolates the bus bar from earthed or other live chassis. It features 2 x 5mm bolted terminals for connecting main power feeds, and 10 screw terminals for connecting lower current feeds of up to 10A each. Total current capacity is 150A, and is suitable for 12-32V wiring. 2 countersunk screw holes for 5mm metric fasteners.

Do not use either SZ2003 or SZ2012 for 240V

- Not suitable for 240V active circuit

EXPANDABLE PPS SLEEVING

This PPS (Polyphenylene Sulphide) monofilament sleeving is ideal in high temperature environments and offers a lightweight mechanical protection to your cabling. The construction expands up to 3 times to allow easy insertions of cables and reverts back to original diameter for a snug fitment. The open weave design also dissipates heat and doesn't trap moisture.

Heatshrink Accessories

SOLDER SPLICE HEAT SHRINK TUBE

Solder splice heat shrink tubes allow you to quickly join two cables thanks to the small section of solder in the middle of the tube. Simply slide a tube over the join in two cables and heat as you would any other shrink tube. As the tube shrinks the solder melts to electrically connect the wires resulting in a join which is reliable and well insulated. Available in four sizes approximately 26-40mm in length with 5 pieces per pack. Shrink ratio 2:1.

- Minimum shrink temperature: 85°C
- Starting temperature of solder melt: 140°C
- Operating temperature:- 55°C to 125°C
- Minimum full recovery temperature: 160°C

CARPET CABLE COVER - SOLD BY THE ROLL OR METRE

Conceal unsightly cords and eliminate trip hazards with this low profile cord cover. Its 'cut to length' flexibility avoids the constraints of similiar cord covers. Just lay it over your cords, and let the "hook and loop" technology on the underside do its job on your nylon based carpet to secure your cables in place. The channel along the middle allows you to reconfigure your set up without the need to remove any cords. Re-usable over 1,000 times, machine washable and a fraction of the price of other carpet cord covers. The ideal solution for any office, boardroom, meeting room or public space. Choose from black to keep cable runs discreet, or yellow to prevent people tripping over it.

Cable Glands

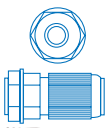

IP68 NICKEL PLATED BRASS CABLE GLANDS

These nickel-plated brass cable glands are certified to IP68 and provide superior grip and sealing. They are totally protected and O-ring sealed against the ingress of dust, moisture and water to a depth of one metre. The unique design speeds installation and eliminates the need to disassemble the gland before fitting. A self-adjusting cable seal allows the glands to be used on a wide range of cable sizes and minimises inventory holdings. These glands are supplied complete with seals and locknuts. 5 sizes are available.

THREAD REPAIR KITS (SMALL METRIC) M4 - M6

These products enable you to drill out a stripped or otherwise damaged thread in a blind hole. You can then insert a replacement thread with the coiled thread inserts and regain full function of the threaded hole, often giving a much stronger thread than the original one. This also works when a damaged stud or screw shaft has been removed. The basic thread repair kit includes: Drill bit, thread tap, insertion tool, tag punch and 10 inserts of the nominated thread size.

Three versions available.

Power

The Heart of Everything

There were major power outages on the East Coast of Australia in January & February 2020. The outages were mainly caused by trees taking out power lines, but there were substation breakdowns as well. We also went close to simply not having enough power to keep up with demand for summer air-conditioning, etc.

These problems only serve to highlight just how important it is to have a robust source of power – whether it be AC or DC.

The following pages help you design and build power and lighting circuits which are not only safe, but will not let you down!

High Current Connectors

These connectors first appeared on electric forklift trucks. They proved to be so useful, reliable and versatile the original type grew to be a family of connectors of various current carrying capacities. The applications have grown considerably and now you commonly see them in RV, caravan and other off-road vehicle, and of course in marine applications.

They were originally made by a company called Anderson® and indeed this name has become the generic description for the type. Jaycar carries a very large range of Anderson-type connectors for every time high current needs to be reliably coupled together.

50A ANDERSON® CONNECTORS

This is the most popular standard Anderson® unit. It supports the greatest range of variations. It is very commonly used in marine, 4WD and caravanning applications. Supplied as a moulded grey body with identical positive and negative contacts. Inserting the contacts in the body automatically polarises the connector (Cable entry contacts do not change overall connector body size).

120A & 175A ANDERSON® CONNECTORS

These are the larger body connector styles that you commonly see on electric forklift trucks. You occasionally see them use as winch connectors on 4WDs, especially the PT4422 model. Identical design to 50A model only larger. The positive and negative contacts are the same and inserting the contacts home inside the connector (once the power cable has been crimped or solder-sweated) is seated home the connector is automatically polarised.

tech talk Assembling Anderson® Style Connectors

These connectors come with absolutely no assembly instructions which might surprise some. Assembly is self-evident however.

All that you really have to do is solder-sweat the heavy gauge wire into the 'pot' on the end of the connector tip. It is a good idea to puddle some solder into the pot and then lower the tinned wire into the pot. It may be necessary to apply some more heat (usually with a small gas torch or stove gas top) to get the whole lot to melt. Try to keep the joint immobile until the solder 'sets', then cool off under tap water. And of course you can always crimp the lead into the solder cup, but this should really be done professionally. A piece of heat shrink tidies the job nicely. The wire/lug/contact then just snaps into the housing. Look for our Anderson® terminal crimping tool on page 39.

ANDERSON® 35A SBS MINI CONNECTORS

These compact mini connectors can handle up to 600 volts continuous in AC or DC with current up to 35A. The mechanical and colour coded keys protect against accidental cross mating of connectors. The genderless housing makes for easy assembly in the factory or the field. The touchsafe housing prevents accidental exposure to live circuits and these also have the ability to disconnect under load. Supplied as a moulded 2 pole with contacts.

50A ANDERSON® LEADS

A series of Anderson® connector leads for automotive, caravan, 4WD or industrial interconnection. The design of the Anderson® connector housing is genderless, whereby each connector simply interconnects with another so you can't plug them in the wrong way - one less thing to worry about! Each lead is pre-made with machine crimped terminations, and tinned copper cable. Connectors are rated at 50Amps, with either 8AWG cable or 16AWG cable fitted depending on the model.

Six versions available:

PLUG EXTENSION, 8AWG 5M

4 WAY 15A ANDERSON® CONNECTORS

These are the high impact and corrosion-resistant black thermoplastic outer shells with a 4 way 15A Anderson® multi-connectors. They allow easy connection and disconnection for the electrical equipment in commercial and industrial applications. The cable clamps provides strain relief and integral latches to prevent any accidental disconnections of your equipment. The positive latching provides security in applications where shock or vibration may be severe and the integral strain relief to reduce the risk of wire breakage.

tech talk Safe Wiring Principles

Most of the products shown on these pages are designed for powering accessories in cars and trucks. They are perfect for example in wiring big power amps in your car. If you intend to use these components for critical applications (say, where safety is an issue) we suggest that you wire multiple circuits if possible and limit the current in each circuit accordingly. Then if you lose one circuit you will have some redundancy. You don't, for example want to lose your headlamp circuit at night because of Deep Purple! This principle, of course, applies to all high current wiring.

Extended Versatility Anderson® Hardware

This range enables you to panel mount Anderson plugs. Something you have not been able to do in the past. There are also waterproofing boots, etc.

CHASSIS MOUNT ANDERSON® ADAPTORS

1 YEAR WARRANTY

Black or red cover assemblies with locking device and UV insulated protection to suit Anderson® and Anderson® style connectors. Used for protection of power connectors in mobile environments. The intelligent design ensures a safe and reliable connection for towing, battery charging, marine & industrial OEM applications.

SPLASHPROOF ANDERSON® CONNECTOR BOOTS

These soft shell boots provide water, dirt, chemical and UV protection for the high current Anderson connectors. The durable boots shield the connectors from water and dirt to IP64 when connected or by itself when the integral cover is used. The terminals of the rubber boot can also be customised to fit cables in-between 12-6 AWG (4-16mm2) wires.

- IP64 protection
- Resistant to UV, Roadway Chemical and Ozone
- Splash resistant when connected and by itself when the integral cover is used
- Customise boot terminals to fit different cables from 12AWG (3.3mm²) to 6AWG (13.3mm²) which is typically 4.5mm OD to about 8.5mm OD.

Power Meters

HIGH PRECISION 200A DC WATT METER POWER ANALYSER WITH LCD DISPLAY

1 YEAR WARRANTY

This exceptional trouble shooting device is not just a watt meter it is an all-in-one power meter, volt meter, amp-hour meter, ammeter and energy meter. It's designed for systems less than 60V and currents up to 200A (Peak). Slotting in between various links of a power system it can check charge going to a battery from battery charger or alternator, solar panel output, charge controller output, health and performance of batteries, evaluate charging efficiency or measure power and energy consumption of any load device with a battery. The Watt Meter only requires a tiny 7mA draw to operate making little difference to power production during usage. Ideal for cars, boats, caravans, off-grid installations, wind, solar installations, and so much more.

- 75A continuous / 200A Max
- Up to 60VDC compatibility
- Accurate amps, volts, watts, amp-hours, watt-hours, peak amps, minimum volts (sag), peak watts

DC POWER METER 6.5-100V WITH BUILT IN SHUNT AND LCD DISPLAY

Exceptionally handy for keeping an eye on your solar installation, generator, battery banks, and more. Totally self-contained, so wiring is a breeze, and it's powered form the DC power you're monitoring. Suitable for solar systems up to approximately 2kW or 10kW. Provides details on power, voltage, and current, as well as aggregation of power throughput (which can mean generation or usage depending on your installation) with an easy reset function. Bright blue backlit display provides easy reading in any lighting conditions.

- Real time information
- Large backlit display
- Aggregated energy throughput
- Power Consumption: 0.2W
- Measurement speed: 2 times/s

POWERTECH Lithium

NEW LOWER COST Lithium Iron Phosphate (LiFePO4) Batteries

LiFePO4 batteries are the most significant development in large commercial battery storage technology since Nickel Cadmium technology over 50 years ago. You may know that Nickel Cadmium technology is largely obsolete.

This year we have extended our range of Lithium (let's just shorten the term for convenience) 12V batteries from 7Ah to 200Ah. (See table below.)

They are very different internally from conventional lead acid batteries. They are actually made up of many Lithium cells controlled by a battery management system (known as BMS) that ensures that each cell is uniformly charged and discharged. A lead acid battery is "dumb." It has no battery management system and this is one of the main reasons why Lithium batteries have far longer life.

Also, lead acid batteries are not short circuit protected. Under a severe short circuit a lead acid battery can very rapidly heat up to the point where the sulphuric acid boils and the casing of the battery splits open. It's rare, but it happens. Also dangerous flammable hydrogen gas can vent to the atmosphere. Lithium batteries are protected from such short circuits.

Remember all of this when making simple price comparisons with the two battery types.

12.8V LITHIUM DEEP CYCLE BATTERIES

The next generation of power storage is here! These LiFePO4 batteries weigh less than half of their Lead Acid counterparts. They may look fairly similar to lead acid batteries, but internally they're a totally different, next generation concept. They're actually made up of regular 18650 or 26650 LiFePO4 cells, which are in mass production for many portable devices. An internal battery management system (BMS) ensures all cells are uniformly charged and discharged, as well as providing short circuit, over current, and reverse polarity protection. This provides you with a higher degree of protection than a traditional lead acid battery which is unprotected, and can discharge rapidly under short circuit conditions, causing fire and damage. The internal BMS will also limit discharge and manage cut-off voltage, to further protect the internal cells.

Absolutely perfect for high capacity portable power, and replacement of similar capacity lead acid / AGM battery.

- Much lighter than Lead Acid and AGM Batteries
- Robust LiFePO4 Cells
- Excellent life span

3 YEAR WARRANTY

HELPFUL HINT

NOTES ON CHARGING

While the internal battery management system will take care of most charging, in order to maintain optimum operation and capacity, we recommend using a charger which is designed for LiFePO4 charging. These chargers are developed to work in the optimum method for recharging, providing longer service life.

If you're installing them as a house battery, then a DC-DC charger between your main battery system and the house batteries is also recommended, such as the MB3683 Dual Input Multi-Stage.

If you're charging from mains power, we recommend the following chargers (see page 284 for individual details)

- MB3611 4-Stage Multi-Voltage
- MB3613 9-Stage Multi-Voltage
- MB3621 Multi-Stage Charger

If you are installing them off grid we recommend upgrading your charge controller to MP3741.

Deep-Cycle Batteries

12V DEEP CYCLE AGM BATTERIES

This product has an absorbent glass mat (AGM) embedded in the structure of the plates. (There are 6 sets of plates, each 2.0V which makes up a "battery" of plates, i.e. 12V). The mat does two things. It reinforces the lead frame of each plate, or cell, and it stops the plates from buckling under heavy discharge current. By helping make the innards of the battery virtually solid, you can mount it in any position, but it is still preferable, of course, to mount the battery upright, even for the sake of convenience of terminal access. They are an excellent product.

Note: It is important to not discharge an AGM more than 60% between recharge.

Note: 150Ah and 200Ah not stocked in all stores but can be ordered.

12V 150AH SLEEK AGM DEEP CYCLE BATTERY

This high performance deep cycle AGM battery offers an excellent power storage solution to those with minimal space. A high energy density and top grade materials allow such a high capacity of 150Ah to be packed into such a small footprint - just 123 x 556mm, suitable to fit into a standard 23" rack. Front terminal access makes battery connections neat and simple, and the durable carry handles allow for easier handling and inspection. Designed to perform in harsh tropical conditions, and with a superior high rate discharge performance and higher cycle service life, this battery is perfect for a wide array of applications including remote solar systems, caravan and RV, motor home, and marine. With a float voltage of 13.5V, this AGM battery is perfectly suited to caravans to make the most of charging off the engine alternator. See our website for a full specification datasheet.

1 YEAR WARRANTY

- Small footprint to suit installations in tight areas such as marine, caravans or motor homes
- Design Float life of 12+ years in accordance with Eurobat classification of long life battery
- Suitable for standard 23" rack
- Advanced AGM (absorbed glass matt) separator offering longer service life and superior high rate discharge performance
- Threaded post copper insert terminals offering high conductivity
- Fire retardant container and cover (UL40 - V0)
- Compliant to IEC 60896-21/22:2004 and UL approved

Note: Not stocked at stores but can be ordered.

BATTERY BOX WITH VOLTMETER DUAL USB CHARGER & DUAL ANDERSON® PLUGS

NEW

This portable 12V battery box has all the common connections you would typically need for your outdoor recreation power needs. The box with carry handles is capable of holding a deep cycle battery up to 100Ah (sold separately), which secures in place with the supplied webbing strap. High current power connectors include two 50A Anderson, insulated bolt terminals (wing nut), and a 12V cigarette lighter socket with over current protection. There is also a dual-port USB to charge your Smartphone and similar USB devices, and a voltmeter to help monitor the battery level.

- Suits batteries up to 100Ah
- Dual 50A Anderson Plugs
- 12V Cigarette Socket
- Dual USB Ports
- LED Voltmeter
- Circuit Breaker Switch

Battery Tester

12VDC LEAD ACID BATTERY TESTER

This battery tester quickly, easily, and accurately measures the actual cold cranking amps capability of the vehicle starting battery. It tests most automotive cranking lead acid batteries, including an ordinary lead acid battery, AGM flat plate battery, AGM spiral battery, and GEL battery, etc. It can identify a battery with bad cells, has reverse polarity protection, and meets major battery testing standards such as CCA, BCI, CA, MCA, JIS, DIN, IEC, EN, SAE, GB. The handy device features an LCD display to indicate the results, a menu tab and clips to connect the battery tester to the vehicle's battery.

Battery Management

CAR BATTERY DISCHARGE PROTECTOR

1 YEAR WARRANTY

This handy device plugs straight into your vehicle cigarette lighter socket, and warns you when battery power is running low. Not only that, but it disconnects power through the unit when power gets too low. This means you can run 12V lighting, an inverter or charger etc, and not risk draining your battery such that it causes damage. Simple plug and play operation, no tools required!

12V BATTERY LOW VOLTAGE MONTOR AND PROTECTOR 10A

Now you don't need any installation to protect your battery. This inline device connects with a cigarette lighter plug and socket, and automatically shuts off power to the connected device (such as a fridge or lighting) if the voltage drops below 11.6V! Power is automatically restored when voltage exceeds 12.8V (eg. the vehicle engine is started). It's simple piece of mind when running power-hungry equipment at a campsite, for instance. Suitable for loads up to 10A.

- Protects battery from excessive discharge
- Power status indicator
- No installation required

BATTERY DISCHARGE PROTECTOR

1 YEAR WARRANTY

Protects your car battery from total discharge by switching off appliances such as fridges and TV sets before the battery voltage drops to an unrecoverable level. When battery voltage is re-established by recharging, it switches appliances on automatically. The interrupting voltage is adjustable from 10.4.to 13.3VDC. Essential low-cost insurance if you have a dual battery setup in a boat, 4WD, RV or for an alternative energy system such as solar or wind power.

LEAD-ACID BATTERY CONDITIONER

Removes or reduces sulphation which kills batteries. When wet-cell lead-acid batteries are allowed to sit around they will sulphate up in as short a time as 6 months. The sulphate builds up on the plates and separators. This product basically dissolves the sulphation. The product is so good that the manufacturer will extend the warranty on a new battery by a year if used when the battery is new.

- One bottle will do up to an N70Z size battery (4WD, boat, truck etc)
- Will not work with sealed batteries. i,e. you must be able to access the battery fluid to use.

TOP POST KNIFE-BLADE STYLE BATTERY ISOLATOR SWITCH 250A

NEW

This handy isolator switch can serve many purposes. Firstly, it can help avoid battery drain on an idle vehicle or boat that is in storage or only gets occasional use. It can help discourage theft, and also provides an easy way to disconnect power to prevent shorts and fires when you are working on the electrical system. The switch fits directly over the battery's negative post, and has a knife-blade that enables you to disconnect power without any tools. Suits either 12V or 24V systems and is rated to handle 250A continuously and a cranking current up to 750A.

- Red copper and brass with anti-fire nylon construction

Warning: This switch is only to be assembled on top of the NEGATIVE post of battery, under NO circumstances is this to be connected to POSITIVE post of battery.

BATTERY ISOLATOR SWITCHES WITH AFD

The switches themselves are very durable and rated for massive output. They feature removable windows on all four sides to cater for whatever cabling arrangement you have. Alternator Field Disconnect (AFD) protects your alternator when switching batteries in and out of the circuit. By disconnecting the alternator moments before the battery (moments after when re-engaging), there's always a load on the alternator to protect the regulation circuitry.

DUAL BATTERY ISOLATOR (VSR)

NEW

A voltage sensitive relay (VSR) is the best way to ensure you can always get your dual-battery vehicle started. If the radio stops working that's one thing, but if you're stranded because your car cannot start because you ran your fridge for too long, that's potentially a life and death scenario. It allows two batteries to be charged from your alternator. Once your main starter battery is sufficiently charged, it will begin charging the second battery too. Fully automatic with emergency override.

tech talk Battery Maintenance

Periodic inspection of the battery is recommended. If the battery is stored for over six months, it is recommended to charge and discharge the battery several times to recover the battery capacity, failure to do so may result in a loss of capacity and shorter battery life. Bear in mind that self-discharge has to be taken into consideration when storing a charged battery. The remaining battery capacity should be at least 50% after a month of storage at room temperature for a fully charged battery. High storage temperatures will accelerate the self-discharge, and reduce the remaining capacity.

12V 140A DUAL BATTERY ISOLATOR KIT WITH WIRING

NEW

1 YEAR WARRANTY

Adding a second battery in your vehicle or boat enables you to power your electrics without flattening your main starter battery when the engine is off. Applications include, for example, 4WD's with a 12V fridge/freezer, a boat with bright cabin lighting, or say a tradesperson's van or ute with an inverter powering various power tools. This Voltage Sensitive Relay (VSR) kit provides everything you need to wire up your second battery, while handling the isolation during shut-off periods. It is provided with marine-grade hardware so it can be used on a boat or vehicle. Suitable for 12V systems with a continuous rating of 140A. All wiring hardware and instructions included.

Note: additional black (negative) wire may be required for systems without chassis earth, such as fibreglass boats, depending on your installation.

Compact Modified Sine Wave Inverters:

We have retained this range from last year because they have shown a reputation of being reliable and very rugged. Indeed, so confident are we of this line, we have extended the warranty from one to two years.

The units come with a 2.1A USB socket as well which has proven to be very popular. They have pretty good surge capability and overload protection and reverse polarity protection.

Pure Sine Wave Inverters

NEW

AMAZING PRICE BREAKTHROUGH!

Jaycar is proud to introduce a range of fully sine-wave (3% distortion) inverters from a fantastic new factory with strong engineering qualifications. The range goes from 300W to 2000 watt. There has never been a true retailer anywhere in Australia with lower prices on True Sinewave inverters.

Warning. Do not be fooled into comparing a modified sine-wave inverter against this product. You will never get a modified unit to have up to 95% battery efficiency. Inferior units are generally 70% efficient at best. You will get far more 230/240V time out of each battery charge.

You don't have to worry whether a sinewave inverter will power your sensitive appliances. They will power anything* including laptops, microwave ovens & Hi Fi systems etc.

The larger units have dual 230/240V power points and generally a USB power port. They all have power and battery protection too.

Specifications common to all models:

DC Input:	10-15V (or 20-30V)
Low Voltage Alarm:	10.5V (or 21v) or less
Working Temperature:	-10° to +50°C
No-Load Consumption:	<0.7A
Thermal Shutout:	≥75°C
Output Waveform:	Pure Sinewave (<10% Distortion)
Accessories:	Heavy Duty D.C. Leads, Spare Fuses, Instruction Manual

Except for air conditioners, air-compressors or large compressor freezers.

What To Buy - Sine Wave Or Modified Sine Wave?

"Modified" sine wave is a crude approximation of the 240V waveform, with square wave components in it. Many appliances are OK with this. Typically these are:

- All incandescent lighting
- Most switchmode power supplies
- Most TVs, VCRs CD/DVD players
- Small power tools
- Fax machines
- Some audio equipment
- Computers (most)
- All incandescent lighting
- Most switchmode power supplies

Sine wave is closer to mains and those inverters are much more efficient. Most appliances work OK with the lower cost modified sine.

Sine wave inverters are best for:

- **Electric clocks**
- Sensitive equipment
- Electronic weighing machines
- Mains powered PA equipment
- All other TVs
- Plug pack powered equipment
- Anything where you want to get the most out of a battery charge

Inverters:

Getting 230VAC to run small electrical appliances from your car's battery is easy with our range of general purpose inverters. We have models suitable for charging your laptop in the bush to running a microwave in a motor home. They have fan assisted cooling and electrical isolation for safety.

Wind Turbine Generators

When solar panels started to come down in price, wind turbine generators ceased to remain competitive! Wind turbines, however, are still a great option where you need a lot of generating power and don't have room for large solar arrays. Indeed, the two generators below are cheap compared to large solar panel arrays. They are very rugged and made to marine salt water corrosion resistance specifications and will last a long time.

Both units are warranted for 3 years from faulty materials or workmanship.

Mounting mast and guying hardware available separately.

tech talk Application Suitability - Inverters

We DO NOT recommend that you use these products to operate the following: FRIDGES, AIR COMPRESSORS, AIR CONDITIONERS

An inverter is a device which converts 12 or 24VDC into 240VAC. The 240VAC generated is as lethal as the power in homes, and should be treated with the same respect. Inverters can be easily damaged, and connecting the input voltage terminals the wrong way around on the battery can damage the unit - be careful!!

- **Appliances most suitable for connection include:** Most power tools, lights, most TVs, video recorders / players, most computers, fax machines and most audio equipment.
- **Fluorescent lights can give a highly inductive load on start up which can damage inverters. Appliances NOT suitable include:** Electric blankets, toasters, hair dryers, irons, radiators and heavy power tools (large angle grinders, circular saws etc.)

Inverters will generally drive inductive loads such as electric motors, but only if the startup current is not high. Generally high startup current situations are when the motor is permanently coupled to a load such as a refrigeration or airconditioner compressor (Imagine the compressor at rest just before top dead centre you can easily realise the start up load on the motor!). Many other motors such as in drills, small angle grinders, buffers etc. start up under virtually no load and this is usually OK for the inverter provided the tool is within the inverter rating.

It needs to be pointed out that one of the major differences between a domestic power point and inverter is that the source impedance of a power point is very low compared to the inverter. This is why inverters have trouble with appliances with high start up currents and a domestic power point does not. Another thing that must be remembered is the special case of fluorescent lights with ballast chokes in them (by far the most common type).

Manufacturers of fluoro lights assume that they are just going to be installed to a normal 240V 50Hz sine wave supply. They are required to supply a product that does not overly distort the mains waveform. They generally comply with this by installing a, say, 3.3µF non polarised capacitor accross the mains/neutral supply inside the housing of the lamp fitting. This is called a power factor correction capacitor. This seems to work OK for a sine wave supply from a low source impedance.

When you drive such a device with modified sine wave 240V power, different things start to happen. The power factor correction capacitor presents a much greater load to a modified sine wave signal (which is a complex collection of high and low frequencies) than it would if it was a sine wave.

The bottom line is to reduce this capacitor to about 0.47µF or take it out completely. Inverters are generally OK then. It is also possible for an inverter to be damaged by the surges in current generated when using standard flourescent starters. This can be prevented by replacing the starter with an electronic starter.

Powertech Monocrystalline Solar Panels... NEW LOWER PRICES!

These high performance monocrystalline solar panels are much smaller, thinner, higher in efficiency and more affordable than our previous models. The manufacturing process for this range uses pieces of 156x156mm A-grade solar cells cut into defined sizes with multiple grid lines, which provides excellent performance under low light environments. Each panel is designed to withstand harsh environmental conditions with a durable anodised aluminium frame and 3.2mm low iron tempered glass. The glass is anti-reflective and has a hydrophobic effect to resist dirt and dust, improving light absorption thereby preventing any needless power loss. The junction box and bypass diodes stops the panel from overheating and suffering from the "hot spot effect". The entire range is easier to install with minimal ongoing maintenance and compatible with industry standard inverters and mounting systems.

25 YEAR LIMITED WARRANTY
All Powertech monocrystalline solar panels are covered by a 25 year limited warranty. This warranty covers the panels for defects in construction and manufacturing for a period of 5 years, and warrants that the electrical output will remain above 80% of its original rated output for a period of 25 years.

Portable Solar Panels

HIGH EFFICIENCY MONOCRYSTALLINE SOLAR PANEL CHARGERS

Quality solar panels with high efficiency and smaller footprint compared to our regular monocrystalline models. An easy way to keep your 12V batteries topped up and ready to go on your caravan, farm equipment, the spare car, or on the shed out the back. The dust and weather resistant panel features a robust frame, and is supplied with 3m long leads terminated with battery clips. Each version is fitted with a blocking diode, so they are suitable for direct connection to your battery as a trickle charger (take note of the minimum battery capacity), or as a low current charger to replace a load or current drain on the battery. A charge controller such as AA0348 is recommended on the 10W and 20W versions when there is not enough current drain to prevent over-charging of the battery.

Portable Solar Chargers

10W SOLAR MOBILE CHARGER WITH USB OUTPUT AND 1M LEAD

Designed to keep your smartphone, tablet, and other USB charged gadgets running for longer when you're on the go, camping, or away from mains power. The lightweight and flexible charger includes two thin mono-crystalline silicon solar panels to provide up to almost 2A at 5V in full sun. This means you should be able to charge most phones in less than 4 hours in full sun. It is water resistant, easy to clean, and measures 349 x 265mm when open and 265 x 175mm folded for compact stowage. The mounting holes allow you to conveniently tie it onto a backpack, tent, etc. Supplied with a 1m USB lead.

12V BATTERY SOLAR TRICKLE CHARGER 1.5W

Perfect for keeping your boat, classic car, tractor, or any other infrequently used vehicle battery topped up. It includes battery clips and a cigarette lighter socket for simple connection, which a discharge diode prevents any drain on your battery at night. Provides up to 1.5W charging power, which is plenty to prevent idle discharge of your expensive vehicle battery.

- Ideal for maintaining the battery of an infrequently used vehicle
- Cigarette lighter / battery clip option
- No configuration required

Flexible Solar Panels

12V SEMI FLEXIBLE SOLAR PANELS

A lightweight and versatile monocrystalline solar panel designed for RV, marine and camping applications. The advanced DF cell technology produces high conversion efficiency up to 20%, giving much more power for a smaller footprint, compared to SP cell type panels. The DF cell, identified by its 21 bus bars, is also flexible up to 30 degrees. This means you can mount the panel on a curved surface such as a boat deck or curved rooftop on your car, caravan, boat, etc.

Thanks to its lightweight design, 2.5mm thickness, and IP65 weatherproof rating, it is perfect for portable applications as well. The mounting holes allow you to secure it using rope for temporary applications or screws for permanent mounting. The short leads with MC4 PV connectors also make it easy to disconnect when you need to pack up and stow away for transport.

A blocking diode is built into the panel to prevent discharging a battery at nighttime, but we recommend you add a solar charge regulator to charge batteries more effectively.

- Maximum recommended bending degree: 30°

Solar Water Pumps

SOLAR WATER PUMPS

Run your outdoor aquarium, garden pond or water feature from the sun, eliminating the need for wiring or the safety aspects of electricity near water. This mutli-application Powertech solar powered water pump comes with its own solar panel, cable and pump assembly ready to go. A convenient functional solution which is simple to clean and move to different locations.

PORTABLE POWER CENTRE AND 40W SOLAR PACKAGE

Incorporating a 42Ah multi-function power centre and a 40W monocrystaline solar panel, this package will provide a standalone power system for travelling or camping. The MB3748 Portable Power Centre provides a combination of 12VDC, 240VAC, and 5VDC USB power from the internal battery, ideal for powering a huge variety of equipment. Coupled with the ZM9056 12V 40W Solar Panel for daytime recharge, the power centre can be recharged in full on a daily basis (depending on sun levels).

Solar Books

SOLAR THAT REALLY WORKS!

The sun god Ra has been raining down free energy for about 4.5 billion years and it is only in recent years that humans have developed the technology to capture it. This is an informative book that fills a previously all but unexplored need in one concisely written book. It covers everything you need to know to design a solar electrical system, for everything from a caravan to a permanent remote dwelling. It also contains specialised information for applications such as converted coaches. Solar that Really Works shows what can and can not be run from typical solar installations as well as how to calculate energy requirements. You won't be left asking questions, as the author has everything covered!

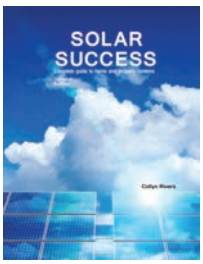

- Completely revised 3rd edition
- Softcover, 96 pages, 297 x 210mm (A4)

	BE1535	$59.90

SOLAR SUCCESS - COMPLETE GUIDE TO HOME AND PROPERTY SYSTEMS

A complete guide for home and remote property systems, this book is about using solar energy to reduce the fossil fuel generated electricity that produces our carbon footprint. This can be done by three associated and economically viable approaches: reduce energy usage by doing things differently, reduce energy usage by using more energy-efficient appliances, and, change the supply of energy to non-fossil fuel through appropriate technology. A pragmatic no-nonsense approach to solar energy written by acclaimed Australian author Collyn Rivers, who walks the walk by showing his self-installed solar system on his 100% solar powered 10-acre property in the Kimberley. Spiral bound softcover.

Solar Power Meter

SOLAR POWER METER

Installing solar panels can result in a missed opportunity if they're not positioned optimally to catch the radiation from the sun. Similarly to a TV installer using a signal meter, you can use this device to find optimum locations on a rooftop (or wherever you're installing them) to help ensure they'll be efficient and generate as much of their rated power possible for your location. Expressed as either W/m2 (Watts per square metre), or BTU/ft² (British thermal units per square foot). Measurement up to 1999W/m², or 634BTU/ft2. With data hold and high accuracy, you can get rapid readings on the huge LCD. Includes carry case.

WATERPROOF SOLAR POWER "PV" CONNECTORS

IP67 rated for maximum environmental protection, these photovoltaic (PV) system connectors are ideally suited to harsh installations such as solar panel arrays and other permanent outdoor applications. When matched with our solar power cables WH3120 & WH3122, you can leave your cabling out in the open with the knowledge that you will never have a bad connection or an oxidised power cable. The panel mounting & in-line connectors suit a wide range of system applications:

Circuit Protection For PV Applications

ULTRA HIGH CURRENT FUSES

Littelfuse® patented technology designed for high current protection, found OEM on Ford, GM and Chrysler vehicles. Slo-Blo® feature eliminates nuisance blowing during temporary, short duration overloads. Commonly used for battery and alternator connections and other heavy gauge cables requiring ultra high current protection.

- SF1982 and SF1984 are slow blow fuses
- Rated up to 32V AC or DC.
- Terminal studs 8mm.

Solar Panel Mounting Hardware

ECOTECH PROFESSIONAL SOLAR MOUNTING HARDWARE

A universal and code compliant mounting system for attaching solar panels to the roof of your property. Designed to be used with either tiled or tin roofs, with any slope from 0-60° (either flat or pitched), and fully cyclone rated even for wind region D. The easy insertion modules mean that you don't have to slide each attachment along the rail to get it in place, they slot in quite easily at the very spot you want to attach them. For use with 35mm thick modules, a full range of components are available.

10 YEAR WARRANTY

- Cyclone proof to Wind Region D (installation guide must be strictly adhered to)
- Vertical or horizontal panel mounting
- Suits any solar panel width, but optimised for 800-825mm width
- Suitable for aluminium framed panels
- 10 year materials warranty
- AS/NZS 1170 approved
- Roof slope: up to 60°
- Wind load: 80m/s
- Snow load: 1.4kNm²

ABS SOLAR PANEL MOUNTS FOR CARAVAN/MARINE

Stick these heavy duty ABS plastic mounts onto your caravan or boat using Sikaflex®, and then screw your panel onto the mount. The solar panel is kept with adequate space underneath for cooling, and the curved design ensures adequate wind deflection for high winds. There are 4 different products, which can be used in any combination to suit your specific application. White in colour.

ABS SOLAR PANEL CORNER MOUNTS

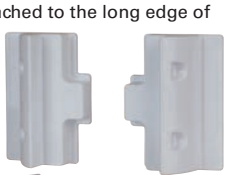

A set of four corner mounts, to attach each corner of your solar panel to your desired mounting surface.
These can be used on their own for solar panels 40W or smaller.

- Dimensions: 150(L) x 150(W) x 65(H)mm Set of 4, Cat. HS8860

ABS SOLAR PANEL SIDE MOUNTS 180MM

This pair of side mounts are intended to be attached to the long edge of taller solar panels, such as 80W and above, adding extra mounting strength and giving more wind deflection.

- Dimensions: 180(L) x 120(W) x 65(H)mm PAIR, Cat. HS8862

ABS SOLAR PANEL SPOILER MOUNTS 510MM

Specifically designed to deflect wind on solar panel edges that face into high winds, such as the leading edge of solar panels mounted on caravan or RV rooftops. Well matched to 80W and 90W panels oriented with the short edge leading into the wind.

- Dimensions: 510(L) x 120(W) x 65(H)mm PAIR, Cat. HS8864

UNIVERSAL INDIVIDUAL SOLAR PANEL MOUNTING BRACKET

Note: Solar panel not included

Each bracket includes a stainless steel M6 bolt and nut to attach it to the factory holes in the aluminium frame of your solar panel, meaning that no drilling or modification is required. Sold individually, so you just have to purchase the quantity that suits your panel & application.

- Recommended quantity for panels up to 40W: 4
- Recommended quantity for panels 40W-200W: 6
- Spacing from mounting surface: 22mm

Solar Regulators / Charge Controllers

12V 6A BATTERY CHARGING REGULATOR FOR SOLAR PANELS

Designed for efficiently charging 12V batteries using solar cells rated up to 6 amps. It is easy to wire up, prevents battery discharge during low sunlight and indicates charging and full battery conditions using a yellow and green 3mm LED.

- Ideal for charging 12V SLA batteries from solar panels up to 60 watts
- 6 amp fuse and fuse holder recommended - not supplied

MINIATURE 12/24V 3A PWM SOLAR CHARGE CONTROLLER

This compact solar controller uses Pulse Width Modulation (PWM) to manage battery charging from a connected solar panel. It features light and timer control, similar to street lights, and three charging states (bulk, equalise, and float charging). It provides all the important safety features such as overcharge, over-discharge, over-current, short-circuit, and reverse-polarity protection.

- Red charge LED indicator
- Green power LED indicator
- Hang hook
- Battery voltage automatic identification
- PWM charging mode
- Comprehensive electronic protection

Solar Regulators / Charge Controllers CONTINUED

12/24V PWM SOLAR CHARGE CONTROLLERS WITH LED INDICATOR AND USB

Intelligent yet lightweight, this solar controller uses Pulse Width Modulation (PWM) to control battery charging. With total autonomy, its set-and-forget operation means you can get maximum charge into your batteries from your solar installation without having to worry about those things. It provides all the important safety features such as overload, short-circuit, over-discharge, and reverse-polarity protection. A handy feature is also the USB port located on the front panel, to provide up to 1.2A charging. Very handy during power outages to keep your phone charged without any additional equipment. Charge modes include bulk, equalise, and float charging, and the unit automatically switches to the best charging mode. Suitable for sealed lead-acid, as well as Gel/flooded type cells.

- Automatic charge mode selection
- Suitable for 12V and 24V battery banks
- USB charging port on front panel

12/24V PWM SOLAR CHARGE CONTROLLERS IP67

A highly efficient fully automatic 12/24V PWM solar charge controller that adopts the most advanced digital technology which increases battery lifetime and improves solar system performance. With a robust industrial housing and IP67 protection this charge controller is suited to most applications especially extreme outdoor environments where corrosion, dust and water ingress are prevalent. Capable of automatically detecting day/night it comes with an inbuilt timer which can be set to operate loads at specific intervals or manually in the night.

- High efficient PWM charging
- Automatically recognizes day/night
- LED indicators for PV and battery status
- Industrial design, wide application range
- Intelligent timer function with 1 to 13 hours' option
- PV reverse polarity protection
- Battery overcharge, over discharge, reverse polarity and overheating protection
- Load overload and short circuit protection

12/24V 10A DUAL BATTERY PWM SOLAR CHARGE CONTROLLER WITH LED INDICATOR

2 YEAR WARRANTY

We have many solar battery charger controllers - up to 50A - but they only work on one battery bank. This unit will charge TWO house battery banks or one house bank and your motor start battery as well. Too often the motor start battery is forgotten if you are camped in the one spot for a long time.

- Will charge 2 completely separate battery banks at the same time
- Works with 12V or 24V systems
- Highly efficient PWM (Pulse-width modulation) charging system
- Provides up to 10A charging current (Limited by size of your solar panels)
- Electronic protection from over charging short circuit or accidental reverse battery connection

Specifications:

- Max solar input voltage: 30V (12V system), 55V (24V system)
- Battery input voltage range: 8-15V (12V system), 8-30V (24V system)
- Max output current (both channels): 10A
- Overnight self-consumption: 4mA
- Dimensions: 153 (W) x 76 (H) x 37 (D) mm
- Weight: 240g

Recommended solar panel to utilise output of this controller. ZM9059, 8.3A unit.

(Note output of this controller is limited by the current output of the solar panel feeding it)

tech talk Solar Charge Controllers

Directly connecting a solar panel or array to a battery can be catastrophic as solar panels can output a wide voltage range. As an example, a nominal 12 volt rated panel can output anything up to 22 volts during an average sunny day. A solar charge controller between the panel and the battery ensures the battery receives the correct output voltage and current from the panel to minimise the risk of the battery being overcharged or discharging back into the panels. Charge controllers come in a variety of types which give different performance and can be matched to simple recreational applications all the way up to complex high power solar array installations. SWITCHING: Simple switching controllers connect the panel to the battery when the panel is providing power & the battery is not fully charged. This type of controller is low cost and only good for basic solar equipment setups such as standby lighting, etc. where the panel yield is far higher than the load requires. PWM: Pulse width modulated (PWM) controllers continually apply voltage pulses to the battery whenever the panel is providing sufficient voltage. The pulse width (or duration) is varied by the controller depending on the charge state of the battery to ensure the correct amount of charge is harvested from the panel whenever it is available. As a result, PWM controllers provide a much higher power yield than simple switching controllers.

MPPT: Maximum power point tracking (MPPT) controllers maximize power conversion between the panel output and the battery input by using a DC to DC switchmode power converter. By continuously tracking the panel output and adjusting the converter they yield the maximum amount of power under widely varying solar conditions. MPPT controllers give the best solar system efficiency and improve solar system power yield by a significant percentage. Both PWM and MPPT controllers are available with display panels which allow you to track performance of the solar system. Panel voltage, battery voltage, charging current, and total charge supplied can be easily displayed so you can ensure the system is running correctly. More complex models also include integration functions to remotely control other equipment or be linked into advanced systems.

12V/24V 30A PWM SOLAR CHARGE CONTROLLER WITH LCD DISPLAY FOR LEAD ACID AND LITHIUM BATTERIES

NEW

1 YEAR WARRANTY

This compact charger uses Pulse Width Modulation (PWM) to charge 12V or 24V lead acid (sealed, gel or flooded) or 12V lithium battery banks. It supports 12V solar arrays up to 500W or 24VDC arrays up to 1000W. The backlit LCD screen displays real-time feedback on battery voltage, load voltage, PV voltage, time, etc, and the integrated Wi-Fi enables you to remotely access the controller using an app on your Smartphone to keep an eye on the system. An external temperature probe is also supplied to adjust the float voltage according to the temperature when charging SLA batteries. Heavy-duty screw terminals for cabling up to 10AWG. Safety features include over-voltage, low-voltage protection, reverse connection, short-circuit, over-current, and over-temperature protection.

- Backlit LCD with real-time energy stats, operational and fault message
- Temperature sensor for battery charging compensation
- 3-stage charging
- 2 programmable timers
- 2 x USB Ports

12/24V 30A FLUSH MOUNT PWM SOLAR CHARGE CONTROLLER WITH LCD DISPLAY

NEW

2 YEAR WARRANTY

This flush mount solar charge controller enables you to keep an eye on your power system without having to stare at an unsightly controller cluttering your RV or boat's interior. The intelligent system features a PWM charger with bulk, boost/equalise, and float modes to keep your Lead Acid or LiFePO4 batteries in peak condition. The integrated LCD indicates real-time energy information, operational parameters, and fault messages, and is easily navigated using the two push buttons. Installation is made easy with pluggable terminals on the rear for the solar panel, battery, and temperature sensor. An RS485 port enables you to connect a computer for programming purposes, or to a Wi-Fi module (sold separately) so you can control the system from your Smartphone. It has extensive electronic safety protection, and is sure to keep your appliances and gadgets running when you're away from mains power.

12V/24V MPPT* SOLAR CHARGE CONTROLLERS

1 YEAR WARRANTY

MPPT technology uses DC to DC conversion along with some electronic smarts to be able to extract the absolute maximum charging power from your solar panels, giving you up to an extra 10-40% from your solar panels when compared to a normal PWM charge controller. Adding to the benefits of MPPT technology are the features of this charge controller, such as 3-stage battery charging, twin timer programming, 30A load control with automatic load disconnection/reconnection, and much more. Programming is simple and intuitive via the front panel buttons whilst the LCD screen shows you what's happening. Suitable for 12V or 24V systems.

- Automatic load control with low-voltage disconnect/reconnect
- Two timers available for programming
- Includes temperature sensor for battery charging compensation
- Protection against over voltage, reverse connection, short circuit, over current, and over temperature

NOTE: Unit WILL charge a 12V battery from 24V solar panels, but not vice versa.

TOP POST KNIFE-BLADE STYLE BATTERY ISOLATOR SWITCH 250A

NEW

This handy isolator switch can serve many purposes. Firstly, it can help avoid battery drain on an idle vehicle or boat that is in storage or only gets occasional use. It can help discourage theft, and also provides an easy way to disconnect power to prevent shorts and fires when you are working on the electrical system. The switch fits directly over the battery's negative post, and has a knife-blade that enables you to disconnect power without any tools. Suits either 12V or 24V systems and is rated to handle 250A continuously and a cranking current up to 750A.

- Red copper and brass with anti-fire nylon construction

Warning: This switch is only to be assembled on top of the NEGATIVE post of battery, under NO circumstances is this to be connected to POSITIVE post of battery.

12V AUTOMATIC LEAD ACID BATTERY CHARGER 1A

This intelligent automatic battery charger stops charging when the battery is full and starts to maintain the battery with a 'floating' charge mode. The charger monitors the battery voltage and tops-up the battery to keep it fully charged all the time. This feature allows you to leave the charger connected to the battery without risk of overcharging. It comes with a LED indication for battery charging status. The 2m long cable includes an interchangeable DC plug and Alligator clips.

tech talk Low Current Chargers

Low current output designed to steadily recharge sealed lead acid (SLA) batteries without causing the battery to overheat and become a swollen mess. As a guideline the charger's current rating should be no more than 10 to 15% of the battery's ampere-hour rating.

tech talk MB3619 & MB3527 Chargers

These chargers are ideal for units that spend a long time unused and therefore with the danger that the starter motor batteries will sulphate up and die. By putting one of these units permanently on trickle charging the battery (in the jet-ski, vintage car, snowmobile, etc) will be ready to rock-n-roll the next time you use it.

Switchmode Multi-State Battery Chargers:

High tech SLA battery chargers for automotive, marine, motorcycle, workshop or industrial use. All feature switchmode operation, multi-stage maintenance and charging, near-bulletproof performance & microprocessor control. All are IP rated for use in workshop and hostile environments.

- Dust & splash proof - most are IP65 rated
- Anti-spark protection

6/12VDC 0.87A 7-STEP INTELLIGENT LEAD ACID AND LITHIUM BATTERY CHARGER

NEW

1 YEAR WARRANTY

An intelligent battery charger to keep your batteries in peak working order. Suitable for 6V or 12V Lead Acid batteries between 1.2Ah - 26Ah, or 12.8V LiFePO4 from 2Ah to 15Ah. The seven charging modes keep batteries fully charged and in peak condition, and can also recover slightly sulfated batteries to increase battery life. LEDs on the front panel indicate the state of charge and a push button enables you to select the appropriate charge mode. The housing can be permanently mounted using the integrated mounting holes and the IP65 weatherproof rating means it can handle a little rain. The charger is mains powered, terminated to battery clips on a 1.8m lead, and features short circuit, overload, incorrect polarity, reverse battery, and safety timer protection.

An intelligent battery charger to keep your batteries in peak working order. Suitable for 6V or 12V Lead Acid batteries between 4Ah - 50Ah, or 12.8V LiFePO4 from 3Ah to 25Ah. The eight charging modes keep batteries fully charged, and can also recover slightly sulfated batteries to increase battery life. Five RGB LEDs on the front panel indicate the state of charge and a push button enables you to select the appropriate charge mode. The housing can be permanently mounted using the integrated mounting holes and the IP65 weatherproof rating means it can handle a little rain. If you happen to live in areas with a cold climate, the charger can be set to provide a more effective charge in temperatures below 10°C. The charger is mains powered, terminated to battery clips on a 1.8m lead, and features short circuit, overload, incorrect polarity, reverse battery, and safety timer protection.

- 6V/12V dual function charger
- Suitable for Lead Acid and LiFePO4 batteries
- 8 state intelligent charging modes
- Can recover slightly sulfated batteries

An intelligent battery charger suitable for flooded and gel lead acid batteries including deep cycle batteries at 6V, 12V or 24V. The microprocessor controlled unit provides 4 stages of charging, Soft Start, Bulk Charge, Absorption and Float which assists in the batteries life expectancy and performance. An auto detection feature provides a user friendly experience, which can be pre-programmed or manually set for greater control. Should a blackout occur or AC input power be lost during a charging operation the memory function will resume charging once power is re-established. Other features include temperature/voltage compensation, reverse polarity/short circuit protection and a battery status indicator. Ideal for cars, motorcycles, caravans and boats with battery capacities between 20-200Ah. It's also ultraportable with a handy storage pocket in the back for the leads.

Switchmode Multi-State Battery Chargers CONTINUED

12V-7.2A/24V-3.6A 9 STATE CHARGER

The bigger brother of MB3611, this is a fully automatic 9 state charger for 12 or 24V sealed lead acid batteries- wet cell, gel cell, AGM and LiFePO4 batteries.. Advanced diagnostics enable this unit to maximise charge rate while also maximising battery life. You can also switch it onto power supply mode where it will act as a 13.8V and up to 5A power supply, useful in supplying power to computer systems of many modern cars when replacing batteries.

SPECIFICATIONS	MB3613
Input Voltage	220 - 240VAC
Output Voltage	5-14.7V (12V battery), 10-29.4V (24V battery)
Input Current	5A @ 220VAC
Charging Current	12V - 7.2A, 24V - 3.6A
Efficiency	>75%
Ripple	≤150mV
Back Current Drain	≤1.2mA
Rated	IP65

tech talk Multi State Charging States

Charging states include:

BATTERY TEST - Checks the battery to ensure it is ready for charging, polarity of leads etc.

DESULPHATION: Detects sulfated batteries. Pulsing current and voltage, removes sulfate from the lead plates of the battery restoring the battery.

SOFT START: Initial battery test to determine battery condition. If the battery is severely discharged, charger will begin the Soft Start stage. Charging starts with reduced current until battery voltage reaches a normal condition for charge.

BULK MODE: Major charging stage where the battery receives the majority of its charge. During this stage the battery is charged to up to 80% capacity.

ABSORPTION MODE: Completes the charge up to virtually 100% at a slower charge rate to protect the batteries working life.

RECONDITION MODE: Select "Recondition" mode, charges at higher voltage to recondition the sulfate of the battery to save battery life.

ANALYSIS: Tests if the battery can hold charge. Batteries that cannot hold charge may need to be replaced.

FLOAT: Low constant voltage, minimal charge current, battery is fully charged.

PULSE MODE: Maintaining the battery at 95-100% capacity. The charger monitors the battery voltage and gives a pulse when necessary to keep the battery fully charged.

tech talk Multi State Charger

All-in-one chargers which have multiple charge settings to suit different sized batteries and charging requirements. Capable of recharging the battery and maintaining the charge state indefinitely, they are particularly well suited to being continuously connected to a battery. Some models also have additional functions such as rapid boost charging and can also be used as a general purpose high current power supply.

Battery Chargers

12V 8A 8-STEP AUTOMATIC MARINE BATTERY CHARGER WITH DUAL OUTPUT

Designed to charge and maintain 12V lead-acid batteries, including Wet, MF, VRLA, AGM and Gel, and Calcium batteries from 1.2Ah to 120Ah. Compact in size, but feature-packed with intelligent charging and dual channel output to charge two batteries simultaneously up to 4A each. The 8-step charging process includes Diagnosis, Recovery, Soft Start, Bulk, Absorption, Analysis, Float, and Maintenance for larger capacity batteries. The housing is dust and waterproof rated to IP68, making it suitable for outdoor and marine use. Safety features include short circuit, open circuit, reverse polarity, battery low, over temperature, spark, and safety time protection. Mains powered.

- Suits Wet, MF, VRLA, AGM, GEL, and Calcium
- Dual Channel
- IP68 dust and waterproof rated

MULTI-STAGE CHARGER FOR LITHIUM AND LEAD ACID BATTERIES 12V 30A

Charger for lead acid and lithium batteries that can operate with or without a load. This professional charger intelligently charges 12V Lead Acid, AGM and Lithium (LiFePO4) batteries from 50Ah to 300Ah, with (rated output of load should be less than that of charger) or without load. A 5-stage charge mode for Lead Acid batteries includes Soft, Bulk, Absorption, Float and Standby, with Refresh and Equaliser options to keep your Lead Acid battery in peak condition. A half power mode suits batteries under 100Ah and a special algorithm effectively charges LiFePO4 batteries using Bulk and Absorption modes.

A host of safety protection features include short circuit protection, self-recoverable over temperature protection, and self-recoverable reverse polarity (fused). Supplied with three charging cables terminated to 50A Anderson connectors, large battery clips and eye terminals.

DUAL INPUT 20A DC/DC MUTI-STAGE BATTERY CHARGER TO SUIT LEAD AND LITHIUM STYLE BATTERIES

NEW

1 YEAR WARRANTY

Designed to manage solar and alternator power inputs to charge an auxiliary (house) battery system. The system will preference solar, providing lower loads on your engine when solar is available. With automatic ignition detection enabled, the system will isolate the starting battery when the engine is off, preventing discharge of your critical starting battery. It's fully automatic, with a set-and-forget type operation. The microprocessor controlled circuit keeps your battery in peak condition, automatically switching between six charging modes; Qualification, Recondition, Bulk, Absorption, Check, and Maintenance. Housed in a heavy-duty aluminium case with mounting bracket, and a front panel with charge status LEDs and push button to select between Lead acid, AGM, Calcium, GEL or LiFePO4 batteries. It handles solar panels with 16 to 25V open circuit voltage, and includes over charge, short circuit, over temperature, reverse polarity, thermal overload, and solar input overload safety protection.

- Dual input - solar and/or alternator/car battery
- 20A max charging current (automatically controlled)
- Six-stage Battery Charging
- Supports Lead acid, AGM, Calcium, GEL or LiFePO4 batteries

ON-BOARD MARINE BATTERY CHARGER

Advanced electronic and fully automatic multi-stage marine battery charger that mounts on-board your boat to charge the cranking and house batteries, once you connect to shore power. The multi-stage charging process delivers five modes of operation, including start-up diagnostics, charging, conditioning, auto maintenance and storage reconditioning of each battery. This process is proven to extend the life of your batteries and will fully charge your batteries each time you connect to AC power. The charger Distributed-On-Demand® charging technology will automatically sense and distribute 100% of the available charging output of 15 or 20 amps to any one battery or combination of all batteries. Each battery charger output is fully isolated.

- Suits Flooded, Standard AGM, and GEL batteries
- Prewired with 1.8m leads for easy installation

tech talk High Current Chargers

Higher current chargers steadily recharge larger lead acid batteries such as car, marine or high capacity deep cycle batteries. Available in simple models which need to be monitored manually ie. disconnected when the battery is fully charged, and automated models which monitor battery condition. Automated models have higher charge rates and improve battery life as their control systems prevent overcharging. Jaycar does not stock simple chargers, only automatic types.

Wireless Qi Chargers

FAST WIRELESS QI CHARGER 10W

1 YEAR WARRANTY

Qi charging is an entirely wireless charging method, so there's no fumbling with cables. Using resonant inductance with an enabled device, you simply need to place your phone within a centimetre or two of the charging pad, for charging to automatically begin. Supporting Fast 10W and Standard 5W charging specifications, it's not always as fast as connected charging, but it's VERY convenient. Many new smartphone models now support Qi charging, such as Apple® iPhone®, Samsung Galaxy, and so many more.

- Adaptive fast (10W) & standard (5W) wireless charging
- Check with the manufacturer our website to see if your model is a Qi-Enabled Device
- LED indicator

USB Socket Saver

MICRO USB SOCKET SAVER LEADS - PAIR

1 YEAR WARRANTY

Many of us on the Jaycar staff have found that using a USB socket (either standard or USB micro B, etc.) very frequently actually wears the connector out and it becomes unreliable. To reduce this problem, we have introduced a micro USB lead that should remain plugged into the USB device to save wear on the inlet socket. Yes, this means that you will have to put up with the inconvenience of a small lead sticking out of the device but it saves the product from becoming unusable. You can, of course lay the lead down with double-sided tape if you like to create a neater result.

42,000mAh PORTABLE POWER CENTRE

1 YEAR WARRANTY

This is a fantastic product. Firstly, it is a multipurpose power bank that can be charged from 240V mains or a solar panel via built-in MPPT charger. In other words, it can provide a campsite power completely independent from AC power charging, but provides AC and DC power itself!

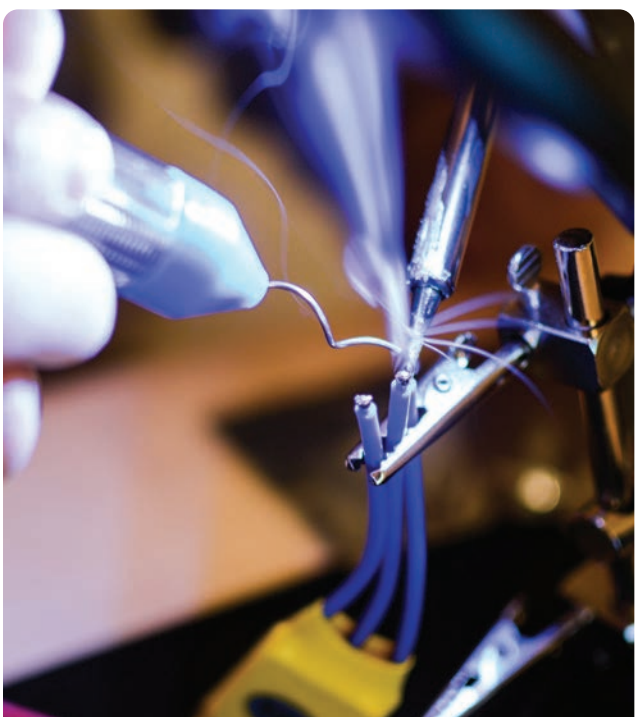

This is what it does:

- 100W 240V Inverter (modified sine wave)
- 12VDC to 3 separate points. 9-12V at up to 15A. Ideal for a low voltage lighting system
- 3 x USB charging ports (Up to 6A shared)
- Bright LED camping light built-in
- Supplied with a solar panel charging lead (MC4 connectors), in-car charger adaptor, and mains charger.

Uninterruptible Power Supplies (UPS) – AC:

Critical systems should ideally be connected to some form of backup power in the event of a blackout, power surge or brownout. A fault at the grid may drop the voltage at the mains, which could cause some systems to shutdown, reset, lose data or worse, resulting in thousands of dollars of damage (both material and immaterial). These line interactive units give you a good balance between real time system protection and power redundancy when mains electricity is down or experiencing reliability issues. During mains voltage sags both units will deliver a steady voltage, keeping critical systems running properly. For a total power blackout the units can keep your systems running long enough to save important data or cleanly shutdown connected devices.

Mini UPS

30W DC MINI UPS

A compact DC UPS designed to connect inline with your ordinary 12VDC mains power adaptor. In the case of a power outage, the internal battery will keep your equipment operating for longer. Three interchangeable DC connectors are supplied to suit a range of devices such as a modem, network switch, router, video device, surveillance systems or lights. An integrated smart charger ensures the internal 18650 Li-ion batteries are charged, and adjusts the charge current based on the current draw to the device you are powering. The rated output is 2.5A at 12V but 3A can be provided for a short time. Four status LEDs indicate the UPS charge status, and safety features include over-charge, over-discharge, over-current, and short-circuit.

"Plugpacks" & Small Scale Power Supplies:

When we first produced the Jaycar catalogue over 35 years ago, all power supplies were fitted with a 240V stepdown transformer. The transformers could be quite small - down to 3VA (3 watts approx.). They were relatively heavy (some would fall out of a power point) and all were fairly inefficient. Today, almost no plugpack or small scale power supplies have transformers, except AC-to-AC plugpack-type adaptors, the rest use what is called Switchmode technology. "Switchmode" type power supplies are in fact very clever. If you don't know how they work, look them up on Google, etc.. There is not enough room here to give you a primer. Not only are they lighter and far more efficient than transformer-type ("linear") power supplies, they are capable of providing far more DC power in a smaller size. I have a switchmode 'stick' welder at home that is about the size of a loaf of bread but will deliver up to 120A to weld very heavy steel objects indeed. The welder weighs about 5kg and replaced a transformer model that weighed over 100kg.

A switchmode power supply will also typically recognise the mains voltage that is being fed to them. You can, for example, take an AU/NZ 230/240V AC adaptor and use it on 110-115 volts overseas (with a plug pin adaptor) and not need to buy a special 115V unit. (Always check that your adaptor will do this of course).

All-in-all, switchmode technology is a clear winner. They are generally also more reliable and offer similar levels of dielectric isolation to transformer types.

Gary Johnston.

Switchmode AC Adaptors

They are extremely light and compact; enough to snugly and neatly fit side by side on a powerboard - no more wasted AC outlets! They incorporate high-efficiency circuitry, built in EMI filter, short circuit protection, over current protection and thermal shutdown capability.

Ideal for use with powerboards.

5 WATT - ULTRA-SLIM

- Input: 100-240VAC 50/60Hz
- Fit side-by-side on a powerboard
- Supplied with 7 plugs
- 1.7m lead

tech talk Stepdown Transformers

A word on isolation. This means that:

The primary (240V) & secondary (115V) are totally electrically isolated (Dieletric isolation). This is the safest way of making a mains voltage conversion. We recommend this type of transformer whenever the application is medical or medically related or where the secondary equipment is to be operated in or near water or high moisture environments. Note the 240V earth is carried through to the 115V socket earth. As a further safety measure we now supply the ISOLATED units with resettable circuit breakers.

Click and Collect is now available at all Jaycar stores! Simply place your order online and the team at your local store will get the order together for you, ready to collect in just 1 hour!

240 - 115V Stepdown Transformers

50 WATT - 240VAC TO 115VAC

Includes overheat protection. If the unit gets too hot, the thermal fuse will open, then close after unit cools down, restoring operation. Two pin US socket on unit for 110V appliance and cord plug for 240V power.

- This is not dielectrically isolated. (Auto transformer type)
- Not for use in wet areas

ISOLATED STEPDOWN TRANSFORMERS

1 YEAR WARRANTY

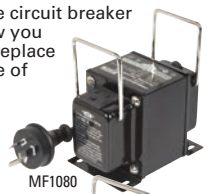

Quality fully-enclosed stepdown transformer with fold up metal carry handles, approved 3 wire power cord & US style 3 pin 110/115V socket that also accepts 2 pin plugs.

- Electrically isolated between primary and secondary
- Protective earth carried through to output
- Useable with precision electric & electronic appliances.
- Compact, excellent, safe & robust construction - steel case.
- DO NOT compare these to cheap, non isolated units. Your life is too precious!

Includes a resettable circuit breaker instead of fuse. Now you are not tempted to replace the fuse with a piece of coathanger wire.

Note: Due to heavy weight (11kgs) please check for freight costs.

These devices are not switchmode, they are AC to AC.

Variac

0-260VAC VARIABLE LABORATORY AUTO TRANSFORMER - 500VA

1 YEAR WARRANTY

The variable autotransformer (Variac is the trade name of a popular brand) is one of the most useful and efficient devices ever invented for the control of AC voltage and of voltage-dependent parameters such as current, power, temperature, light intensity, motor speed etc. It enables the AC input to a mains powered appliance to be easily varied from 0 to full line voltage (or greater).

Encased in heavy-duty steel housing it also features on/off switch, output-voltage meter, mains-supply lead and standard 3-pin power output. A must for testing appliance performance under real (simulated) mains fluctuations.

- Now supplied with slow blow fuses for extra reliablity

Note: These devices are not switchmode, they are AC to AC.

Enclosed Industrial Standard Switchmode Power Supplies

A range of highly efficient, fixed voltage, no load low power (<0.2~0.75W) consumption enclosed power supplies for a wide range of industrial applications. They are more compact and more efficient than previous generation models. The 30mm low profile design allows them to be built into 1U rack enclosures, while the metallic mesh case enhances the heat dissipation. They are capable of operating at altitudes up to 5000 metres. Not only do they satisfy every kind of industrial related application but also can be utilised for household appliances thus accounting for a broader coverage across diverse industries. See our website for full datasheets on each model.

- Full range 85~264VAC input
- Withstand 300VAC surge input for 5 seconds
- High efficiency, long life & high reliability
- 100% full load burn-in test
- Extremely low no load power consumption
- Protection: Short, overload & overvoltage
- Power on LED indicator
- 5G anti-vibration capability
- Complies with international safety standards
- Tolerance figure includes setting + line regulation + load regulation
- Operates from -30°C to 70°C under air convection without a fan
- Backed by 3 year warranty

MINI POWER SUPPLIES

MEAN WELL

3 YEAR WARRANTY

The IRM Series is a miniature encapsulated AC/DC power supply. This on board module features compact size and extremely low (<0.1W) no load power consumption at standby mode. This allows designers to easily conform to the requirements of ErP norm (Energy-related Products) and EISA. The 94V-0 flame retardant plastic case and fully-potted silicone enhance the heat dissipation and meet anti-vibration demand up to 5G. The new series complies with UL/CUL/TUV/CB/CE certificates for safety. Suitable applications include electronic instruments, hand held electronics, factory automation and electrical or mechanical equipment. Our range comes with screw terminals.

- Universal AC input / Full range
- Compact size
- Protections: Short circuit / Overload / Over voltage
- Cooling by free air convection
- Isolation Class II
- No load power consumption <0.1W
- Pass LPS
- 100% full load burn-on test
- High reliability

DIN Rail Power Supplies

DIN RAIL POWER SUPPLIES

Mean Well HDR DIN Rail power supplies are available in 15W, 30W, or 60W and feature an ultra-slim, step shape plastic housing. The HDR family specially adopts the European Union standard DIN EN43880 and slim design with a height of 90mm and the width are only 1SU to 3SU (17.5mm/35mm/52.5mm). They also feature efficiencies up to 91%, adjustable (±10%) DC output voltage, and a working temperature range of -30°C to +70°C. Typical applications include building automation, household control system, industrial control system, factory automation and electro-mechanical apparatus.

3 YEAR WARRANTY

Only 17.5mm wide

- Ultra slim design with 17.5mm(1SU) / 35mm(2SU) / 52.5mm(3SU) width
- Universal input 85~264VAC
- No load power consumption < 0.3W
- Isolation class II
- Pass LPS (limited power source)
- DC output voltage adjustable
- Short circuit / overload / over voltage protections
- Cooling by free air convection (working temperature: -30~+70°C)
- DIN rail TS-35/7.5 or 15 mountable
- LED indicator for power on

DIN RAIL POWER SUPPLIES

Mean Well EDR Din Rail Power Supplies are an economical and slim solution which adapt to be installed on TS-35/7.5 or 15 mounting rails. They are 40mm wide which allows plenty of space to be saved in cabinets. They are designed with metal housing that enhances the unit's power dissipation. It is equipped with constant current mode for over-load protection fitting various inductive or capacitive applications.

Mean Well Desktop Power Supplies

DESKTOP POWER SUPPLIES

Mean Well GST series Power Adaptors are highly reliable desktop style single output green adapters complying with the latest energy efficiency regulation (EISA 2007/DoE Level VI). With a low no load power consumption (less than 0.075W) and an average operating efficiency up to 90% these are far superior to any other power supply in the market. They are made of 94V-0 flame retardant plastic case and are certified for various international safety regulations. This range is ideal for use with various types of consumer electronic devices, telecommunication devices, office facilities, industrial equipment, and various kinds of apparatus or systems requiring conformity to the latest energy related regulations.

- 90~264VAC input
- No load power consumption <0.075W
- 94V-0 flame retardant fully enclosed plastic case
- Complete protection functions:
- Short circuit/overload/over voltage/over temperature (GST60A only)
- 3 pole AC inlet IEC320-C14
- Energy efficiency level VI
- Comply with up to date global energy efficiency regulations
- EISA 2007/DoE, NRCan, AU/NZ MEPS, EU ErP and CoC Version 5
- Class I power (with earth pin)
- Pass LPS
- LED indicator for power on

0 TO 36VDC, 0 TO 5A SLIMLINE

Often in a workbench environment you don't need massive amounts of power, and your huge unit is underutilised. This slimline power supply provides up to 80W of power, still plenty of grunt for many tasks. It provides constant current and constant voltage options. Simply select your power range, then adjust the controls to obtain your desired outputs. Ranges available are 0-16V @ 0-5A, 0-27VDC @ 0-3A, and 0-36V @ 0- 2.2A. Output is provided via banana sockets which will accept insulated banana plugs. A powerful, compact unit for your workbench or mobile toolkit. Includes banana to alligator clamp leads.

A good lab power supply is a must-have for any serious hobby bench. This one provides the flexibility of wide voltage range and current limiting. A large backlit LCD provides feedback. Thoughtful design makes this unit very functional. While it's capable of up to 40A, if you're only using up to 5A, handy banana sockets are provided on the front panel. If you need up to 40A, heavy duty binding posts are provided at the rear of the unit. The lightweight switchmode design means you can move it around as required, while voltage ripple is kept below 100mV.

MAINS PLUG AND SOCKET PROTECTOR - IP44

1 YEAR WARRANTY

There are often instances where you have no choice but to connect mains appliances out in poor weather. Sure, your appliance might be weatherproof, but you need to protect the mains plug and socket from the weather too. This brilliant enclosure safely encapsulates a mains plug and socket connection (say from an extension lead to a mains powered appliance), to ensure no water gets into the connection. It not only stops a short circuit that will trigger your circuit breaker, it prevents accidental electrocution from water ingress. Of course, in good weather it still prevents accidental disconnection and damage to the mains plug and socket.

- Protects mains plug and socket
- IP44 waterproof rating
- Heavy duty

WEATHERPROOF OUTDOOR POWERBOARD ENCLOSURE - IP54

1 YEAR WARRANTY

This fantastic enclosure takes your average mains powerboard and turns it into a safe, IP54 rated weatherproof power distribution system! It features a heavy duty lockable latch to keep things closed, with an o-ring seal to keep the water out. The cavity inside is around 295(W) x 180(L) x 100(D)mm, which is enough for most 4-way powerboards, and will house plugpacks for Christmas lights and garden ornaments with ease. A 5-way cable grommet is built-in (1 for powerboard, 4 for the items connected to the powerboard). Comes with optional drill holes for M20 or M25 cable glands.

MAINS POWER METER

This intelligent power meter simply plugs into a normal power point (GPO) and turns it into a real-time power monitoring outlet.
You can enter the local price of your electricity and the meter will tell you exactly how much the appliance is costing to run. In addition, the power meter tracks the power used and can display the instantaneous voltage or current being drawn as well as the peak levels that have been drawn. The meter has backup batteries so it will not lose the stored dataduring a blackout or moving from point to point.

MAINS POWER METER WITH EXTENDABLE LCD DISPLAY

A fantastic large LCD and clear power usage numbers make this unit easy to read, but what's even more impressive is the genius design of having the LCD separated from the mains point! An all-in-one meter might seem like a great idea, but if you're measuring the usage of your fridge, or your HiFi system, or something else where the mains point isn't in clear view, it can be very difficult to take readings. Solved!
It has all the usual features, power usage in watts, cost conversion, and more.

- Separate wired LCD for better readings
- Displays watts, cost, volts, amps, and CO2 emission
- Display hang-holes for mounting

RCD Power

SINGLE RCD (SAFETY SWITCH) OUTLET

1 YEAR WARRANTY

RCDs (residual current devices), also commonly called safety switches, are designed to cut the power in a fraction of a second in the event of a fault condition, thereby preventing electrocution. The electrics in your house may be too old to have RCDs installed, or you might want to use a power tool outdoors on an outlet that doesn't have an RCD fitted - use this handy portable one instead. Buy one right now if you don't have RCDs already. Note: RCDs are not a substitute for common sense around mains electricity. While they will work in most situations, they may not in some cases and are not a substitute for current overload devices such as fuses and circuit breakers. Wiring, appliances, leads and power outlets must always be maintained in a safe condition. Test function / reset button

Caravan & Motorhome Electrics Book

CARAVAN & MOTORHOME ELECTRICS

A comprehensive text written primarily for owners, designers and builders of caravans, campervans and motorhomes who face unique power demands and challenges that most auto electricians are ill-equipped to properly address. The book covers every aspect of designing, installing and fixing the electrical systems in all type of caravans, camper-trailers and motor-homes. It explains how things work without the sales pitch jargon, and shows how to dramatically increase power efficiency as well as how to install solar power. Written with emphasis on proven techniques that work, rather than ideas that might work. Written by acclaimed Australian author and field expert Collyn Rivers, this is an essential reference for all caravan and motorhome enthusiasts

UNIVERSAL MULTI-CHANNEL NI-MH/NI-CD FAST CHARGER WITH LCD DISPLAY AND USB OUTPUT

This is a powerful, yet flexible, fast charger for all those standard (AA/AAA/C/D) rechargeable cells (Ni-MH or Ni-Cd), up to 6 at a time, including 2 exclusive slots for 9V rechargeable batteries. Up to 1A charging per cell (depending on size) means typical AA cells will only take a couple of hours to charge. Feedback on charging status is provided thanks to an informative LCD panel and status lights. It also provides a convenient 1A USB outlet, so you can charge your smartphone, tablet or any other USB powered device. This unit does not charge rechargeable Lithium or Alkaline cells.

- Quick charge
- USB output
- Intuitive LCD display
- LED indicators (various modes)
- Dimensions: 180(W) x 144(D) x 55(H)mm

Note: Batteries not included.

Lithium Battery Chargers

USB POWERED LI-ION BATTERY CHARGERS

NEW

1 YEAR LIMITED WARRANTY

These portable charger can intelligently fast charge a rechargeable Li-ion cell (or two) from a USB power source - no mains power required. The charger automatically detects the battery and sets a 500mA or 1000mA current to fast charge the battery accordingly. The spring-loaded cradle supports a battery up to 71mm long, including 26650, 22650, 18650, 17670, 18490, 17500, 18350, 17335, 16340(RCR123), 14500, 10440, and more.
Features zero voltage battery activation for protected cells, as well as over-charge, short-circuit, reverse-polarity, and bad battery detection. Supplied with USB power cable.

- Intelligent fast charging
- LED charge status indicator
- USB powered

4-CHANNEL UNIVERSAL FAST CHARGER WITH LCD

NEW

This intelligent charger has four independent charging slots to charge any combination of Ni-MH, Ni-Cd, Li-ion, or LiFePO4 cells at the same time. The microprocessor monitors each battery and provides a safe and effective charge using precise Pulse Width Modulation (PWM) technology. A single Li-ion or LiFePO4 cell can also be fast charged at up to 2A. The high contrast LCD screen provides real-time battery monitoring, including charging current (A), charging capacity (mAh), voltage (V) and battery power (%), and humanised voice messages provide audible notifications. Power comes from an available USB port using the supplied USB Type-C cable. Safety features include alarm and error messages for bad batteries, reverse connection, short circuit, over-charge, and over-temperature.

UNIVERSAL BATTERY TESTER

Never trash a good battery again! This universal tester provides testing for most types of small rechargeable batteries, including a huge range of Lithium-based (LiFePo4, Li-Ion etc) batteries. You can test voltage, capacity, and internal resistance. Internal resistance is usually tied to the current charge level, however generally increases with a battery's age, it provides a good indication of battery health, most notably in Lithium-based rechargeable batteries. It also works with alkaline and various other non-rechargeable batteries.

- Tests over 11 types of batteries including cylindrical and button cells
- Test battery voltage, capacity (%), and internal resistance

Free Boxes!

MOVING HOUSE? NEED SOMETHING FOR STORAGE?

In the course of running our business, we go through thousands of stout cardboard boxes that become surplus to our needs. If you need a box - even several - just ask and we will probably have half a dozen or so that could be suitable for you. They are FREE and you are doing yourself and us a favour by recycling them.

Nickel Metal Hydride Ni-Mh Rechargeable Batteries:

Powerful rechargeable batteries with massive capacity for your power-hungry devices. Two types are available. Nipple cap, which are like your standard Alkaline batteries in style, and solder tabs, which are perfect for DIY projects due to their ease of installation and solder connection. If you've ever tried to solder to a regular Nipple Cap type cell, you'll know how tough and unreliable the connection can be.
Ni-MH suffers no memory effect as Ni-Cd does, with huge capacities available in a range of standard sizes.

PANASONIC® ENELOOP NI-MH PRE-CHARGED RECHARGEABLE BATTERIES

This range of Panasonic® Eneloop batteries have numerous advantages over regular rechargeables. Key characteristics include low self-discharge, they are pre-charged so can be used right out of the packet, and can be recharged up to 1800 times. After 5 years of storage they will retain 70% of their capacity once fully charged. A far more environmentally friendly option than churning through dozens of alkalines.

tech talk LiFePO4

Lithium iron phosphate (LiFePO4) is a technology proving to overcome the safety concerns that exist with Lithium ion (Li-ion) and other lithium battery technologies because it is chemically more stable. In particular, LiFePO4 is able to deliver extremely high surge currents without risk of the battery chemistry breaking down (and the battery exploding), holds a charge for a very long time, and is far more stable when exposed to high heat and other environmental conditions.

tech talk Protected vs Unprotected Li-ion Batteries

With great power comes great responsibility. For the ultimate in protection, our SB2299 protected Li-ion battery provides safety while offering huge power. It's a great choice for novices, schools, and younger experimenters, or when you just want that added safety and piece of mind.

Li-ion Rechargeable Batteries:

Lithium technology has enabled huge portable power with minimal weight, critical for modern portable electronics. A range of nipple cap and solder tab batteries in varying capacites, allow you to select what you require for size, capacity, and budget.

LiFePO4 Rechargeable Batteries

LIFEPO4 RECHARGEABLE BATTERIES

Lithium iron phosphate (LiFePO4) is a more chemically stable type of lithium rechargeable cell that is becoming increasingly popular, due to the increased safety and longer cycle life over traditional Li-ion cells. They have a slightly lower capacity and nominal voltage than equivalent Li-ion cells, but can be charged/discharged around 2000 times (versus 500-1000 for Li-ion), and can deliver higher peak currents. We now offer a couple of common sizes:

14500 3.2V 600MAH LIFEPO4
- Capacity: 600mAh
- Dimensions: 14(diam) x 50(L)mm SB2305

SAMSUNG HIGH DRAIN 2500mAh 20A 3.6V 18650 LI-ION BATTERY

This high quality Li-ion rechargeable battery by Samsung is an ideal replacement flat-top 18650 batteries in high power devices such as LED torches, power tools, portable fans, vapes, etc. It has a capacity of 2500mAh and a maximum continuous discharge of 20A.

Note: This is an unprotected rechargeable lithium battery, which is only suitable for use in a compatible device/charger. Use of an unprotected cell where a protected cell is expected is very dangerous, please review your product's user manual before proceeding.

HEARING AID REPLACEMENT BATTERY PACKS

Supplied in a handy rotary wheel dispenser pack.

Tip: Caring for these batteries is important. When they are not in use, hearing aid batteries should be stored at room temperature. When you're not using your hearing aid, example, at night when sleeping, leave the battery compartment open so the battery doesn't drain and fresh air can dry the hearing aid and battery compartment.

tech talk Lithium Can Be Dangerous

All the batteries on this page are non-rechargeable. Do not try to recharge any of these lithium batteries. There are basically two types of lithium batteries: rechargeable & non-rechargeable. Rechargeable batteries are usually referred to as Lithium-Ion, Lithium Polymer or LiFePO4. The ONLY WAY to recharge such batteries is with a dedicated charger for the particular battery size, such as CRV-3 or CR123A types. Such chargers are specifically designed to strictly manage the special charge rate requirements for rechargeable lithium ion or lithium polymer cells. Standard Lithium non-rechargeable batteries are not designed to be recharged - even with a Lithium-Ion or Lithium-Polymer charger. Indeed there is a VERY HIGH likelihood that the battery will violently EXPLODE if any attempt is made to charge a standard Lithium battery. DO NOT try to recharge ANY lithium battery with an undedicated charger, such as lead acid or Ni-Cd charger, under any circumstances. All batteries on this page are non-rechargeable. Do not try to recharge any of these lithium batteries.

It was not until battery manufacturers came up with small (generally) lead-acid batteries with low internal impedance that enabled these products to emerge. With such battery technology, it was possible to make a portable power source in a reasonably lightweight package with enough grunt to be useful. Up until that point you had to borrow a full-size battery - or a nearby vehicle to jump-start a car or truck. Even if that jump-start capability was the only feature, they'd be worth having. But, in addition they have other in-built features which include: small air compressors, AC/DC chargers, USB outlets, 240V inverters & jumper cables! No wonder these products are some of the fastest sellers in the Jaycar range. There is no reason why everyone who owns a car, 4WD, boat, caravan, truck etc. would not have one.

12V 400A GLOVEBOX JUMP STARTER & POWERBANK

Gone are the days of flooded engines and manual chokes to get your car started, but that pesky battery still has a habit of failing at the most inconvenient of times. This unit is amazing. Barely larger than a smartphone, and probably even lighter, but packs a huge power punch to get your car started. With a peak current available of 400 amps, it's powerful enough to get just about all but a tank running. Of course, sometimes emergency phone power is just as important as starting a car, so a 5V 2A USB port is provided to get you powered back up. It even includes a cigarette lighter socket charging adaptor, so it never has to leave your car (just remember to charge it when your battery is NOT flat!). In case it's dark, it also incorporates a clever high-power LED. It can provide torch light, flashing strobe, or flashing blue and red - all have their respective purposes. These devices are now so reliable that similar ones are used by roadside service operations instead of jumping from their own vehicle! If you have more than one vehicle in your family, one for each is a very sound idea.

12V 450A LI-PO JUMP STARTER & POWERBANK

Powerful enough to start most vehicles, it'll crank an engine up to a 5L petrol, or 3L diesel. When not being used for jumpstarting it includes an LED torch, as well as a strobe/orange warning light. You can charge USB devices using one of the two USB ports, one rated at 1A, the other at 2A. Recharge time is less than 5 hours, recharged using the supplied mains adaptor. tech talk Lithium Polymer (Li-Po)

Lithium Polymer (Li-Po) batteries are lightweight and pack alot of power into very small and lightweight case. They can also deliver an exceptionally high current in a very short space of time, making them ideal for jump starter and power bank devices. Sealed Lead Acid models still typically provide a higher capacity overall, but are much larger and heavier. Our Li-Po based models will fit in your glovebox without a fuss. However like most rechargeable batteries, regular recharging will keep them ready to go at a moment's notice.

12V 850A JUMP STARTER AND POWERBANK WITH 10W WIRELESS QI CHARGER

It wasn't long ago that so called "portable" jump starters were about as portable as 4 bricks with a handle on top. Things have changed a lot since then thanks to lithium battery technology. Indeed, this unit weighs in at around half a kilogram and could almost fit inside a shirt pocket! Not only is it light and portable with a whopping 850A peak cranking current, it also features a wireless Qi charger for your phone and two USB sockets for your other devices. You won't be caught in the dark either thanks to the built in torch with SOS beacon function. Charging is via the onboard USB C socket.

12V 1100A 17AH JUMP STARTER WITH AIR COMPRESSOR

So much more than a jumpstarter. Sure, it has selfcontained jumper leads and a huge 17Ah battery, so it'll bail you out of many situations. But the real utility of this unit comes from the additional features. There's a built-in air compressor to inflate tyres. There's a 5-LED high power work light on the front so you can see what you're doing. 2 x cigarette lighter sockets as well as 2 x USB sockets for powering and recharging many devices. An internal battery condition gauge helps you make sure it's ready for action, and it's all in a self-contained unit! Includes mains and 12V charging adaptors.

- 400A 12V jump starting
- 2 x USB charging sockets
- 2 x cigarette lighter sockets
- Air compressor with tyre inflator

12/24V 1000/500A LI-PO JUMP STARTER

Lithium battery jump starters revolutionised jump starter technology, making them lightweight and ultra-compact. This one is compact, but it's great on the inside! It works on 12V or 24V systems, to provide a whopping 1,000A of peak current (500A on 24V systems). A massive 22,200mAh of LiPo power is ready to leap into action at a moment's notice. Capable of starting cars, motorbikes, but also large motors such as boats, trucks, buses, other industrial and commercial applications. Intelligent detection circuitry provides automatic 12 / 24 selection, with a manual override option useful with very low discharged batteries (when Auto mode isn't able to detect correct battery voltage). Like all good power banks, a USB outlet is also provided for mobile phone charging and powering other usb devices too. A small light is also included which is very useful at night and in enclosed spaces. Short circuit, over-temperature, over-current, and internal battery protections are included to ensure the jump starter stays in good working order. Mains and car charger included, with battery-level indicators on the unit.

- Ultra high capacity jump starter
- 12V / 24V compatible starting with automatic detection
- USB charging outlet and light

12 TO 5VDC POWER CONVERTER

Use this wiring kit to get rid of those unsightly and annoying power cables floating around your car dash that power your GPS, Dash cam or mobile device. Simply hardwire it to the 12V power fuse panel in your vehicle and plug the micro USB plug (micro USB adaptor also included) into the device you need to power. If your vehicle uses blade fuses then wiring can be made easier using our SF5115 or SF5125 blade fuse sockets, which patch into the fuse panel.

Cigarette Lighter Connectors & Adaptors

Merit Automotive Connectors

MERIT PLUGS & SOCKETS

Smaller in size than existing cigarette lighter connectors, they also have the advantage of a superior rugged construction and higher current carrying capability. The panel sockets feature a flip down cover to resist ingress of moisture and dust, and can withstand long periods of sustained current draw (unlike the el-cheapo versions of these connectors!). We have even included a modular merit plug to cigarette lighter adaptor in our range for those people who need both styles in a single connector (like those used on popular brands of 4WD fridges and spotlights).

USB AND 12V CIGARETTE LIGHTER POWER SOCKET (SWITCHED)

A classy little panel! It features an on/off rocker switch under a protective tamper-resistant cover. 16A rated - it will behave like a circuit breaker if current draw exceeds 16A, and can be immediately switched on again. The panel measures 130mm wide x 50mm high and will need approx. 70mm behind the panel for wiring access. The switch turns the power on to both the 10A cigarette lighter sockets and the USB sockets, of which there are 2, one 1A rated and the other 2.1A, both at 5V of course. There are no inline fuses fitted but you could reconfigure the wiring easily as everything connects by 1/4" QC tabs. Mounting is via two countersunk holes 4mm dia.

Smart LED Bulbs

Wi-Fi Smart LED Bulbs with Colour Change

These smart LED bulbs can be controlled from an App on your Android or iOS phone or from voice commands using your Alexa or Google Assistants. From the comfort of your seat (or from anywhere across the internet) you can easily command the light to adjust for your mood, from a comforting warm white up to a cool white for reading, etc. You can also dim the brightness without the need for an external dimmer, and set up automatic schedules using the App. Family members can be provided access to control the same devices, and multiple lights can be controlled simultaneously. Available with Bayonet or Edison Fittings, sold individually or in three packs.

Note: 2.4GHz Wi-Fi network required. An Amazon Alexa or Google Assistant is required for voice functionality.

tech talk LED Information

Power supply requirements for LED lamps or lighting modules, such as our MR16 LED downlight replacement globes, can vary considerably and it is essential that a suitable power supply is used. Switchmode transformers, or "electronic transformers" that are designed to run halogen lights, should not be used with LED lighting modules or lamps unless they are specifically certified to do so. LED lamps are compatible with all types of magnetic (linear) transformers, but not all types of switchmode transformers. Most halogen lamp switchmode transformers require a minimum load to function correctly & output a high frequency pulse train based on the load requirements. As LED lamps draw a fraction of the current of an equivalent halogen lamp (typically ~1/10th), this usually results in problems such as flickering, strobing, or in some cases, no light at all. It may also reduce the life expectancy of the LED lamp. It is essential the maximum input voltage of the LED lamp or module is not exceeded and the power supply can deliver the necessary current required in a linear manner. If using switchmode or electronic power supplies, make sure they are designed for use with LED lamps, otherwise use a linear power supply or a DC output power supply.

LED Replacement Lamps For Caravans

LED REPLACEMENT LAMP FOR 2D FLUOROS IN CARAVANS

One of the most common lights used in caravans up until quite recently, is the 16W 2D fluoro. The problem with these is not only do they draw a lot of power for the light they produce, but they also blow very frequently, take a long time to "warm up", and they aren't very pleasant on the eye. This LED replacement lamp solves all that! The circular shape metal core PCB is backed with the same moulding as a normal 2D fluoro, so it fits into the same light socket - all you have to do is bypass the fluoro ballast and supply the lamp with 12VDC directly. No need to carry spare globes as the LED lamp is impervious to vibrations, and the LEDs are rated to last over 50,000 hours.

ELECTRONIC TRANSFORMERS FOR LED LIGHTS

These electronic transformers are designed to be used with LED lighting products that take a 12V power source, for example our LED MR16 replacement globes, and provide the same kind of efficient power delivery and compact size as a normal electronic transformer. Electronic transformers that are intended for use with halogen downlights are not suitable for use with LED-replacement lighting products, since using them often causes flickering and dramatically reduces the life expectancy of the LED light. They deliver a constant 12VDC and feature short circuit, over temperature, over load and spike protection. Suitable for domestic and commercial applications, they are perfect for combining with our LED MR16 globes to replace those power-hungry halogen downlights.

LED Power Supplies

In efforts to conserve energy globally, Mean Well has consistently introduced new series of LED Power Supplies. Our range includes a wide range of products which offer higher efficiency, lower power dissipation, compliance with the latest domestic and international lighting regulations. Mean Well LED Power Supplies are ideally suited for street lighting, architectural lighting, decorative lighting, embedded lighting, indoor lighting, stage and theatre lighting and LED signage. Because of the robust design and high protection levels against dust and moisture, they can be installed in many indoor and outdoor LED applications.

NON-DIMMABLE - APV SERIES

The APV series is ideal for users looking for a low cost, reliable constant voltage LED driver for use in indoor applications. All models are subjected to a 100% full load burn in test and these LED drivers are backed with a 2 - year warranty. 94V-0 flame retardant plastic is used in the manufacture of the plastic housing and all models feature a full suite of safety protections including short circuit, overload and over voltage protection. The APV-12E and APV-16E Mean Well LED drivers are supplied with a 1.8m input lead and plug.

- 180~264VAC input only
- Rectangular plastic case with IP42 leve
- Low cost, small and compact size
- Constant voltage mode for APV-E serie
- Suitable for indoor LED lighting and moving sign applications

DIMMABLE

5 YEAR WARRANTY

The Mean Well LPF-D series is a plastic bodied - constant current dimmable LED driver. It comes with a 5-year warranty and 1.8m input lead and plug. Models in this range have an IP67 ingress protection rating making them suitable for outdoor applications in tougher environments. These can be used in LED panel lighting, LED downlights, LED decorative lighting, LED tunnel lighting and many other applications.

- 90~305VAC input, built-in active PFC function
- Fully isolated plastic case with IP67 level
- Class II design, without FG

Flexible LED Strip Lighting

FLEXIBLE ADHESIVE LED STRIP - 5M ROLL

When the absolute brightest light possible isn't what you are looking for, then these competitively priced flexible LED strips are what you are looking for. These strips still use the same super efficient 5050 SMD LED package as our ultra bright LED strips, but each LED has around 20-40% less light output that our ultra bright versions.

Everything else is the same; there are 60 LEDs per metre, the flexible strip can be cut into sections every third LED to create separate strips to your desired length, the strip is backed with 3M brand adhesive tape, and each section had solder pads to enable you to wire up to your desired configuration. Sold as a full 5 metre reel in cool white and warm white colours, they are an excellent solution to thousands of lighting applications such as display cabinets, under bench lighting, accent lighting, caravan camping, 4WD, mood lighting, etc.

ULTRA BRIGHT FLEXIBLE ADHESIVE STRIP - PER SEGMENT

These flexible adhesive LED strips are made using the highest brightness 5060-SMD type LEDs, and feature 60 of these LEDs per metre of stripping. Each strip comes as a 5m length, which can be broken down into individual 5cm sections with 3x LEDs that can be individually soldered to apply power. We understand that not all applications require a full 5m length, so we cut them to length and sell by the 5cm section, so that you can get the exact length you require. The strip itself is a flexible circuit board, backed with quality 3M brand adhesive tape to ensure a long term adhesion to your mounting surface. Powered by 12VDC.

MOTION ACTIVATED UNDER-BED LIGHTS

This is ingenious. It essentially contains two long LED strips, which are connected to motion sensors. Simply mount them under your bed. If you get up during the night, or your kids come and greet you before the sun rises, it will automatically create a soft glowing light under your bed to help you see what's going on. If there's no more movement, it will automatically switch off after around 25 seconds. They're mains powered so there's no batteries or recharging to worry about, and each strip has 45 LEDs to create a soft glow. The LEDs are very warm white (around 1600 Kelvin) so they're not jarring at night either. Of course you can override the motion sensor to simply create nice bedroom mood lighting if you like too. Includes everything you need including mains power supply.

USB POWERED TRIMMABLE RGB LED STRIP - 1M

Featuring 30 RGB LEDs along a 1m strip, for great light output with colour-changing dazzle. Attach it to your laptop, TV, a wall, wherever you like! Unlike many designs, this light strip can be trimmed down at any of the 30 points between the 30 LEDs, so you can "fit it" to whatever you like. A small remote inline with the power lead provides light mode, colour-change, and on/off controls. Powered from a spare USB port using the provided 1m USB lead.

RGB LED FLEXIBLE STRIP LIGHT - 5M ROLL

This is an extremely versatile lighting solution. The 150 RGB LEDs allow you to change the colour to suit your mood, match your shoes, or just change it just because you want to. It uses a handy remote control for all on/off/colour selections, and you can change the brightness of any colour too. You can even trim the LED strip to a shorter length if required. Amazing! tech talk Strip Lighting

Our range of LED strip lights are made using some of the most common type of SMD LEDs used in LED lighting products; the 3528 type, and the 5050/5060 type. Their model designations actually come from their footprint dimensions: 3528 = 3.5x2.8mm, 5050 = 5.0x5.0mm, and 5060 = 5.0x6.0mm. The 3528 type is a single LED emitter type in a very compact package, whereas the 5050 and 5060 type are commonly referred to as "triple-chip" due to having three LED emitters built into the one package. The 3528 typically offers superior lumen performance per emitter and greater light efficiency than 5050/5060, but the 5060/5060 triple-chip types are more cost effective due to lower manufacturing and production costs when built into a finished product.

RGB LED FLEXIBLE STRIP LIGHTING KIT WITH EFFECTS

An easy to setup RGB LED strip that can produce an array of dazzling effects. The device controls each bank of 3 x LED's individually to create effects that emulate flowing water, a shooting star, curtains opening, a colour gradient and more. Using the remote control you can switch all LEDs to white, red, green, blue, yellow, purple etc. adjust the brightness or set it up to cycle through all the different effects. Lighting applications include cinema foyers, nightclubs, casinos etc. The kit includes a 5m reel of high brightness RGB LEDs with 3M adhesive backing, a power supply remote control, and a joiner to connect LED strips together.

Kit contains:

- 5m RGB LED lighting strip
- Infrared remote control
- Power supply
- LED strip joiner

ULTRA BRIGHT IP67 WEATHERPROOF LED FLEXIBLE STRIP LIGHTS

Fully weatherproof yet flexible. They're made from an array of ultra high brightness 5050 SMD-type LEDs, 60 to each metre of strip light. Everything's encapsulated in a protective casing to keep the dust and water out. Weatherproof male / female connections are provided at either end. 12VDC powered. The 1m version can be daisy-chained (up to 5 together), and it's available as a single 5m run too. The 5m version should not be daisy chained, instead run an individual power connection to each 5m length.

SMART WIFI RGBW LED STRIP LIGHTING KIT WITH EASY APP CONTROL

NEW

1 YEAR WARRANTY

2.4GHz

A 5m long RGBW LED strip light that can be controlled from an App on your Android or iOS phone, or from voice commands using your Alexa or Google Assistant. From the comfort of your seat (or from anywhere across the internet) you can easily command the light to adjust for your mood, from a comforting warm colour to cool white for reading, or set to produce colourful patterns that can flash with the rhythm of the music playing on your Smartphone. Great for use in an entertainment area or a display case at the office or exhibition space, for example. The App also enables you to dim the brightness and to set up automatic schedules to turn the light on or off at a pre-set time. Family members can be provided access to control the same devices, and multiple lights can be controlled simultaneously. The included double-sided tape backing makes installation easy.

tech talk RGB vs RGBW

You may be thinking we have a typo in our text when you see RGBW. However it's accurate, and a little different to regular RGB strip. In addition to the Red, Green and Blue LEDs, there's a pure white LED also. Typical RGB does a fairly good job of giving you a white-ish light output, however nothing beats true white LED. While it might not make too much difference if you're using it for a little illumination while camping, the true-white makes all the difference when reading and using technology. In addition, the extra white provides additional colour-blending options to get even more colour shades from the light. Now you can have light pink, light green, or anything in between, and still have a high volume of light output.

4 X RGB LED STRIPS WITH CONTROLLER FOR CAR INTERIOR

Add some colour and lighting effects to your car interior with these bright RGB LED light strips. The kit includes four LED strips with twelve LEDs in each, a controller and a remote control. The LEDs can be remotely controlled to change between eight different colours with four different lighting patterns. The lights can be set to change with the beat of the music, and the brightness and speed can also be adjusted.

Electroluminescent (EL) Wire

3M EL WIRE LIGHT ELECTROLUMINESCENT LIGHTING

Add amazing colourful lighting to your party, costume, signage, decorations, etc. These 3m long flexible wires can be bent into most shapes and glow (similar to a neon light) when power is applied. Power is provided using the compact EL controller (SL2440 sold separately), which runs off 2 x AA batteries, making it extremely versatile and portable. At only 2.3mm diameter it can be easily stitched into clothing or fastened with cable ties. Excess length can be cut off to suit your application (note: can't be re-joined). Up to 3 x EL wires can be connected at the same time to the same controller using 2 or 3 way splitters (sold separately).

- Dimensions: 3m length x 2.3mm diameter
- Requires SL2440 EL Wire Power Supply and Controller (sold separately)

Connects the SL2440 EL wire power supply and controller to multiple lengths of EL wire. Available in 2-way or 3-way versions with each outlet capable of connecting a full 3m length of EL wire*. Power supply/controller and EL wire lengths sold separately.

Two models available:

- SL2441 2-way 350mm
- SL2443 3-way 350mm

Compatible 3m lengths of EL wire sold separately:

** Note: Overall light output will drop when using splitter with full 3m lengths compared to direct connection to power module. To maintain maximum light output the total length connected to the splitter needs to be under 5m.*

PORTABLE MULTIPURPOSE CABINET CAMPING LIGHT

NEW

2 YEAR WARRANTY

A superb rechargeable LED light that you can use on-the-go or mount in your tent, caravan, camper, etc. The versatile 3-in-1 base holder enables you to mount the light almost anywhere using the supplied strong 3M® double-sided tape, timber screws and built-in magnets, and the 360° angle adjustment means you get light to where you need it. A 1m long USB cable is provided so you can charge the light's internal Li-ion battery from a USB power source such as a powerbank, computer or USB power adaptor. To operate, simply touch the button at the end of the light, which can cycle between natural, warm, and cool white light up to 200 lumens. An SOS flashing mode is also included if you need to attract attention. By holding the switch in, you are also able to dim the brightness from 100% to 2%, which can help save power if you only need some ambient lighting. The light can be used for other applications where mains power is not available, including cupboards and cabinets, garages, sheds, outdoor gazebos, etc.

LED Cabin Lighting:

LED lighting fixtures are ideal for areas that do not have mains power. LED lights draw such a small amount of current for their light output battery power (generally AA cell is all that is necessary). Indeed many fixtures have inbuilt battery compartments or simply require a 12V source. All units can be wired by DIY handy people. They are 12V safe or battery. They are idea for caravans, sheds, boats - even cubby houses. With these products you never need to be scared of the dark again!

MINI LED LIGHT

Pre wired in a sleek and compact design, this is a perfect mini LED light for illuminating harsh areas. Using new advanced lens technology the LEDs increase light output for optimal lighting with minimal power. The 12 volt light draws 10% of the power of conventional lights. Sealed stainless steel construction allow for placement in tight spaces and harsh environments. Horizontal and vertical mounts provide a variety of mounting options. Can be used in step, board, accent lighting as well as marine applications!

REMOTE CONTROL 3 PIECE LED PUCK LIGHT SET

This amazing kit of three LED puck lights takes the hassle out of adding lighting to, well just about anywhere! Each puck light contains not one, two, or three, but 5 ultra bright LEDs. There's no pesky wiring to get them to work though just install three of your favourite AA batteries in to each light and put them in a location that's begging to end the darkness. The included adhesive tabs also mean no screws are required! But these aren't your average puck lights, there's a central remote control to control them all! The remote control then caters for centralised on and off functionality, as well as a "low brightness" dim setting, or set them to turn off in 30-minutes automatically. Not near the remote? Simply press a puck light and it will turn on for you too. Amazing!

- High / low brightness modes

Super Bright LED Worklights / Floodlights

Once again LEDs have revolutionised the established concept of floodlights and work lights. Up until recently a workshop light meant trailing a dangerous 240V lead, often across a wet or greasy floor. Now these devices are often 12V powered (there are still powerful 240V models for all night marathons). The portable ones are also great for outdoor functions at night, as well as camping and fishing outdoors. Once you have appreciated the portability of these bright, rugged and lightweight lamps you will wonder how you did without them.

5W PORTABLE LED WORK LIGHT

SLIMLINE LED WORKLIGHTS - IP65 - 240VAC

Avoid the heat and hassle of traditional Xenon / Halogen worklights. They're power hungry, generate a lot of heat, and there's nothing worse than a blown globe while you're trying to see what you're doing. These lights feature an integrated floor stand, and put out plenty of ultra-white bright light. They use far less power than their traditional counterparts, which is especially important when running from a generator or inverter power. They're IP65 rated so won't mind a little rain, and they're tough, so you don't have to wrap them in cotton wool to transport them in the back of your ute either. 10W and 30W versions available.

MULTIPLE MOUNT LED WORKLIGHT

This unit features 3 mounting configurations – a magnet to attach to steel car/truck bodies, a sturdy hook hanger and a tilting 'bail' to sit on a floor at a convenient angle. The main light itself is a COB (chip on board) array of 27 LED lights on two light settings: very, very bright and just bright. There is a torch-type LED light on one end to view into confined spaces. The main light is rated at 250/200 lumens and the torch at 80 lumens. It is compact at 150(L) x 55(W) x 23(D)mm and will easily fit into a glove box or tool kit until it is needed. It will fit into a pocket nicely as well.

- Yellow with soft black accented hand grip
- Main light output: 250/200 lumens
- Torch output: 80 lumens
- Requires 4 x AA Batteries
- Dimensions: 150(L) x 55(W) x 23(H)mm

RECHARGEABLE HANDHELD 3W COB WORKLIGHT

A must-have handy worklight for every toolbox, workshop or glove box. This versatile worklight sits comfortably in your hand and it can also be used hands-free using the flip-out hook or strong magnets in the base that adjusts 180° for the best angle. This rechargeable worklight doubles as a hand torch using the 6 x white LEDs in the end. Features a chip-on-board (COB) LED for an even spread of light, switch to toggle between worklight or torch, with a soft rubber finish. To avoid being stranded with a flat mobile phone there is also a USB port to charge your phone or to power other USB gadgets. Recharge the torch via USB.

LED Torches:

The Americans call a torch a 'flashlight'. Why? Because in the early days batteries were so poor and light globes so inefficient, you could only turn the torch on for a second or so, i.e. "flash" to save the battery and still see where you were going in the dark. Well, batteries got better, but torch globes stayed hopeless but at least we could keep the torch on for a while. Now almost all torches use LED-type globes. LEDs draw about 1/50th the current of old globes so you can leave the torch on all the time. Even better, LED globes are far, far brighter. Even though we have an extensive range, you will have difficulty making a mistake when choosing a LED torch. They are all good. But the Americans still call them flashlights...

KEYRING LED TORCH WITH BOTTLE OPENER

There are only two things almost as important as the keys on your keyring... a torch, and a bottle opener. This ingenious device has both! Especially important if you're opening a bottle, in the dark - it helps avoid spills when you can see what you're doing! Available in black, blue, grey or silver.

250 LUMEN LED HEAD TORCH WITH RED & GREEN LEDS

Designed with two distinct light sources to suit different uses. The first is a powerful Cree® LED for long range / torch style illumination when hiking or searching etc. The large COB LED can then be operated in white, red or green modes. This provides you a broad flood-style light which is perfect for more general illumination. Red and green modes are especially useful in adverse conditions. All bundled into a shock-resistant case for durability. A small red light and whistle is also included on the head-strap as an additional emergency feature.

SOLID LED DRIVING LIGHTS

Why would you ever buy halogen or HID spotlights again?

These LED lights output loads of brilliant white light - more light than a 300W/500W halogen at a fraction of the power consumption! They are also completely shockproof, waterproof (IP68), rust proof, shatterproof, last for 50,000 hours, turn on instantly, have a beam throw of up to 648m depending on the model!

Powered by 12VDC or 24VDC, and can handle pretty extreme temperatures without fuss. A must have for any serious 4WD bull bar or roll bar, or for any other application where extreme ruggedness and blinding brightness are desired. Available in either spot or flood beam patterns, and fitted with marine grade 316 stainless steel fasteners. Sold Singularly.

tech talk How To Wire Up Driving Lights

Fitting spotlights or driving lights to your 4WD, ute or other vehicle is generally pretty simple when you use a relay wiring kit like our SY4081 to the right, but it pays to wire it correctly to avoid any hassles with the law. Most states follow the requirements of the Australian Design Rules (ADRs), which requires that they be wired so that they only operate in conjunction with the head light circuit and are fitted with an independent ON/OFF switch - however some states require them to only operate in conjunction with the HIGH beam circuit and with an independent switch. Check with your local transport authorities for rules in your area.

12V Lighting Controller

12V 60A WIRELESS LIGHTING CONTROLLER

This extremely useful lighting controller gives you wireless control over your light bars, driving lights, caravan lights and any other 12V powered device. 8 output channels over two zones provides the ability to switch lights on and off at the touch of a button. The two main (green and blue) zones each have 4 outputs for up to 20, 5, 3.5, and 1.5A output respectively. Total power load is up to 60A (that's a lot of light bars!). The controller is fused for safety, so you can connect it straight to your vehicle battery, and your light bars to the controller - simple! Lights are quickly connected into the screw-down terminals, and the control box has mounting tabs for secure mounting in your vehicle.

12VDC 30A RELAY WIRING KITS

Taking a shortcut might be fine when you're driving through the bush. But don't do it with your electrical wiring. These relay kits take the hassle out of figuring out relay wiring, to provide a safe and easy method to install any high current device. That might be a fridge, driving lights, awning lights, or anything else. By wiring through a relay, you're not feeding all the power through your switch mechanism, which keeps the high current cabling to a minimum. They're easy to install and will save you time. Two models available. Each kit includes a 2m wiring loom, 30A relay, a contura style switch, and one or two high current outputs.

LED T10 3D WEDGE GLOBE

Many cars are now employing an electronic control system called CANBus, which can be a problem when using LED replacement globes as the system will give a globe failure indication. Being CANBus compatible, these LED globes don't cause these failure indications. Each globe features a special "3D" type of LED lamp, which provides an extremely even, wide light output that is very similar to a normal globe in style and appearance. This makes them a perfect replacement for interior lights, and automotive lamps where the light fitting has a lot of "clear" elements making other LED globes unattractive to look at. Powered by 12VDC, and suitable for off-road use only.

LED REPLACEMENT GLOBES WITH 6 X 5730SMD LEDS

This range of common automotive and general use LED globes are also compatible with modern CANBus systems, so that they don't give globe failure warnings when you fit them to your modern vehicle. Each globe is powered by 12VDC, is fitted with six high brightness 5730SMD type LEDs, and have a non-polarity circuit so you don't have to worry about fitting them the right way around. There are three models to choose from:

- 150 Lumens

LED BA9S 3D GLOBE

Many cars are now employing an electronic control system called CANBus, which can be a problem when using LED replacement globes as the system will give a globe failure indication. Being CANBus compatible, these LED globes don't cause these failure indications. Each globe features a special "3D" type of LED lamp, which provides an extremely even, wide light output that is very similar to a normal globe in style and appearance. This makes them a perfect replacement for interior lights, and automotive lamps where the light fitting has a lot of "clear" elements making other LED globes unattractive to look at. Powered by 12VDC, and suitable for off-road use only.

Canbus Compatible Globes

LED FESTOON REPLACEMENT GLOBES, CANBUS COMPATIBLE

A range of ultra-bright LED replacement "festoon" globes for car interior lights, which are fully compatible with modern "CANBus" systems that would otherwise give a globe failure warning when using an LED globe. Each globe features six ultra bright wide angle SMD LEDs, a non-polarity circuit (can fit the globe either way), and a CANBus circuit. There are three models to chose from, each working on 12VDC.

Canbus Compatible Globes

CANBUS COMPATIBLE AUTOMOTIVE BA15 TYPE LED REPLACEMENT GLOBES

1 YEAR WARRANTY

More and more modern vehicles are employing an electronic control system called CANBus, which has many benefits including monitoring of globe failures. This can pose a bit of a problem with LED replacement globes causing the CANBus to detect that globe as having failed. This range of BA15 type LED globes are all CANBus compatible (won't give errors), with universal polarity, very low power consumption and a high lumen output. For off-road use only.

- Powered by 12VDC, can be used as tail/brake light (BAY15D), parker light (BA15S), or even as interior light globes (BA15D/BA15S) thanks to their high brightness
- The BA15D is very commonly used in caravan and marine interior lights

tech talk Automotive Globes

You may look at our range of LED automotive globes and wonder what all these different globe numbers mean: BA15S, T10, E10, BAY15D, etc.

Well luckily these numbers are an industry standard, and actually describe the type and size of the globe's base and pin arrangements.

Below is a list of the most common types of automotive globes, and a typical application for them:

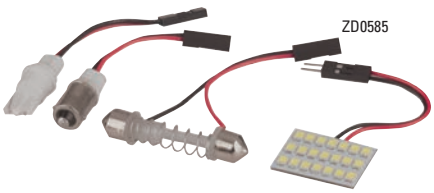

T5	5mm wedge style base. Used in dashboard illumination
T10	10mm wedge style base. Used in dashboards, park light, number plate illumination, etc.
T20	20mm wedge style base. Used in some indicators, tail and brake lights
E10	10mm Edison screw base. Used in some dashboards, park lights and number plate illumination (typically on older vehicles)
BA9S	9mm Bayonet cap base with single contact pin. Used in dashboards, park lights and various lights
BA15S	15mm Bayonet cap with single contact pin. Used in indicators, tail, parker and some brake lights
BA15D	15mm Bayonet cap with two contact pins. Used in caravan interior lights and marine navigation lights
BAY15D	15mm Bayonet cap with offset side location tabs, with two contact pins on the base. Used for tail/stop lights (high/low brightness)

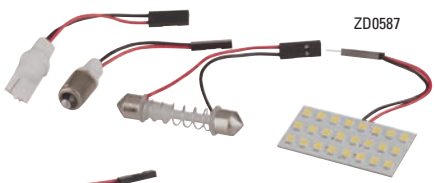

Car Lighting Kits

UNIVERSAL T10/211/BA9S LED RETROFIT KITS

Fantastic little kits to upgrade your car/caravan/boats interior lighting with LED technology. Each kits consists of an array of LEDs on a board with 3M adhesive foam backing, making it easy to retrofit into almost any existing light. There are 3 bases which can connect to T10, 211, or BA9S sockets. The base is then connected to the SMD LED array, couldn't be easier! The LEDs will give greater lifespan and brighter light in many cases.

Car Lighting - Trailer Lights

12V LED TRAILER LIGHTS (STOP/TURN/TAIL)

Regular bulb failures in your trailer lights are not only a pain in the posterior, but also quite dangerous to your fellow road users. Switching to LED alternatives solves this problem completely, since LEDs are not at all affected by shock and vibration, last over 50,000 hours, use a fraction of the power, and are actually more visible to other road users. These trailer lights are an "all-in-one" solution measuring only 100mm wide by 90mm high, and providing all the legal illumination needs of a caravan, boat trailer, camping trailer etc., being; Stop, Tail, Turn and number plate illumination. They appear to be quite water resistant but we cannot quote an IP rating for water and dust.
Also has a red reflector panel.

12V LED TRAILER LIGHT KIT WITH WIRING

Regular bulb failures in your trailer lights are not only annoying to replace, but also quite dangerous. LED alternatives solves this problem completely, since LEDs are not at all affected by shock and vibration, last over 50,000 hours, use a fraction of the power, and are actually more visible to other road users. These trailer lights are an "all-in-one" solution measuring only 100mm wide by 90mm high, and providing all the legal illumination needs of a caravan, boat trailer, camping trailer etc., being; Stop, Tail, Turn and number plate illumination, along with a red reflector panel. The housing is submersible which is perfect for boat trailers, and each light is fitted with a connector to make wiring easier. The kit includes 2x trailer lights, a pre-made 7m trailer cable with 7pin flat trailer connector. Sold as a pair.

Trailer Wiring Accessories

Before 1988, the only trailer connector in common use was a 6 pin unit (There were some 5 pin plug/sockets found in Victoria, TAS, SA & NT). Since 1988 you must have a 7 pin (minimum) connector in order to register your boat, camper trailer etc. (You may need a bigger connector in some cases, so consult an auto electrician for this) in both Australia & New Zealand. You can, however, in the case of small box trailers use 5 core wire. See below.

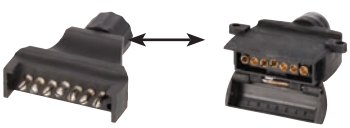

TRAILER CONNECTORS
There are now three types of trailer connectors - each with its own wiring configuration. See our website for full details of pin connectors and colours...

RE-WIREABLE TRAILER CONNECTORS - 7 PIN

A range of the most common 7 pin trailer plugs and sockets, featuring easy to use screw down terminals, corrosion resistant metal contacts and high quality UV stabilised plastics. In each type, the socket is fitted to the vehicle, and the plug is fitted to the trailer.

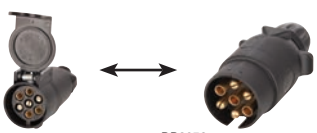

- All trailer plugs and adaptors are made from the highest quality material.

TRAILER PLUG ADAPTOR LEADS - 7 PIN

Often we find that the trailer we've borrowed from a mate does not plug into the socket on your vehicle, and that's where these trailer plug adaptor leads come in handy. About 300mm in length, and 6 versions available to fix up any mismatch of the 7 Pin Flat, 7 Pin Large round and 7 Pin Small round trailer connectors. Remember, match the plug end of the adaptor to the socket on your car, and the socket end of these adaptors to the plug end on your trailer.

Brass Monkey Fridge/Freezers

We have been staggered by the success of the range of Brass Monkey fridges in 2019. Our factory has been outstanding in producing a range of reliable, efficient and LOW COST compressor fridges. We have blown the Euro fridge people out of the water by making a compressor which is the equal of the best German designs. Even though we are up to 50% cheaper than our competition we offer the same or better warranties than theirs. Frankly, it's easy to offer this warranty as our products just don't come back!

ULTRA-PORTABLE WITH HIGH-MOUNT COMPRESSORS

NEW

3 YEAR WARRANTY

These are highly portable with great telescopic handes and wheels, similar to what you see on large luggage bags. It certainly helps take the weight out of moving a fully loaded fridge. What makes these fridges particularly unique however is the high mount refrigeration compressor. This makes them less prone to getting dirt or sand in the compressor which could damage the unit. This also applies to long grass and other debris, particularly if it's wet. Very durable.

tech talk Thermoelectric Heating/Cooling

This technology uses the "Peltier Effect" to increase or decrease temperature. It is fully solid state and is very reliable. It is quite inexpensive as it does not use gas compressor technology. The amount of temperature differential from ambient, is however, fairly modest. If you really want massive chilling or freezing capacity, you are better of saving your pennies and buying a compressor-type unit like above.

MINI 240V OIL HEATERS

NEW

Oil heaters are so safe you can leave them unattented. They will automatically turn off if tipped over and the cabinet will not get hot enough to seriously burn. You know this because you have them at home. Now JAYCAR has developed these wonderful products for outdoor camping, caravanning or RV. They are scaled down versions of domestic units, designed to fit into smaller environments.

Two models available:

- 500W & 700W

Check the modest external dimensions! They are simply plugged into a 240V and left. When you get back to your camp site you will be greeted with a toasty warmth! No waiting for other heaters to start up. They are noiseless, inexpensive, require no installation and energy efficient. You will love them.

- Temperature Adjustable

THESE HEATERS ARE FANTATSIC AT THE FOOT OF THE OFFICE DESK TO WARM COLD FEET. THE 500W UNIT IS IDEAL FOR THIS!

tech talk 12V Kettles, How Long Is Too Long?

A lot of people bring these back as they are dismayed at the amount of time it takes to boil water. They often take over 20 minutes to boil 1/2 a litre of water. You need to look at the physics of this. A 12V Kettle will often draw 20 amps at 12V. This equates to 240 watts of power. Whilst this may seem a lot, it is generally only a fraction of a domestic 240V Kettle. They routinely draw between 1800-2200 watts of power. No wonder they are quick! 12V Kettles work, but the laws of physics are against them. You may be able to live with them once you are aware of the above.

ATHANOR PORTABLE GAS WATER HEATER

NEW

This portable outdoor gas water heater makes cleaning up after a day's adventure in the outdoors very easy. The adjustable temperature, water flow, and shower head makes it very versatile, from showering yourself or the kids to washing the dishes, cleaning pets, removing the mud or salt-water from your equipment, and much more. To operate, simply connect up your water source and LPG gas cylinder, and open the shower head to activate the heater. Water will heat to your desired temperature up to 45°C, which is shown on the LED display. Safety features include a temperature sensor to stop the water temp from exceeding 50°C, and a water flow sensor that only enables the burner to work when water is flowing. Supplied with shower head on a generous length shower hose and hanging kit with mounting hardware for temporary or permanent mounting. 2 x standard D cell batteries are required.

Note: For outdoor use only, hung upright, and not to be used for drinking water. A water pump is required (sold separately) when water pressure is below 0.25MPa.

- Easy to set up
- Adjustable temperature and water flow

MOSQUITO ZAPPER WITH 180 LUMEN LED LANTERN

This rechargeable electronic zapper measures 90mm in diameter and 130mm high. It weighs only 200 grams and features a nifty double hook to mount anywhere. The unit also features a soft white light (3 light levels) which can be operated independently of the zapper. The zapper can work with or without the light. When on, the zapper has an unobtrusive UV style light, which attracts the bugs. The bugs fly through the finger guard only to be confronted with a high voltage grid which either kills them instantly or stuns them. Result? No more bugs around your ears at 2am! It gets better. The unit is charged by USB! It works for about 8 hours on a charge, depending on insect kill rate and lighting level. Great for camping or at home.

Air Compressors

12VDC AIR COMPRESSORS

Powerful air compressors great for a variety of outdoor activities and emergency situations such as pumping flat car/4x4/truck tyres, inflatable boats, air beds, etc. Both models incorporate automatic thermal cut-out for added protection as well as cleanable air filters to keep the units free from dirt and other contaminants. Includes heavy duty battery clamps for secure connection to your 12V power source and extendable coil hoses for reaching those tricky spots. Each unit has anti-vibration mounting feet to ensure they stay planted to the ground and a foam grip handle. Accessory nozzles for pumping bike tyres, balls, and other inflatables included as well as a black carry bag.

tech talk Air Compressors

How do you know you are getting a good compressor? The real way is to pull the compressor apart and check the piston. A good compressor will have a steel piston in an alloy cylinder, or an alloy piston in a steel lined cylinder. An easier way is to look at the construction of the tyre inflator. Cheap compressors supply a poorly built & flimsy unit. Check ours out.

Oil Pump

OIL PUMP 0.3-1.2LPM 12VDC

Perfect for siphoning oil to a holding tank, or refilling oil on your inboard while reducing the potential of a bilge full of oil from a spill. Suitable for motor oil and diesel, but not petrol or other highly flammable liquids. Includes hoses and hose clamps.

Note: Motor oil should be warm where possible (40-60°C) for maximum transfer speed. Not suitable for pumping of water or high viscosity oils (such as gearbox oil).

Features:

- Fast transfer
- Quick battery connection
- Up to 1.2 litres per minute

WATERPROOF METAL DETECTOR WITH LARGE LCD

Ideal for beachcombing and prospecting as well as finding objects in obscured locations such as long grass, this high grade portable metal detector is suitable for many applications. Capable of detecting a coin at up to 180mm depth it will detect a variety of metals, with three different tones to distinguish dissimilar metals. Operating at a low frequency of 6.6kHz, the detector will only respond to metal objects and ignores the effects of iron ground mineralization, making it more accurate for locating at large depths. Alternatively, the all-metal mode can be switched on to enable any underground metal traces detected and is signalled both optically and acoustically. An extra large waterproof pick-up coil with its intricate two-dimensional helical winding technology enables very fine and precise measurements to be carried out while carrying it comfortably with the arm support.

- Adjustable sensitivity
- Deep target searching
- 3 Operation modes: All metal, Disc, Notch
- Ferrous/Non-ferrous indicators
- Waterproof search coil
- 3 Tones for different metal indication
- One touch auto ground balance
- Headphone jack & 2" speaker
- DSC and GND adjustment
- Requires 2 x 9V batteries

MODERN, UPRIGHT STYLE WITH CLEAR LCD SCREEN AND LONGRANGE DATA SENDER

Apart from the very clear (monochrome) upright LCD screen, this unit includes the and 5-in-1 weather sensor/transmitter as the XC0434 unit shown elsewhere. Older transmitters operate on the 433MHz ISM band, which is plagued by garage door opener transmitters. This unit works on the 868/915/917MHz band with a range of up to 150m and is not allocated to a lot of consumer-type equipment.

This unit has basically the same features of the XC0434 (See that unit for details) but with a compact display and offers a saving over the colour console unit.

7" COLOUR TOUCHSCREEN WITH 5-WAY LONGRANGE 917MHz TRANSMITTER

1 YEAR WARRANTY

The main improvement to this model over the previous unit is the outdoor weather sensor. This sensor does not use the 433MHz band, which is sometimes plagued by interference from garage door openers especially. This model will send weather data to the indoor console unit up to 150m away! It has an improved rain gauge as well.

THE SENSOR

- Temperature / humidity
- Wind speed
- Wind direction (16 point)
- Rain gauge
- Requires 3 x AA batteries

THE CONSOLE DISPLAY

- Active display area measures 165 x 90mm
- Time, calendar, weekday and alarm
- Gust, or average wind speed (m/s, kmh)
- Real time and dominant wind direction
- Rain rate, daily/weekly/monthly (inches or mm)
- Weather forecast (Sunny, slightly cloudy, cloudy, raining, stormy or snowy)
- Barometric pressure (relative or absolute)
- Histogram of rainfall or barometric data
- Much, much more

WIRELESS DIGITAL WEATHER STATION WITH COLOURFUL LCD DISPLAY AND WI-FI

NEW

1 YEAR WARRANTY

Get your own local weather forecast with this professional Wi-Fi weather station. The feature-rich system is supplied with a wireless 5-in-1 outdoor sensor to measure rainfall, wind speed, wind direction, temperature, and humidity, as well as one high-precision hygro-thermo sensor to measure humidity and temperature from another place on your property. All sensors send data by a low power radio frequency signal (917MHz band) to the multi-colour main display unit up to 150m away (line of sight).

The backlit display can be desk or wall-mounted, and shows you the local forecast, high/lows, totals and averages for virtually all weather variables, without a PC. Connect it to your Wi-Fi network to be able to upload the weather data to wunderground.com and weathercloud.net, where you can access and upload your weather data freely. The time and date will be kept accurate as well, thanks to the internet time server.

With calibration and moon phase features, this system is truly a remarkably personal yet professional weather station for your own backyard.

Supplied with a USB power cable to power the main display from an available USB power source.

Breathalyser

FUEL CELL BREATHALYSER WITH ADVANCED FLOW DETECTION

1 YEAR WARRANTY

This personal breathalyser uses an internal fuel cell to measure alcohol in your breath, which is one of the more accurate ways to test. Testing is simple, and blood alcohol is presented as a percentage on the backlit LCD display. Of course, all measurements are an indication only and you should only use them as a guide. The safest blood alcohol to drive with is zero. Features include a breath sample flow check, memory of the last 16 results, cumulative test counter, and a sensor self-diagnostic system. Just one AA battery is required for power. An auto-off function extends battery life, and a battery low indicator reminds you when its time to change the battery. Mouthpieces are supplied, and a pack of six (QM7321) can be purchased separately.

- Fuel Cell Sensor
- Breath Sample Flow Check Technology
- Backlit LCD screen

Quadcopters

MINI R/C QUADCOPTER WITH LEDS

NEW

This agile remote controlled quadcopter is very easy to fly and has LEDs built into the rotor surrounds for a dazzling aerial show as you fly. Take off or land at the touch of a button or to perform amazing 360° flips. The durable rotor surrounds help bounce the quadcopter off walls, and thanks to the built-in 6-axis gyro and barometer, the quadcopter maintains its altitude and provides a very stable flight. The headless mode option keeps the quadcopter moving in the same direction as you rotate and perform stunts, and a speed switch on the remote toggles between beginner or experienced flying modes. The compact remote provides a range up to 30m, and runs off two AAA batteries (not included). A USB charging lead is supplied to charge the quadcopter from an available USB power source. Ages 14+.

MOTION DRONE WITH GRAVITY SENSOR

NEW

This motion drone includes a wrist-mounted remote to control its direction with a wave of your hand! To take-off, simply press the finger mounted button and your drone will automatically fly to about 1.2m off the floor. Thanks to the built-in gravity sensor, the drone will hover waiting for your wrist gestures or perform 360° flips using the finger button. Press the main button on the wrist remote for a soft landing. Enable the 360° infrared obstacle avoidance mode to avoid bumping into walls or to change the drone's direction by holding your hand in front of it. LEDs are also built into the rotor surrounds to add to the excitement. The drone can be controlled up to 30m away and has a fly time of up to 6 minutes before recharge. The wrist remote can also be charged using the supplied USB charging cable. Recommended for ages 14+.

720P FPV WI-FI R/C DRONE

NEW

Watch a live video feed from the high definition camera onboard this agile remote controlled drone as it flies in the sky above. The front facing 720p camera can be adjusted 60° from the remote control to provide a first person view (FPV) on your Smartphone via Wi-Fi from up to 60m away. Take-off and landing is made easy using just one button, and a return home function means that you can safely get the quadcopter to return back to you before the battery runs out. The headless mode option keeps the drone moving in the same direction as the drone rotates and perform stunts, and a trajectory flight function enables you to draw a flight course on the touch screen of your Smartphone. When you have finished flying, the rotor arms fold in so it takes up less room for easy storage. The remote control has a universal phone bracket to hold your phone. A USB charging lead is supplied to charge the remote and quadcopter from an available USB power source. Spare batteries are sold separately (GT4147) so you can keep flying while your other batteries charge. Recommended for ages 14+.

Bluetooth Audio

Cable Free & Streaming Products

Wireless audio, particularly Bluetooth, continues to grow in popularity. Our range of Bluetooth speakers, both personal and PA, has grown since last year and besides sounding great, offers features like TWS (True Wireless Stereo), waterproof housings, lighting effects and longer battery life.

The other extremely popular addition to the range has been the Bluetooth wireless earbuds on p 390, great for listening to music on the go and taking calls. With TWS and Bluetooth 5.0 includes they represent excellent value for money.

Speaking of value, we have introduced a new lower cost UHF phased array TV antenna on p426 and added some new party lights to the range, with more features and better pricing than on previous models.

Lastly, make sure you check out our range of phones holders and FM transmitters on p443. With stricter enforcement, higher fines and even phone detection cameras in NSW, it's just not worth the risk of driving and handling your mobile phone, for as little as around $20 you can help avoid the fines.

Bluetooth® 5.0 Explained

Bluetooth® 5.0 offers many benefits over earlier versions: Lower power consumption (for longer battery life), twice the data rate (up to 2Mbps), 4 x the range (up to 240m) and 8 x the broadcast messaging capability of Bluetooth® 4.2.

That's not all, with Bluetooth® 5.0 Dual Audio, you can stream music to two different speakers at the same time! But to benefit from all the new Bluetooth® 5.0 features, you need to have both devices compatible with the new standard.

TV SOUNDBAR WITH TOSLINK AND BLUETOOTH®

These compact wireless earphones fit comfortably in each ear and pair very easily with your Smartphone thanks to the Bluetooth® 5.0 technology. The True Wireless Stereo (TWS) functionality provides amazing stereo sound, and the inbuilt microphone enables you to take phone calls hands-free. Use the small push button on each earpiece to control your music or to accept or reject phone calls. A simple double-tap on the button starts the Siri or Google Assistant on your phone so there's no need to reach for your phone to make calls or to control your apps, for example. The rechargeable internal batteries provide up to 3 hours of listening or talk time and up to 100 hours of standby. Use them separately or as a pair. To recharge, simply pop the earphones into the included charging storage case, which you can charge from any USB power source. Includes USB charging cable, ear hooks and interchangeable ear tips.

tech talk TWS Explained

True Wireless Stereo (TWS) technology allows you to wirelessly connect two Bluetooth speakers together to provide you true left and right channel stereo quality sound. Once your smartphone, tablet or laptop is paired with the main speaker; connect a second speaker which will act as a slave and be able to play the same music in stereo format. Any speaker that supports TWS technology can be paired together without the need for messy cables or wires.

4K HDMI CAT5E/6 EXTENDER

2 YEAR WARRANTY

Send UHD 4K signals from a set top box, media player, or other video source to another room up to 50m away over a Cat6 cable. Ideal for PayTV, home theatre systems, meeting rooms, or to connect a computer to a display where they may not be in close proximity. The plug-and-play system provides a stable picture with superior audio and supports the latest standards including HDCP 2.2, DVI 1.0, and High Dynamic Range (HDR). There is a HDMI loop output on the transmitter, and the EDID (Extended Display Identification Data) can be switched to copy either the source or output device. For added convenience, an infrared extender is fully integrated, so you can use your remote control on the receiver end for full control of your devices too! Power is sent to the receiver over the Cat cable, and the infrared emitter and receiver each have short leads that enable you to mount the main units out of view.

Note: Distance will be reduced to about 40m using Cat5e cable

Special Function HDMI Hardware

4X2 4K HDMI MATRIX SWITCHER SPLITTER

2 YEAR WARRANTY

Simultaneously routes up to four HDMI sources to two HDMI displays in all resolutions up to UHD 4K at 60Hz on all ports. This will add a level of convenience for households that have two TVs but don't want to buy another set of Blu-ray players, set top boxes, etc. A single Blu-ray player connected to the matrix would output its movie to two screens. This is also great for retail service-scapes, shopping centres, reception areas, and foyers. Flexible control using the on-panel button or from the comfort of your couch using the supplied remote control. Output A supports audio extracting to optical and analogue L/R outputs, and output B supports automatic 4K to 1080p downscale function if the source is 4K but your TV only supports up to 1080p. Support for 3D signals, High Dynamic Range (HDR), audio up to 7.1 surround, and smart EDID management so switching sources will be fast with minimal interruption.

- Up to 4K Video Resolution on all ports
- Optical and analogue L/R output on output A
- 4K to 1080p downscale support on output B

Infrared (IR) Extenders

2 CHANNEL IR EXTENDER KIT

Use it to extend the range of your IR remote control to another room, or run all your remote controlled devices from a single sensor. This IR Emitter Kit acts like a hub, enabling you to interface all your IR remote controlled devices together and control them from a single sensor point. Up to six IR emitters to be connected to a single point and you can add extra emitters as you need.

1 YEAR WARRANTY

4 CHANNEL IR EXTENDER KIT

Some aesthetically pleasing home theatre setups may not be 100% functional. AV source devices may be hidden in a cabinet to create a clean minimalistic setup. In these scenarios, the signal from your remote control may be partially or completely blocked. To overcome this you can use this IR repeater extender kit to give you control of your devices. Plug the IR receiver in (to receive signals from your remote), then connect up to 4 devices to the emitter outlets. The 3M adhesive backing on the IR receiver the emitters can be mounted in an unobtrusive location. The kit is 4 channel so will accept up to 4 source devices.

The IR repeater unit includes:

- 2 x Dual IR emitter cables included
- 1 x IR receiver cable
- 1 x Mains plugpack
- 1 x Repeater/Extender
- Mounting holes & screws
- Cable length: 3m

WIRELESS IR EXTENDER KIT

Wirelessly control your video sources such as cable TV, streaming boxes or Blu-Ray/DVD players from another room. Infrared remote controls usually have an effective range of only 5-10m, however this extender allows you to use your remote control on devices up to 50m away! Features in-built infrared ports for easy operation and infrared extension cables if you have devices hidden inside a wall or TV cabinet. Supports up to 4 transmitters with the purchase of additional kits for control to one or more TVs from the one source. Perfect for controlling a source device which is being displayed in a bedroom, garage, conference room or an outside entertainment area. Includes infrared emitter cable, infrared receiver cable and two mains power adaptors.

Note: Transmission distance varies depending upon the obstacles in between the transmitter and receiver such as walls or solid objects.

WORLD BAND AM/FM/SW PLL RADIO

1 YEAR WARRANTY

Truly an ideal radio for the casual user and the enthusiast. It offers FM, MW(AM) stations and three Short Wave (SW) stations which range from 1,711kHz to 29,999kHz for receiving international broadcasts. The analogue tuning is assisted with a digital display and a tuning step, select fast for scrolling through the frequency or slow for that fine adjustment. Uses a Phase-Locked Loop (PLL) to ensure a stable reception. This unit is built with high performance IC's and MOSFET's that provide high sensitivity, strong anti-interference, low background noise and distortion. Includes a large back lit LCD displaying the frequency, clock, battery level and signal strength indictor. Other features includes AM RF gain, AM bandwidth switch, internal/external antenna switch, Local/DX antenna switch, IF out, total of 50 presets - 10 presets for each band (AM/FM/SW1/SW2/SW3), alarm function, snooze button, button lock, and the list goes on. Power options are 6 x AA (not included) used with supplied 6 x D size battery adaptors, 6 x D batteries (not included) or the supplied 9V PSU. Supplied with a carry strap.

tech talk What Is World Band?

World Band Radios are those radios that are capable of tuning into radio programs generated by, say the British BBC, Radio Australia (Australian ABC Radio programs), Voice of America, Radio Vatican, etc. These programs are transmitted on a regular weekly basis in any one 24 hour period. It is generally preferable to use 24 hour time, linked to GMT (Greenwich Mean Time) which is the time it is in London (UK) so that confusion is eliminated as when the program is broadcast. There are dozens and dozens of programs from countries all over the world in the special languages of these countries. For example if you are an Australian citizen but originally from Greece, you can tune into stations that enable you to keep your knowledge of the language up to date. The stations typically have a lot of local news which you would normally not hear. The World Band stations are generally broadcast in several frequencies at the same time, typically between about 1.8MHz & 29.00 MHz, especially between 7 & 21MHz. You can look up the broadcasting details on Google etc. Phase-Locked Loop (PLL) is a circuit configuration invented over 80 years ago. Originally the circuit was so complex that it only appeared in expensive radios. With modern microchip technology, the PLL got a lot cheaper. The benefits of PLL technology enabled receivers to remain on a station frequency with great accuracy. The radio circuit did not 'drift.' PLL technology, though still not cheap, is a hallmark of quality short wave radios and that's why Jaycar specifies them.

Turntables

TURNTABLE WITH CD PLAYER AND USB/MICROSD

This unit is a proper transcription type turntable that has a belt drive, strobe-type speed check, pitch and anti-skating control, and s-shaped arm with high quality cartridge. DIGITAL TO ANALOGUE CONVERTER WITH 4-WAY SWITCHER

Manually switch between four digital audio signals and simultaneously output to TOSLINK, stereo analogue, and a headphone output. Use it to switch the audio from your DVD, Blu-ray, Playstation, Xbox, HD player, PC, etc. to your amplifier or active speakers. Supports common audio formats including PCM, LPCM, DTS, Dolby-AC3, THX, and HDCD, and uses 192kHz/24bit DAC to minimise any audio loss. It automatically identifies the digital signal format and remembers the previous settings if the power is turned off. Status LEDs on each input flash when no audio is detected or when there is an input data error. Over-voltage protection helps prevent any damage caused by connecting signals unmatched to the device.

- 192kHz/24bit DAC
- Support LPCM digital audio converted to analogue audio output
- Automatic identification of input signal format
- Last state memory when powered off
- Over-voltage protection
- 3.5mm earphone socket with 30mW output
- No loss of quality

GALVANIC ISOLATION AUDIO FILTER

When certain audio devices are interconnected, it's possible to end up with what is referred to as a ground loop. You may not know what that is, but it results in a rather annoying "hum" coming from the speakers. In a vehicle it can also change pitch with engine speed. A galvanic isolation filter can be used to eliminate this electrical condition, removing the hum from the audio so you can enjoy the music properly! No power required, it simply connects inline with the line-level RCA connections, and you're ready to go.

Features:

- Gold-plated RCA sockets
- Can be wall-mounted
- No power required

2 X 18WRMS STEREO AMPLIFIER

This is a simple, fairly bullet-proof 18W/channel transistor amp and it's surprisingly loud! It is ideal as a small office or workshop PA amp in churches, community halls etc. It is protected from accidental speaker wiring shorts and if abused will simply shut down and reset after it has cooled off. It has a front panel microphone input, bass & treble controls as well as a master volume control.

- A suitable microphone for this unit is AM4190
- Low cost mains powered

Speaker Swiches

TWO WAY STEREO SPEAKER SWITCH

1 YEAR WARRANTY

This is a simple manual speaker switch so you can easily select between two different sets of speakers from the one stereo system. You can select from set A, set B, or A+B. Designed for use with 8-ohm speakers (the standard for HiFi speakers), you should check that your stereo can support 4-ohm speakers, since it will provide a 4-ohm load when using the A+B selection. Rated at 10WRMS per channel, plenty for indoor/outdoor speakers, ceiling speakers, and other applications.

Features:

- Non-shorting speaker contacts
- Select A, B, or A+B speaker sets
- No power required

Free Boxes!

MOVING HOUSE? NEED SOMETHING FOR STORAGE?

In the course of running our business, we go through thousands of stout cardboard boxes that become surplus to our needs. If you need a box - even several - just ask and we will probably have half a dozen or so that could be suitable for you. They are FREE and you are doing yourself and us a favour by recycling them.

HIGH POWER TWO WAY STEREO SPEAKER SWITCH

Perfect for controlling two sets of speakers from the one audio source for your indoor/outdoor area, separate rooms, and more. Simple operation with pushbuttons for both A and B sets so you can easily switch them on or off independently. Easy installation with screw terminals for speaker wires. No power required, suitable for systems up to 50WRMS per speaker.

- Pushbutton switches
- Aesthetic wall plate design
- Simple installation

Note: As speakers are connected in parallel in A+B mode the amplifier must be rated for half the rated speaker impedance.

PHONO STEREO PREAMPLIFIER

Vinyl records have become all the rage again but you may encounter a couple of issues which are addressed by this unit. Firstly, vinyl records are manufactured in a way that requires frequency equalisation of the turntable output to make them sound right. Secondly, if your amplifier doesn't have a phono input then you won't be able to listen to your records. This unit provides the necessary frequency equalisation and increases the signal level so that it can be fed to your line-level amplifier. There is a second set of inputs for a CD player or other device. There is a front panel switch to choose between input devices and a volume control on the front panel to adjust the output level as necessary as your turntables cartridge may provide a lower or higher output than expected. All connections are made with the popular RCA connectors. Power is provided by an included mains adapter.

Features:

- 2 x stereo RCA inputs
- Volume control
- Stereo RCA output
- Function can be set to mix or IND
- Screw mount holes
- RIAA equalisation for phone input

In-Ceiling 2 Way Speakers

1 YEAR WARRANTY

These ceiling speakers are a 2 way speaker design giving excellent audio quality compared to traditional PA speakers. Combining a coaxial woofer with dome tweeter they are available in three sizes to cover a variety of domestic and commercial applications. Two of the models also have adjustable tweeter mounts making them ideal when used in a home theatre setup by allowing you to direct high frequencies towards the centre of a room. The flush mount design and fold out retaining clamps allow them to be easily installed in new or existing ceilings, and the matte white finish blends in with most ceiling colours.

Tweeters:

One unit is magnetically screened for applications where the device may be near a CRT screen, Home Theatre for example. The Titanium dome unit has quite a high power rating for a dome tweeter. Both are ferrofluid filled which keeps the voice coils cool and adds to reliability. We are delighted with these products.

25MM TITANIUM DOME TWEETER

This tweeter features a titanium dome with a phase shield which provides a more controlled high frequency roll-off. It produces very crisp & clear high frequencies.

Speaker / Equipment Cabinet Fittings

HOOK & LOOP TAPE

Ideal for holding grilles on speaker cabinets. One side is glued or stapled to the box & the other to the grille. The grille then sticks to the box.

	Cat.	Qty 1+	Qty 5+	Qty 10+
300mm long	CF2763	$3.90	$3.10	$2.70

SPRAY-ON CONTACT ADHESIVE

This pressure-sensitive contact adhesive is in an aerosol can, and bonds to paper, fabric, leather, rubber, foam, vinyl, concrete, metal, in fact almost any surface! No more spills and dribbles from a tube, or sticky screwdrivers (and plastic applicators) from applying glue to a surface. Great for laying innerbond and speaker carpet on speaker cabinets etc.

- Cannot be sent by air freight or post

tech talk Decibels

Contrary to much popular usage, the decibel (dB) is not actually a unit of any particular quantity, but rather an expression of the ratio between two quantities, such as, power, voltage, current, acoustic pressure. Many sensors, including our own ears, respond to stimuli in a logarithmic fashion, that is, an increase of 10dB results in a doubling of loudness. This allows a huge range of intensities. As the dB compares the logarithmic quantities, it agrees with our perceptive comparisons. To calculate the ratio, in dB, of two power levels, P1 and P2, the formula is: dB = 10 log (P1/P2). If the quantities are voltages, currents or sound pressure levels, X1 and X2, the formula becomes: dB = 20 log (X1/X2). If the quantities X1 and X2 are both measured in the same impedances, their dB ratio will be numerically equal to the dB ratio of their equivalent powers. If their impedances Z1 and Z2 are unequal, the dB ratio of their power can be found from: dB = 20 log (X1/X2) + 10 log (Z2/Z1). Negative dB ratios will result when P1 (or X1) is less than P2 (or X2), while positive values indicate that P1 (or X1) is greater than P2 (or X2).

COMBINATION BUTYL/FOAM SUPER SOUND DEADENER

Combining both the sound deadening properties of butyl material, and insulating properties of honeycomb foam, this is an easy single application solution for complete sound deadening and isolation that also offers thermal insulation. Consisting of a layer of our AX3687 Butyl Based sound deadener and a 3.0mm thick layer of honeycomb foam (similar to our AX3662), lining the cabin of your vehicle with these sound deadening sheets will give you drastically reduced road noise, less panel vibration and a cooler cabin temperature. Application is easy with the self adhesive backing and the ability to mould to the shape of the panel. Ideal for door skins, head linings, door cards and under bonnet insulation.

- Thickness: 4.5mm (1.5mm butyl, 3.0mm foam)
- Temperature range: -10 - 100°C

BUTYL BASED SOUND DEADENING MATERIAL

Give your vibrating buzz-box a luxury car ride with this butyl-based, foil backed sound deadening material. By adding weight to the metal panels of your car, such as door skins, boot lids, quarter panels, etc., you can stop nasty vibrations, reduce road noise, and give your doors and boot a nice solid "thud" when they shut. Each sheet is self-adhesive, and can be easily moulded, cut and stuck onto virtually any metal surface of your vehicle's body, giving you a pleasant, quiet and comfortable ride. Combine with our AX3662 Sound Absorbing foam to add thermal insulation and eliminate low frequency humming from big exhaust systems for an even more comfortable vehicle interior.

Cable Tester

ROADIES CABLE TESTER

Simply plug the cable under test and turn the rotary switch. The LED array gives you an instant go/no-go status of each conductor path in the cable. With bullet-proof all metal construction, it's ideally suited to the ruff and tumble world of rock 'n' roll, but is also suitable for any technician working with cables. Faster and much easier than a multimeter. Requires 1 x 9V battery. (use SB2423)

Tests the following cables:

- Speakon 4, 8P
- 1/4" mono & TRS
- DIN 3, 5, 7, 8P
- XLR 3, 5P
- Phono (RCA)
- USB
- RJ45

4G/LTE FILTER FOR DIGITAL TV RECEPTION

1 YEAR WARRANTY

Since the re-stacking of Digital TV transmissions has already begun, pretty soon 4G/LTE mobile phone signals will start being transmitted on the old UHF TV channels 52-69. Of course, this means that UHF antennas will be picking up those signals, and interfering with Digital TV reception. When this filter is plugged into the back of a digital TV receiver blocks unwanted signals from 4G/LTE mobile transmitters.

- In-line coax connection - waterproof design
- Frequency pass range: 5-694MHz
- Insertion loss <1dB
- LTE band rejection: 720-1000MHz, 40dB

ELEMENT VHF YAGI DIGITAL TV ANTENNA

With the major cities in Australia now receiving their Digital TV reception on Band 3, the Kingray range of yagi antennas provide the perfect solution for metropolitan and some country areas. The antennas are almost completely assembled out of the box, with only the reflector and director having to be attached to the boom. The heavy duty 12mm elements, stainless steel screws on the driven element connection points, powder coated boom and UV stabilised plastics will ensure many years of trouble free reception. They are also suitable for DAB+ reception.

tech talk Digital TV Antenna Guides

Before you invest in a new antenna and make the effort to climb up on the rooftop to install it, be sure to check out our TV Antenna Guide to make sure you have the correct antenna. Our friends at KINGRAY have come up with some very useful TV Antenna Guides that recommend the best antenna for your area. The coloured charts show you the main, adequate and tertiary TV coverage areas based on the transmitter tower's location, and then recommends which antenna is best suited to that location. The guide also suggests accessories, such as masthead amplifiers, that you may need depending on your location. TV antenna guide for the Sydney Region shown below.

Combination VHF/UHF DigiMatch Antenna

These Australian made heavy duty antennas are the ideal metropolitan antennas for Digital TV as they are capable of receiving digital and analogue TV on VHF channels 6-12 and UHF channels 21-69. The UHF section of the antenna employs X-type elements for wider bandwidth and higher gain, whilst the VHF section has elements made from high grade aluminium strong enough to withstand damage from birds. The VHF section of these antennas can be mounted horizontally or vertically for areas such as Canberra and Shepparton, making them suitable for all TV transmitters throughout Australia. Their overall design has improved figures for gain, VSWR and F/B ratio to give a superior carrier to noise ratio - this means more signal, less noise and therefore much lower chance of picture dropouts. The Digital anti-reflection Matching System (DMS) employs a diplexer to electronically couple the VHF and UHF sections of the antenna together, giving 20dB isolation to achieve a better Bit Error Ratio (BER) and maximum digital performance.

- Ready for today and future UHF allocations and Plus One networks
- F-Type PCB balun & diplexer for quick installation and improved VSWR
- Black ABS UV resistant plastics
- 12.7mm dia. VHF elements
- Stainless steel screws
- Australian designed and manufactured
- Powder coated boom (blue)

tech talk Indoor TV Antennas?

Jaycar carries a great range of "indoor" type TV antennas in both passive & active gain models, which are good quality. Many people select such products hoping that they will offer satisfactory TV reception without the cost and/or hassle of a full outdoor TV antenna system. Often people who are renting premises cannot install a full TV antenna system anyway because they are not allowed to drill holes etc. The reality, however, is that indoor TV antennas rarely give totally satisfactory results. The antenna element dimensions never correspond to broadcast frequencies for a start. Because you are inside, you may have no idea where the TV tower is anyway. Even if you knew where the tower was the antenna rarely has directional qualities. This makes the towers' location fairly meaningless. Trying to make an indoor antenna according to the laws of physics misses the point. Despite this, indoor TV antennas can work amazingly well! Just don't get too scientific about it. They work best when you can throw a rock and hit the TV tower. As all the channels you will want to watch will not be in rock-throwing distance, some stations will work better than others. Wiggling the antenna around is really your only available technique. Indoor TV antennas are made for flat dwellers in large Western or Asian cities with high building density. In other words, all the TV towers will not be far away.

If you live in a "spread out" city and cannot see a TV tower i.e. like most Australian and New Zealand cities, it is highly likely that an indoor antenna will not solve your reception problems. There may simply be very little signal for you to pick up. Just imagine walking into a darkened room at night. Even with your eyes wide open you see virtually nothing until your eyes adjust to the conditions. At best you can see, say the white frame of a door. You certainly would not be able to read! You would not blame your eyes because you could not see but people frequently blame an indoor TV antenna in a similar situation for "not working" (visible light and TV signals are both part of the electromagnetic spectrum).

So when you buy an indoor antenna - from us or anyone else - don't expect a lot. If you bring the product back and say "it doesn't work", we know that you are really blaming the messenger. You may think that our words are a bit harsh but we respect both your time and your money too much to tell you what you need to hear, not what you want to hear. The copy above relates mainly to Analogue TV systems. They are basically gone now but the need for an indoor or temporary TV antenna still exists. Let us Jaycar people take a position on this: We do not like indoor TV antennas and if we could get away with it, we would not sell them.

The behaviour of an indoor TV antenna can be ok, it can really be bizarre. If you are renting a flat and have a hopeless TV (Digital) reception you really need to get the landlord to fit a proper TV signal feed. Good Luck.

The TV Signal is still R.F. however, although digitally encoded. This means that the indoor antenna is still capable of picking up the radio frequency signal and converting it into a signal voltage. In all likelihood the antenna will pick up several versions of the R.F. signal at once. This is because R.F. being R.F. will have made its way to your antenna via several paths. It will be up to the front end of your TV receiver to distinguish the strongest signal and ignore the others. Modern TV front ends are pretty good at this.

So if you are in a rented flat and want to watch TV try one of our indoor antennas. Ours are as good as or better than anyone else's. If you are not happy with the performance of the antenna, keep the packaging, your receipt and bring it back to us if you feel you have to. Just don't tell us that …"it does not work…" You will get your money back all right, but you might get a blank stare…..

KINGRAY VHF/UHF MASTHEAD AMP WITH LTE/4G FILTERS

3 YEAR WARRANTY

As you may be aware by now, a large chunk of the Australian TV broadcast spectrum is being reallocated for the next generation 4G/LTE mobile phone service. This is currently due to happen at the end of 2013, and early reports are suggesting that this reallocation of the spectrum may interfere with existing TV reception apparatus. To guard against this, Kingray have produced this Australian made masthead amp that provides a good VHF & UHF TV band gain, and user selectable filters for VHF bands 1&2, FM radio, fixed pagers, and the new 4G/LTE band.

- Supplied with AC power injector and F-type to PAL adaptors
- Combination and separate VHF & UHF Antenna inputs.

Flat Screen Monitor & TV Wall Brackets

We have celebrated the emancipation of new bracket designs by introducing a total new product range. Wall brackets for TVs & monitors have come down in price for 2 main reasons.

- Supply is no longer dominated by expensive European manufacturers
- The brackets no longer need to be made to hold 80kg+ CRT-type TVs.

Our range of universal TV and monitor brackets are easily strong enough to safely hold up any LCD, LED or even plasma TV safely. Indeed TVs are in fact getting lighter and lighter.

These products have come a long way. Not only are they more versatile, most come with built-in bubble-type spirit levels to aid in successful installation.

- Models to suit LCD/LED TVs from 13" - 100"
- VESA standard compliant
- Mounting hardware & instructions included
- Solid steel construction

CEILING / WALL SPEAKER BRACKET - STEEL

This sturdy bracket has main axis angle adjustment by a diecast, toothed plate secured by a wing nut. The detents won't slip as can happen with ball types. Minor axis adjustment is by a handwheel with backup by lock screw. As a safety measure a steel wire lanyard easily secures the two halves of the bracket - a good safety feature that is common in professional P.A Installations. The wall plate has holes for 4 x 6mm (or 1/4") screws. Another hole is provided for speaker wire egress. The speaker mounting plate has 4 x 4mm holes and also two slotted holes. Sold individually.

tech talk VESA Mounting Standard

The Video & Electronics Standard Association (VESA) has issued suggested standards for the attachment mounting systems for electronic visual displays also known as the Flat Display Mounting Interface. This is a family of standard defined by VESA for mounting flat panel monitors, TV's and other displays to stands or wall mounts, it is used on most modern flat-panel monitors and TV's. Whilst these standards are quite detailed the basic details of the standards involve the size of the display and the relevant spacing and sizing of the hole to mount the display. The dimensions vary from 75 x 75mm to 800 x 400mm.

CAR SMARTPHONE CHARGER HOLDER WITH DUAL USB AND CIGARETTE LIGHTER SOCKET

This is genius! It plugs straight into your cigarette lighter socket to provide a phone holder, as well as two high-power USB charging outlets (up to 4.8A combined)! What's more is it doesn't even use up the cigarette lighter socket, providing you with another one too! The flexible gooseneck allows you to position the phone conveniently, and adjusts to firmly hold just about any phone size. It works with 12 and 24V systems, so suitable for trucks too! It even includes a microUSB charging cable, but you can bring your own for other devices as well.

- 360° rotation
- Dual USB charger
- Suitable for phones with 4- 6.3" screen

In-Car Mounting Brackets

GOOSENECK SUCTION CUP MOUNT PHONE HOLDER

Suits most Smartphones and securely mounts to your windscreen or other non-porous flat surfaces with a super strong suction cup. The bracket adjusts to firmly hold your phone in place, while the 190mm flexible gooseneck with 360° rotating ball head allows you to get the phone into the best viewing position. The bracket adjusts between 58mm and 80mm for phones, which is generally suitable for phones with 3.5" to 5.3" screens.

- Flexible gooseneck
- Universal phone compatibility
- Suits 3.5-5.3" screens with a maximum phone width of 80mm
- Phone Suitability: 58-80mm wide
- Dimensions: 80(H) x 285(L) x 40(W)mm

PHONE HOLDER - AIR VENT MAGNETIC

1 YEAR WARRANTY

This simple device allows you to easily hold your smartphone in a convenient position (for use when safely parked of course). The mount itself simply slips firmly onto the grilles of your air-vents. You then have two options: use the small (40mm Dia.) adhesive mounting plate, or slip the 40 x 60mm mounting plate inside your protective case. Both mounting places are just a fraction of a millimetre thick and weigh barely 1 gram, so you won't even notice it's there. Then by simply putting your phone close to the magnetic holder, it will firmly snap into place. Simply pull to remove! No clips, cradles, or other inconveniences. The magnetic mount itself is also rubber-moulded so the strong magnet won't scratch your phone (or phone case). Product may differ slighty to one shown.

Marine Audio:

Jaycar has been selling direct-import audio products for almost 30 years. In that time we have sold tens of thousands of general, Hi-Fi and car sound speakers, Home Cinema products, MP3 players, and thousands of car and marine head units. We have developed an expertise with specialty buying staff and long-term relationships with factories that we can trust. In these pages you will find products that are not national brand names (Many of the factories that we use actually make a lot of the national brand names, but we are legally prevented from telling you who they are). When Jaycar negotiates with a factory, we specify what we think is useful to you and what is rubbish (like rainbow coloured lighting displays). In buying such products from us, you get the same (or better) warranties, but the bonus sensible-specification products from a firm with a strong engineering background.

IN-DASH MARINE AM/FM RADIO WITH MP3 PLAYER

3 YEAR WARRANTY

An attractive marine radio perfect for your boat but can be used for automotive purposes. In addition to standard AM/FM radio the front panel includes USB & SD card slots which allow playback of MP3s. There's also a 3.5mm auxiliary port so you can connect an iPod®, headphones, or Smartphone for playing back music. The unit can be controlled with the infrared remote or front panel interface. For audio tinkerers, a myriad of settings are available including bass, treble, balance, and fade settings. There are also rock, pop, and classical equalisation pre-sets to suit your taste in music. Installation is straightforward, just connect via the supplied 14pin plug, all speaker cables are labelled to streamline the install. The USB, SD card and AUX sockets all come with splashproof silicone covers.

Acoustic Sound Absorbing & Deadening:

Ideal for car sound installations. One of the most hostile environments for a loudspeaker is in the door of a car. It is made out of flexible sheet steel which, when it is not vibrating & absorbing energy by rattling or buzzing, is reflecting energy all over the place! To produce Hi-Fi sound in a car you not only need to control the acoustics of the car environment. As any professional will tell you, it's the installation which makes for sound quality more than any other factor.

HEAVY DUTY SOUND BARRIER DAMPING MATERIAL

This is basically a flexible plastic-like material that forms an attenuating / reflecting sound barrier. The product is made of 25% PVC loaded and spread evenly with barium mineral powder which takes up the other 75% (by weight) of the product. The barium mineral is very heavy and makes the vinyl heavy and impenetrable to sound waves. It's sort of like if lead was plastic! It weighs 4kgs per square metre. It is ideal for any surface that needs to be 'deadened' e.g. car door or floor panels. It completely damps (ie prevents) any panel resonating from high power speakers. It is also amazing for attenuating road noise from steel car floors, etc. It can be cut with a hobby knife or good scissors etc. The material is held in place with spray or gel contact cement. One sheet is generally enough for the average car door. Supplied in a polyethylene bag.

SELF-ADHESIVE SOUND ABSORBING FOAM

The perfect ultra light weight insulator to use in conjunction with AX3687. This durable crush and tear-resistant material has the highest heat blocking properties available in a single layer synthetic foam-type material. Not affected by oil and does not absorb water. It provides acoustic isolation and excellent thermal insulation for roof, firewall, floor, quarter panels, doors and even as an under bonnet liner. Adhesive backed for easy installation.

BUTYL BASED SOUND DEADENING MATERIAL

By adding weight to the metal panels of your car, such as door skins, boot lids, quarter panels, etc. you can stop nasty vibrations, reduce road noise, and give your doors and boot a nice solid "thud" when they shut. Each sheet is self-adhesive, and can be easily moulded, cut and stuck onto virtually any metal surface of your vehicle's body, giving you a pleasant, quiet and comfortable ride. Combine with our AX3662 Sound Absorbing foam to add thermal insulation and eliminate low frequency humming from big exhaust systems for an even more comfortable vehicle interior.

COMBINATION BUTYL/FOAM SUPER SOUND DEADENER

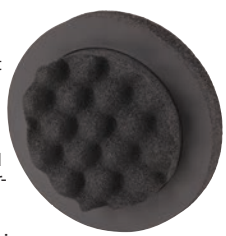

Consisting of a layer of our AX3687 Butyl Based sound deadener and a 3.0mm thick layer of honeycomb foam (similar to our AX3662), lining the cabin of your vehicle with these sound deadening sheets will give you drastically reduced road noise, less panel vibration and a cooler cabin temperature. Application is easy with the self adhesive backing and ability to mould to the shape of the panel. Ideal for door skins, head linings, door cards and under bonnet insulation.

tech talk Notes About Speaker Specifications

- In an effort to assist customers choices between speakers, our entire speaker range have been assessed and measured under the same test conditions. Therefore making the resulting data in this catalogue comparable.
- All drivers have been measured for Thiele and Small parameters after a period of "Breaking In" for a minimum of 15 hours, and not tested straight off the shelf. This ensures a more long term and realistic result.

Security & Surveillance

Last year we proudly launched our new range of Concord CCTV kits and the response has been overwhelmingly positive, thank you for your generous support. There is a new range of Concord wired kits due out in the 2H/2020 with more improved features & value, stay tuned.

This year we've improved our range of wireless IP cameras to include more features like Pan/Tilt/Zoom, PIR, spotlights and two-way audio. IP cameras are now a simple and affordable surveillance option for your home. We also have some new Wi-Fi battery cameras at a lower price than previous models. These are a fantastic home surveillance option for people renting or for those who don't want to go to the trouble of installing a wired kit.

On the automotive front, we've introduced a new dual camera dash cam to keep an eye on what's happening on the road and in the vehicle, excellent for couriers, chauffers, taxi or ride sharing drivers. There is also a new 4G tracker to complement our very popular 3G unit, added piece of mind for single vehicle or fleet owners.

720P WI-FI IP CAMERA WITH MOTION SENSOR FLOOD LIGHTS & SOLAR PANEL

NEW

This all-in-one security camera is designed to be mounted outdoors under the eaves of your home or garage to deter or record any intruders. It is very easy to install, and is wire free thanks to the supplied solar panel that keeps the internal battery charged. Once movement is detected from up to 8m away, the camera will record in 720p high definition to a microSD card (sold separately), and the two 3W LED spotlights will illuminate if it is dark. If the spotlights don't deter the intruder, they will help record them in colour so you can get a good look at them. The lights also double as pathway lights if you get home late at night. The IP camera can also connect to your Wi-Fi network, which enables you to watch live or recorded video on your Android or iOS Smartphone from anywhere in the world. Supplied with solar panel, mounting brackets, and hardware.

1080P WI-FI IP CAMERA WITH SECURITY ALARM

1 YEAR WARRANTY

Wi-Fi

This surveillance camera can work stand-alone to record audio and video in 1080p high-definition, or expanded with sensors (sold separately) to turn it into a security system. It features a magnetic base to quickly adhere to any metal surface and Wi-Fi connectivity for easy installation. Plug in your microSD card (up to 128GB) and it's a full recording system that you can leave perpetually recording, or set to motion-detection mode. Once the built-in PIR detects movement, or connected wireless PIR, reed or panic switch is triggered, the camera will send 30-seconds of audio and video to your Smartphone! The free Android & iOS™ app provides flexible control and monitoring. What's more is the provision of 2-way audio communication, meaning you can talk to the intruder "You are being watched!", or use it more like a doorphone for less sinister visitors "Sorry, I'm not home right now". Infrared LEDs mean it works in just about any lighting conditions too. Setup and configuration is easy, and there's Windows software provided if you prefer to access via a computer. Powered using the included USB mains power adaptor.

- Supports additional security sensors (QC3872/4/7)
- PIR Motion Detection & Manual Recording
- microSD Card & Smartphone Recording
- Video snippet with alert to your Smartphone
- Free Android & iOS™ Smartphone App

1080P WI-FI IP CAMERA WITH LED SPOTLIGHTS

Keep an eye on your property with this easy-to-install wireless IP camera. Remotely access the camera from your Smartphone to see what is happening live or to review footage on the microSD card. Infrared LEDs automatically turn on when darkness falls for night vision, and four bright LED spotlights can be scheduled to illuminate at a time you choose. Ideal for illuminating a path for visitors, to deter would-be thieves, and also to enable the camera to record in colour at night. Connecting to your Wi-Fi network is simple with sound pairing setup, and a free app is available on Google Play and the Apple Store for Android or Apple Smartphones. Other features include two-way audio to talk to visitors or intruders, and alarm function that sounds an alarm for 5 seconds if movement is detected, then sends an alert to your phone. The camera can be used outdoors, however, needs to be protected against rain or direct sunlight.

4 CHANNEL WIRELESS 7" LCD DVR & CAMERA KITS

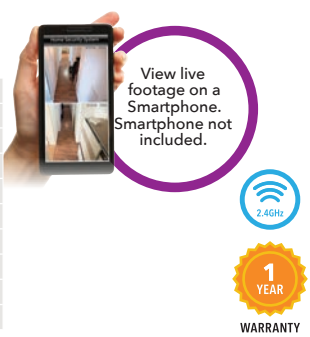

The large 7" touch screen LCD gives you full control, and you can even connect up to 4 cameras (1 camera included in kit, others available separately). There are two different resolution models available to suit your requirements too! Digital transmission up to 100m ensures a flexible, no-fuss installation. The monitor can be easily moved around thanks to the in-built rechargeable battery, which will power the unit for up to 2.5hrs at a time. Video is then easily recorded to an SD card (not included). The camera itself is a solid weatherproof outdoor camera with built-in LEDs for night vision, and a motion detector (PIR). This can be used to automatically trigger recording from motion detection, so reduce required memory and save review time when looking for events in the recordings. Of course all video is transmitted wirelessly, so you just need a power source nearby the camera. All power supplies are included, as well as mounting hardware for the camera.

DVR & Camera Kits:

Swann CONCORD NEXTECH

Jaycar stocks the strongest and largest range of security and surveillance products in Australia and New Zealand. Yes, you can buy a small range of security cameras, etc. from a discount Hi-Fi or hardware store. But why would you? The store staff generally know NOTHING about this eclectic area of technology. They know NOTHING about the significance of emerging technologies.

We here at Jaycar are acknowledged EXPERTS in Security and Surveillance products and this year it is no different. You would not get your family GP to remove your appendix, so why go to a mobile phone shop to get advice on a home security/surveillance system?

Jaycar has been selling this gear for over 30 years and we know our stuff. You will pay no more at Jaycar but rest assured that the advice you get will be sound, along with the largest range of quality products available. We do not sell mobile phones.

- We now have wider range of 4K UHD resolution products in DVR and NVR
- New DVR kits with cameras with in-built PIR & floodlights
- New lower cost wireless, long-life battery powered cameras with 1080p resolution. Making home security even more affordable for people renting or leasing properties where hard wiring is not allowed. Wireless system popularity is exploding because there is simply no loss in performance any more.
- UHD 4K DVR kits for an unbelievable $799 (p468), saving you $200 on last year's price, more great Jaycar value!

CONCORD

Concord offers a collection of video surveillance products with features that were previously only available on high end or commercial products. Concord DVR and NVR surveillance systems range from 1080p HD to 4K UHD resolution. The kits come in different configurations of camera type and quantity and contain everything you need for and an easy DIY installation.

For added peace of mind all Concord surveillance kits come with a 2-year warranty, online and phone support. For more information, visit:

www.concord.support/surveillance

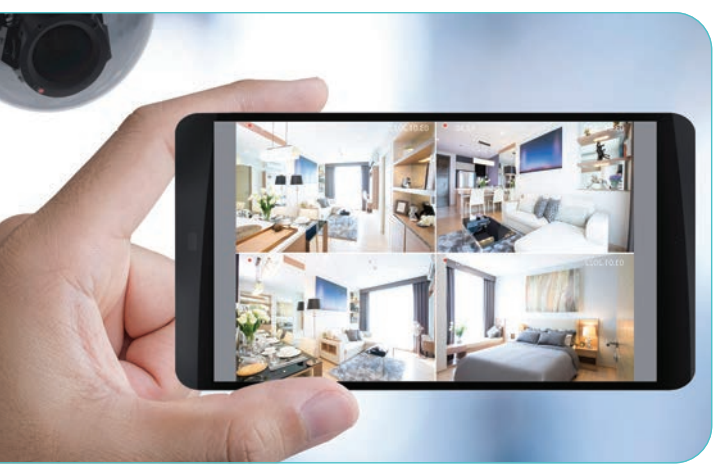

We here at Jaycar have been selling security camera systems for over 30 years. The technology has moved appreciably since then. For example, the first surveillance recording systems were basically household VHS video recorders! They simply wore out very quickly. Now all recording is digital or in the cloud. Nothing to wear out and a quantum leap in reliability. The quality, resolution, sensitivity and overall performance improvements of surveillance cameras, has if anything, been even more dramatic.

Jaycar has contracted with a major overseas manufacturer of camera and recorder equipment who supplies industrial surveillance organisations all over the world. What we are saying here is that we are sourcing products for industrial/ government/ military areas but configuring packages to you at realistic prices. We have named this equipment Concord and it carries the full backing of our 40 year business association of technical customer service.

The Concord product range offers astonishing performance, reliability and value to the surveillance user in the 21st Century.
And of course like all serious surveillance/security companies, we offer an alternative to our Concord range.

This is of course, is our strong commitment to the venerable SWANN range of security/surveillance gear. We are constantly amazed (and impressed) by Swann's ability to almost reinvent itself every year. They have an uncanny dedication to product improvement and development.

Finally, the world of surveillance technology is moving faster now than it ever has before. If your application is simply area monitoring, you may not have a need for fancy close-up facial recognition technology and what is in these following pages is fine for your needs What you need to know, however, is that our technical staff are abreast of the latest developments.
So why go to a hardware store for surveillance equipment when you can get the advice from our EXPERTS for FREE and pay no more?

tech talk DVR vs NVR

There are key differences between NVR and DVRs. NVRs may have a higher cost, however can provide an easier install and higher quality images.

DVR (DIGITAL VIDEO RECORDER):

- Uses coax cable to run video from the camera to the DVR
- 200m maximum camera maximum distance to DVR
- Each camera needs its own power source using a secondary cable between power supply and cameras using a splitter
- Cameras are analogue with the image processing done by the DVR
- Cheaper camera cost

NVR (NETWORK VIDEO RECORDER):

- Uses common Ethernet cables to run video and power between the camera and DVR
- 100m maximum camera distance to DVR, but can be extended using PoE enabled Ethernet Router or Switch
- Power is provided from the DVR over Ethernet (PoE). No extra cabling.
- Modern homes and offices already have Ethernet running between rooms, which makes installation easier
- Cameras are digital with the images processed in the camera.
- Higher camera cost

Swann Premium NVR Camera Kits:

Get amazing image definition with 5 Megapixel or 4K UHD cameras. Zoom in closer with incredible clarity to license plates, facial features and clothing patterns. The IP security cameras come with Ethernet cables and are weatherproof, built tough for the outdoors or indoors. Swann's True Detect™ PIR Thermal Sensing technology detects motion by heat, such as from people & cars, to trigger recording and push notifications. This virtually eliminates false triggers, like plants moving with the wind, to only capture events with security relevance. See in the dark up to 40 metres with the camera's powerful infrared night vision. Enjoy easy camera installation with Power over Ethernet (PoE) as each camera is connected via Cat 5 network cable to transmit power, video and audio. Set up the security system to save video footage to your personal Dropbox, Google Drive or Microsoft OneDrive account in the cloud. Expand your CCTV system by adding up to 8 cameras for a complete 8 channel home security system, suitable for medium-sized businesses & detached homes. For maximum resolution, add 8-megapixel 4K cameras, which have 1.7 times more pixels than 5MP.

Concord Cameras

Expand your surveillance system with extra weatherproof HD and 4K cameras.

Choose either a bullet shape to make the camera more visible to potential intruders, working as a deterrent to protect your property and loved ones or a dome shape that is more difficult to see where the camera is pointing and much harder to damage.

All cameras have built-in Thermal Detect Technology for compatible DVR or NVR systems and built-in infrared LEDs for night vision up to 20m. The integrated IR cut filter improves colour reproduction during daylight and automatically switches off in darkness.

Depending on the Concord DVR or NVR you own you can choose to add HD 1080p, 5MP or UHD 4K cameras so you won't miss details such as number plates or clothing details that can help catch trespassers.

tech talk IP Surveillance

IP surveillance is a digitized and network version of closed circuit television (CCTV). In an IP surveillance system, an IP camera records video footage and the resulting content is distributed over an IP (Internet Protocol) network.

Digitisation offers several benefits over analogue CCTV including:

- Improved search capabilities & greater ease of use
- Better quality images and no degradation of content over time
- The ability to record and play at the same time
- The ability to compress content for improved storage

Adding networking capabilities to digital CCTV provides additional benefits, including:

- Improved ability for remote viewing & control. Anyone on the network with password access can potentially see video from any camera connected to the network.
- IP Storage makes it possible to store data in any geographical location
- Greater ease of distribution. An image of a crime suspect, for example, can immediately be distributed to officials
- The ability to connect to email and other communications systems so that alerts can be sent automatically

Professional Dome & Outdoor Cameras

SWANN TVI AND IP CAMERAS

The range of additional SwannTVI and IP cameras allow you to increase the security coverage of your home or business with bullet or dome cameras in HD 1080p, 5MP or UHD 4K resolution.

Bullet cameras are easily visible which means they work as visual deterrents to anyone thinking of intruding on your property and record them if they choose to ignore the warning. The dome shape cameras are a little more difficult to see but are much harder to damage in areas where they can be hit by objects such as ladders.

All the cameras feature True Detect™ PIR Thermal Sensing which is designed to reliably detect people, pets, cars and other heat generating objects. This saves you precious space on your DVR or NVR and reduces the number of push notifications you receive on your phone as it will only store events that were triggered by things you actually want to know about, not the washing on the line or a tree branch moving in the wind.

Swann's Day/Night Surveillance Cameras allow you to clearly see what is going on during the day in resolution from HD 1080p to 5MP or UHD 4K for when you want to be able to capture every detail such as number plates or writing on clothing. Then at night you can see up to 30m using their powerful infrared technology with no extra illumination.

SWANN 4K IP BULLET CAMERA WITH PIR FLOODLIGHT AND AUDIO

Packed with crime prevention features this 4K Ultra HD IP security camera is the perfect addition to your Swann NVR-8580 to cover blind spots. Get security evidence and zoom in to essential footage such as license plates & faces, while night vision keeps your property protected 24/7.

The camera turns the lights on & triggers recording when it detects heat. The 2-way audio & siren let you talk back & scare off intruders. Audio capture adds another layer of security and lets you hear off-screen noises and identify voices by age, gender, accent & language.

Video analytics trigger recording & alerts with Face Detection, Line Crossing Detection, Intrusion Detection, Person Detection & others.

True Detect Thermal Sensing detects motion by heat, such as from people & cars, to trigger recording and push notifications, virtually eliminating false triggers.

The sturdy aluminium construction is built tough for the outdoors or indoors with IP66 weatherproof rating.

Power-Over-Ethernet

GIGABIT POE INJECTOR

Power Over Ethernet (PoE) devices are becoming more commonplace, such as IP cameras, telephones, and many more small devices which require a small amount of power to operate. However most conventional Ethernet switches do not natively support PoE. This device adds the power inline to a single network cable, working up to 100m, so you don't need mains power down the line at the device. It supports up to gigabit network throughput for ultra-fast connectivity, and is PoE IEEE 802.3at compliant

10 PORT GIGABIT POE NETWORK SWITCH

PoE simplifies power delivery for IP surveillance, telephone, and many other systems. This is a powerful gigabit switch with 8 x PoE-enabled and 2 x standard gigabit ports. It can deliver up to 130W of power (max 30W to a single port), which is loads of power for just about any PoE-enabled device you may have. Ultra-fast gigabit network also enables fast data transfer, critical for high resolution IP cameras and data-intensive systems, and is also very useful for providing PoE to access points and switches which are also distributing the connection. Automatic PoE detection, fully compatible with non-PoE devices. Includes mains power adaptor and mounting bracket.

POWER-OVER-ETHERNET (POE) PASSIVE KIT

PoE allows transfer of electrical power, along with data, over twisted pair cables. Finding a power supply is a common obstacle in LAN installations: PoE allows you to power wireless access points or other equipment via a Cat 5 cable without the need to have a separate power source available.

You simply connect a plugpack of the required voltage via the 2.1mm DC connector, then tape it where you need it at the other end.

Baluns

BNC TO CAT5E/6 UTP AHD VIDEO BALUN KIT

Extend the transmission distance of your CCTV cabling without the need for a video amplifier. The balun accepts all composite video signals such as AHD, TVI and CVI. To use the baluns, strip away your UTP Cat5 cable at the ends and use a stranded pair connecting one wire to the positive terminal and the other to the negative terminal. Note the colour of the wires used and repeat the process at the other end. This kit includes two baluns; one to act as the transmitter and the other the receiver. It is suitable for CCTV setups, multimedia presentations and video conferencing.

CAMERA DETECTOR

Protect your privacy! Covert cameras and listening device are nearly impossible to spot by the naked eye. This handy little unit will detect hidden wired and wireless cameras through the units lens finder. The 6 pulsing LEDs reveals the location of a camera by illuminating its lens when you look through the lens viewer. Also features a built-in wireless RF detector that provides audible (buzzer) and visual (LED) signal strength indication. Great for detecting wireless transmitters and eavesdropping devices. It even comes with a set of earphones for complete discrete bug detection.

- Requires 2 x AAA batteries (use our SB2426).

LONG RANGE INFRARED SPOTLIGHT

CMOS and CCD surveillance cameras are often designed with only minimal night vision range or sometimes without infrared LEDs at all. This high-power spotlight will add or increase your existing surveillance cameras infrared viewing range of up to 50 metres. The six built-in LEDs switch on automatically at night or when dark conditions are detected. The compact size of the spotlight is ideal where unobtrusive surveillance in low light areas is preferred, such as warehouses, driveways, backyards, alleyways and boundary line fences. Includes a 12VDC power supply and mounting hardware.

Visible deterrence is probably the most important aspect of security. Most criminals aren't completely stupid - if your premises looks like it has CCTV surveillance, they'll move on to the place that doesn't. These dummy cameras look totally convincing - they have genuine-looking IR LEDs and a real LED that adds to the illusion. Add a couple of warning signs and the baddies will never know the difference.

DUMMY CAMERA WITH LED SPOTLIGHTS

This dummy camera looks just like a security camera but features a motion activated alarm and bright spotlight to deter intruders. The built-in 120° movement sensor can detect movement up to 6m away, and be set to either spotlight only, alarm only or both. This is great for safely lighting the way to your front door when you return home at night. The internal 120dB siren is quite loud and sure to draw attention and hopefully send the intruder running. Being battery powered means you can install it in a location where mains power is not available. Other features include a dusk sensor that enables the light and siren to work only at night, and the remote control includes a panic button.

HIGH SOUND LEVEL WIRELESS DOORBELL WITH STROBE FOR THE HEARING IMPAIRED

When this doorbell rings, the sound is accompanied by several bright flashes from the receiver's built in strobe light, which makes it much easier for a hearing impaired person to know that someone is at the door.

The sounder can be taken from room to room, or even used outdoors and will work up to 30 metres from the transmitter button. The melody can be set to one of seven different sounds and has two volume levels - medium and loud. The unit is supplied with a neck lanyard and mounting hardware for the transmitter button.

- Requires 4 x C cells, available separately
- 210mm long

Door & Driveway Beams

INDOOR COMMERCIAL GRADE DOORWAY BEAM

The system consists of a send/receive unit which transmits an IR beam across the doorway onto a prismatic reflector mounted on the opposite side. The beam is reflected back to the receiver to complete the circuit. When a person walks through the beam, the circuit is interrupted and this causes the alarm to sound an audible warning. The warning buzzer can be mounted in any suitable location up to 10m away.

- Mains plugpack and mounting hardware included.
- Range 2 - 6 metres
- Power: 9VDC

Smart Lock

SMART LOCK DEADBOLT KIT WITH BLUETOOTH TECHNOLOGY

1 YEAR WARRANTY

This smart door lock is perfect for offices, rental apartments or homes where many people need to gain access. Designed to replace a traditional door lock and enable users to gain access by using a unique passcode. The administrator uses an app on their iOS or Android Smartphone to generate permanent, timed (6hr) and one-time (24hr) passcodes, freeze or delete codes, and to view a record of who has gained access. Power is provided from 4 x AA batteries which allows the unit to operate up to 5000 times before batteries require replacement. A low battery alert sounds when the battery is getting low, and the remaining power can be checked by the administrator via the app. Other features include a tamper alarm, auto-lock, unlock alert, and a 5 minute lockout if a passcode is incorrectly entered too many times. Two mechanical keys are also provided for the owner to gain access without the need to enter a password. The lock suits door thicknesses between 32 and 48mm, and caters for both left and right hand doors. Mounting hardware supplied.

- Unlock with App, Keypad, or Key
- Fits Doors 32 ~ 48mm Thick

Dash Cameras / Event Recorders

A lot of the spectacular video seen on the TV News comes these days from devices called Event Recorders. They can be attached to the windscreen of your car, in a shop (acting as a security camera) or even in a bushland setting to record animal or intruder activity. They offer quality pictures & draw very little power. They can be movement triggered or not. They have really changed the way we live in the world, as you never know when you are being electronically observed these days. Jaycar has a great range to suit every application & budget.

Wireless Reversing Camera Kits CONTINUED

2.4GHZ DIGITAL LONG RANGE REVERSING CAMERA KIT

Confidently manoeuvre your caravan, truck, 4WD or trailer and avoid unseen or unexpected obstacles when reversing with this wireless camera kit. The 4.3" colour display and camera features signal stabilisation and processing for high speed observation of up to 100m range as standard reversing cameras will not provide enough distance to reach a caravan, truck or trailer. Prior to travelling, securely affix the camera in place and plug the monitor into your vehicle's 12V auxiliary power outlet, then pair them to adjust the camera to the preferred angle. You can pair up to two cameras with an additional camera (QM3857) being placed on your car or 4WD and one on your caravan or trailer to have a dual camera display or be viewed individually. The camera features infrared night vision, adjustable angle and waterproof housing to ensure it will cope in the harshest weather conditions. Includes suction cup mount & cigarette lighter plug power for the monitor

Wired Reversing Camera Kits

ULTIMATE REAR-VIEW SYSTEM - WIRED

This unit enables you to monitor the area to the rear of a bus, truck, caravan, RV etc, view a much wider field-of-view than any rear view mirror array and works in the dark with IR lighting. The system comes with a 7" (diagonal) LED display that has two video inputs, so you could (for example) have another camera monitoring, say bus passengers (camera extra). The rear vision camera is fitted with a SHARP (Japan) CCD device with 18 x IR LEDs for night vision illumination. The housing of the camera is metal, IP65 and has a gymbal bracket. It can be mounted externally. The kit is supplied with 10m of preterminated connecting cable. A remote control for the monitor is also provided.
In keeping with the professional status of the product, it will work from 12 or 24VDC.

GPS Tracking Devices

3G GPS/GSM VEHICLE TRACKER

This 3G GSM and GPS Tracking solution will locate and track the whereabouts of your vehicle in real time via the Internet on a computer or Smartphone. The device is easy to install with only 2 - 4 wires to connect. Insert a 3G GSM Sim card (not included) and hide the device away while connecting the external antenna to your windscreen. It works by sending the vehicle's GPS coordinates via the GSM network to the free online tracking service, which shows the location on Google Maps. It can also SMS longitude and latitude coordinates to up to 3 mobile phones, as well as alerts when vehicle exits a pre-determined area or exceeds pre-set speed.

Other features include an engine kill function to remotely disable the petrol pump, and movement sensor to extend battery life. An SOS/Panic button is also supplied which can send an SMS to the pre-programmed mobile phones. The built-in rechargeable Li-Po battery will keep the device functioning for up to 4 days when power is disconnected, which could help you locate the vehicle should it have been stolen and abandoned. There is no installation or on-going tracking charges. You only pay for the GSM sim card and service. Supplied with an external antenna, wiring loom, SOS button and microphone

- Real time & history online tracking website
- Free Smartphone App available on iTunes® & Google Play
- SMS location & tracking return
- Remote engine immobilisation
- Geo fence alarm
- External microphone
- Over speed alarm
- Shock & movement alarm

3G GPS/GSM PERSONAL TRACKER

Locate and track the whereabouts of a person, personal belonging or vehicle in real time via your mobile phone. The tracker is rechargeable and compact so it can fit unobtrusively inside a pocket, handbag, luggage, vehicle, etc. To operate, simply insert a GSM Sim card (not included), charge and turn on. It then sends it's GPS coordinates via the GSM network to your mobile phone which can be viewed on Google Maps.

Latitude, longitude, speed, direction, date & time, and battery condition or a GoogleMaps website link can be sent at any time by sending an SMS from your mobile phone to the tracker. You can also set it to SMS details once movement is detected, when the tracker is in a pre-determined area, over a preset speed, or when the battery is getting low.

A microphone and speaker in the tracker also allows you to dial in to listen to sounds around the tracker, and one of two phones can be called from the tracker for two way communication. To top off the rich list of features is a SOS button that sends help information to up to three pre-set phone numbers. A USB cable and mains power adaptor is supplied to recharge the built-in rechargeable Li-ion battery, which will keep the tracker functioning for up to 3 days on standby.

Car Displays

LCD GPS SPEEDOMETER

1 YEAR WARRANTY

More accurate than mechanical speedometers, the GPS speedo works independently of the vehicle so it is not subject to factors such as tyre pressure, circumference, diff ratio, etc. This wireless unit is also safer to use on the road as the big LCD display can be mounted on the windshield and allows you to check speed without having to take your eyes off the road. You can also take this anywhere, use it on your boat, ATV or bike. Supplied with suction mount holder, USB cable and cigarette lighter charger.

GPS 5.5 INCH HEAD-UP DISPLAY

This is the big brother of heads up displays. It features all the standard features such as current speed in km/h or mp/h, as well as a compass. However, it also provides a tripmeter (distance travelled) and driving time, which can be extremely useful. The large 5.5" display ensures all information is large, clear, and easily read. Additional information is also provided such as current altitude and the number of satellites currently in range for precision. It's a fantastic unit, and a great safety addition to your vehicle to ensure you keep your eyes on the road.

GPS SPEEDOMETER HEAD-UP DISPLAY WITH OBDII DATA

At the touch of the built-in scroll button, you can switch between GPS and OBD II modes. In GPS mode, the display will show your speed, battery voltage, and the number of connected satellites. Switch over to OBDII mode to display speed, engine RPM, water temperature, battery voltage, and distance travelled. The main unit has a glare hood and features auto dimming for night time operation. While the OBD II mode is limited for use in 12V vehicles only, it will happily operate in GPS mode in 24V vehicles.

SPEEDO CORRECTOR MODULE FOR CARS

When you modify your gearbox, diff ratio or change to a large circumference tyre, it may result in an inaccurate speedometer. This module alters the speedometer signal up or down from 0% to 99% of the original signal. With this improved model, the input setup selection can be automatically selected and it also features an LED indicator to show when the input signal is being received.

Computer & Networking

With 5G just around the corner it's going to be interesting to see what impact faster mobile data has on the NBN. It seems like every device in our house or office now wants to connect to some kind of data network. To help your bandwidth cope we've bolstered our range of Wi-Fi extenders and routers, with speeds now up to AC3000 (3000Mbps); still at a fraction of the cost of some of the leading brands.

Another newish technology that (finally) seems to gaining traction is USB Type-C. It's taken a few years but Type-C sockets are now appearing on more & more new devices. Check out our new range of Type-C adaptors on p502, invaluable pieces of hardware these days as laptops and other devices keep reducing their number of on-board ports.

We've been selling the reputable GME UHF radios for a few years now, like you we love the quality of their products. This year we are delighted to expand our GME range to include VHF handheld radios and marine EPIRB's (Emergency Position Indicating Radio Beacon), you'll find them on p526.

N300 WI-FI RANGE EXTENDER

This intelligent Wi-Fi device can handle it all. Use it as a repeater to extend the range of your existing Wi-Fi network, provides a Wi-Fi access point for your wired network, or even acts as a router for your existing modem. It connects straight into your mains power outlet for no fuss installation, and configuration is quick and painless (with ultra-simple WPS connectivity supported too). Suitable for 802.11b/g/n standards up to 300Mbps, supporting modern standards for security too. It also features integrated status LEDs for signal strength, as well as quick reference of network status.

N300 WIRELESS BROADBAND ROUTER

Sharing your internet connection and networking your computers is made easy. It provides powerful 300mbps wireless connectivity, as well as four wired ethernet ports. Dual antennas help boost signal strength and reduce dead-spots, while WPS provides hassle-free connection. The WAN port provides PPPoE, Dynamic and Static IP broadband support functions. It's also NBN compatible to provide smooth streaming of your favourite content. Easy to setup and configure, but still provides some advanced firewall configurations too, this is a great compact unit for the home or small office.

AC1200 SMART WI-FI ROUTER

Featuring the latest 802.11ac wireless standards for solid streaming, fast gaming, and interrupt-free networking. A stunning aesthetic design meets core functionality with the use of four 5dBi high performance antennas (two for each band), for better connectivity and greater range. It also provides a USB port for centralised storage and network sharing of data. Management is simplified with the use of a Smart App, so you can manage your network anytime. Dual 2.4G and 5G frequencies to support the latest high speed devices without forgetting about legacy devices either. Two 10/100 LAN ports are also provided for wired connectivity or expansion to another network switch. It provides a WAN interface with PPPoE and most other broadband protocols, so it's suitable for NBN connections too.

AC1200 VDSL/ADSL MODEM ROUTER

The Archer VR400 unlocks the full potential of your internet connection by providing combined dual band Wi-Fi speeds of up to 1.2Gbps, including 300Mbps on the 2.4GHz band and 867Mbps on the 5GHz band, eliminating lag and buffering from your online experience. Two dedicated Wi-Fi networks support more devices and reduce wireless interference to create stable connections.

- Speedy Wi-Fi – Superb wireless experience with 300Mbps (2.4GHz) + 867Mbps (5GHz) dual-band Wi-Fi connections
- Superior Range – Three fixed antennas provide stable wireless connections and optimal coverage
- Versatile Connectivity – Fully compatible with the VDSL2/ADSL2+/ ADSL2/ADSL standards
- Beamforming Technology – Improves wireless range and performance at 5GHz band
- USB Port – Supports storage and print service sharing, FTP and media servers as well as 3G/4G dongle
- Tether App – TP-LINK Tether provides the easiest way to access and manage the router on your iOS and Android devices

AC2100 DUAL-BAND SMART WI-FI ROUTER WITH TOUCHLINK AND GIGA LAN

NEW

Wi-Fi speeds of up to 2100Mbps will keep the signal flowing to your network so you can enjoy exceptionally smooth gameplay and uninterrupted streaming. The 2.4GHz/5GHZ dual-band mode avoids signal congestion to enhance the ability to switch between two bands for a good signal anywhere at home. Six omnidirectional smart antennas will ensure your signal can be reached under circumstances a regular router would otherwise not cope with due to signal congestion.

- Transmit data to multiple client devices simultaneously
- Five Gigabit Ethernet ports
- 10X faster than conventional Fast Ethernet
- Parental Control Options

10 PORT GIGABIT POE ETHERNET SWITCH

This is a powerful gigabit switch with 8 x PoE-enabled and 2 x standard gigabit ports. It can deliver up to 130W of power (max 30W to a single port), which is loads of power for just about any PoE-enabled device you may have. Ultra-fast gigabit network also enables fast data transfer, critical for high resolution IP cameras and data-intensive systems, and is also very useful for providing PoE to access points and switches which are also distributing the connection. Automatic PoE detection, fully compatible with non-PoE devices. Includes mains power adaptor and mounting bracket.

2 IN 1 NETWORK CABLE TESTER & DMM

This innovative device is ideal for network installers or technicians and will allow the user to easily check cable integrity or measure AC & DC voltage, current, resistance, and continuity etc. without needing to carry two separate devices. The unit will check for cable continuity, open-circuits, short-circuits, and cross-connects etc. A remote terminator is included and enables the user to check network cables at a wall jack or patch panel. Supplied with loop back cable, LAN terminator, and multimeter leads.

LAN Tester Specifications:

- LAN tester checks faults
- Mis-wired conductors
- Manual or automatic testing

DMM Specifications:

- 600 volt max input
- 200mA AC/DC
- 20M ohm resistance
- 3.5 digit
- Diode test
- Data hold

4P/6P/8P/ MODULAR CRIMP TOOL WITH NETWORK/POE TESTER

Designed for a wide range of residential structured wiring, and professional applications. After crimping a modular connector, it enables you to quickly and easily test ethernet twisted pair cable located on the handle of the tool for wiring continuity, opens, shorts, and mis-wires. With a single press on the TEST button, it will test the cable and gives the result of pin to pin configuration of the cables. Can also clip out of the housing and can be used as a general network tester. The tool is steel framed with PVC handles and rust resistant black oxide finish. Includes a PoE (Power-over-Ethernet) finder to check if a voltage is present on a port or cable you are testing. Supplied with a carry pouch that can directly worn on your belt.

- Testing for both UTP and STP cable
- Testing cable for continuity, opens, shorts, mis-wires
- Pin to pin indication
- Single and multi-wired cable crimping
- Integrated cable stripper and cutter
- Crimping tool and cable tester in one
- Detachable cable tester

NETWORK CABLE TRACER

This tone generator is a highly practical network installation and troubleshooting tool which features a single/multi tone signal, test leads and a 4 conductor modular cable. The signal emitted by the tone generator can be easily traced by the companion probe, even when cables are in a bundle or hidden in punch down blocks or wall plates. The generator can also be used for checking telephone line polarity and status ie. Ring/Busy/Idle. The probe is equipped with an insulated inductive pick up and will amplify the tone signal to an audible level. A LED is also included as a visual indicator. The probe has a volume control and either indicator can be switched off if desired.

- The tone generator measures: 115(L) x 60(W) x 30(D)mm
- The signal leads are 185mm long & terminated with alligator clips
- The modular lead is 250mm long & terminated a 4 pin RJ12 plug
- The probe is 205mm long and approximately 35(H) x 35(D)mm
- Both units operate from a 9 volt batteries (sold separately)Use our Cat. SB2423

PRO GRADE 19" RACK STYLE EQUIPMENT ENCLOSURES

Complies with IEC 297 / EIA RS- 310 C-1977 / DIN 41494 standards. Each cabinet is made from phosphated steel and coated with a dark grey enamel. The colour matched rack front panel is in 3mm aluminium with extruded handles (excluding 1U). The rear panel is aluminium as well. The top, bottom and sides of each cabinet are liberally punched with ventilation holes. All screw fasteners are metal thread - not self tappers. Top, bottom, front and rear of enclosure can be separately removed without affecting the integrity of the cabinet. Each enclosure comes with punched internal rail bars to facilitate PCB, transformer, filter capacitor etc, mounting independent of cover panels. Each cabinet also features an internal sub panel (in 1.5mm enamelled aluminium) which is adjustable from 0-20mm from the back of the front panel. This panel is ideal for mounting panel hardware (no screws need appear on front panel). Rear panel is also adjustable 0-20mm inwards.

- The entire cabinet is packed flat for convenient transport.

tech talk — What Is ADSL & VDSL?

ADSL stands for Asymmetric Digital Subscriber Line. It is a technology that allows data to be sent at high speeds across copper phone lines rather than conventional voice-band modems. ADSL2+ provides double the downstream rate compared to ADSL, from 12Mbps to 24Mbps. Data speed is dependent on the distance between the user's modem to the DSLAM (Digital Subscriber Line Access Multiplexer), usually located at the local telecom exchange. VDSL stands for Very-high-bit-rate Digital Subscriber Line, which provides a faster data transmission than ADSL. VDSL is able to support applications like HDTV and VOIP (Voice over IP), and able to downstream data up to 100Mbps (or 300Mbps using VDSL VPlus).

2W UHF TRANSCEIVER

1 YEAR WARRANTY

An advanced 80 channel UHF transceiver for professional or recreational use. Compact in appearance but feature packed with a VOX hands-free function, CTCSS & DCS, PTT IT transmit, a group call mode, emergency alarm, selectable 25kHz wideband or 12.5kHz narrow band, and much more. An LED at the top helps shine the way at night, and an FM radio is also integrated so you can listen to important broadcasts or for entertainment purposes. A feature not seen in many other models is the Stun, Kill and Revive function. This enables you to use a second similar transceiver to send a signal that prevents unauthorised use of a lost or misplaced transceiver. The high capacity 1300mAh Li-ion battery can last up to 13 hours of average use, and a lower power mode helps extend battery life when long range communication isn't required. A mains powered charging cradle is supplied to keep the battery charged.

- Squelch Function

GLASS MOUNT UHF CAR ANTENNAS

NEW

These antennas enable you to use a UHF CB in, say, a luxury 4WD/RV without the need for an external whip antenna. The antenna fixes to a glass window surface INSIDE the car for complete security. It is not a thru-glass unit like old car phone antennas, but is extremely compact and will stick to an obscure window if necessary. Installation takes minutes. Supplied with 1m of pre-terminated cable with a PL259 plug and full instructions.

1.1M 6.6DBI GAIN UHF CAR HEAVY DUTY ANTENNA MOUNT KIT

NEW

This is for semi-serious off-road driving. It is meant to be bull-bar mounted. It features a medium coil spring base coupled to a very strong fibreglass whip mast that is actually 30mm (1 & 1/4") diameter where it connects to the spring base. The entire antenna is over 1.1m (3.5 feet) long. Even at its top it is still 20mm diameter! This is the sort of whip antenna that will not be broken by bush saplings, or other heavy undergrowth. It comes with 4.5 metres of RG58 commercial grade coax and a screw-demountable UHF PL259 plug. You can remove the plug to feed the cable through narrow openings, holes, etc and reassemble at the back of the rig later. Many professional bull-bars will have a horizontal mounting plate and the base of this unit will go straight on via a 1/2" (13mm) hole. Or you can use a heavy duty mounting bracket such as the DC3077 stainless steel unit.

VHF Radio – A History

When the Italian/British inventor Marconi developed wireless communications at the beginning of the last century, he envisioned radio apparatus to be so complicated that special experts had to be trained to operate it. Indeed, this was an accepted dictum and "The Marconi School of Wireless" was established in many countries to train people.

It was run in Australia by AWA and it was around for many, many years. As technology advanced, it was becoming obvious that you did not have to be a rocket scientist to operate a two-way type radio set. The American Motorola company (the inventor of the car radio) developed a two-way radio for the police. This innovation helped the police and soon other industries started clamouring for similar sets for their industries.

Taxi-cabs were an early adopter of two-way radio. This improved the productivity of the taxi service enormously. By the mid-to-late 60's two-way radios were being adopted for taxis, the fire brigade, police and other commercial users. Early marine two-way radio operated on the "short wave" or High Frequency Bands. It was complicated to use but had long range. You had to dial an actual frequency and the operation required some skills.

The sets were quite expensive. Riding on the back of the CB radio boom in the mid-70's came 27MHz marine radio. It was relatively simple to use, but had limited range and was plagued with interference. A VHF marine band was gazetted earlier but popularity was limited because sets were fairly expensive. Along came Japanese production technology from the CB boom and the price of VHF Marine radio equipment plummeted.

VHF Radios were refined, worked on FM which made them almost interference free, and used simple channel numbers rather than frequencies and only needed a minimum number of controls. And you did not need to be trained by the Marconi School of Wireless to operate them!

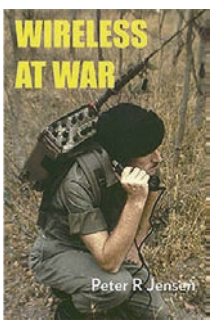

See "TECH TALK" below for more info on VHF Marine Equipment.

Wireless At War Book

WIRELESS AT WAR BOOK - BY PETER JENSEN

The existence of electromagnetic radiation was first demonstrated in 1885 by Heinrich Hertz. After 1900 the potential advantages of wireless technology to the battlefield and for marine warfare became known, interested industrial organisations multiplied, keeping pace with the growth of the armies and navies. This book features 250 photos and diagrams and tracks the use of wireless technology in war from its inception all the way up to more recent conflicts in Afghanistan. Special reference is made to military communications used by the Australian Army, especially WWII and Vietnam. Whilst overseas references are made, this book is basically about radio technology and the Australian army. It was written by an Australian radio historian. A great read.

AUSTRALIAN HAM RADIO HANDBOOK

The Australian Ham Radio Handbook will help you become a radio amateur, set up a station and make contacts on air. Written for Australian conditions it covers practical topics that existing licence study and theory books miss. For beginning and experienced hams alike, it's an ideal read for anyone interested in taking up, continuing in or returning to amateur radio. What's in the book? First there's a quick tour of what amateur radio can offer. That includes things you can do right now, with no special equipment or licences required. Then it describes how to get your callsign and set up a station. Equipment and antennas are covered next. You'll find information on what items are necessary and where you can get it, whether you choose to buy new, buy used or build your own. Later you'll learn about what different radio frequencies do, the diverse activities hams enjoy and winning tips that will get you contacts almost any time you turn on. Near the end we cover things you can add to make your equipment more versatile, technical subinterests and how you can learn more. All up it's over 100 pages of solid information that deserves to be in any Australian amateur's shack.

tech talk VHF Marine Radio

The VHF Marine Radio band (156 - 174MHz) has been allocated internationally for the exclusive use of two-way radio equipment with fixed technical standards for marine use. Theoretically, you can buy a VHF marine transceiver in Country A and it will work in any other country. The reality, however, is slightly different. There are 56 channels allocated across the radio spectrum for Australia shown above, and the main emergency channel, channel 16, is the same all over the world! There is a secondary distress channel, channel 67 and it is also universal. When you operate a VHF Marine transceiver you monitor Ch. 16 (in case someone makes a distress call) and you can actually use that channel to call a colleague to contact them on the water. Once you have made contact, you immediately switch to another channel to keep Ch. 16 clear for possible emergency use. It is wise to confer with your colleague before going out to agree on the alternative channel, say Ch. 10. Then you don't have to broadcast what that channel is to discourage people from snooping in on your conversation. The non-emergency channel allocations may have local specific uses (such as harbour management, etc.) and this info appears in the manual that comes with the equipment when you buy it, if you buy it in Aus/NZ. RANGE: For most amateur boating operations you should get plenty of range with VHF marine. A good fixed installation (not handheld units) should give you 25km line-of-sight. Conditions vary enormously at sea, so don't depend on this. Most of the time someone will hear you and you can relay messages if necessary. Volunteer coastal stations monitor Ch. 16 generally 24 hours a day. PRIVACY: Remember your first conversations can be heard by anyone on Ch. 16. Depending on how sophisticated your VHF unit is, you can configure it to have a private conversation with a colleague who has similarly equipment set on a non-emergency channel. One of the best features of VHF Marine use is that you do not have of be aware of actual frequencies. You can then think just in terms of channel numbers. Setting up when you go out. If you like, you can go straight to your nominated channel and bypass Ch. 16 as much as possible. You can arrange 'skeds' (i.e. schedules) to monitor, say Ch. 10, at 15 minute intervals, quarter to the hour, on the hour, a quarter past and half past for 2 - 3 minutes and then the rest of the time on Ch. 16. Happy boating!

All employees and officers of Jaycar are required to comply with the Act and this Privacy Statement. Jaycar has a Privacy Act Procedure which can be obtained by emailing privacyofficer@jaycar.co.nz. Information or opinions which are collected, held, used or disclosed by Jaycar about an individual whose identity is apparent, or can reasonably be ascertained, will be protected by the standards outlined in this Statement. To deliver our commitment to privacy, we will:

- Be bound by, and comply with, the APPs under the Act in relation to personal information communicate this Privacy Statement to all employees and stakeholders to ensure awareness of their requirement to comply with our privacy standards and to anyone else who asks for it
- Ensure lawful, fair and unobtrusive means are used to collect personal information that is necessary for our business purposes
- Collect sensitive information only with the individual's consent and not disclose any personal information to an unrelated third party, except with the individual's consent or where we are required to do so by law
- Take reasonable steps to destroy or de-identify personal information in a secure manner when we have no further need for it or are required to do so by law
- Ensure only authorised personnel who have agreed to keep personal information confidential have access to the information
- Take reasonable steps to keep personal information up to date, accurate and complete
- Provide individuals access to their personal information on request
- Periodically review and revise this Privacy Statement and related procedures to maintain relevance.

Jaycar recognises and respects the importance of each individual's privacy. This Statement and related procedures ensure all personal information held by Jaycar is handled appropriately and kept confidential.

What do we use personal information for? Any personal details you provide will be used for the purpose of dealing with your request, enquiry, transaction or application for employment. This may involve disclosing your personal information to companies within the Jaycar Group, or to service providers who assist us in operating our business. These organisations are required to comply with the principles of this Statement.

Data Security We take steps to protect the personal information we hold against loss, unauthorised access, use, modification or disclosure, and against other misuse. When the personal information that we collect is no longer required, we destroy or delete it in a secure manner, in accordance with our documented procedure.

Your Choices You can access the personal information that we hold about you, and you can ask us to correct the personal information we hold about you. For more information, see our Privacy Policy which is located on our website. If you are listed on one or more of our media or network email lists you can opt out at any time. You can unsubscribe by using the 'unsubscribe' link in our emails.

Our Obligations Jaycar is bound by the information Privacy Principles in the Privacy Act. For more details see our complete Privacy Policy on our website.

Jaycar Resellers

Serving rural electronics enthusiasts.

Jaycar Authorised Resellers are privately owned businesses that resell an extensive range of products on a regular basis. Whilst these businesses endeavour to stock as broad a range as possible, they generally do not stock every product in the Jaycar range. They may, however, be happy to order specific goods in for you - subject to availability. As privately owned businesses, many in rural parts of Australia and New Zealand, our Authorised Resellers are subject to extra costs such as freight, and we therefore cannot guarantee they will have the same prices, trading conditions, or product specials as Jaycar retail stores. It's wise to check availability before you make a special trip into town. **For the most up-to-date list of Jaycar Authorised Resellers, visit our website.**

Build the Cover!

The dazzling displays that are possible from LED cubes are clearly what inspired our 2020 cover. It inspired us so much that we want you to be able to build one yourselves too!

In collaboration with the team at DIYODE Magazine, Australia's favourite magazine for Makers, you'll soon be able to build your very own LED cubes.

The project will publish over several issues commencing in Issue #034 (May 2020) of DIYODE Magazine, starting with a 4x4x4 cube, and we'll be making cost-effective kits available too.

See the website below for more details:
